Rosenberg said he and other members of the staff were with Opont when he met with an assistant district attorney investigating the case. ''At the first session, they gave him a workbook on the judicial system,'' Rosenberg said.

A hearing in the case was expected Tuesday.

The district attorney's office could not be reached to confirm whether Opont would be asked to testify.

Opont lost much of the use of his right hand in the attack that left him with burns over 55 percent of his body. Rosenberg said therapists are working to help him regain the use of the hand as well as to learn to use his left hand.

Opont went on his first outing away from the hospital Saturday, Rosenberg said. Dressed in a cap and long-sleeved shirt, he walked through the park with another 12-year-old boy from Brooklyn hospital staff matched with Opont to help him learn to get used to being around other children.

Rosenberg said several people recognized the boy who's face has appeared on television and in newspapers. ''They nodded and smiled but left him alone,'' Rosenberg said.

#90169u0357 06/18/1990 ~United Press International

TOKYO (JUNE 18) UPI - Mexican President Carlos Salinas de Gortari had an audience with the Japanese imperial couple at the Imperial Palace and called on Japan to expand its role in the international community, especially in Latin America.

Next on Salinas's Monday agenda was a meeting with Prime Minister Toshiki Kaifu. They first met in Mexico in September.

Local news reports said Kaifu planned to pledge a major aid package to Mexico, including loans and official development aid for the country's pollution control projects.

The package would include a $1 billion loan over a three years to help finance Mexico's $2 billion program to contol air pollution in smog-shrouded Mexico City, they said.

Salinas urged Japan to increase investment in Mexico, which can provide a strategic base for Japanese enterprises interested in the Latin American market.

''Japan can and should play a more active role in the new configuration of world balances in keeping with the magnitude of its weight in the economic world,'' he said in a speech before a gathering of politicians, government officials and business leaders.

Making his first official visit to Japan, Salinas said, ''Mexico views Japan as offering a great opportunity for mutual benefits.''

Japan's growing role in aiding development in Latin America and reconstruction in Eastern Europe should be backed by a greater presence in Latin America, he added.

Salinas invited more investment from Japan, saying new regulations introduced since his inauguration in December 1988 provide for simplified investment procedures and open new areas of investment.

Earlier Monday, Salinas rode to the moated Imperial Palace for an audience and lunch with Emperor Akihito and Empress Michiko.

Salinas was accompanied by his wife, Cecilia Occelli de Salinas, two sons and a daughter, palace officials said.

During the 40-minute audience, Akihito presented to Salinas Japan's highest medal, the Grand Cordon of the Chrysanthemum, the officials said. The First Class Order of the Sacred Crown was given to his wife, they said.

Salinas, in turn, conferred on Akihito the Mexican medal, Collar de la Orden Mexicana del Aguila Azteca, the officials said.

Salinas and members of his party, who arrived in Tokyo Saturday, were scheduled to visit Osaka, Japan's second-largest city and business center about 250 miles west of Tokyo, before heading to Singapore and Australia.

#90169u0365 06/18/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JUNE 18) UPI - A newspaper reported Monday that a U.S. diplomat based in South Africa, and not a CIA agent, was responsible for the 1962 arrest of black leader Nelson Mandela, who was incarcerated for 27 years.

The Afrikaans daily Beeld, refuting a report in the Johannesburg Sunday Times that the CIA was involved in Mandela's capture, quoted anonymous ''senior police officers'' denying the agency was directly involved in the arrest.

The sources said an unnamed staffer at the U.S. Embassy in Pretoria leaked details of the fugitive anti-apartheid activist's movements to a non-commissioned security policeman who was a ''good friend.''

''The diplomat told the policeman certain things in conversation which led (the policeman) to Mandela's trail,'' a senior officer told Beeld.

That information resulted in Mandela's arrest at a roadblock the night of Aug. 5, 1962, the officer said.

The Sunday Times had named Millard Shirley, who was reportedly head of covert operations in southern Africa in the 1960s, as the CIA agent who engineered Mandela's arrest, quoting retired South African police spy Gerard Ludi.

Ludi speculated the U.S. government wanted Mandela ''out of the way'' because of his links to communism, particularly the South African Communist Party (SACP).

''During the 60s, communist expansion in Africa was one of America's biggest bugbears,'' Ludi said.

Shirley retired in 1973 and died in a car accident in Swaziland in 1988.

Mandela, 71, was sentenced to a life term on charges of sabotage and conspiracy but was released from prison Feb. 11 this year by reformist President Frederik de Klerk.

Now deputy president of the African National Congress, Mandela was in Canada Monday and plans to meet with Bush June 25.

ANC executive member Ahmed Kathrada said over the weekend he found the timing of the CIA claims ''suspect'' at ''a time when such a report could sour our relations with the United States, while Mandela is over there.'' However, he said the story sounded ''very plausible''

#90169u0366 06/18/1990 ~United Press International

KATMANDU, NEPAL (JUNE 18) UPI - The World Hindu Federation Monday protested Nepal's decision to release Christians and Moslems jailed for proselytizing, calling it an affront in a country overwhelmingly populated by Hindus.

Nepal's new interim government agreed last week to free 64 people, most of them Christians and Moslems, convicted of violating laws that ban proselytizing.

The World Hindu Federation, in a statement of protest to the government, said the action had ''infringed upon the religious freedom of the majority of the people by granting amnesty to all religious prisoners and withdrawing charges against them.''

The statement also said the action had ''hurt the feelings of the majority of the Hindus in Nepa. ... The Hindu state must be safeguarded against the

politically motivated forces who are trying to create factions among the Hindus.''

About 90 percent of Nepal's population is Hindu, according to official figures.

#90169u0412 06/18/1990 ~United Press International

CLEVELAND (JUNE 18) UPI - Investigators are expected to review why National Weather Service bureaus issued no flood warnings before a deadly wall of water deluged the town of Shadyside, a newspaper said Monday.

Ed Heath, meteorologist in charge of the Akron-Canton bureau, told The Cleveland Plain Dealer his office was expecting a review by the National Oceanic and Atmospheric Administration, parent agency of the NWS.

''I know they'll be here,'' Heath said. ''The policy is whenever five people or more die, they have a review board check the areas of responsibility to see if there was anything we missed or if there are weaknesses, places for improvement or breakdowns.''

By early Monday, the death toll from the flood last Thursday evening had climbed to 20, with more than a dozen people still unaccounted for.

A flood watch was issued for the Shadyside area by the weather service's Cleveland bureau at 7:40 p.m., Thursday. The Cleveland bureau forecasts for the entire state.

Heath said that smaller bureaus around the state are responsible for issuing warnings and fine tuning forecasts.

A flood watch means there is a possibility of flooding. A warning is more serious, advising those in the area to seek shelter.

The Akron-Canton bureau has 15 counties under its jurisdiction including Belmont County, where Shadyside is located.

''As far as I'm concerned nothing broke down,'' Heath said. It's impossible to predict the amount of rain that fell in Shadyside based on what showed on weather radar, he said.

Some disaster relief officials in Shadyside agreed, saying there was no way to foresee that a rainstorm would turn into the raging flood that uprooted trees, demolished homes and swept people to sudden deaths.

But others said they wondered why the NWS bureau in Akron-Canton failed to issue a flood warning, giving those living in the low-lying Pipe and

Weegee creeks area a chance to save themselves.

Shadyside Fire Chief Mark Badia explained that over 5 inches of rain fell between 7:30 p.m. and 11 p.m., Thursday, causing the shallow creeks to swell and overflow. The force of the water, coupled with debris from nearby dams, provided the rushing waters with more force.

Al Hahn, coordinator for the Federal Emergency Management Agency said a flood like the one in Shadyside happens once in every 100 years.

''A storm (comes) in from the west, hitting a cold front and dumping a very huge amount of water on an area that is vulnerable,'' he said.

If the storm keeps moving, the rain gets spread out, Hahn said. But if the storm stalls, it picks up debris, gathers force and begins a path of destruction. Hahn said the chances of these conditions happening again is about 1 percent.

#90169u0427 06/18/1990 ~United Press International

JERUSALEM (JUNE 18) UPI - Convicted war criminal John Demjanjuk's alibi that he was a German prisoner of war in Poland and not a Nazi death camp guard is ''a figment of the imagination,'' an Israeli prosecutor told an appeals court Monday.

''Of course, we submit that all this is just made up, that he was never at Chelm,'' a POW camp in Poland, prosecutor Yona Blatman told the five Supreme Court justices hearing the appeal, now entering its sixth week.

Demjanjuk was convicted in April 1988 of being the sadistic Nazi guard ''Ivan the Terrible'' at the Treblinka death camp in Poland, who was responsible for killing hundreds of thousands of Jews. Demjanjuk repeatedly shook his head in disagreement as Blatman explained why the Chelm alibi was flawed.

The retired auto worker from a suburb of Cleveland, Ohio, maintains that he and other Ukrainian members of the Soviet Red Army were Nazi war prisoners during the period between 1942 and 1943, the height of the killing of prisoners in Treblinka's gas chambers in Nazi-occupied Poland. He estimates that he was interned at Chelm for about 18 months.

Blatman argued that Demjanjuk, 70, could not remember basic details from his supposed stay at Chelm, including the name of the camp, a physical description of it and the ethnic background of Romanian guards and Italian prisoners of war.

''For someone to have spent nearly two years at Chelm and to recall so

little of it is hard to imagine,'' Blatman said.

''The story of Chelm is a figment of the imagination,'' he said.

The prosecutor also pointed out that the defense had not produced a witness from Chelm who could place Demjanjuk there as a prisoner.

''Is it possible to spend 18 months at Chelm and not be remembered by anyone?'' he said. ''We feel that the lower court was justified in rejecting the story of Chelm in its entirety.''

In convicting Demjanjuk of war crimes and sentencing him to hang, a lower Israeli court ruled that Demjanjuk's alibi could not refute Treblinka survivor testimony that identified him as Ivan the Terrible.

The defense has argued, however, that many more Treblinka survivors did not recognize pictures of Demjanjuk in photographs than could identify him. The defense also maintains that the manner in which photographs were presented was biased against Demjanjuk, with survivors being coaxed into identifying him as Ivan.

The prosecution is expected to finish its presentation Tuesday, after which the court will recess for the week. Demjanjuk's lawyer will then have several days to rebut the prosecution arguments and present new evidence.

#90169u0434 06/18/1990 ~United Press International

(JUNE 18) UPI - The latest news details and developments from the 'round-the-clock wires of United Press International.

National Guard officials in Ohio say Disaster Assistance Centers will open this morning to help families and residents of Shadyside recover from a devastating flash flood.

By late yesterday, search teams had recovered a total of 20 bodies. Army National Guard Sergeant Bob Mullins says 16 people are still missing. Red Cross and Census Bureau workers are poring over population lists to get an accurate count of those still unaccounted for.

The disaster has taken a huge toll on families in the normally tranquil town. The 20 deaths include a mother and her two sons, a brother and sister and four married couples. A Red Cross spokesman says the flooding affected as many as 16-hundred families in Belmont and Jefferson counties in Ohio and Ohio County in West Virginia,

Officials say they fear the death toll may rise as more National Guardsmen

arrive on the scene with additional equipment to clean up the banks of the Ohio River. Shadyside Fire Chief Mark Badia says- ''''We will look until we are convinced we have done all we can.''

Local churches will hold a joint memorial service for the flood victims Wednesday at the high school football stadium. And further details of the recovery effort are expected to be outlined during a news conference later this morning

-30- 1573

#90169u0440 06/18/1990 ~United Press International

(JUNE 18) UPI - Texas officials say bacteria seem to be eating the oil spilled in a tanker fire in the Gulf of Mexico.

A Texas land office official, Blanton Moore, says from the air it looks like the micro-organisms are doing the job. It's a controlled experiment to test the success of the microbes.

The oil-eating bacteria have an estimated 12-thousand to 40-thousand gallons of oil to work on. Officials say the rest of the light Angolan crude that spilled burned away in the tanker fire or evaporated and dispersed on its own.

But microbes are NOT the only weapon. Officials plan to use a Texas A-and-M research vessel to deploy two 15-foot booms in a cleanup effort today. One of the booms will be covered with the microbes.

Thousands of gallons of chemical dispersants have been dropped on the slick, turning it into a non-toxic mousse, and 11 skimmer boats have picked up a quarter-Million gallons.

Officials say the ship-board leak stopped yesterday. Once the tanker is emptied, the burned-out hulk of the Mega Borg will be towed to shore.

The 30-mile-long sheen's leading edge was 11 to 12 miles off the Texas coast yesterday with landfall predicted between High Island and Sabine Pass. That's a sparsely populated 35-mile-long area stretching from south of the Louisiana border to 30 miles north of Galveston Island's beaches.

#90169u0450 06/18/1990 ~United Press International

(JUNE 18) UPI - A father in Brooklyn, New York, is calling the rescue of his five children from a burning van a miracle. The children and their father- all Hasidic Jews- had just come from receiving a blessing from their spiritual leader yesterday when they stopped at a bank so Avraham Haim could use the automatic teller.

39-year-old Haim of Brooklyn's Crown Heights section left his five children, ages two-and-a-half to nine, inside the van while he went into the bank. He said he had only been away from the vehicle for a few seconds when he heard people shouting ''fire.''

Haim says he saw flames inside the van and watched three black men pull his children to safety. The young men were inside a laundry across the street when they saw the flames inside the van.

One of the rescuers, 18-year-old Tyronne Chung, says the ''doors were locked but the windows were open.'' Chung adds he feels great despite burns on his hands and fingers. Police say the two other men also were slightly injured.

Crown Heights has been the site of tensions among blacks and Hasidic Jews during the years. But Haim, who is from Israel, notes- ''When it comes to life and death matters, everybody puts differences aside to save life.''

South African anti-apartheid leader Nelson Mandela is in Ottawa, Canada, where he will address the Canadian Parliament later today. The African National Congress leader arrived in Canada yesterday for the first leg of his North American tour.

Mandala was greeted by about two-thousand people, including hundreds of schoolchildren. The crowed waved A-N-C flags, chanted in Zulu and sang the A-N-C's national anthem.

Mandela promised a more humane South Africa looms just beyond the horizon. He also said he'll ask Western nations to find new ways to help fight against the racial segregation policy of apartheid.

Canadian Prime Minister Mulroney welcomed Mandela as a powerful symbol of what he termed- ''the unbreakable spirit of man.'' Mulroney said Mandela's release from prison has rekindled hopes for a Democratic South Africa.

Mandela will visit the United Nations in New York later this week before traveling to Washington next week to meet with President Bush.

-30- 2405

#90169u0540 06/18/1990 ~United Press International

BEIRUT, LEBANON (JUNE 18) UPI - Syria indicated Monday it would reject a Vatican plan to reconcile Lebanon's warring factions, refusing any amendment to a peace accord worked out by the Lebanese Parliament last year.

The Syrian government-run Tichrin newspaper said in an editorial that the agreement, known as the Taif accord, was the ''sole way to resolve the Lebanese crisis.''

The Vatican had reportedly suggested that Lebanon's rival Christian leaders, Gen. Michel Aoun and militia chief Samir Geagea, be included in a new government, which was not part of the Taif plan.

The Vatican had reportedly argued that the peace accord, worked out in Taif, Saudi Arabia last October, should be reviewed anyway following the resignation of pro-Syrian President Elias Hrawi's government and the formation of a new Cabinet.

''President Hrawi, and his Cabinet, is the sole legitimate leadership in Lebanon that represents all Lebanese,'' Tichrin said, indicating Syria was not interested in bringing the rival Christian leaders into the government.

The Vatican arranged a general truce in the Christian enclave in May, ending more than four months of bitter fighting between followers of Aoun and Geagea. But sources say the church is seeking a more lasting settlement.

The truce has been repeatedly marred by recurring exchanges of mortars, rockets and automatic guns and the beefing-up of fortifications by the warring forces.

Geagea has been seeking to unseat Aoun, the ruling Christian strongman who has opposed the Taif accord because it does not call for the immediate withdrawal of all Syrian troops from Lebanon.

Meanwhile, tension was reported high Monday in the embattled district of Iklim Al Toffah, a mountainous region south of Beirut where rival Shiite Moslem militias - Amal and Hezbollah - battled fiercely over the weekend, police said.

Amal and Hezbollah, competing for control of Lebanon's estimated 1 million Shiites, have been engaged in a violent power struggle for more than two years.

#90169u0546 06/18/1990 ~United Press International

(JUNE 18) UPI - Disaster Assistance Centers will open in Shadyside, Ohio, tomorrow to help residents of the small rural town recover from a flash flood that has left at least 20 people dead. Two of four bodies found yesterday were those of a married couple. National Guard officials say 16 people are still missing. Local churches are planning to hold a joint memorial service for the victims Wednesday.

F-A-A officials say an American Airlines jet en route to London made an emergency landing at Logan International Airport in Boston. The pilot of the D-C-10 reported a lit warning light made him fear a fire had started in the jet's number two engine. Flight 50, which originated in Dallas and carried 240 people, landed safely and NO injuries were reported. Authorities say they did NOT detect a fire and are NOT sure what caused the warning light to malfunction.

African National Congress leader Nelson Mandela will address the Canadian Parliament in Ottawa today. The anti-apartheid leader arrived in Canada yesterday and was welcomed by thousands of cheering supporters. Mandela said he'll ask Western nations to step up efforts to find new ways to combat South Africa's system of racial segregation... and promised a more humane South Africa is within sight.

U-S Secretary of State Baker is in Guatemala for meetings with six Central American presidents. The presidents have just ended a two-day summit... hoping they can forge an economic integration of the region. A document obtained by U-P-I indicates Baker will suggest the creation of an international group similar to the Group of 24 nations that co-ordinate aid and development efforts in Eastern Europe. The Central American presidents are critical of such a proposal.

-30- 1913

#90169u0560 06/18/1990 ~United Press International

(JUNE 18) UPI - European Community foreign ministers opened a two-day meeting in Luxembourg today with economic sanctions against South Africa and unrest in Romania topping the agenda. Last week's violent suppression of anti-government protests in Romania is leading the ministers to reconsider a trade pact with Romania that was completed earlier this month but NOT actually signed.

The third young man indicted in the Bensonhurst racial slaying in New York goes on trial today. Opening arguments are set to begin in the case of 21-year-old John Vento. He has been indicted for second-degree murder in the killing of Yusuf Hawkins. Vento originally made a deal with prosecutors to testify against his friends in exchange for immunity but later reneged on the arrangement.

New York police say two women died last night when a van packed with members of Korean church group slammed into a pillar supporting elevated train tracks. 25 others were injured in the accident, two critically. A police spokesman says witnesses report the van was traveling southbound when it swerved to avoid hitting another car driving north. He says investigators will determine whether the van was overcrowded.

The shuttle Atlantis is being slowly hauled to the launch pad at Cape Canaveral this morning. The spacecraft is set to blast off July 13th on a secret military mission. Once Atlantis reaches the launch pad, NASA engineers will spend the day hooking up fuel lines, electrical cables and hydraulic systems. Atlantis replaces the crippled shuttle Columbia was grounded May 30th, one night before its scheduled take off.

#90169u0619 06/18/1990 ~United Press International

(JUNE 18) UPI - Red Cross and Census Bureau workers have gone through population lists to get a count of those missing in flood-stricken Ohio. 16 people are still unaccounted for today. Search crews have found 20 bodies. And they believe they are going to find more.

Days of heavy rain have caused flooding in Nebraska, Iowa, South Dakota and Missouri. One Nebraska official says he's never seen it so bad... and neither have old-timers who survived a flood in 1941.

South African black leader Nelson Mandela plans to address the Canadian parliament today. Mandela will be the first non-head of state to speak to Canada's governing body in more than four decades.

A South African newspaper reported today that a U-S diplomat was responsible for the 1962 arrest of black leader Nelson Mandela, who was imprisoned for 27 years. There had been earlier reports a C-I-A agent exposed Mandela.

Six Central American presidents will hear from Secretary of State Baker today before they head home from a two-day summit in Guatemala. Baker will push for a Central American economic bloc.

There's word today that a weekend of negotiations did NOT get Donald Trump 60-Million dollars in new loans. A report says Trump's loan request became mired in disputes among his largest bankers.

A group of the nation's largest mayors wants to repeal the balanced budget law. The U-S Mayor's Conference resolution committee endorsed a proposal calling for the repeal. The full conference will vote Wednesday in Chicago.

-30- 1681

#90169u0628 06/18/1990 ~United Press International

(JUNE 18) UPI - The Coast Guard says if the present tides and winds continue, an oil spill won't damage the popular beaches of Galveston, Texas. The leading edge of the oil sheen from a burned tanker appears headed north of Galveston.

Final patches were put on to the cruise ship Bermuda Star yesterday. It ran aground off Cape Cod a week earlier. Officials say the hull will be cleaned of all remaining oil clinging to the water line before it is towed to New York.

Romania's opposition leaders say they will press Parliament today for an explanation of last week's suppression of an anti-government protest. Opposition officials doubt any of the involved miners will be arrested.

Results are expected tomorrow from the second of two rounds of voting in Bulgaria's first free elections in 44 years. The former Communist Party is expected to have an absolute majority in the Bulgarian parliament.

The judge in Washington, D-C, Mayor Marion Barry's trial has ordered lawyers to make final selections for the jury today. The jurors will be sequestered during Barry's cocaine and perjury trial.

Individual questioning of jurors for the Central Park jogger's gang-rape trial will start today. Three of the six youths indicted in the attack will face the jury that's being selected.

The Japanese government said today it will help trim the nation's carbon dioxide emissions by the year 2000. The commitment does NOT set a specific target.

China's parliament is expected to pass a law against desecrating the flag. Debate will begin Wednesday. A parliament spokesman says the flag law has already passed muster at all levels of the Chinese government.

#90169u0660 06/18/1990 ~United Press International

(JUNE 18) UPI - Stock prices on the Tokyo Stock Exchange closed lower in thin trading Monday as lack of fresh trading news kept investors sidelined.

The blue-chip Nikkei Average of 225 selected issues, which lost 129.71 points on Friday, fell another 161.60 points to 32,376.80.

The broader-based Tokyo Stock Exchange Price Index of all major listed shares, which shed 3.65 points Friday, dropped 15.29 points to 2,381.03.

Declines outnumbered advances 632 to 300, while 190 issues remained unchanged.

Volume was unusually light as an estimated 300 million shares changed hands, down from Friday's 460 million.

Market watchers said there was almost no excitement in Monday's market.

''It was like a summer vacation out there,'' said one broker.

Elsewhere in Asia, stocks closed higher in light trading on the Singapore Stock Exchange amid some bargain hunting following last week's string of losses.

The key Straits Times Industrial Index, which added 1.21 points last Friday, for its first gain in five trading sessions, climbed 14.43 points to 1,545.72.

The narrower All Singapore Index gained 1.32 points to 434.13.

An estimated 32.6 million shares changed hands, compared with 47.9 million shares on Friday.

In Seoul, stock prices closed sharply lower in light trading in a continued consolidation on the Korean Stock Exchange.

The closely-watched Korea Composite Stock Index fell 17.68 points to 756.39.

Declines hammered advances 726 to 30, while 39 issues remained unchanged.

In Manila, stock prices closed higher in moderate trading on the Manila Stock Exchange.

The key Manila Composite Stock Index of 25 selected issues, which climbed 26.58 points Friday, surged 32.53 points to 920.51.

Elsewhere in Asia, in Hong Kong, banks, major businesses and the stock exchange were closed for the Queen's birthday. Trading will resume on Tuesday.

In Australia, stock prices closed slightly higher in moderate trading on the Sydney Sharemarket.

-30- 2175

#90169u0679 06/18/1990 ~United Press International

TOKYO (JUNE 18) UPI - Personal expenditures in Japan will remain robust in fiscal 1990 because of the changing style of spending, a bank report said Sunday.

The Yokohama Bank said in its report on trends of personal consumption that the present consumption boom is characterized by a new type of spending.

''Purchases are made to improve the quality of life and this type of

spending is spreading not only among families with assets but among consumers of all levels,'' the report said.

''This kind of consumption is from a deep-seated desire to improve living conditions and has become habitual, making it difficult for consumers to revise their spending downward.''

The report said the recent slump in stock prices will inevitably cause negative impact on consumption but should not hold down the growth of consumption.

Spending by salaried workers should remain firm mainly because the spring wage hike at almost 6.0 percent exceeded the 5.2 percent rise last year, the report said.

The report said capital gains by households in the three years from 1986 to 1988 were about 552 trillion yen ($3.58 billion) from land and 106 trillion yen ($688.3 million) from stocks.

-30- 1379

#90169u0704 06/18/1990 ~United Press International

JERUSALEM (JUNE 18) UPI - Prime Minister Yitzhak Shamir Monday invited Syrian President Hafez Assad to hold peace negotiations with Israel and urged Washington to break off its dialogue with the Palestine Liberation Organization.

''We invite (Assad) to come and talk, to hold negotiations, and maybe we will arrive at peace,'' Shamir said, speaking to a group of high school students in in the Israeli coastal plain town of Petah Tikva.

Shamir also told the students a foiled May 30 attack on a crowded Israeli beach by the Palestine Liberation Front, a radical PLO faction, proved Israel was correct in its opposition to negotiations with the PLO.

The attack should also have proved to the United States that its dialogue with the PLO should end, he said.

''We were sure that no one in the United States would dare to say to us that again this time they have doubts'' about PLO involvement in terrorism Shamir said.

''(But) what do we see? Week after week goes by and they (U.S. officials) are still consulting on the political implications in the United States if the PLO is still a terror organization.

''They cannot decide if it is necessary to prove the credibility of the United States, to prove to the entire world that whoever uses terror is

not to be included in negotiations,'' he said.

Also Monday, an Israeli district court charged Ami Popper with seven counts of murder and 10 counts of attempted murder in connection with a May 20 attack on Palestinian workers near the Israeli town of Rishon Le Zion. The attack sparked widespread rioting in the Israeli-occupied territories, where more than 10 Palestinians were killed and hundreds wounded in less than five days when the military tried to quell the violence.

Shamir's comments in Petah Tikva echoed an interview he gave to the Egyptian journal Mayo, which was published Monday and reprinted in the Hebrew newspaper Ha'aretz. In the interview, Shamir said Israel's policy was to talk with all neighboring Arab states and with elected Palestinian representatives of the occupied territories.

Foreign Minister David Levy, hospitalized Thursday after a mild heart attack, met with Egypt's ambassador to Israel at Emek Hospital in Afula Monday. Army Radio reported Levy said he hoped Egypt would act as a bridge between Israel and the other Arab states in advancing the peace process.

Egypt is the only Arab nation to have signed a peace treaty with Israel.

#90169u0731 06/18/1990 ~United Press International

(JUNE 18) UPI - Officials in Missouri's Pettis County say a leak at the Alcolac chemical plant early today forced the evacuation of between one-thousand and 15-hundred people in the Sedalia area. Officials say 14 plant employees and two firemen were treated and released for eye burns and skin irritation after the leak. There was NO fire... but the leak of allyl methacrylate caused the release of a white cloud. One official says the cloud has begun to dissipate. Sedalia is about 85 miles southeast of Kansas City.

Disaster relief officials say there was NO way anyone could have predicted that last Thursday's rainfall in Shadyside, Ohio, would turn into a raging flood. They add such a calamity happens once every 100 years or so. 20 people died in the flash flood and 16 others remain unaccounted for.

Authorities in India say at least 21 people are dead following a torrential downpour that dumped more than 22 inches of rain on Bombay. This weekend's 24-hour rainstorm flooded most neighborhoods in India's largest city and cut off air and rail traffic. The Indian Weather Bureau is calling the storm Bombay's worst in 104 years.

Secretary of State Baker is in Guatemala to meet separately with six Central American presidents. The leaders have just concluded a two-day

summit that produced an agreement that the nations should work together to create economic integration in the region. Civil wars and internal conflicts have strained the region's economies for several decades.

Romanian opposition leaders say they will pressure Parliament for an explanation for last week's suppression of anti-government rallies. The leader of the opposition Liberal Party, whose house was ransacked, accuses the government of inviting workers to take the law into their own hands.

African National Congress leader Nelson Mandela is in Canada, where he will address Canada's Parliament today before heading on to Toronto and Montreal. Upon his arrival yesterday, Mandela said the end of the ''hard and costly'' struggled against apartheid is within sight.

-30- 2247

#90169u0754 06/18/1990 ~United Press International

(JUNE 18) UPI - The former Bulgarian Communist Party is expected to emerge the clear winner when results from yesterday's second of two rounds of elections are released tomorrow. Bulgaria is the only East Bloc nation to hold free elections and elect the formerly communist ruling party back into office.

Texas officials say oil-eating bacteria appear to be feasting on the oil spilled by a Norwegian tanker in the Gulf of Mexico. As of yesterday, the light crude oil was about 12 miles off the Texas coast. But Coast Guard officials say if present conditions persist, the oil will NOT reach the shores of Galveston.

The U-S Mayor's Conference, meeting in Chicago, is backing a proposal calling for the repeal of the Gramm-Rudman act. The mayors say the act- ''has NOT been effective in reducing the federal deficit as originally planned.'' The city leaders also support a resolution asking Congress to fund the National Endowment for the Arts without restriction.

The parents of a mining engineer kidnapped in Ecuador say they are planning to go to Ecuador to talk with negotiators trying to win their son's release. A new twist in the case reveals a former co-worker was allegedly involved in the abduction of Scott Heimdal.

A 12-year-old Brooklyn boy burned in an attack by a neighborhood bully will get a boost today when New York Mets pitcher Dwight Gooden visits him. The baseball star will help David Opont with his physical therapy. Gooden is the latest celebrity to visit Opont, who police say was burned by a 13-year-old who wanted him to use drugs.

DETROIT (JUNE 18) UPI - Isiah Thomas, captain of the NBA champion Detroit Pistons, firmly denies any involvement in a gambling investigation and his teammates are backing him up to the hilt.

''I'm an open book,'' Thomas said Sunday. ''I'm so mad right now because I don't deserve this.''

Thomas said he would be willing to take a lie detector test if necessary to prove his innocence.

''Isiah did not gamble. Isiah is not a gambler. Print that,'' teammate John Salley said Sunday while attending the Grand Prix in downtown Detroit.

The FBI has declined comment on reports by a combined edition of the Detroit News and Free Press and on WJBK-TV that Thomas' name was linked to a grand jury probe of a nationwide gambling operation.

The reports surfaced late Friday, as Thomas and the team were returning from Portland, Ore., after clinching their second consecutive NBA title Thursday night.

Thomas said in an interview published in Monday's Detroit Free Press that he learned of the reports when he arrived at his suburban Detroit home and found his wife, Lynn, ''standing in front of the television crying.''

Thomas said he met with FBI officials who had some checks of his that were cashed by Emmet Denha, a 40-year-old Warren businessman who is Thomas' close friend and former neighbor.

Denha's name has come up in the federal investigation of Henry Hilf, 50, of West Bloomfield Township, who is suspected of involvement in a multi-million dollar betting ring.

Thomas said he told FBI agents that Denha regularly cashed checks for him as a matter of convenience. Denha owns a supermarket in the Detroit suburb of Center Line.

''They (FBI agents) said, 'What about these checks?' And I said: 'The reason why I cash these checks at the supermarket is because it's easier for me to cash them with Emmet as opposed to going to the bank. When I go to the bank, I have to stand in line. I have to sign everybody's autograph and it's just a hassle for me. It's much easier for me to give the check to Emmet and he would give me cash.'

''Over a three-year period, Emmet cashed all my monthly checks that I would have for walk-around spending money. It was perfectly legal ...

''Emmet was being audited, and my checks came up in his audit, just as if someone cashed a check at Farmer Jack and they were audited. The FBI said they weren't even going to talk to me about this until two or three months down the road. They're saying I'm not a target of the investigation, nor am I suspected of doing anything illegal.''

According to media reports, Thomas' name appeared on checks totaling $100,000 which have been subpoenaed by a grand jury investigation centering on Hilf. The reports also alleged that Mark Aguirre, a Pistons teammate, had approached a former FBI agent with his concern that Thomas was involved in high stakes dice games.

Thomas said he had never held any crap games at his house. And he said neither he nor Aguirre had any idea how Aguirre's name cropped up in the reports.

''There's never been a crap game at Isiah Thomas's house,'' Thomas said. ''Very few people have ever been inside my house. I could name to you on one hand the number of people who've been to my house...''

(JUNE 18) UPI - The parent agency of the National Weather Service... the National Oceanic and Atmospheric Administration... will investigate why NO flood warnings were issued for Ohio last week. One N-W-S official says whenever five or more people die, a review board investigates. The death toll in and around Shadyside is 20... and 16 people are still missing. One N-W-S official and some disaster relief officials say there was NO way to predict the heavy storm would virtually stand still and dump five inches of rain on the area Thursday.

A space agency ground crew has taken the shuttle Atlantis to its launch pad. NASA spokesman George Diller says moving Atlantis to launch pad 39-A at Cape Canaveral went smoothly. The shuttle arrived at the pad an hour-and-a-half ahead of schedule. Atlantis is scheduled to lift off around July 13th on a secret military mission, replacing the Columbia in NASA's revised flight schedule. A fuel leak is keeping Columbia on the ground.

Several small towns and a subdivision near Sedalia, Missouri, have been evacuated this morning. A chemical leak sent a white cloud into the air... forcing between one-thousand and 15-hundred people from their homes. Officials in Pettis County say the leak was at the Alcolac chemical plant. 14 plant employees and two firemen have been treated for burning eyes and irritated skin. One official says the chemical leaked is allyl methacrylate. He says the chemical cloud is beginning to dissipate.

A carbon monoxide leak killed one person and injured nine others in an office building in Bala Cynwyd, Pennsylvania, last night. Officials say a faulty generator caused the G-S-B building to fill up with carbon monoxide. The person killed was a man who worked at a bank in the building. The 12-story building will be closed for business today while crews repair the exhaust system.

#90169u0867 06/18/1990 ~United Press International

KUWAIT (JUNE 18) UPI - Iraq may close the Arab Bab al Mandeb Strait in the Red Sea to Iranian ships if Tehran tries to prevent the delivery of Italian-made warships to Iraq through the Strait of Hormuz, a Kuwaiti newspaper reported Monday.

The daily Al Seyasseh, quoting an unidentified source, said Iraqi President Saddam Hussein discussed closing the Red Sea strait with Yemeni leaders during a visit over the weekend to Sanaa, the new capital of the united Yemeni Republic.

Yemen, an Iraqi ally, lies on the southwestern tip of the Arabian peninsula and dominates the strategic Bab al Mandeb Strait, the southern gateway to the Red Sea.

Iran's naval commander was quoted last week on Tehran Radio as threatening to close the Strait of Hormuz to Iraq, which is expecting to receive 11 Italian-built frigates through the strait. Hormuz is the strategic entrance to the Gulf.

On Thursday, Iraq rejected the Iranian threat and said it maintained the right to free navigation through the Strait of Hormuz.

Iraq accused Iran of deliberately violating the 2-year-old U.N.-brokered cease-fire that suspended the eight-year Iran-Iraq war.

Although there have been no serious violations of the cease-fire, both sides have yet to sign a comprehensive peace treaty and are holding a total of some 100,000 prisoners of war.

''Closure of the Bab al Mandeb Strait will block the delivery to Iran of

new naval units, including submarines, which (Iranian Rear Adm. Ali Saleh) Shamkhani said would be used to prevent Iraqi military navigation in the Strait of Hormuz and on the high seas,'' Al Seyasseh quoted the sources as saying.

The newly born Yemeni Republic, which united North Yeman and South Yemen, is linked to Iraq through the four-member Arab Cooperation Council, which also includes Jordan and Egypt.

#90169u0911 06/18/1990 ~United Press International

HOUSTON (JUNE 18) UPI - Domestic drilling rig activity rose slightly last week but offshore activity dropped as 13 rigs came off contracts in the Gulf of Mexico, energy industry figures showed Monday.

Baker Hughes Inc. said a total of 999 rotary rigs were working in the United States last week compared to 991 the week before and 795 the same week a year ago.

Drilling activity in the Gulf of Mexico dropped as 13 rigs came off contracts, pushing the utilization rate down by 5.8 points to 65.4 percent.

But Offshore Data Services representatives reported ''nothing odd about that.'' They said the drop was a coincidence stemming from the timing of the contracts' expiration dates.

Aside from that drop, Offshore Data said rig utilization rates in the Gulf generally have risen this year.

The Gulf of Mexico fleet comprises 211 rigs with 138 under contract. The European and Mediterranean fleet comprises 135 rigs with 126 working for a utilization rate holding steady at 93.3 percent.

Worldwide, there were a total of 12 fewer rigs working last week. That dropped the worldwide utilization rate 1.7 points to 80.4 percent with 537 mobile offshore rigs working out of a total fleet of 668.

There were 323 drilling rigs working in Texas last week compared to 340 the week before and 246 the same week a year ago. Other rig counts included Louisiana, 150 rigs last week, 149 the week before and 130 the same week a year ago; New Mexico 51, 47 and 39; Oklahoma 132, 125 and 81; and Canada 104, 94 and 105.

#90169u0924 06/18/1990 ~United Press International

PINE BLUFF, AR (JUNE 18) UPI - No 11th-hour appeals were planned for a

convicted killer, described as the most dangerous on Arkansas's death row, who faced the electric chair Monday in the state's first execution in 26 years.

John Edward Swindler, 46, a husky, red-faced native of Columbia, S.C., was to be executed for the 1976 shooting death of Randy Basnett, 30, a police officer in Fort Smith, Ark.

Swindler, who also has been convicted of killing two teenagers in South Carolina and was charged with killing a Pennsylvania student in Florida, was scheduled to die at 9 p.m. CDT at the state's Cummins prison unit about 20 miles southeast of Pine Bluff.

Death will be accomplished by strapping the 6-foot, 250-pound Swindler into a wooden chair called ''Old Sparky'' and sending 2,300 volts of electricity through him for four minutes.

His attorneys, whose request for a U.S. Supreme Court stay of execution was rejected Saturday on a 7-2 vote, said they planned no last-minute appeals because they had no new grounds. They also said they knew of no attempts at intervention by outside groups.

Swindler was to be the first person executed in Arkansas, and the 130th in the nation, since the Supreme Court reinstated the death penalty in 1976. He would be the 10th prisoner in the nation to receive the death penalty in 1990. Charles Franklin Fields, a convicted rapist, was in 1964 the last person to be executed in Arkansas.

About 50 Amnesty International protesters wearing black arm bands held a silent vigil on the steps of the state Capitol in Little Rock Sunday, asking Gov. Bill Clinton to halt the execution.

Swindler spent Sunday writing letters, watching televison and praying, authorities said. The Rev. John O'Donnell, a Catholic priest from North Little Rock, said the prisoner was nervous and apprehensive.

''He doesn't have any anger,'' O'Donnell said. ''He didn't voice anything about he's getting a bad deal.''

Swindler has claimed in the past to be a Satanist, but O'Donnell said he will have a Christian funeral and will be cremated. O'Donnell will claim the body because a brother of Swindler's said the family would not.

Correction Department spokesman David White said Swindler was calm and presented no behavior problems Monday, although White said he was the most dangerous man on death row because of his size and unpredictability. For a last meal, Swindler requested only what the prison's general inmate population was receiving.

Swindler, after being released from Leavenworth prison in Kansas in September 1976, allegedly abducted Dorothy Ann Rhodes, 18, and her boyfriend, Greg Becknell, 19, in Columbia, S.C. Becknell was sexually assaulted and both were shot in the head.

After leaving Columbia, Swindler later told police he headed for Kansas intending to shoot as many Kansans as he could because he was angry at his treatment at Leavenworth.

Instead, because he could not read, he became lost and ended up in Fort Smith, stopping at a service station to ask directions. Basnett was at the station, recognized Swindler by his description and confronted him. Swindler shot him twice in the chest. He sped away but surrendered in a wooded area a short distance from the station after being surrounded by police.

He also was charged but never tried for the slaying in Florida during the Christmas holiday period of 1975 of Jeffrey McNerney, 19, of Pittsburgh, who was on holiday break from college.

BEIJING (JUNE 18) UPI - A high-ranking government official, theologian and social scientist accused of insulting the Communist Party during last year's pro-democracy movement has been stripped of his positions in absentia, the state-run news agency said Monday.

Zhao Fusan, 64, was removed Sunday from his seats in the National People's Congress and its standing committee, the official Xinhua news agency quoted a spokesman for the congress as saying.

Zhao already had been stripped of a position as vice president of the prestigious Chinese Academy of Social Sciences, a position he held since 1985, Xinhua said.

The Xinhua dispatch corroborated a report carried Sunday by Xinmim Wanbao, a state-run daily in Shanghai.

Zhao, a Jesuit-trained theologian who wrote a Chinese ''History of Christianity,'' dropped from sight June 12, 1989, at the height of China's ill-fated pro-democracy movement. He was at that time in France for a U.N. Educational, Scientific and Cultural Organization conference.

The dispatches did not disclose Zhao's current whereabouts.

While in Paris, Zhao voiced support for the Chinese students' demands for

political reform and greater freedom. In one speech, he allegedly ''insulted and attacked the Chinese Communist Party and Chinese government '' the newspaper said.

Xinhua said Zhao's actions violated an article of the Chinese Constitution requiring deputies show ''an exemplary role'' in obeying the law and supporting the Communist government.

After the Chinese government launched its violent nationwide crackdown on student-led demonstrations on June 3, Zhao failed to return to China.

Shanghai delegates to the National People's Congress chastised Zhao at a Sunday session and then stripped him of his seat in the nominal parliament and on its standing committee, the daily said.

''The delegates believe Zhao's actions and speech were illegal and noted his refusal to return to China,'' the newspaper said. ''So they determined that it was improper for him to continue as a delegate to the congress.''

A 1946 graduate of St. John's University in his native Shanghai, Zhao taught Christian theology in the 1950s and 1960s and endured China's chaotic Cultural Revolution as a researcher at the Institute of World Religions at the Academy of Social Sciences.

#90169u0968 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - Five children were pulled safely from a burning van parked on a Brooklyn street by three men who spotted the flames and rushed to the scene.

The children, Hasidic Jews, had just received a blessing Sunday from their spiritual leader and their father called the rescue by three black men a miracle, saying ''if they hadn't been there, my children would not be alive.''

Avraham Haim, 39, of the predominantly Jewish Crown Heights section of Brooklyn, left his children, ages 2 1/2 through 9, inside the van while he went inside the bank to use an automatic teller machine Sunday afternoon.

He said he had been away from the van for only seconds when he heard people shouting ''fire'' and saw flames inside the vehicle and three men trying to pull the children out from its windows.

The men, Tyronne Chung, 18, Roger Robinson, 34, of Brooklyn, and Mark Carpenter, 24, of Queens, were inside a laundry across the street from the parked van when they saw the flames.

''We ran over. The doors were locked but the windows were open,'' said Chung. ''The older children were in the front. They knew to get out of the windows and we helped pull them out.''

Chung said the younger children were in the back separated from the other by a ''barricade of fire.''

''They were screaming. Fire was making a barricade. We couldn't get them through the windows so we broke the door. I put my arm into the fire to get the last child,'' Chung said.

Haim said he was pulling on the bank door as he watched the scene in horror. ''I panicked and forgot it was an electric door. Someone inside said to push the button and I got out,'' Haim said. ''When I got to the van they had the children out. Then it blew up in flames. Thirty seconds later they would not be here.''

Chung said he felt ''great'' despite burns on his hands and fingers. ''At the time I didn't think about what I was doing. I just ran,'' he said.

Chung was treated at Kings County Hospital for the burns and for smoke inhalation. Carpenter suffered minor burns on his hands, neck and throat and, along with Robinson, was also treated for smoke inhalation at the

hospital and released, said Sgt. Nick Vreeland, a police spokesman.

Vreeland said the fire was started by one of the children who was playing with matches.

The Crown Heights and the Williamsburg sections of Brooklyn constitute one of the world's largest settlements of Jewish survivors of the Nazi Holocuast and their families, many of them adherents of the devoutedly religious Hasidic sect.

The neighborhoods' other major ethnic groups are blacks and Hispanics, and cultural differences have resulted in increasing tensions and a number of violent confrontations in recent years.

''Race takes a back seat in these cases,'' Vreeland said.

Chung, who comes from Guyana, said he never thought about color or religion. ''I was just thinking to save the the kids,'' he said.

''Where we live, there are blacks and Jews,'' said Haim, who is from Israel. ''We work hand in hand to try to help each other. When it comes to matters of life and death, everybody puts differences aside to save life.''

Haim, a member of the Lubavitcher sect, said he and his children had just come from visiting their spiritual leader for a blessing and believed the incident was a miracle.

''It is Father's Day and because of this miracle and these men I am eligible to be a father,'' Haim said.

His wife, Michal Haim, said she had sent her husband and children to get a blessing after the family attended the funeral of a friend.

''I wanted them to appreciate life,'' she said.

Two years ago, the family survived a fire that completely destroyed their apartment, she said.

#90169u0977 06/18/1990 ~United Press International

COLOMBO, SRI LANKA (JUNE 18) UPI - Heavy fighting between Tamil rebels and government security forces in northern Sri Lanka left at least 68 people dead Monday, including 60 guerrillas, a military source said.

The violence, which appears to have shattered an unconditional cease-fire that was slated to begin Saturday evening, raised the total number of dead since fighting erupted a week ago to more than 600, the military source

said.

The worst fighting of the day occurred in the farming town of Mankulam, about 175 miles northeast of Colombo, where Sri Lankan security forces killed 60 guerrillas of the Liberation Tigers of Tamil Eelam, the military source said.

At least six government soldiers were killed during the encounter, the source said. Further details were not available.

Heavy fighting in Vavuniya, about 35 miles south of Mankulam, claimed the lives of two soldiers, the source said.

Fighting was also intense around the eastern provincial capital of Batticaloa where Tigers continued their weeklong attack on the two major army camps of Kiran and Kalawanchikudy, but there was no immediate report of casualties.

Rebels attacked the camp at Kiran with rocket-propelled grenades and mortars for two hours beginning at 5 a.m. Monday, preventing the delivery of food supplies and the evacuation of the wounded, the source said.

The fighting forced many residents to seek shelter at refugee camps set up at schools, temples, churches and mosques, the source said.

One resident reached by telephone from the capital said electricity, food and water were in short supply.

The military source said an army brigade that entered Batticaloa district Monday after a five-day, 60-mile march from the town of Amparai captured a number of Tiger positions in and around Batticaloa.

Thousands of people have died in ethnic violence since 1983, when Tamil militants began waging a bloody campaign to establish in the northern and eastern provinces an independent homeland for the mostly Hindu Tamils.

Tamils demanded a separate state because of years of alleged discrimination by the majority Buddhist Sinhalese, who control the Colombo government.

#90169u1039 06/18/1990 ~United Press International

(JUNE 18) UPI - NO 11th hour appeals are expected on behalf of the man Arkansas officials describe as the most dangerous inmate on death row. 46-year-old John Edward Swindler is scheduled to take a seat in the state's electric chair tonight for the 1976 shooting death of an Arkansas police officer.

The U-S Supreme Court Saturday refused to issue a stay of execution for Swindler, who also has been tabbed as the killer of a pair of South Carolina teen-agers and a Pennsylvania student in Florida. About 50 protesters maintained a vigil on the steps of the state Capitol in Little Rock yesterday to protest the upcoming execution.

Officials in Pettis County, Missouri, say between one-thousand and 15-hundred people in the Sedalia area are returning to their homes after a leak at a chemical plant in Sedalia. The early morning leak of allyl methacrylate forced the evacuation of the area about 85 miles southwest of Kansas City.

The death toll from Thursday's flooding in eastern Ohio has reached 21, with more than one dozen others still UNaccounted for. High waters also affected Iowa, Nebraska, South Dakota and Missouri after heavy rains deluged those areas. Cleanup operations are taking place as weather permits.

The Soviet news agency Tass says a 12-seat biplane was hijacked today from a Ukrainian city. Details are sketchy, but initial reports from the K-G-B cited by Tass indicate the plane may be headed to Turkey. It is NOT known if there were any passengers aboard the craft when it was hijacked.

#90169u1045 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The Supreme Court refused Monday to step into a bitter dispute over song royalties involving the son and illegitimate daughter of the late country-western singer Hank Williams.

The high court declined to hear arguments in the case brought by Williams' legitimate son, Hank Jr., who was seeking to be judged the sole heir to royalties of more than 100 songs his father wrote.

The U.S. Court of Appeals for the 2nd Circuit in Montgomery, Ala., last year ruled that Williams was the sole heir to his father's royalties. It also said Cathy Stone, Williams' illegitimate daughter, was not entitled to any royalties.

Stone successfully sought a rehearing, however, and the court ruled she was the natural daughter of Williams and may have certain rights to royalties under federal copyright laws.

In a related case, the Supreme Court also declined to review a ruling that found Stone was entitled to receive her proportionate share of any proceeds of the estate of the late country music star, including income, interest and copyright royalties.

That case was also brought by Hank Williams Jr. after a lower court said Stone was only entitled to her share of the estate from the date she gave notice of her claim, Aug. 5, 1985.

The high court rejected both cases without comment.

Stone, 37, was born out of wedlock to Williams and Nashville secretary Bobbie Jett five days after the 29-year-old musician died on Jan. 1, 1953. Stone was adopted by Williams' mother, Lillian Stone. After her death five years later, Cathy Stone was adopted by a couple in Mobile, Ala.

When Cathy Stone reached age 21 in 1974, she was told by her adoptive mother that Williams could be her biological father, entitling her to money from his works.

In 1985 Stone sought in federal court to be deemed the natural daughter of Williams and sought to collect a portion of royalties from her father's music. The court held she was Williams' daughter but ruled she had ''unreasonably delayed'' her claims and was therefore not entitled to any money.

The appeals court affirmed the lower court's ruling in April 1989, but three months later, it granted her motion for a rehearing. In a rare move, the appellate court vacated its earlier ruling, reversed the lower court's opinion and reinstated Stone's case.

Stone also appealed the federal court's ruling to the Alabama Supreme Court, asking to have her father's estate reopened to obtain her proportionate share. The court found that Williams Jr. and his family had fraudulently conspired to keep Stone from knowing her identity and potential claim to Hank Williams' estate and royalties.

The court excused Stone's delay in asserting her claims to the royalties and found ''substantial evidence'' that could indicate to a trial judge or jury that the Williams family fraudulently concealed her identity.

Hank Williams Sr. set the standard for hard living and country-western song writing, producing hits that included ''Cold Cold Heart'' and ''Hey Good Lookin'.''

#90169u1070 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The Supreme Court agreed Monday to decide if a failed Texas savings and loan shareholder can sue the federal government for not policing the savings and loan association.

The court will hear arguments next term in the case brought by the government seeking review of a ruling by the 5th U.S. Circuit Court of Appeals.

At issue in the case is whether Thomas M. Gaubert can bring a suit against the government under the Federal Tort Claims Act. The FTCA waives governmental immunity from suits for injuries or losses resulting from government negligence.

Despite the law, government maintains immunity from suits involving discretionary functions or duties of the government or employees. The discretionary functions exception is meant to avoid having the courts second guess government decisions.

The appeals court found the activities of the bank regulators in the case fell outside the discretionary function exception because it was ''operational in nature'' in that the regulators were advising bank officials on how to run the bank rather than just making policy decisions.

The government maintains that the appeals court ruling allowing the suit is a ''serious misreading of the discretionary function exception - an exception that has long been a pivotal limitation on government liability under the FTCA.''

The case stems from the failure of the Independent American Savings Association. Gaubert, a major shareholder and former officer of IASA, brought suit charging he suffered personal financial losses because of the 1987 failure that he alleged was caused by the negligence of federal regulators in their supervision of the bank.

#90169u1084 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The Supreme Court refused Monday to enter a dispute involving a New Jersey law barring top casino employees from

giving money to political campaigns.

The court refused to hear the case brought by Gloria E. Soto, who in 1985 when the case began was a lawyer for the Trump Casino Hotel, seeking review of a ruling by state courts.

At issue is a 1977 law that bars key employees of casinos from making direct contributions to state political parties or campaigns. The law was designed to combat the appearance of governmental corruption following the 1976 approval of casino gambling in Atlantic City that followed a campaign into which hotels and others interested in gambling poured money.

Soto, who was active in the Democratic Party in the state, wanted to increase her activities, including making financial contributions. State courts barred the contributions.

Seeking high court review, she claimed the law violates her First Amendment rights.

Arguing against review, the state pointed out that the law only affects the highest ranking 3.5 percent of casino employees and said she remains free to ''express her political opinions to anyone who will listen, to announce her support for political candidates or parties, to vote, to join political parties or groups, and to volunteer non-professional services to such parties or groups.''

WASHINGTON (JUNE 18) UPI - The Supreme Court refused Monday to become involved in a tenure fight that ended with Boston University being ordered to grant a lifetime job to the winner of a sex discrimination suit.

The court refused to hear the case brought by the university seeking review of a ruling by the 1st U.S. Circuit Court of Appeals.

The case began when the university denied tenure to Julia Prewitt Brown, an assistant professor in the school's English department. Brown eventually brought suit charging sex discrimination and was awarded $215,000, reinstatement and tenure. The appeals court upheld the award.

The university asked the Supreme Court to decide whether a federal court should order a school to award lifetime tenure when there is a legitimate dispute over a tenure candidate's ability.

Attorneys for Brown argued against review.

WASHINGTON (JUNE 18) UPI - The Federal Reserve Board said Monday it approved the merger of Baltimore Bancorp and Municipal Savings Bank of Towson, Md.

The savings bank is a subsidiary of Baltimore Bancorp's principal business The Bank of Baltimore. Baltimore Bancorp has assets of $3.3 billion while Municipal Savings has assets of $102.6 million.

''Bancorp and all of its bank subsidiaries currently meet all applicable capital standards and, upon consummation of the proposed transactions, will continue to meet all applicable capital standards,'' the Fed said.

NEW YORK (JUNE 18) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 72.50-73.50 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 124.70 c-lb.

Lead, common, U.S. primary producers 45.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.14-$4.40 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $117.25-118.25 per troy ounce.

Platinum, soft, 99.5 fine, producer - $473.50-$475.00; dealer-approx., $486.00-$489.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $104.00-$105.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $108.13 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 293.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and

imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

#90169u1160 06/18/1990 ~United Press International

SEDALIA, MO (JUNE 18) UPI - An irritating chemical cloud spewed from an overpressurized storage tank early Monday, injuring 30 people, none seriously, and forcing the evacuation of as many as 1,500 for about seven hours, authorities said.

The storage tank at an Alcolac Inc. chemical plant began leaking allyl methacrylate vapor just before midnight CDT Sunday, authorities said.

Between 1,000 and 1,500 residents in a 5-mile radius east, north and south of Sedalia, a town about 85 miles southeast of Kansas City, were evacuated beginning about 1 a.m., authorities said.

''We have lifted the evacuation ban (at 8:15 a.m. CDT) and allowed people to go back to their homes,'' said Jerry Shull, Pettis County civil defense director. ''It appears that the situation at the chemical plant is stable at this time.''

Bothwell Regional Health Center said 30 people were treated and released, including 14 Alcolac plant employees, 14 residents and two firefighters.

''They had some complaints of eye burning and some skin irritation and slight nausea,'' assistant hospital administrator Richard Davidson said. All of the residents were walk-in patients, he said.

The leak occurred when pressure built in a 40,000-gallon tank, said plant manager Richard Faulkner. The amount of liquid that was vaporized and released had not yet been determined, but he said it probably was a small amount.

''Something in the storage tank initiated a reaction,'' Faulkner said. ''The material reacts with itself and generates heat when it does that. The heat from the reaction eventually vaporized some of the material in it.''

He said pressure increased in the tank and the tank's safety release, a thin piece of metal, vented and released vapor into the atmosphere.

He said there was no fire, no explosion or spill of material, just a vapor release.

''Until we've completed the investigation, we won't know if it was an operator failure or an equipment failure,'' Faulkner said. He said the probe would be completed ''within a couple of days.''

Faulkner said the chemical ''provides a function to our customers' products and I'm not sure what that function is.''

The chemical is listed as a toxic if ingested. As a vapor it causes eye, throat and skin irritation, Faulkner said. A person would smell it long before it caused any problems, he said.

The problem was first identified a little before midnight and authorities were notified ''right around midnight,'' he said.

Alcolac is owned by a French company, Rhone Poulenc Inc., which has its U.S. headquarters in Princeton, N.J., Faulkner said. He said there are 105 employees at the plant.

A lawsuit filed by several homeowners alleging health problems related to odors from the Sedalia plant was settled six to eight months ago when Rhone Poulenc bought the company, Faulkner said.

#90169u1178 06/18/1990 ~United Press International

ANTIGUA, GUATEMALA (JUNE 18) UPI - U.S. Secretary of State James Baker met in Guatemala Monday with six Central American presidents who ended a two-day summit hopeful they can forge economic integration of the region.

In a joint statement issued late Sunday, the six presidents said they agreed to meet July 20-21 for a regional drug summit in the Nicaraguan capital.

Baker arrived Sunday night in Guatemala ahead of joint and individual meeting Monday in Antigua, 30 miles from Guatemala City, with the leaders of Guatemala, Costa Rica, Nicaragua, El Salvadore, Honduras and Panama.

A document obtained by United Press International indicated Baker would encourage Central America to work as a bloc and suggested the formation of an international group similar to the Group of 24 nations that was set up to coordinate development and aid for Eastern Europe.

''Our idea is that the U.S., European Community, Japan and possibly others would serve as co-chairs with the U.S. secretariat to coordinate development of Central America,'' the document said.

The proposal was criticized before Baker arrived. Central American leaders

feared it was another attempt by the United States to exert its ''Big Brother'' role and control the destinies of its southern neighbors, sources close to the talks said.

There was general agreement at the summit that the six countries should work together to restore their battered economies.

In closing the conference, Costa Rican President Rafael Calderon said, ''The new word for peace is development.''

The agreement, signed by all six presidents, called for wide-ranging integration within three months to six months on everything from setting tariffs and pushing for debt reduction, to export marketing and infrastructure improvements.

''We're not putting out our hand for charity,'' Calderon said.

Enrique Iglesias, president of the Inter-American Development Bank, said: ''For the first time, the economic approach is very similar between the countries. And it is timely because of a follow-up to the peace efforts.''

Iglesias's view was shared by the majority of those attending the summit, which ended Sunday with a genuine atmosphere of hope between the presidents and other representatives of Guatemala, Costa Rica, Nicaragua, El Salvador, Honduras and Panama.

''There is a feeling that the conflicts are either at an end or coming to an end,'' said a regional observer close to the talks. ''The result is more optimism for socio-economic development.''

A draft copy of the Declaration of Antigua said the presidents ''reaffirmed that the solution to development problems are the primary responsibility of the governments and peoples, aware of their commitment to consolidating peace and to individually and collectively improve the economic and social destiny of Central America.''

The document also pledged ''to restructure, strengthen and reactivate the process of integration of the regional Central American organizations ... to conform to the new strategies of foreign trade and production modernization.''

Civil wars and internal conflicts have strained the region's economies for several decades and prevented the cooperation necessary to create a Central American common market, or trading bloc.

With the civil war over in Nicaragua and some progress made to resolve the conflict in El Salvador, regional leaders see the opportunity to concentrate on development and renew efforts that in the past failed to

bring about regional integration.

''I don't think it's ever been expressed this way,'' said Silvio de Franco a member of the Nicaraguan delegation. ''Instead of going backward, the whole idea now will be on export production.''

De Franco said the other main reason for such optimism is ''there is a lot of interest on the European side, and also now by the Americans, to help the region as a whole, rather than country by country.''

''Nicaragua will benefit in many senses because we are getting off to a fresh start,'' de Franco said in reference to the capitalist reforms being carried out by President Violeta Chamorro. ''The possibilities of modernization, given current conditions, are the best.''

Iglesias said the IDB was considering structuring loans to the regional as a whole as well as to individual countries. He also indicated the bank would loan money to Nicaragua once it pays off the $60 million it still owes the bank.

#90169u1179 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - A jury consisting mostly of black women was seated Monday to hear the drug and perjury trial of Mayor Marion Barry.

The jury of 12 regulars and six alternates consisted of 15 women - a dozen of them black - and three men. Thirteen members of the panel are black, and five are white.

Barry is black, and many of his supporters have cast the federal case against him as part of an effort by the white establishment to undercut black politicians.

The jury, seated after an hour of whittling down of a larger group of potential jurors selected over two weeks, was to be sequestered later Monday, with opening arguments scheduled for Tuesday morning, U.S. District Judge Thomas Penfield Jackson said.

Attorneys for Barry used their strikes from the pool of 82 potential jurors primarily to dismiss whites from the jury; federal prosecutors struck mostly blacks.

The atmosphere during the brief hearing Monday was tense, with Barry at times huddling with his defense team.

''We'll begin the trial proper tomorrow with my instructions to you and the opening statements,'' Jackson told the jury. ''I am generally pleased

at your willingness, if not enthusiasm, to serve as jurors in this case.''

The trial is expected to last about a month.

It was not expected to be known to jurors or the public throughout the trial which of the 18 are members of the jury and which six are alternates.

The pool of 82 potential jurors passed through 10 working days of questioning aimed at eliminating those with preconceptions based on pre-trial publicity, the FBI-police sting operation that led to the mayor's arrest or Barry's status in the city.

Jury selection began June 4 with a pool of 250 potential jurors. When the process lagged behind schedule, Jackson ordered the first phase of jury selection to end Friday and told defense lawyers and prosecutors to make their final choices for the panel on Monday.

Defense attorneys had 10 ''peremptory strikes'' - which allows them to excuse a prospective juror without giving a reason - and prosecutors had six. Once peremptory strikes were exhausted, the jury was empaneled.

Four televisions, one of them facing the jury box, and sets of headphones for jurors were placed in the courtroom Friday afternoon. Barry was not present Friday for the first time since the trial began.

Barry last week announced he would not run for a fourth term in office, fueling speculation that his willingness to step down from office could lead to a plea agreement. But his lead attorney, R. Kenneth Mundy, said the trial will proceed as scheduled.

''Nobody's sitting at home waiting for the phone to ring. Nobody is waiting to make a call to somebody else,'' Mundy told reporters Friday. ''All that's going to happen is the trial, believe me. ... Bet on it. Believe it. Don't question it.''

The government's most damaging evidence against Barry is expected to be a videotape of the Jan. 18 undercover FBI operation that led to his arrest. The videotape allegedly shows the mayor smoking crack cocaine at the Vista International Hotel in downtown Washington. He was later indicted on 14 drug and perjury counts.

Barry is charged with three felony counts of perjury for allegedly lying to a grand jury, 10 misdemeanor counts of cocaine use, and one misdemeanor count of conspiracy to possess cocaine as long ago as 1984.

He could face 26 years in prison and $1.85 million in fines if convicted on all counts.

#90169u1189 06/18/1990 ~United Press International
MOSCOW (JUNE 18) UPI - A former pilot stole a 12-seat Aeroflot biplane from a city in the southwestern Ukraine and flew it across the Soviet border Monday toward Turkey, the official Soviet news agency Tass said.

There were apparently no passengers or crew aboard when the pilot took off in the AN-2 single-engine plane from the airport at Izmail, a Soviet city on the Danube near the Black Sea, Monday morning.

The plane crossed the Soviet border three minutes after takeoff and ''KGB officials told Tass the plane was reported flying in the airspace of Romania and Bulgaria and heading toward Turkey.''

Tass said the pilot, whose name was not given, had resigned from Aeroflot several months ago. His motive was not immediately known.

#90169u1230 06/18/1990 ~United Press International
(JUNE 18) UPI - The jury that is to hear the federal drug and perjury case of Washington, D-C, Mayor Marion Barry was chosen today after two weeks of legal wrangling. The panel of 12 regulars and six alternates will be sequestered later this afternoon. U-S District Judge Thomas Penfield Jackson commended the jurors for their willingness to decide Barry's fate. Opening statements are scheduled tomorrow after the panel receives instructions.

The Supreme Court today agreed to decide if a shareholder of a failed Texas thrift can sue the government for its possible role in the institution's bankruptcy. The basis of the case is whether the plaintiff can seek reparations from Washington under the Federal Tort Claims Act. The F-T-C-A waives governmental immunity from suits for injuries or losses resulting from government negligence.

The National Weather Service predicted triple-digit temperatures for the Southwest today, as well as the panhandle region. The summer-like heat wave boosted the so-called heat index beyond 100 degrees yesterday in Arkansas and much of the Southwest. The Weather Service warned anyone working outdoors or living without air conditioning to take precautions against heat stroke and heat exhaustion.

Cleanup efforts are underway throughout the Midwest, the Great Plains and in Ohio following rain-caused flooding. Rescue workers in eastern Ohio have found another body, lifting the death toll from Thursday's massive flooding to 21.

-30- 1649
#90169u1237 06/18/1990 ~United Press International
CAPE CANAVERAL, FL (UPI) - The shuttle Atlantis was slowly hauled to the launch pad Monday for blastoff around July 13 on a secret military mission replacing the crippled shuttle Columbia in NASA's revised flight schedule.

Atlantis, mounted atop a squat mobile launch platform and carried by a powerful crawler-transporter, began the 3.5-mile trip from the Vehicle Assembly Building to launch pad 39A at 11:16 p.m. EDT Sunday, about 45 minutes ahead of schedule.

''It's been a smooth activity. It's run ahead of schedule all night,'' said NASA spokesman George Diller. ''First motion was 11:16 p.m. and we were atop pad A at 5:30 a.m., a good hour and a half earlier than (had been expected).''

He said engineers planned to test fire the shuttle's hydraulic power units late Monday after hooking up fuel lines and completing a variety of

electrical and mechanical connections between the spaceship and the launch pad.

Air Force Col. Richard Covey, Atlantis's commander, Navy Cmdr. Frank Culbertson, the co-pilot, Marine Col. Robert Springer, Air Force Lt. Col. Carl Meade and Army Capt. Charles Gemar planned to fly to the Kennedy Space Center Monday night to participate in a practice countdown Wednesday and Thursday.

Details about the flight are classified, but sources have said launch is planned for around 8 a.m. July 13 and that the mission is scheduled to last about four days. The shuttle's typical altitude will be 190 miles in an orbit tipped 28.5 degrees to the equator.

The launch schedule flip flop between Atlantis and Columbia was ordered by NASA managers to minimize the impact of the fuel leak that grounded Columbia the night before its planned takeoff May 30 on a 10-day astronomy mission.

NASA managers decided Monday to order a special test in which supercold liquid hydrogen will be pumped aboard Atlantis's external tank to make sure the ship does not have a similar problem to the one that grounded Columbia. The test likely will be scheduled early next week, officials said.

Engineers traced Columbia's leak to a 17-inch-wide fuel line fitting where the ship's main liquid hydrogen line enters the belly of the orbiter. But technicians were unable to isolate the problem area and NASA managers had little choice but to order Columbia back to its hangar for a detailed inspection.

The part of the ''17-inch disconnect'' fitting on the external tank side of the big umbilical will be shipped back to the manufacturer Tuesday.

If tests fail to find a leak, the corresponding valves and plumbing on the shuttle side of the fitting will be removed and replaced with hardware currently installed in NASA's newest shuttle, the Endeavour.

In either case, NASA officials say Columbia will be ready for another launch attempt around Aug. 12.

As for Atlantis, Covey and company planned to participate in the practice countdown this week and to review emergency launch pad escape procedures, a traditional milestone before any shuttle flight.

If all goes well, the astronauts, dressed in bulky spacesuits, will strap in aboard Atlantis Thursday for the final hours of the mock countdown, scheduled to end with the simulated ignition and shutdown of the shuttle's

three main engines.

#90169u1249 06/18/1990 ~United Press International
ELK GROVE VILLAGE, Ill. (JUNE 18) UPI - Non-union UAL Corp. employees said leaders of a union-led buyout of the parent company of United Airlines were backing away from an agreement on concessions by management and salaried UAL workers.

''The unions have not been willing to enter into an agreement on wage and benefit concessions (for non-union workers) that we have been led to believe they were agreeable to,'' a spokesman for the roundtable said in a statement Sunday.

United's three unions - the machinists, pilots and flight attendants - joined forces earlier this year to mount a $4.5 billion takeover of the airline. Recently, former Chrysler Corp. Vice Chairman Gerald Greenwald agreed to lead the financing effort and then become CEO of the new company.

As part of the negotiations, the leaders of the buyout have been negotiating with non-union employess on a compensation package.

System Roundtable, a group representing the non-union employees, said the unions now appear to be balking at approval of a negotiated settlement for those 26,000 employees.

''We are very disappointed ... If the package is not agreed to very shortly ... it does not bode well for (the unions') ability to make the proposed leveraged buyout, and, if that transaction is completed, in running the airline,'' the spokesman said

Observers said failure to resolve the dispute could jeopardize financing for the buyout, which, if completed, would produce the world's largest employee-owned company.

#90169u1288 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - A survey of 1,706 working mothers around the country shows more than two-thirds experience conflicts between job and home, with kids the biggest problem, Working Mother magazine reported Monday.

In a separate survey of about 30,000 women readers, Parents Magazine reported that 56 percent of working mothers admire moms who stay at home, and only 8 percent are critical of them.

However, 49 percent of at-home mothers said they are critical of their working counterparts, with 31 percent admiring them.

Seventy-percent of the women interviewed in the Working Mother survey said taking care of a sick child is the top conflict between work and family life.

Sixty percent said it was hard getting the kids moving in the morning and still make it to work on time, while 44 percent said taking the kids to doctors' appointments were hard to work into their work day.

Almost 20 percent admitted they sometimes lie to their bosses about the reason for their absences.

The survey also indicated women with higher incomes have more work-related conflicts, such as getting work finished on time, working overtime and traveling.

Women with lower incomes appeared to be most concerned about concentrating at work because they worry about their chldren during the day.

Fifty-two percent of the women said they feel some women are granted more flexibility than others, especially ''higher-ranking women'' and ''bosses' favorites.''

In the Parents Magazine survey, 66 percent of working mothers said they miss their children, while 61 percent of housewife mothers said they miss the money.

Overwhelming majorities of both sets of women, 88 percent working and 76 percent non-working, said lack of time was a problem, with 43 percent of working moms terming it a serious problem, compared to 22 percent of those at home.

CHICAGO (JUNE 18) UPI - Members of the U.S. Conference of Mayors Monday disagreed with research polls saying there is a decline in drug use.

The mayors - some 250 of them in Chicago for the fourth day of their annual conference - scheduled a series of workshops and news conferences to highlight their concerns.

Mayors from New Bedford, Lynn and Newton, Mass.; Madison, Wis.; DeKalb, Ill., and Philadelphia planned a news conference to announce a consensus on reordering federal budget piorities.

''People in our communities have paid the price for the massive peacetime military buildup of the last decade,'' the mayors said in a statement. ''The crisis across the nation in housing, health care, education, employment, environment and infrastructure demands a redefinition of national security.''

The mayors said polls fail to show drug use is growing in the nation's cities, especially in the black community.

''It's not going to go away,'' Chicago Mayor Richard M. Daley said, adding that drugs are affecting the ''fabric of the African-American community.''

The mayors discussed the impact of drug use during a breakfast meeting preceding their plenary session. Especially troubling, Daley said, is the growing use of crack cocaine in the inner cities and the number of infants born addicted to drugs.

The mayors Sunday backed a Daley-sponsored resolution supporting legislation that would allow local governments to levy an airport passenger tax to expand or improve airport facilities. The bill, sponsored by Rep. William O. Lipinski, D-Ill., would permit airport operators to impose a $3 passenger fee.

Sponsors estimate the bill, if enacted, could generate $75 million for Chicago to help build a new, $5 billion Southeast Side airport.

''I think support from the mayor's conference will help get the legislation approved,'' Lipinski said. ''We have problems in this country with airport capacity and we need to pass this legislation to help reduce those problems.''

The resolution committee also endorsed a proposal calling for the repeal of the Gramm-Rudman-Hollings Balanced Budget Act.

The Gramm-Rudman resolution stated the act ''has not been as effective a tool at reducing the federal deficit as originally planned and has led to an array of budgetary gimmicks.''

The committee also approved a Daley-sponsored resolution calling for the preservation of federally subsidized low-income housing.

''It's time for a major consistent housing policy for urban areas,'' Daley said.

The full conference has set aside Wednesday to vote on resolutions considered during this weekend's committee meetings.

SRINAGAR, INDIA (JUNE 18) UPI - Seven people, including five police officers, were killed Monday in a fierce gunbattle that erupted when a paramilitary unit trapped a group of Kashmiri Moslem guerrillas in a house in Srinagar, police sources said.

The Moslem rebels, who are fighting for independence from India, opened fire with automatic weapons as about 100 officers from the Central Reserve Police force surrounded the house near Airport Road on the southern outskirts of the city, witnesses said.

Witnesses said later the gunfire smashed every window in the multi-story home, owned by a professor from Kashmir University who was in New Delhi at the time. They said a police truck was riddled by bullets from the militants.

Police sources said at least five paramilitary police and two rebels were killed in the fighting, which broke out about 1 p.m. Three militants were arrested, including Rafi Punjabi, the brother of the professor who owns the house, witnesses said.

Meanwhile, a powerful bomb exploded in the heavily guarded central garage where government vehicles are parked, destroying 10 new Indian-made Ambassador automobiles and damaging six others, authorities said.

On Sunday, gunmen burst into a house in Srinagar and opened fire with automatic weapons, killing four members of a Kashmiri Hindu family as they watched television, police said. Two others were wounded in the assault, they said.

Nearly 500 people have been killed in northern Jammu and Kashmir state since mid-January, when a simmering Moslem secessionist movement flared into a popular uprising against Indian rule.

In the latest shootout, Punjabi's wife said police locked her in a room with her two children as they searched the residence.

''I am confined to my ground floor room with my two children, who won't stop weeping because their father was carried away,'' she said in a telephone interview.

She said about 30 police officers had been stationed in and around the house. The entire neighborhood was cordoned off by police and traffic to the airport was diverted to a secondary road. Merchants in the area immediately closed their shops following the incident.

Kashmiri Moslems are demanding independence because they believe they have been continually discriminated against by the Hindu-dominated central government in New Delhi. They also charge that India has reneged on a promise to hold a plebiscite to allow the state to determine whether to join India or Pakistan.

#90169u1370 06/18/1990 ~United Press International

BANGKOK, THAILAND (JUNE 18) UPI - Cambodia's Communist Politburo dismissed three liberals from high positions in a crackdown on reform-minded leaders, government sources said Monday, and U.S.-backed rebels said they briefly captured the first provincial capital to fall in the nation's 11-year-old war.

The government purge - in which a Politburo member, the health minister and the editor of the state-owned newspaper - were sacked is another step in a hard-line crackdown on liberals and advocates of a multi-party political system that began with the arrest of a liberal Cabinet minister last month, analysts in Bangkok said.

''This is a warning to all liberals,'' said Khieu Kanharith, the editor of the state-owned Kampuchea newspaper, who was fired on Saturday.

The action shows 39-year-old Prime Minister Hun Sen's moderate faction is losing influence to an older, tougher group backed by conservative Vietnamese leaders, analysts said. The hard-line faction is led by Chea Sim, the 58-year- old chairman of the National Assembly, who is also a Politburo member.

The dismissals were announced the same day the U.S.-backed National Army of Independent Cambodia, a resistance group loyal to former Cambodian monarch Prince Norodom Sihanouk, said 1,450 of its soldiers had briefly captured the provincial capital Kompong Thom, about 100 miles north of Phnom Penh. The town controls access to the province capitals of Preah Vihear and Siem Reap to the north.

If true, it is the first provincial capital to have been captured in the resistance war that followed Vietnam's 1979 invasion of Cambodia.

Ek Sereywuth, spokesman for the rebel group, said the lightly armed insurgents captured the town Sunday but abandoned it soon after when government forces counterattacked.

Ek Sereywuth said the communist Khmer Rouge rebel group ''may have taken some part in the fighting'' at Kompong Thom, but insisted the Sihanoukist forces were in the majority.

''Due to the large civilian population living in the city and for security reasons, our forces evacuated and withdrew to surrounding positions," he said.

Even though the rebel troops failed to hold the town for long, they scored a military and psychological victory, he said.

''Now most of the northwest is cut off. The only way to supply the area is

by air and river,'' the spokesman said.

Ek Sereywuth said the guerrillas destroyed four Soviet-supplied T-54 tanks three trucks and two pieces of artillery in the raid.

He said the Vietnamese, who have insisted all their troops left Cambodia in September, would have to help mount an airlift to beleaguered garrisons in the northwest because the Phnom Penh government lacked the needed pilots and planes.

The fighting came even as representives of the Sihanouk group and another non-communist rebel force are planning to meet government representatives later this month in a ''Supreme National Council'' to discuss a cease-fire agreement signed in Tokyo earlier in June.

However, the most powerful of the resistance groups, the communist Khmer Rouge, has refused to sign the agreement or to name representatives to a council meeting.

The other two non-communist resistance groups say they will not to appoint representatives to fill positions originally designated for the Khmer Rouge at the talks in hopes the Khmer Rouge will eventaully agree to attend the meeting.

Cooperation between the U.S.-aided factions and the Khmer Rouge has become a sensitive point for the Bush administration, which has denied giving the communist faction any assistance.

The crackdown on liberals in Cambodia follows a rising wave of criticism of the prime minister for his army's battlefield reverses, failure to negotiate a peace settlement with the rebels and widening corruption in government.

Hun Sen also has called for political and economic reforms, including a multi-party democracy.

Besides Khieu Kanharith, those dismissed from their posts are Health Minister Yith Kim Seng and Politburo member Men Sam An, president of the Communist party organization commission and the only woman in the 13-member Politburo, government sources said.

Kyie Kanharith said he had been told to work for the governing party, the National United Front for National Salvation. Yith Kim Seng reportedly will become adviser to his former deputy, a hard-liner. And Men Sam An is being transferred to a less influential trade union position, sources said.

#90169u1386 06/18/1990 ~United Press International
NASHVILLE, TN (JUNE 18) UPI - The controversial rap group 2 Live Crew made an unauthorized derivative recording of Roy Orbison's ''Oh, Pretty Woman,'' a federal court lawsuit claims.

Acuff-Rose, a Nashville music publishing firm, said Monday it refused permission to allow 2 Live Crew to record the song but a derivative version appeared on the group's album, ''As Clean As They Want To Be,'' the sanitized version of ''As Nasty As They Want To Be.''

''It's not about talking dirty,'' said Acuff-Rose attorney Eddie Wayland, referring to the suit. ''It's about copyright infringement.''

Named as defendants in the case were Luther ''Luke Skyywalker'' Campbell and Christopher ''Fresh Kid Ice'' Wongwon. The two band members were arrested in Fort Lauderdale, Fla., on obscenity charges last week.

Also named as defendants were band members Mark ''Brother Marquis'' Ross and David ''Mr. Mixx'' Hobbs, the band itself and Luke Skyywalker Records.

Acuff-Rose said it holds the copyright to ''Oh, Pretty Woman,'' which was a major hit for Orbison, co-written by the late singer and William Dees in 1964.

The 2 Live Crew album credits Acuff-Rose and the composers.

The Nashville publishing firm asked for unspecified damages and for the forfeiture of all copies of the album.

WASHINGTON (JUNE 18) UPI - Merrill Lynch & Co. has filed with the Securities and Exchange Commission a shelf offering of up to $1.5 billion principal amount in debt securities, according to a registration statement released Monday at the SEC.

A shelf registration gives the company the right to periodically issue the securities with terms to be determined at the time of sale.

The registration statement said the offering may be comprised of senior debt securities, subordinated debt securities and warrants to purchase debt securities.

Funds will be used for general corporate purposes, including extensions of credits to subsidiaries and lengthening the average maturity of the company's borrowings.

Merrill Lynch, based in New York, is the holding company for Merril Lynch, Pierce, Fenner & Smith, one of the world's largest securities brokerages.

RICHMOND, Va. (JUNE 18) UPI - A federal appeals court Monday upheld financial awards to four former Du Pont Co. workers who claimed a manufacturer supplying Du Pont failed to warn them of the danger of products containing asbestos.

In finding against The Celotex Corp., the 4th U.S. Circuit Court of Appeals also refused to grant a new trial to two other workers who were denied awards.

Initially, seven former workers and their wives filed suit in federal court in Texas against 14 manufacturers that supplied materials containing asbestos to Du Pont's Spruance plant in Richmond.

All but Celotex, a subsidiary of Walter Industries Inc., both of Tampa Fla.,and Raymark Industries Inc., settled out of court, and the case was transferred to the federal court in Norfolk, Va.

After a jury trial in November 1988, four former insulation workers and their wives won their case against the two companies. Vincent Lewis was awarded $150,000; Herman Mensing, $300,000; Elwood Hamlet, $200,000; and Daniel Willis, $100,000.

In its appeal, Celotex argued the trial court erred by failing to employ the ''sophisticated user'' defense, an argument permitted in cases where the employer is aware of the inherent dangers of a product.

By that defense, the employer is required to warn employees of any product dangers, thus absolving the manufacturer.

But the three-judge panel, which included retired Supreme Court Justice Lewis Powell, suggested Celotex failed to show that Du Pont knew of the dangers.

''Celotex offers no evidence that it apprised Du Pont of the dangers of the insulation or that it attempted to ascertain whether Du Pont could reasonably be relied upon to disseminate information about the dangers of the product,'' the court said.

''The fact that an employer possesses knowledge of a product's dangers does not extinguish the manufacturer's liability unless the manufacturer can also show that it has reason to believe that the employer was or would be acting to protect the employees.''

The appeal also turned back arguments that the five-year statute of limitations on defective materials supplied in the building trade should apply.

''The harmful exposure complained of by the plaintiffs, however, occurred prior to the point at which the insulation products were incorporated into the realty,'' the court said. ''The fact that the insulation was destined for such use when it was manufactured does not in and of itself activate the statute.''

In turning back appeals of Richard Taylor and Roy Bass, the court found ''readily distinguishable'' distinctions between their cases and their co-workers.

''Unlike the other plaintiffs, who worked as insulators, he (Bass) was a pipefitter and he admitted that he never actually handled the asbestos-containing insulation products,'' the court said. Taylor, the panel noted, also differed in his job description, and also continued to smoke through his trial.

The seventh worker, William Cobb, was not granted a financial award, but did not appeal his case.

MADISON, WI (JUNE 18) UPI - Health inspectors have given fraternities at the University of Wisconsin-Madison a mid-August deadline to clean up health and safety violations or face prosecution.

Hundreds of health and safety violations were found by city health inspectors, who ordered renovations at 20 of the 23 fraternity buildings inspected since May 1.

Inspectors found clogged toilets, bathrooms overrun with mold and mildew, sagging ceilings, rickety stairways and broken smoke detectors. Some of the houses had overloaded electrical circuits and were generally messy, according to the city reports.

The buildings mostly are owned by fraternity alumni associations or by corporations set up to manage fraternity houses nationwide. They have been ordered to fix up the houses to avoid prosecution.

The top violator was Pi Kappa Alpha with 162 building code violations, including rotting bathroom floors and an inadequate fire alarm system. Sigma Alpha Mu had 157 violations, including overloaded electrical circuits, a hole in one bedroom ceiling and moldy bathrooms.

#90169u1438 06/18/1990 ~United Press International
JOHANNESBURG, SOUTH AFRICA (JUNE 18) UPI - President Frederik de Klerk moved Monday to forge a national pro-government black alliance to counter the growing influence of the African National Congress in the anti-apartheid movement.

De Klerk held a meeting of government-appointed black officials and other leaders in a bid to undercut the power of the socialist ANC, which supports world trade sanctions against the white minority government, government sources said.

The delegates to the meeting later issued a joint statement that repeated de Klerk's call for ''real negotiations for a new constitution'' to begin soon between the black majority and white minority.

The statement also said an ''efficient government at all times,'' should be a priority in South Africa along with ''economic growth and development'' and an end to ''intimidation and political and other violence.''

As the group met in Cape Town, the chief of staff of the ANC's military wing, Chris Hani, returned to South Africa from Zambia after 16 years in exile, taking advantage of recent racial reforms which include the unimpeded return of many political refugees.

''As long as there is apartheid, I will preach the (ANC's 29-year) armed struggle,'' Hani, 55, told reporters before leaving the ANC's Lusaka, Zambia headquarters.

The ANC also hinted Monday that the security forces may have launched a smear campaign involving the United States and ANC Deputy President Nelson Mandela, whose 1962 arrest has been linked in recent days to CIA cooperation with South African authorities.

The reports implicating the CIA have come just days before Mandela's arrival in New York Wednesday on the first stop of a 10-day U.S. visit.

''These reports, even if they are true, seem just too coincidental ... they relied on police sources and we can not rule out security forces dirty tricks,'' an ANC organizer said. He stressed the movement had no official stand on the reports.

De Klerk summoned to his talks the leaders of South Africa's six nominally self-governing black homelands, the chairmen of the three houses of the racially segregated Parliament - from which the black majority is excluded

- and four white provincial administrators.

The meeting was billed only as a ''discussion of common concerns,'' but government sources said privately Monday that de Klerk would try to persuade the black leaders to adopt a charter advocating free enterprise and democracy. The ANC, in contrast, is pressuring for a redistribution of the national wealth concentrated in the hands of the white minority.

The ANC became legal in South Africa in February after 30 years of operating underground.

The organization has since swept black opinion and worked to convince the self-governing homelands - created by Pretoria to segregate the black tribes, as well as blacks from whites - to abandon their nominal status and embrace the ANC formula for a single state.

De Klerk has tried to summon the homeland leaders to meetings before, but has been thwarted by the ANC, which has pressured the leaders to boycott the sessions.

The government apparently timed this summit to coincide with the 71-year-old Mandela's six-week trip abroad. Officials have several times accused the black nationalist of directly intervening in homeland affairs.

Mandela claims the ANC enjoys majority support among the 25 million blacks in South Africa. The movement was buoyed Saturday when ten times more people turned out to ANC rallies - commemorating an anti-government uprising in Soweto - than to those of other black alliances.

#90169u1440 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - The third man to go on trial in the Bensonhurst racial slaying ''knew a gun was on the scene'' when he helped recruit a gang that killed a black youth who wandered into the Brooklyn neighborhood prosecutors said Monday.

John Vento, 21, is being tried on second-degree murder charges in the killing of Yusuf Hawkins, 16, after reneging on a deal to testify against his friends in the explosive case.

Assistant District Attorney Pamela Hayes said during opening statements in the trial that Hawkins was shot ''all because Johnny Vento and the boys went along with a plan to take care of 'the niggers.'''

Hayes will try to prove that even though Vento did not fire the shots that killed Hawkins, he should be convicted of second-degree murder because he knew a gun was present when the gang confronted Hawkins and three black

friends.

''John Vento knew a risk of death was present because he knew a gun was on the scene,'' Hayes said. ''Johnny Vento directly participated in the entire episode.''

In testimony before a grand jury in exchange for immunity, Vento implicated Joseph Fama, Keith Mondello and others in the death of Hawkins. Vento later reneged on his deal with prosecutors, fled, finally surrendered and was indicted for second-degree murder.

Vento's lawyer, Gerald DiChiara, said in his opening statement Monday that Vento did not know Fama had a gun and did not share Fama's intent to kill.

''John Vento was not playing the same game as Joey Fama, not playing the same song,'' DiChiarai said ''Was he on the scene? Yes. Did he know Joey Fama had a gun? No.''

''There is no evidence they can show that he somehow aided Joey Fama,'' DiChiara said.

The Hawkins killing on Aug. 23 inflamed racial tensions across the city and led to a series of protest marches.

On June 11, Fama, 19, the accused triggerman in the killing, and Mondello, also 19, the accused ringleader of a mob, were sentenced to maximum prison terms in the slaying.

Fama, convicted of second-degree murder and a series of lesser charges, was sentenced to 32 and two-thirds years to life in prison. Mondello, 19, who was acquitted of murder but convicted on lesser charges, was given a term of five and one-third to 16 years in prison.

Vento's lawyer has said his client reneged on the deal with prosecutors because his life was threatened by members of Fama's family, who he implied have connections to organized crime.

Four blacks, seven whites and one Hispanic have been chosen to hear the case against Vento, which was being tried before Justice Thaddeus Owens.

Vento is the third of eight Bensonhurst young men accused in the killing to go on trial. Fama and Mondello were tried together, but before separate juries.

Vento told a grand jury he was with Mondello three hours before Hawkins was killed and the two discussed the plans of Gina Feliciano, a neighborhood woman, to invite blacks and Hispanics to her 18th birthday party.

Hawkins and three friends from East New York were then mistaken for the guests when they ventured into the mostly white Benonshurst neighborhood looking for a used car.

Vento reportedly told the grand jury he was standing 3 feet from Fama when Hawkins was killed, and described the shots and Hawkins' screams.

#90169u1443 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - U.S. and Soviet scientists will spend the summer gathering material from the forests of Siberia, Alaska, and Minnesota to assess the possible effects of global climate change, officials announced Monday.

First stop for researchers will be sites in Yakutsk in eastern Siberia and the Komi region of Western Russia. Work is scheduled to begin at the sites following this week's Moscow Climate Change Workshop.

After two months of gathering biomass data on trees and soil of the boreal forest, the teams of seven U.S. scientists and seven Soviet scientists are scheduled to travel to U.S. sites to collect similar information. The U.S. sites are Caribou Creek, about 40 miles north of Fairbanks, Alaska, and the Boundary Waters Canoe Area in northern Minnesota.

The goal of the cooperative effort is to provide new information about what effect climate change - usually expressed as concern of a possible warming trend - might have on northern forests and how to respond to the changes.

The joint effort is an extension of work that begin in 1988 between the Soviet Academy of Sciences and the Institute for Resource Management, a non-profit environmental group in the United States.

Sponsors of this year's work at the U.S. Forest Service and the Soviet State Forest Committee. The Institute for Resource Management continues as the organizer.

''Climate change is a global problem that transcends all political and institutional boundaries,'' institute president Terrell Minger said in a statement. ''Managing the world's resources in the face of this challenge will require unprecedented levels of cooperation between all sectors and nations.''

After the research teams compile their information, scientists will analyze and interpret the data using a forest-growth simulation model developed by Daniel Botkin of the University of California at Santa

Barbara. The field research is being coordinated by Botkin and Anatoly Shvidenko of the All-Union Scientific Research Center of the State Forest Committee.

#90169u1449 06/18/1990 ~United Press International

PROVIDENCE, RI (JUNE 18) UPI - Trixie the polar bear is back up to speed at the Roger Williams Park Zoo, thanks to what may have been the most expensive root canal in city history.

A specialist from Denver flew into Rhode Island last week to perform the operation on Trixie, a 500-pound, 3-year-old bear, for whom the zoo paid $10,000 two years ago.

The procedure took about two hours, and cost the city and the state zoological society $1,700. Most of the fee covered the plane fare of Dr. Peter Emily of Lakewood, Colo., a dentist who normally practices on human mouths but is more widely known for his work with tigers, kangaroos, sea otters, elephants, walruses, and now polar bears.

Trixie apparently broke a tooth while living at the Bronx Zoo and zookeepers in Providence noticed last month that it had become infected. Zoo veterinarian Julie Petlo hit the bear with two anesthesia darts last week. The second one knocked Trixie out.

A team of six doctors then rushed in with their dental equipment, rolled Trixie onto a stretcher and pushed her onto a table. The team used a 4 inch-by-4 inch piece of wood to keep the bear's mouth open and a gas anesthesia to ensure she stayed asleep. Then Emily proceeded with his work.

Trixie did not stir during the operation, and was back to her old self in two days. Emily, meanwhile, said he has since received a call for another

job in the animal kingdom: this time working on a gorilla in Dallas.

#90169u1450 06/18/1990 ~United Press International
(JUNE 18) UPI - Duvall County Sheriff James McMillan calls this morning's shooting rampage in a Jacksonville, Florida, office complex ''one of the worst things'' he has ever seen. Police say seven people were killed... including the gunman... and seven people injured after the gunman opened fire at a General Motors Acceptance Corporation finance office. McMillan says the heavily armed gunman fired at random. It's NOT clear if the man turned his gun on himself. Authorities say the assailant is also being investigated in two weekend killings.

Hundreds of protesters opposed to Romania's ruling National Salvation Front have resumed a vigil in Bucharest's main University Square. The sit-in comes three days after club-swinging miners routed anti-government demonstrators from the protest spot. At least six people died as a result of the government-inspired vigilante campaign, and dozens more were injured. Opposition leaders today called for the prosecution of those responsible for the bloodshed.

Members of the U-S Conference of Mayors today disputed recent federal statistics that show drug use on the downswing. Meeting in Chicago, the municipal heads say new surveys fail to show the rise of drug use among urban dwellers, especially in the black community. Chicago Mayor Richard Daley commented that the scourge of drugs is- in his words- ''NOT going to go away.''

Emergency workers say the death toll has reached 21 in the wake of a flash flood that swept throught the mountain valleys of eastern Ohio Thursday. Shadyside Fire Chief Mark Badia gave NO information on the latest victim found, but he says authorities have accounted for all but 14 of the more than 60 originally UNaccounted for after the flood. A brief storm today raised fears of more flooding, but the rain ended quickly.

#90169u1456 06/18/1990 ~United Press International
ONLY, TN (JUNE 18) UPI - An escaped killer who read articles on wilderness survival during four days on the run was caught by a bloodhound Monday, tired, hungry and tangled in a fence only 12 miles from the prison police said.

Charles Rooker, 32, had been forced to scoop minnows from a stream and eat them before the bloodhound named Missy tracked him down in the woods, state trooper Brad Wilbanks said.

''He was about worn out,'' Wilbanks said. ''He said he just wanted to rest and lay down. He seemed happy to be going back to prison.''

Rooker, who had been serving a 32-year sentence for second-degree murder, slipped away from a work crew at the Turney Center prison Thursday. Wilbanks spotted Rooker trying to hitchhike on Interstate 40 Monday morning and sent for Missy when he fled into the woods.

When the bloodhound ran onto the killer, he was trying to free himself from a fence. Rooker carried magazine articles on surviving in the wilderness, Wilbanks said.

''Missy tracked right to him,'' he said. ''He was kind of anxious to get back and eat. He said he had found a stream with minnows in it and had been eating them.''

#90169u1461 06/18/1990 ~United Press International

PLAINVILLE, CT (JUNE 18) UPI - Kenneth LeBlanc has come up with a new ketchup bottle for those who hate to wait for their favorite condiment.

The bell-shaped bottle uses gravity and two caps to keep the ketchup flowing, but LeBlanc says the big food companies have shown little interest in the bottle he says he ''designed by common sense.''

''Americans mind the wait,'' said the carpenter, undaunted part-time inventor and lifelong tinkerer. ''I don't know why food companies don't make a bottle that works.''

Plastic squeeze bottles have not eliminated the problems of slow-pouring or clogged bottles that have plagued ketchup lovers since Henry J. Heinz first marketed bottled tomato ketchup in 1876, LeBlanc said.

His 16-ounce bottle uses a bell shape and two caps to eliminate the wait. Gravity pulls the ketchup to the bottom of the bottle, where it will flow from the bottom cap, LeBlanc said.

When the bottle is nearly empty, its bell-shape allows the user to grip its neck and shake it in a hammer-like motion, sending the last of the ketchup to the bottom opening.

The top opening allows users to refill the bottle easily, or clean it, said LeBlanc, 40, who received a patent in May 1989 and still hopes to cash in big on his invention in a U.S. market worth $500 million.

He had the idea for his bottle in 1986 while watching his daughter, Christine, then 8, struggle to shake ketchup from a traditional bottle. He

said he spent $3,800 and four years developing his design.

Heinz U.S.A., which controls 52 percent of the U.S. market, however, has told LeBlanc it is not interested in his bottle.

Along with the Coca-Cola bottle, the traditional glass Heinz ketchup bottle, last redesigned in 1944, is one of the most recognized bottles in America.

About 104 million of the 150 million bottles Heinz sells in the United States are plastic squeeze bottles, a spokeswoman said.

WASHINGTON (JUNE 18) UPI - The Bush administration is not ruling out the possibility that Libya is building a second chemical weapons plant, a White House spokesman said Monday, adding that reports of another plant having been destroyed by fire appear to have been a hoax.

White House press secretary Marlin Fitzwater was responding to reports in Monday's Washington Times that said Col. Moammar Gadhafi is constructing a second chemical weapons plant underground at the desert location near Sebha, a town 460 miles from Tripoli.

''I don't have any information we're prepared to give out,'' Fitzwater said. ''We don't comment on intelligence matters. We are making an assessment. We don't have any conclusions to give.''

In view of Libya's ''willingness to deceive the world,'' Fitzwater said, ''we have great suspicions. We're prepared to believe the worst.'' As a result of ''actions in the past, we can't rule out anything.''

In early March, the United States claimed Libya was producing chemical weapons in a plant at Rabta, about 60 miles from Tripoli, and shortly afterward there were reports that the plant had been destroyed by a fire. That report was never confirmed and Monday Fitzwater said, ''It seems most likely that it was a hoax.'' In answer to a question Fitzwater said the plant ''is still in business.''

The Times said the new facility was detected last month by Israeli intelligence and confirmed by the CIA in a report circulated within the U.S. government last week.

The newspaper said sources reported the new Libyan plant was photographed under construction by a U.S. spy satellite and U.S. intelligence agencies estimated the plant will be completed in two years.

It quoted its sources as saying that the Chinese government is involved in the construction of the new plant and has provided chemicals for the poison agents being made at the Rabta plant.

At the State Department, spokesman Richard Boucher said the issue of the dangers of chemical weapons proliferation has been raised with other countries, including China.

He said, ''China understands our specific concerns about Libya's attempts to acquire chemical weapons capability.''

He said China has stated its opposition to the manufacture, possession and use of chemical weapons. ''We expect China to live up to these public commitments.''

(JUNE 18) UPI - The Supreme Court ruled that the federal government has the authority to order companies to resume funding pension plans. The decision in the case by the Pension Benefit Guaranty Corporation reverses a lower court ruling holding the government corporation liable for three pension plans of L-T-V Corporation. In today's 8-1 ruling, the high court sided with government and said the lower court rulings threatened the federally insured program.

Authorities say a New Jersey state trooper on a bicycle tour to promote awareness of drunk driving was himself seriously injured when he was hit by a car driven by a motorist who had been drinking. Police say Joseph Cyran was about 30 miles from his final stop in Atlantic City when he was hit by a car Saturday. Officials say the car's 28-year-old driver is charged with driving while intoxicated.

#90169u1483 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The House passed Monday and sent to the Senate a $50 million bill to provide states with matching money for cervical and breast cancer screening programs for low-income women.

The House also authorized extending the tuberculosis prevention and control program.

Last year, about 43,000 women died of breast cancer and about 6,000 women died of cervical cancer. Studies have shown that early detection could have prevented many of those deaths.

The Breast and Cervical Cancer Mortality Prevention Act, passed on a voice

vote, would authorize the Centers for Disease Control to provide grants to states for screening women for breast and cervical cancer and providing referral services. Priority would be given to low-income women.

Grants also would be used to develop public information and education programs for the prevention and control of these types of cancers.

Marilyn Quayle, the vice president's wife, supported the legislation during subcommittee hearings last month, calling for ''all-out war'' against breast cancer, which killed her mother.

''I think all of us share Mrs. Quayle's concern that we have waited far too long in addressing this major public health problem,'' Rep. Henry Waxman, D-Calif., said.

Rep. Edward Madigan, R-Ill., said, ''Providing federal funds for early detection of breast and cervical cancer for low-income women is an appropriate role for the federal government.''

States would be required to provide $3 for every $1 in federal funds.

The bill authorizes $50 million for fiscal year 1991 and an unidentified sum necessary for fiscal years 1992 and 1993. Congress must still pass an appropriations bill to actually provide the money.

The House also gave voice vote approval to authorizing $36 million in fiscal year 1991 for the tuberculosis control and prevention program and additional sums through 1995.

''This is a disease that should have been eradicated in this country, but it continues to infect and kill,'' Waxman said.

''TB is thought of as a disease of the past,'' Madigan said, ''but unfortunately it persists as a public health program in the United States.''

He said there are about 20,000 new cases of tuberculosis each year and about 2,000 deaths.

#90169u1513 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - Georgetown basketball coach John Thompson has been offered $700,000 a year to relinquish the post he has held for 18 seasons and become general manager of the Denver Nuggets, according to a report published Monday.

USA Today reported that Nuggets co-owners Bob Wussler, Bertram Lee and

Peter Bynoe were in Washington Sunday to meet with Thompson and that the trio offered him a $700,000-a-year on a fou- or five-year contract. Wussler said Thompson would also have an opportunity to own almost 4 percent of the franchise if he accepted the job.

When reached Sunday, Thompson told USA Today, ''I would say I'll be coaching at Georgetown next year. That's what I believe will happen. (But) we are exploring our options. I think I owe it to myself to listen anytime somebody proposes something to me.''

Georgetown spokesman Bill Shapland said Monday that Thompson was not yet prepared to release any statement concerning the Nuggets.

Thompson, 48, has been at Georgetown for 18 years, compiling a 423-142 record and winning the 1984 NCAA championship. He also coached the 1988 Olympic team.

''I'm not looking to leave,'' Thompson told USA Today. ''I have always had great respect and admiration for the Denver people, and I have even more now. We are having discussions but they are no more than discussions.''

The Nuggets also were interested in former Philadelphia 76ers general manager John Nash but Nash was named Washington Bullets GM at a late-afternoon news conference Monday.

#90169u1526 06/18/1990 ~United Press International

LONDON (JUNE 18) UPI - Stock prices closed broadly lower in moderate trading Monday on the London International stock exchange, hammered by poor economic indicators and worries over Britain's full entry into the European Monetary System.

The blue-chip Financial Times 100-stock index, which fell 10.7 points Friday, tumbled 21.8 points to 2,370.5. The narrower top 30 industrial average lost 14.0 points to 1,911.9.

Volume amounted to around 403 million shares, little changed from the 400 million shares changing hands on Friday.

Analysts said the gloomy trading mood stemmed from several disappointing economic reports, which showed that the new poll tax and business rates had undermined public sector borrowing, while unit wage costs continued to rise.

The British Treasury reported the public borrowing requirement (PSBR), the most widely used measure of Britain's government deficit or surplus showed a deficit of around $2.64 billion in May compared with a deficit of $3.28

billion in April and a surplus of $1.38 billion in May 1989.

Forecasts of the May deficit ranged widely between a surplus of around $2.3 billion and a deficit of $4.65 billion. The average forecast was for a deficit of about $1.15 billion.

In addition, the government said unit labor costs rose a seasonally adjusted 0.7 percent in April from March and were up 7.6 percent from a year earlier.

In a seperate report, the Central Statistical Office reported Britain's industrial production rose 0.5 percent in April from March and was up 0.6 percent from April 1989.

Output in all industries rose 0.7 percent in the latest three months ended April from the preceding three months and was up 0.5 percent from a year earlier, the government said.

Analysts said the rise in industrial production showed Britain's industry was too buoyant.

Market watchers said the reports aggravated inflationary fears and deflated the markets' earlier hopes surrounding Britain's potential to enter the pound into the exchange rate mechanism of the EMS.

On the trading floor, among the most widely traded stocks, BAA, the airports management concern, gained 11 cents to $6.77 after reporting a 29 percent rise in its latest pretax profits for the year.

Among some of the international issues, Imperial Chemical Industries eased 2 cents to $19.82, Barclays Bank PLC slipped 6 cents to $6.22 and British Petroleum lost 4 cents to $5.17.

British Aerospace fell 14 cents to $8.92 as investors awaited an EC report on BA's Rover deal.

In a weak banking sector, National Westminster fell 14 cents to $5.34.

In the pharmaceutical sector, Wellcome PLC gained 6 cents to $10.64 after the European Community cleared the way for wider use of its AIDS drug, Retrovir.

Elsewhere in Europe, in Frankfurt, stock prices on the Frankfurt Stock Exchange ended slightly higher in sluggish trading.

The closely watched German Stock Index closed up 5.16 points to 1,797.42 in what analysts called a small technical reaction to last week's streak of losses.

#90169u1532 06/18/1990 ~United Press International

WARWICK, RI (JUNE 18) UPI - Foster Parents Plan, an international relief organization that has helped children for more than 50 years, is changing its name in an effort to grow faster, officials said Monday.

The agency's United States chapter will immediately be known as PLAN International USA, and chapters in seven other countries will adopt the PLAN International logo, with their respective names following, over the next five years, said the public relations director for the U.S. chapter.

''The reason we are changing now is, frankly, that the name (Foster Parents Plan) has become a marketing problem for us,'' Julie Gross said. ''The impact of advertising dollars has been absolutely weakened by the name problem. We know from research and marketing that many people confuse us with other foster parents plans.''

Foster Parents Plan began 53 years ago as a relief organization for orphaned and refugee children of the Spanish civil war. It was originally known as Foster Parents Scheme for Children in Spain.

Organizers quickly changed ''scheme'' to ''plan'' because it conveyed a more positive image. Several years later it became known as Foster Parents Plan for War Children, as relief efforts spread to other parts of Europe. And in 1956 it became simply Foster Parents Plan, and its focus shifted more to Third World nations.

The organization today serves more than 500,000 children from 26 countries in Africa, Asia, Latin America and the Caribbean.

Gross said the organization has been aware for some time it had a problem with its name; some people had the impression it places children in foster homes.

In reality, the organization enlists sponsors whose money helps to improve the health, education, family income, and community infrastructures for children in impoverished areas.

In addition to changing its name immediately, the Warwick, R.I.-based U.S. chapter's sponsorship program will adopt the name of ''Childreach,'' to underscore its ''personal focus,'' officials said.

The organization also has chapters in Belgium, Canada, the United Kingdom, Australia, Japan, the Netherlands, and West Germany. They will also make the name switch over the same five-year time frame, Gross said.

#90169u1552 06/18/1990 ~United Press International

GALVESTON, TX (JUNE 18) UPI - Booms were set out Monday to protect sensitive coastal marshlands and volunteers worked to clear trash from a 40-mile stretch of beach before the arrival of oil from the fire-scarred tanker Mega Borg.

Tar balls that washed ashore near Sabine Pass at the Texas-Louisiana border were being analyzed, but Coast Guard Petty Officer Mark Sedwick said the oil remnants were not believed to have come from the tanker.

The Mega Borg dropped at least 3.9 million gallons of light crude into the Gulf of Mexico after it was rocked by a series of explosions and fire that began June 8. Two men were killed and two others were missing and presumed dead.

Most of the spilled oil was consumed in the fire that burned for a week.

The flow of oil from the crippled ship was stemmed Sunday, and a 30-mile long oil slick moving toward the Texas coast was stalled by winds 8-10 miles offshore, Sedwick said.

''It's pretty much stalled because the last couple of days the wind had been pushing it eastward,'' he said. ''Now it's pushing it westward, so it's just kind of a tug-of-war out there. It really isn't moving any closer to shore.''

Skimmer boats pressed a clean-up of oil from the warm gulf waters Monday, and the Coast Guard set up a line of booms in hopes of keeping the light crude from reaching coastal marshlands.

''We're trying to protect them,'' Sedwick said. ''They're much more sensitive than if it would come up on a sandy beach area, which is easier to clean.

''We don't know how long it will be (before the oil reaches shore). We're just trying to do the best we can in ascertaining where it's going to come ashore. With the wind conditions being what they are, it's very difficult to predict.

''Our main defense still is to attack the leading edge of the sheen with skimmers, trying to get up as much as we can before it reaches the shore.''

State officials, meanwhile, prepared for a second application of oil-gobbling microbes on a portion of the spill. The microbes, part of a process called bioremediation, were sprayed on a portion of the spill last week, but the experiment was inconclusive.

''With a couple of flyovers, there's no oil and there's no oil anywhere around there. Visually, it's great,'' said Dave Roberts, a spokesman for the Texas General Land Office, which is backing use of the microbes. ''But from a hard, scientific point of view, we don't know.

''Did the oil just go away on its own? We don't know. They saw a change in color in the area where they sprayed. They saw it. So it did react, and there was some action going on. Whether we took care of a big patch of oil we can't prove.''

Scientists will try to prove the process's value Tuesday by deploying two ring-shaped booms to contain portions of the slick. The oil-eating micro-organisms will be applied in one ring and not in the other.

''What we've got here is a giant, floating lab,'' Roberts said. ''(Texas) A&M people will start taking samples from each one periodically and then they're going to analyze it. That may take a few days.''

Volunteers converged on a 40-mile stretch of beach from High Island northeast to Sabine Pass Monday in a cleanup effort in advance of the spill's landfall.

''What we need to do is get that stuff off the beach so we can do a good oil cleanup,'' Roberts said.

Efforts continued Monday to stabilize the heeling 885-foot Norwegian tanker anchored 57 miles off the Texas coast with salvage crews transfering oil from the damaged No. 4 center tank to the No. 5 starboard tank and pumping water out of another tank.

''This has raised the stern 2 feet, and brought the tanker to a more level position,'' Sedwick said. ''They're shifting the cargo around, pumping water out, to bring the ship level again.''

Lightering, the transfer of the supertanker's remaining cargo to smaller vessels, may begin Tuesday or Wednesday, Sedwick said.

Thousands of gallons of chemical dispersants earlier were dropped on the oil that spilled from the vessel, transforming the crude into a non-toxic mousse, and 11 skimmer boats have picked up 250,740 gallons, officials said.

Federal officials were making aerial sweeps to monitor the impact on marine life, particularly dolphins and loggerhead turtles. They had spotted at least five turtles sullied by the oil.

Workers were trying to rescue the turtles, which will be cleaned and

rehabilitated at the National Marine and Fisheries Service laboratory in Galveston, which has a special turtle facility.

#90169u1564 06/18/1990 ~United Press International

TORONTO (JUNE 18) UPI - Burns Fry Ltd. announced Monday it signed an agreement to purchase the Canadian retail division of Prudential-Bache Securities Canada Ltd.

The Toronto-based investment dealer did not disclose terms of the deal.

The Canadian unit of New York-based Prudential-Bache Securities Inc. will continue its Canadian cross-border investment banking activities, president and chief executive officer George V. McGough said in a statement. Pru-Bache in turn is owned by Prudential Insurance Co. of America, based in Newark, N.J.

McGough said the decision to sell the retail division came after a review of the company's Canadian operations.

Barry M. Cooper, Burns Fry executive vice president, said in a statement the purchase was a chance to add an ''established, high-quality, experienced sales force to our team of professionals.''

Burns Fry said the acquisition will bring the firm's number of ''investment executives'' to about 500. The company has 1,500 employees across Canada, 280 of them salesmen, a spokewoman said.

A ''majority'' of Prudential Bache Canada's workers will be transferred to Burns Fry, with the merger to be phased in over several months, Burns Fry said.

Prudential Bache Canada has about 700 staffers, some 240 of whom are brokers.

The acquisition continues a string of such deals engineered by Burns Fry, 30 percent owned by Security Pacific Corp. of California, over the last two years in Canada.

The transaction comes several months after another U.S. securities dealer Merrill Lynch, retreated from Canada, having sold its entire Canadian retail arm to Wood Gundy Inc.

Burns Fry reported 1989 income of $4.25 million on revenue of $257 million.

#90169u1568 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The State Department called Monday for the Romanian government to immediately release demonstrators wrongfully jailed by authorities last week and once again warned that U.S. economic aid will be held back until the new government in Bucharest respects human rights.

Spokesman Richard Boucher said the United States is awaiting evidence that President-elect Ion Iliescu ''will permit democratic pluralism'' before there can be any further consideration of non-humanitarian economic assistance from the U.S. government.

The State Department said last week that there would be no consideration of granting Romanian most-favored-nation tariff status as long as the Romanian government continued in what Boucher described as the ''vicious suppression'' of demonstrations in Bucharest.

Thousands of miners wielding clubs invaded Bucharest Thursday after Iliescu appealed to workers to defend his government in the wake of anti-communist protests.

Hundreds of political opponents of the Iliescu government were reported arrested. Boucher said, ''We call on the government of Romania to release immediately all those who were wrongfully detained.''

Boucher said that the official toll in last week's violence was six dead and about 500 injured, but he noted that other, unofficial accounts put the number of dead and injured much higher.

-30- 1556

#90169u1596 06/18/1990 ~United Press International

DES MOINES, IA (JUNE 18) UPI - Food scientist John Niederhauser, known as ''Mr. Potato'' by admirers, was named the recipient of the World Food Prize Monday for developing blight-resistant potato varieties from Mexico to Bangladesh.

As winner of the award, which sponsors hope will eventually rival the Nobel Prize in prestige, Niederhauser will receive $200,000.

The 1990 award also marked a change in sponsorship from the General Foods Foundation, a subsidiary of Philip Morris, to the John Ruan Foundation based in Des Moines.

The four-year-old food prize was in danger of being ended earlier this year when General Foods announced it could no longer sponsor the prize after 1990.

Nobel Peace Prize winner in 1970 and Iowa native Norman Borlaug conceived

the World Food Prize to honor food scientists who have helped world peace by feeding hungry populations.

''When I first heard I was the recipient I was stunned,'' Niederhauser said. ''But on reflection, I feel a great sense of pride and accept this prize on behalf of all the farmers and scientists who have helped feed the world.''

Niederhauser and Borlaug were among the scientists who engineered the ''green revolution'', credited with sparing the world from massive famine by developing new high-yielding varieties of wheat, rice and other staples.

But Niederhauser said the world cannot rely on new discoveries to keep pace with burgeoning populations and must work to organize an efficient world food system and eliminate bottlenecks that create shortages.

''We've more or less kept up with the nutrition needs, however, the growing threat of an increasing world population requires more action,'' Niederhauser said.

He called feeding the world ''the greatest challenge in history.''

''We must feed more people and feed people more and then have a world in peace,'' Niederhauser said.

Borlaug said world population has reached 5.3 billion and demographers have realized they have underestimated annual growth by 10 million people a year. Experts now believe the world is growing by 94 million people a year, Borlaug said.

Niederhauser was a young Cornell University professor in 1946 when he accepted a positon in Mexico with the Rockefeller Foundation. A Cornell administrator's farewell words to Niederhauser were ''nobody will ever hear of you again.''

Niederhauser attacked the same potato blight disease that swept over Europe in the 19th century, causing the 1840s Irish famine.

In Mexico alone, his discoveries helped increase potato production from 134,000 metric tons in 1948 to more than a million metric tons between 1978 and 1982.

In 1982, Niederhauser helped revolutionize potato-growing in Poland. He's also a founder of the International Potato Center based in Lima, Peru and advises the Biosphere II project in Tuscon, Ariz., where eight people will try to grow their own food in a sealed environment for two years.

The new sponsor of the food prize is John Ruan, a trucking and insurance

magnate who has dreamed of bringing the prize to Iowa.

Iowa State University will administer the prize.

Past winners of the World Food Prize were M.S. Swaminathan of India, the architect of India's green revolution; Robert Chandler of the United States, who revolutioned world rice production from his base in the Philippines and Verghese Kurien, developer of India's dairy industry.

#90169u1629 06/18/1990 ~United Press International

KIEV, USSR (JUNE 18) UPI - Hundreds of heavily armed Soviet troops Monday put down a prison riot in central Russia led by ''hardened criminals,'' but inmates apparently held part of another facility in the Ukraine, official reports said.

An unknown number of prisoners were killed or wounded in the rioting, government media outlets reported. They said the assault was made when the rioters refused to release guards who had been taken hostage.

One riot involved about 1,000 prisoners in Chelyabinsk, in the eastern foothills of the Urals about 900 miles east of Moscow.

It began three days after an uprising at a prison in Dnepropetrovsk, located in the Ukraine about 550 miles south of the Soviet capital.

Inmates involved in both uprisings were demanding better conditions, but there was no indication the incidents were linked.

At least one person was known dead in the Dnepropetrovsk riot, and nationalist sources in the Ukranian capital of Kiev said as many as four may have died.

Prisoners still apparently controlled an isolation unit at the Dnepropetrovsk prison Monday, but an Interior Ministry spokesman in Moscow said authorities had decided not to use force and the situation there was ''peaceful.''

A correspondent for the government newspaper Izvestia in Dnepropetrovsk reported Friday that more than 1,000 prisoners ''instituted mass disorders'' Thursday night, setting fires and taking control of the No. 1 isolation unit.

He said one prisoner was killed by guards and another wounded in an escape attempt. The inmates allowed women and youthful prisoners to leave the facility Saturday.

The Soviet news agency Interfax said 1,000 of the Dnepropetrovsk prisoners had surrendered by Monday morning but an unspecified number of inmates armed with spades, axes and pitchforks still held the facility and were negotiating with authorities by radio.

The Interior Ministry spokesman in Moscow said the Dnepropetrovsk prisoners were allowed to meet with leaders of the Rukh Ukranian nationalist movement and members of local and national Parliaments.

Izvestia said Sunday talks were continuing and officials were ''seriously considering'' the inmates' demands.

In Chelyabinsk, the official Soviet news agency Tass said riots began Sunday when several inmates attacked guards in the prison yard, stole their keys and released about 1,000 inmates from their cells.

The inmates took six guards hostage. Officials met their demand for a meeting with reporters, Interior Ministry officials and a Russian Orthodox priest.

The leaders of the riot were described by Tass as ''hardened criminals convicted of such crimes as murder and extortion.'' They were shown on Soviet television voicing their demands.

Tass said the prisoners refused to release their hostages when the meeting ended and authorities decided to retake the prison by force Sunday night.

The TV showed hundreds of soldiers armed with rifles and clubs and carrying large shields outside the prison. Several armored personnel carriers were also shown outside the prison gates.

''The prison riot stopped only when troops opened fire,'' Tass said, adding that the prisoners were armed with crude home-made knives and sticks. Soviet television said authorities did not regain control of the prison until Monday.

#90169u1634 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - International Business Machines Corp., targeting a share of the $50 billion training business, will unveil Tuesday a sophisticated system using computer and video laser technology.

IBM is introducing its new MultiMedia training system at the 8th Annual PC Expo, which is being held at New York's Jacob K. Javits Convention Center Tuesday through Thursday.

The system combines the computing abilities of a personal computer or a workstation with the video laser storage technology and its ability to retrieve data simultaneously, said Peter Blakeney, manager for IBM's MultiMedia Solutions division.

''The integration of motion video with high-quality still pictures, sound and animation along with the computer resources provided by our new interfaces will open a new world for PC users,'' Blakeney said.

''Today, a child graduating from high-school would have spent a total of 12,000 hours in the class room since the first grade, while during that period, he would have spent 20,000 hours in front of the television,''

Blakeney added.

''In order to reach out in terms of training, we have to take the technology that can communicate best in the medium children are used to, the visual medium.''

The technology, called MultiMedia in the industry, is based on the latest laser disc technology which allows to store and instantly retrieve large volumes of data, text, audio, video and graphics information on a small medium.

The information can be accessed by personal computers while interface cards allow users to retrieve data and work on them on an interactive basis.

''The new development IBM is introducing at PC Expo is that the same file can be accessed simultaneously by multiple receivers through a cable network,'' Blakeney said.

Multiple users at different locations can access one single pool of data simultaneously and work on different segments on the information according to their needs, cutting down training costs, he said.

IBM has developed a number of education-related training programs, including ''PALS,'' that teach adults to read and write. The program, aimed at an estimated 30 million Americans regarded as functionally illiterate, sharply reduces the time needed to teach basic skills to an adult.

A large number of vendors have developed training courses to run on the IBM system in both education and industrial fields.

IBM is targeting major potential revenues in the computer-based training sector, a new area of growth for the giant hardware manufacturer.

IBM last year announced a new business strategy aimed at higher profits, which involved trimming staff and launching new products including areas outside the company's hardware core business.

#90169u1635 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The National Institutes of Health fails to include enough female patients in medical studies, casting doubt on how the results of major research apply to women, congressional investigators reported Monday.

Landmark studies on many important health problems such as cancer and

heart disease have focused primarily on men despite the strong likelihood of gender differences, according to a study by the Government Accounting Office, an investigative agency of Congress.

Despite this, the NIH, which coordinates the nation's medical research, has not adequately implemented a 1986 policy aimed at making sure doctors understand how diseases and treatments affect women as well as men, the report concluded.

"A few of the people we talked to, I think it's fair to say, were pretty dismissive of these concerns," Mark Nadel, who led the study, testified during a congressional hearing. "I think they make the assumption that ... there are just no differences between men and women."

He cited a landmark study that indicated taking an aspirin every other day could sharply the reduce the risk of heart attacks. The study involved only men even though heart disease is the No. 1 killer of both sexes.

Part of the rationale for excluding women from research - and even for using male instead of female rats - was that the hormonal changes that occur during menstruation make it difficult to interpret results, Nadel said.

Based on the GAO report and Nadel's testimony, congressional overseers called for steps to be taken to ensure women and men are treated equally in medical research.

"It seems to be we're faced with a fairly outrageous situation," said Rep. Henry Waxman, D-Calif., chairman of the subcommittee on health and the environment that requested the report.

Acting NIH Director William Raub and other NIH officials acknowledged the policy had not been properly implemented. Reports that some officials viewed such concerns with "arrogance or indifference" were "very serious," he said. But Raub defended the NIH's performance overall, saying women's health concerns were not shortchanged.

"When one looks at the array of ongoing studies ... in the vast majority women are indeed well-represented as subjects. What that says to me is that the system overall is not grossly out of focus. It does need some fine-tuning ... some sharp-focusing in a particular context. And we intend to do that," he said.

But Rep. Patricia Schroeder, D-Colo., and Rep. Olympia Snowe, R-Maine, criticized the NIH for failing to do enough research on women's health issues and taking so long to make changes.

"What it's really doing is saying it's OK to put women's health at risk,"

Schroeder said. "This whole area of neglect is absolutely shocking and appalling," she said, citing a prevous study that found only 13 percent of the NIH budget was spent on women's health issues.

MOSCOW (JUNE 18) UPI - The Soviet airline Aeroflot will begin weekly direct flights between Leningrad and New York in August under an agreement signed at the Washington summit, the official Soviet news agency Tass said Monday.

Yuri Balakin, head of the Aeroflot office in Leningrad, said a 350-seat Il-86 would make the flight every Thursday, with refueling stops in Ireland and Canada.

The new air route was opened for Soviet flights under an agreement signed at the Washington summit earlier this month to increase air travel between the United States and the Soviet Union.

SOFIA, Bulgaria (JUNE 18) UPI - The former Communist Party won a majority of seats in Bulgaria's Parliament, official returns showed Monday, making it the second East European nation to choose communist leadership freely after more than four decades of communist monopoly rule.

The Electoral Commission said the communists, who recently changed their name to the Socialist Party, won 211 seats in the 400-member Grand National Assembly, or nearly 53 percent of the vote.

The main opposition movement, the Union of Democratic Forces, won 144 seats, or 36 percent, followed by 23 for the Movement for Rights and Freedoms, which represents the sizable ethnic Turkish population.

The election puts Bulgaria in the company of Romania among East European nations voluntarily returning former Communist Party leaders to power after more than four decades of Communist monopoly rule.

The election Sunday was the second round of voting, occurring in 81 constitutencies where no candidate had won a majority in the first round June 10.

After the first round, the Socialists held 172 seats in the Parliament and the UDF held 197.

The Agrarian Party, once allied with the former Communists, got 16 seats

in Parliament after the two rounds of voting, while six were distributed among other parties and independents.

In a surprising upset, Defense Minister Dobri Dzhourov lost in the small town of Troyan to the literary critic Yordan Vassilev, editor-in-chief of the UDF's daily ''Democratsya,'' the Bulgarian news agency BTA said.

A companion of former hard-line leader Todor Zhivkov and a top-ranking official for more than 30 years, General Dzhourov was considered the country's most popular figure for the role he played in ousting Zhivkov last November.

Among other well-known officials who lost to opposition candidates were George Pirinski, deputy chairman of the Socialist Party, its spokesman Filip Bokof, and Stefan Prodev, editor-in-chief of the party newspaper, Douma.

The UDF also had some election casualties, including Milan Drenchev, leader of the Nikola Petkov movement, the largest within the opposition coalition.

Peter Beron, a noted environmentalist and secretary of the UDF's Coordinating Council, lost to Finance Minister Belcho Belchev, who is deputy chairman of the Council of Ministers and a member of the Socialist Party leadership.

However, Prime Minister Andrei Loukanov won his race against a Socialist candidate in the second round of voting.

The Grand National Assembly is scheduled to sit for approximately 1 1/2 years and its main task will be to formulate a new constitution.

About 75 percent of those eligible cast their votes in Sunday's elections, less than the 90.7 percent that voted on June 10.

In Sofia, about 68 percent voted, sending 26 UDF and two Socialist candidates to Parliament.

Socialist candidates won in all rural regions and in almost small towns, except for the areas populated by ethnic Turks, where candidates of the Movement for Rights and Freedoms did well.

After the November ouster of former leader Zhivkov, the former Communist Party adopted a social-democratic platform and carried out numerous reforms.

Although some of them lost elections in single-member constituencies, almost all leaders of parties and organizations - both the Socialists and

the opposition - will be returned to Parliament because they are on electoral lists of the 28 multi-member constitutencies where elections were held based on a proportional representation basis.

#90169u1689 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The Supreme Court upheld Monday the practice of videotaping suspected drunken drivers, but placed limits on the kinds of questions police are permitted to ask.

The high court, reviewing a Pennsylvania case, held that using a videotape of a suspect as evidence at a drunken driving trial does not violate a person's constitutional right against self-incrimination.

However, the court said police do not have unlimited authority in making such tapes and must not ask questions that constitute an ''unwarned interrogation.''

Justice William Brennan, in a complex ruling with various members of the court concurring and dissenting, said the court did ''not agree that the entire audio portion of the videotape must be supressed.''

He said that questions asked the suspect were limited and necessary to conduct the various sobriety checks and ''were not likely to be perceived as calling for any incriminating response.''

The ruling came less than a week after the high court upheld the constitutionality of roadside sobriety checkpoints used by police to combat drunken driving. The court said such stops do not violate the Constitution's ban against unreaonable search and seizure.

J. Michael Eakin, district attorney in Cumberland County, Pa., where the case against Inocencio Muniz was tried, called the ruling a victory for police who ''worry about (suspect's) statements being lost as evidence.''

''The ruling states that as long as we follow a careful script of questioning without (giving) Miranda (warnings), we're not violating anyone's rights and we're pretty happy about that,'' Eakin said.

''There's nothing wrong as long as you don't try to trick (the suspect) with a sneaky question, which we did,'' he said, referring to officers asking Muniz the date of his sixth birthday during sobriety tests.

Mothers Against Drunk Driving hailed the high court's ruling and called the practice of videotapping ''another important tool in the fight against drunken driving.''

''This is going to give the courts and juries a true picture of a person '' said Milo Kirk, national vice president for MADD. ''It's a help to the juries so they can actually see the kind of condition some of these people are in when they are pulled in.''

The case was brought before the court by the state of Pennsylvania, which argued that Muniz's drunken driving conviction should not have been reversed.

The trial court had allowed the videotape to be used as evidence at Muniz's trial and he was convicted of driving under the influence of alcohol.

On appeal, however, a Pennsylvania Superior Court overturned his conviction in 1988. The court said that Muniz should not have been questioned without his Miranda rights.

Pennsylvania authorities contended that Miranda warnings were not necessary at that time because his statements were taken to show his physical coordination.

Muniz's statements included responses he made to police who asked him the date of his sixth birthday, to count a series of numbers, whether he understood the directions he was given, as well as his address, height and weight.

The Supreme Court said responses by Muniz should not have been suppressed, but that his answer to the sixth birthday question was incriminating and should not have been ruled admissable. The court said the content of his answer showed that his mental state was confused and therefore was incriminating.

''Muniz's answer to the sixth birthday question was incriminating, not just because of his delivery but also because of his answer's content,'' Brennan said. ''The trier of fact could infer from Muniz's answer (that he did not know the proper date) that his mental state was confused.''

Chief Justice William Rehnquist, dissenting from portions of the ruling, and joined by Justices Byron White, Harry Blackmun and John Paul Stevens, said the sixth birthday question should not have been suppressed.

''If police may require Muniz to use his body in order to demonstrate the level of his physical coordination, there is no reason why they should not be able to require him to speak or write in order to deterine his mental coordination.''

#90169u1694 06/18/1990 ~United Press International
(JUNE 18) UPI - Police say a gunman whose vehicle had been repossessed opened fire with an automatic weapon in a loan office today in Jacksonville, Florida, killing seven people and injuring at least six. The gunman also died in the rampage. Police say the gunman was under investigation for two weekend killings in his neighborhood.

White House news secretary Marlin Fitzwater says the Bush administration has ''great suspicions'' that Libya may be building a second chemical weapons plant. The announcement comes as a published report says Libyan leader Moammar Gadhafi is constructing another plant beneath the desert, some 450 miles from Tripoli.

Jury selection was completed today in the trial of Washington, D-C, Mayor Marion Barry. The jury of 12 regulars and six alternates consists of 15 women... a dozen of them black... and three men, one of whom is black. Many Barry supporters say the case against him is an attempt by the white establishment to undercut black politicians.

South African black nationalist Nelson Mandela today addressed the Canadian parliament and told lawmakers that economic sanctions are the most important way to do away with the system of apartheid. Mandela stressed to his audience that recent steps taken by the white minority government do NOT mean the institutionalized method of racial segregation is dead.

In Johannesburg, South African President F-W de Klerk moved today to forge a national pro-government black alliance to counter the growing influence of Mandela's African National Congress. De Klerk met with government-appointed black officials and other leaders in a bid to undercut the power of the socialist A-N-C.

#90169u1697 06/18/1990 ~United Press International
WASHINGTON (JUNE 18) UPI - The Supreme Court, in a case the government said threatened the federal pension insurance program, ruled Monday the federal government has the power to order companies to resume funding pension plans.

The court, in a case brought by the Pensions Benefit Guaranty Corp., reversed a lower court ruling that held the government corporation liable for three pension plans of the LTV Corp.

At issue was whether companies facing financial difficulty can turn their pension plans over to the PBGC and later make up any benefits employees

may have lost without taking back financial responsibility for the plan. Such arrangements are called follow-on plans.

The PBGC, a government corporation created by the Employee Retirement Security Act, guarantees pension plans like other government programs guarantee bank deposits. Companies whose pension plans are covered by the PBGC pay fees that can be used to cover losses in pension plans.

In seeking high court review, the PBGC warned that if the lower court decisions were allowed to stand, they ''could have a crippling impact on the pension insurance program.''

''The result will be a fundamental transformation of the PBGC's role and a dramatic increase in the PBGC's liabilities that could lead to a finanacial crisis similar to that currently'' faced by the government in the savings and loan crisis, the PBGC said.

The court, in an 8-1 ruling by Justice Harry Blackmun, agreed.

He wrote that the PBGC's ''anti-follow-on policy ... is not contrary to clear congressional intent.'' He also said the procedure employed by the PBGC was proper.

Justice John Paul Stevens dissented.

Responding to the Supreme Court Ruling, Labor Secretary Elizabeth Dole said, ''Forty Million workers and retirees can sleep better tonight because of today's Supreme Court decision. PBGC's victory will help discourage unwarranted termination of pension plans and encourage better funding of pensions.''

PBGC Executive Director James Lockhart said LTV retirees and workers will get their full pensions as originally promised.

The pension agency said it will begin immeditely to work with LTV to return the pension to the company and also work with the company to assure smooth administration of benefits payments to some 60,000 retirees and 40,000 workers.

''Pensioners will continue to receive their benefits each month on time and LTV will have to adjust the pension checks to reflect 100 percent of the benefits originally promised in the plans,'' the agency said.

In 1986, LTV, facing plant shutdowns and Chapter 11 bankruptcy, turned the pension plans that were underfunded by $2.1 billion over to the PBGC. As a result of that action, plan participants lost some benefits and the steel union sought a court order to have the benefits restored.

Such an arrangement was worked out and approved by the court over objections of the PBGC.

In 1987 LTV, and the steel industry in general, underwent a dramatic financial turnaround. The PBGC, now believing LTV could meet its responsibility to the pension plans, sought to return them. The company refused to take back the plans and was backed up by the 2nd U.S. Circuit Court of Appeals.

In seeking high court review, PBGC said if the decision is allowed to stand ''other companies will follow LTV's example and use pension insurance as a subsidy to reduce costs and gain a competitive edge. PBGC could then become an open-ended source of industry bailouts, unlegislated by Congress, with escalating costs to premium payers and ultimately workers.''

#90169u1713 06/18/1990 ~United Press International

CHICAGO (JUNE 18) UPI - The American Stock Exchange, the Chicago Board Options Exchange and the Cincinnati Stock Exchange Monday announced plans for a new after-hours stock and options trading system.

Officers of the three exchanges, in announcing their definitive agreement, invited the New York Stock Exchange, the Chicago Board of Trade and the Chicago Mercantile Exchange to join in the new system.

''As global markets expand, this is a significant step - and its going to be a giant step,'' CBOE Chairman Duke Chapman said.

The new system, to be operational in two to three years, was announced at simultaneous news conferences in Chicago and New York, linked through a video-conferencing system.

The agreement gives the CBOE and the AMEX exclusive rights to offer their options over the system. The CSE, in turn, plans to offer U.S. traded stocks.

Under the agreement, the CBOE will operate the host computer it will use,

along with the AMEX and the CSE, for after-hours trading. Reuters Holdings PLC will build the communications network through which Reuters terminals will access the system. Reuters also will build host computers for other exchanges that join the new after-hours system.

''We invite all markets in the world to join us,'' Amex Chairman James R. Jones said.

''We have an open invitation to the NYSE and others to sit down with us,'' he said.

Chapman said the Chicago Board of Trade and the Chicago Mercantile Exchange - the world's largest futures exchanges - also have been invited to take part in the new system, though the two exchanges already are working together on their own after-hours trading system, called Globex.

A Reuters spokesman said AMEX, the CBOE and the CSE would like to see some CME financial futures and index futures included on their new after-hours system, along with some CBOT bond futures.

He said negotiations have been held with the CBOT and CME and that further negotiations were planned.

''A global marketplace is here and there is no turning back the clock. Those that seize the opportunity now to provide investors with a market at any time will emerge as the major players in the securities industry of the future,'' Jones said.

''The American Stock Exchange is proud to join forces with the CBOE, the Cincinnati Stock Exchange and Reuters ... in meeting what we perceive will be a paramount investor need as we approach the 21st century,'' Jones said.

The CBOE and the AMEX offer options on some 435 widely held stocks and currently handle about 80 percent of the options market. They also offer interest rate options, bond options and index options.

Initial plans call for offering of options on major stocks. Index options, most notably the CBOE's Standard and Poor's 100 and 500 index options and the AMEX Major Market Index options, also may be added to the after-hours offerings, Chapman and Jones said.

#90169u1723 06/18/1990 ~United Press International

(JUNE 18) UPI - The leaders of six Central American countries closed out their two-day summit in Guatemala by agreeing that they need to link their economies in order to rejuvenate the region's sagging financial power. However, sources close to the talks say the leaders expressed disdain for an idea touted by Secretary of State Baker that calls for Western economic powers to coordinate the region's development.

The Food and Drug Administration warned today that hundreds of breathing monitors may fail to sound an alarm when babies or adult patients stop breathing. The warning involves 16-hundred devices made by a Texas firm called Electronic Monitors. Most of the monitors were sent to hospitals or home health care agencies that rent or sell them to consumers.

The parents of an American kidnapped in Ecuador today made plane reservations to travel to South America. The Peoria, Illinois, couple will try to determine what they must do to free their son after doling out a 60-thousand ransom. He is believed held by Colombian communist guerrillas who apparently have increased their ransom demand to more than 600-thousand dollars.

Workers set out booms today to protect Texas marshlands from oil heading for the Gulf coast. Nearly four-Million gallons of light crude seeped into the Gulf since the Mega Borg tanker exploded June 8th. Most of the oil was consumed by the fire.

Police today finally caught up with an escaped killer who has been on the run for four days in the dense woods of Tennessee. Bloodhounds were used to track down Charles Rooker, who consulted articles on wilderness survival as he tried to evade capture. When police found him, Rooker was tangled in a fence only 12 miles from prison.

WASHINGTON (JUNE 18) UPI - Senate leaders George Mitchell and Robert Dole indicated Monday they have not given up hope that Republican and Democratic negotiators can reach an agreement on campaign finance reform legislation.

Mitchell, the Democratic leader, said he planned to meet with his group and with Dole, possibly Tuesday, to assess the situation after negotiations that broke off late last week.

Dole, the GOP leader, said, ''It remains my hope that bipartisan negotiations could resume sometime next week.''

Sen. David Boren, D-Okla., the top representative for the Democrats, issued a statement Friday saying that the discussions had reached an impasse over the refusal by the Republicans to consider aggregate spending limits for Senate candidates.

Mitchell said he was ''surprised to read that Senator Boren had pulled the plug. I hope that's not an indication that all bets are off. I hope we can give the bipartisan negotiations another chance.''

Dole said Democrats and Republicans had reached a consensus on restricting contributions from political action committees, cutting donations from outside the state, curtailing bundling of contributions and closing the ''millionaire's loophole'' that allows a candidate to pour his own money into the campaign.

''There's simply too much at stake, and too many areas of agreement to throw in the campaign reform towel without further discussion,'' Dole said. ''Let there be no mistake about it - the Senate can pass a comprehensive and truly meaningful campaign reform bill, and it can pass such a bill this year.''

But in Senate remarks, Dole made it clear Republicans will not accept limits on spending ceilings, charging they ''disadvantage challengers and promote incumbency.''

#90169u1731 06/18/1990 ~United Press International
CHICAGO (JUNE 18) UPI - Short-covering rallied soybean futures to session highs at the close Monday on the Chicago Board of Trade. The grains followed the beans and were mostly higher, but the prospect of continued favorable growing conditions limited the gains across the floor.

Professionals were featured buyers in the soy complex in moderate trading. Soybeans and soybean oil were sharply higher at the final bell.

The entire floor had early pressure from rain and hot weather during the weekend and predictions of more rain this week. Although the weather outlook was bearish for the futures market, prices turned higher on short-covering.

Weekend rains were heaviest in a wide band from southeastern South Dakota across Iowa into northern Missouri and Southern Illinois. Crops were damaged by flooding in some low-lying areas of the Corn Belt.

News that China was in the market for 500,000 tons of export bonus wheat supported wheat prices. Harvest pressure and the lack of export sales limited the gains. September and December wheat made contract lows early in the day.

Country movement was light.

At the close, corn was up 3 1/2 to 6 1/4, soybeans up 8 3/4 to 11 3/4, wheat up 2 to down 2 1/2 and oats up 2 1/2 to 3 3/4.

CAIRO, EGYPT (JUNE 18) UPI - Iraqi President Saddam Hussein reiterated his threat Monday to attack Israel, saying he would destroy half of the Jewish state if it attacked any Arab country, Egypt's Middle East News Agency reported.

Saddam, addressing a session of the Popular Islamic Conference in Baghdad held to support Iraq, said he would come to the aid of Syria even if his arch ideological foe, Hafez Assad, was still the ruler.

''We will strike back with force and with all means at our disposal in case of (Israeli) aggression against Iraq or any other Arab country,'' MENA quoted Saddam as saying.

''Iraq will respond against Israel if it attacks Syria, even if Hafez Assad is still the ruler of Syria ... we will wipe out half of Israel with fire if there is an attack,'' he said.

Saddam earlier this year accused a number of Western countries of waging a smear campaign against Iraq after Baghdad in March executed a British journalist on spying charges. British customs the same month foiled an alleged Iraqi plot to smuggle U.S.-made nuclear triggers and parts for a supergun through London.

Saddam, accusing Western states of paving the ground for a repetition of a 1981 Israeli raid on a nuclear reactor under construction near Baghdad, threatened to wipe out half of Israel with poison gas in case of an Israeli attack.

Despite the bitterness between Iraq and Syria, Damascus offered in March to aid Iraq if it came under Israeli attack. But Assad snubbed an Arab emergency summit May 30 because it was held in Baghdad.

The Iraqi leader said Syria and Jordan could not fight Israel alone.

''Syria and Jordan cannot fight Israel alone, therefore we side by them with all our capabilities ... any aggression on any Arab country is an aggression on all the Arabs,'' Saddam was quoted as saying.

Saddam did not say whether Israel's continued occupation of a so-called security belt in southern Lebanon, or Israeli air raids on Palestinian and Hezbollah positions in Lebanon, constituted an attack on an Arab state that would require an Iraqi military response.

#90169u1760 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - Nelson Mandela's first stop after landing in the United States will be at a Bedford-Stuyvesant high school whose students need more black role models like the African National Congress leader, the school's principal said Monday.

Mandela, currently on the last leg of his historic 13-nation tour, is scheduled to arrive at Kennedy International Airport from Canada Wednesday morning for his historic three-day visit to New York City.

After he is welcomed at the airport by Mayor David Dinkins and other city officials, Mandela will ride in a motorcade to Boys and Girls High School in Bedford-Stuyvesant, the predominantly black Brooklyn neighborhood that has been plagued by drugs and crime.

The school, one of the largest in the nation with 3,200 students, will hold a 15-minute ceremony for Mandela during which student leaders will speak about how the ANC leader has inspired them, said Frank Mickens, the principal at Boys and Girls.

Mickens said even though school is not in session because Regents examinations are being conducted, he expects a large crowd of students and members of the community to attend the ceremony.

He said he was ''humbled'' by the prospect of Mandela's visit.

''The stop will touch the common people,'' he said. ''For my kids, he's a very important role model. We don't have enough positive role models in this community. And it is also very prestigious.''

Assemblyman Roger Green called the Bedford-Stuyvesant appearance a major victory for leaders who feared the country's largest black community would be overlooked in planning Mandela's visit.

''(The stop) solves two major concerns,'' Green said. ''One, that Brooklyn will be visited by this heroic figure, and two, that it's a visit primarily organized for children, who were not formerly on the agenda.''

Students from the Central Brooklyn Youth Organization came to City Hall with Green to announce plans for the rally.

''The youth from Brooklyn will be the first constituency to receive him in the United States,'' Green said. ''And considering the common yearning for racial and social justice that our youth share with their peers in Southern Africa, it is only natural that they have demonstrated great support for Mr. Mandela's visit.''

After he leaves Brooklyn, Mandela will travel to Lower Manhattan for a lunchtime tickertape parade and a reception at City Hall, officials said.

The ANC leader's visit to New York will be marked by a dramatic change in the city's night skyline.

At sunset Thursday until midnight, the Empire State building will be lit up with the African National Congress's official colors - black at the top of the 1,250-foot building, then green and gold.

The color scheme, from the 72nd floor to the 102nd floor, will created by changing the gels on the lower two sections and leaving the top lights out said Robert Udowitz, a spokesman for the building's owners and management.

The display of the ANC colors will be visible for about 80 miles, he said.

NEW YORK (JUNE 18) UPI - A record 600 exhibitors are taking part in the sold-out 8th Annual PC Expo held at New York's Jacob K. Javits Convention Center, which is expected to be attended by 60,000 people from 45 countries, exhibition representatives said Monday.

The show, scheduled for Tuesday through Thursday, is the main spring event for corporate volume buyers and trade resellers of computer product and services.

Many major computer and software manufacturers, including International Business Machines Corp., Apple Computer Inc., Compaq Computer Corp., Microsoft Corp., and Software Publishing Corp., are exhibiting their latest products at PC Expo.

The trade show will open with a keynote address by Francis Lorentz, chairman of France's Groupe Bull, entitled ''Strategies and Requirements of a New Information Order in the 90s.''

The show will also feature a ''Windows Showcase Pavillion,'' displaying applications of Microsoft's newest operating system Windows 3.0 from more than 20 key vendors, and a Connections Lab, demonstrating various solutions for computer networks.

#90169u1791 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - Tom Casey of Seattle, trying to become the first person to fly a seaplane around the world with water-only landings, said Monday he hopes Moscow will relent and let him land on Soviet territory as a safety measure.

Casey, 53, was denied permission to cross the Soviet Union on a westward flight path last month. He turned around in Anchorage, Alaska, returned to Seattle and started his trek over, headed east this time in his red, white and blue, single-engine plane, ''Liberty II.''

He stopped in Washington just long enough to have lunch and talk to reporters before heading to Long Island. He landed and took off in the Potomac River next to National Airport.

Casey estimates he must fly 10 hours a day to meet his 27,000-mile goal of returning to Seattle July 21.

Casey said Soviet officials denied him entry into Soviet airspace off Alaska last month on grounds of ''technicalities'' and ''insurmountable problems.'' But he suspects the Soviets were unsure about being able to provide fuel supplies at points near the lakes and rivers he had hoped to use.

He dismissed those worries, saying fueling would not be a problem since he carries 10 five-gallon plastic fuel jugs and could easily get a ride to an airport to collect gas.

While Casey hopes Moscow will change its mind and let him fly directly across its territory, he said he does have an alternative plan to go south from London, and hop across Europe, Egypt, Saudi Arabia, Thailand, the Philippines, Japan and then to Attu Island in the Aleutians.

If he takes route, he said, he hopes the Soviets will at least allow him to make a fuel stop on the Kamchatka Peninsula and in the Kuril Islands.

Otherwise, he will face a 1,350-mile leg to Attu, where the weather is unpredictable. If the weather deterioriates, Casey would have little additional fuel left in the plane, which already has been remodeled to hold just over 200 gallons, up from the standard 76 gallons carried in the wings of the Cessna 206 Stationaire II.

Casey tried the flight last year but his plane was destroyed while anchored overnight in Iceland.

His progress will be monitored by an on-board computer linked to navigational equipment that can verify his water landings so the National Aeronautical Association can recommend his flight to an international sanctioning body for certification as a world record.

The project - in which Casey has sunk his savings - has gotten the help of the Air Force and Navy, which are assisting with weather data, the National Oceanic and Atmospheric Administration, which supplied a special emergency locator beacon that uses satellites to pinpoint downed planes, the Aircraft Owners and Pilots Association, the Seaplane Pilots Association and the Air Safety Foundation.

The prime sponsor is Phillips Petroleum, an aviation fuel manufacturer, which is using the trip to promote a new oil suited to the advanced piston engine installed in Casey's plane. The engine has been modified with a high-technology cylinder coating process that resists wear, provides cooler operation and reduced oil consumption.

Water takeoffs and landings can put increased heat stress on engines and the increased moisture and salt in a seaplane environment can harm engines.

#90169u1794 06/18/1990 ~United Press International
PARIS (JUNE 18) UPI - France honored Gen. Charles de Gaulle Monday, 50 years after his historic radio appeal ignited an anti-Nazi resistance movement and restored the country's honor in the face of Vichy capitulation to the Nazi Third Reich.

President Francois Mitterrand presided over solemn ceremonies at the Arc de Triomphe marking de Gaulle's address in a British Broadcasting Corp. broadcast from London urging his countrymen press on their fight.

The Socialist Mitterrand, formerly was an implacable opponent of de Gaulle's, drew back a white-red-and blue tricolour flag to unveil a bronze plaque.

Mitterrand and Prime Minister Michel Rocard then took a salute from bemedaled former resistance figthters and World War II Free French veterans as the partisans' song, a rousing anti-fascist ballad, blared out under blazing sunshine.

Some 100,000 people were expected to attend a 70-minute sound and light show Monday night on the banks of the river Seine to retrace the history of France at the time of de Gaulle's June 18, 1940, appeal. A giant fireworks display was planned. A huge mock-up of a radio was set up in the vast Place de la Concorde.

The leading newspaper Le Monde, which like the younger Mitterrand also was a frequent critic of many of de Gaulle's policies in the past, said that ''France was nearly unanimous in paying hommage to the man of June 18.''

The only public opposition to the ceremonies was from rightist followers of Marshal Philippe Petain, the World War I hero of the battle of Verdun who signed the armistice with the Nazis at Compiegne on grounds that pursuing the unequal struggle against the German Blitzkrieg was a futile waste of French lives.

Suspected Petain supporters vandalized monuments to de Gaulle at several towns on the outskirts of Paris in the early hours Monday, including Gournay-sur-Marne, Villemomble, Noisy-le-Grand and Raincy, authorities said.

The raiders smashed a bust of the general with iron bars at the Gen. de Gaulle Square at Villemonble and pasted ''anti-Gaullist posters'' on the walls, police said.

Statues of de Gaulle, who became presideent of France after the war, also were smashed at Noisy-le-Grand and Villemomble.

At Raincy, the vandals tried to prise a portrait of the general off a city wall and stuck up posters denouncing ''Gaullist repression'' of supporters of Petain.

Paris itself has been plastered with about 6,000 large posters of the general.

In the village of Colombey-Les-Deux-Eglises Sunday, thousands of marchers paid tribute to General de Gaulle. The village, about 150 miles northeast of Paris, was de Gaulle's home and the place where he died Nov. 9, 1970.

Neo-Gaullist leader Mayor Jacques Chirac and the former president's grandson, Jean de Gaulle, joined the throng of 40,000 on the 2 1/2-mile march to the 135-foot-tall granite Cross of Lorraine memorial on a hill.

Organizers said 40,000 pilgrims filed in two columns to the memorial to pay tribute to the soldier-statesman.

The response to de Gaulle's June 18, 1940, radio appeal - from a BBC studio in London - for the French to fight on regardless of the surrender, brought France back from defeat to take its place among the victorious four powers at the end of the war.

One person was arrested when rightists belonging to the National Petain-Verdun Association placed a wreath Sunday at the Arc de Triomphe to recall Petain's announcement that he was asking for an armistice with Nazi Germany, police said.

Maurice Schumann, former spokesman of de Gaulle's Free French forces, led the main cortege at Colombey-Les-Deux-Eglises. He was flanked by leaders of the Neo-Gaullist Rally for the Republic Party, which organized the ceremonies.

Schumann said he was confident latter-day Gaullists would be able to overcome difficulties in the same way the general had when he was a little-known soldier making his appeal - a symbolic act of defiance - that only a battle, and not the entire war, was lost.

''Nothing was more difficult in London, in 1940, than seeing France from the same height as its conquerors,'' Schumann said.

He rhetorically addressed himself to his hero and said de Gaulle's ideas remain a guiding light to the French.

''The day is approaching, Mon General, when there will be none of your

first companions among those who march to your tomb. But what does it matter. If your old guard has had its time, your time only is just beginning."

#90169u1797 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - Chairman Les Aspin, D-Wis., of the House Armed Services Committee said Monday that reducing U.S. military forces by 25 percent in five years could cut defense spending anywhere between 18 percent and 27 percent.

Aspin, in a memorandum to House leaders involved in budget talks with the administration, made is comments a day before Defense Secretary Dick Cheney was due to brief budget negotiators on how he thinks the structure will come down 25 percent with planned annual reductions of 2 percent a year over the next five years.

The factors that determine how much money will be saved, said Aspin, include the mix of forces that are desired, the level of readiness necessary, the pace at which overhead costs are reduced, the speed with which weapons are modernized, and the resources devoted to research and development.

In the mixed force category, Aspin said defense spending could be down 18 percent over five years by reducing the reserves by the same percentage that active forces are cut, going from 18 to 14 active Army divisions and from 10 to eight reserve divisions. Air Force aircraft would be cut 25 percent in both active forces and reserves.

A 27 percent dollar savings, he said, could be achieved if reserves were cut less than active forces, with active forces down from 18 to 12 divisions and reserve cuts from 10 divisions to eight divisions. Air Force planes would be cut from 76 to 38 active squadrons, with reserve squadrons down from 45 to 42.

Aspin's scenarios kept readiness the same at both levels of dollar savings and had roughly the same cuts in overhead as each category - 18 percent and 27 percent - dictated in force structure.

The smaller dollar savings, he said, would allow a real growth of about 3 percent a year in the procurement of modernized weapons, but the 27 percent savigs would require skipping the next generation of weapons systems.

Under the smaller reduction scheme laid out by Aspin, most research and development would be cut by 25 percent and under the 27 percent reduction proposal research would be held at about 10 percent of the total Pentagon

budget.

Normally Aspin's committee would have written and passed its version of a defense budget, but the talks between congressional and administration negotiators have slowed the process and Aspin's panel is not expected to begin its work until next month at the earliest.

#90169u1824 06/18/1990 ~United Press International

SANTIAGO, CHILE (JUNE 18) UPI - Commerce Secretary Robert Mosbacher met Monday with Chilean President Patricio Aylwin following sessions on trade with Chile's ministers of mining, economy, and foreign relations.

"We are trying to deepen several topics," Mosbacher said of his visit when he arrived in Chile Sunday. Mosbacher called his 30-minute meeting Monday with Aylwin "positive."

Earlier, Enrique Silva, the Chilean minister of foreign relations, asked Mosbacher to eliminate all barriers that hamper trade between the two countries, government sources said.

According to the Chilean Central Bank, Chile in 1989 exported more than $1.45 billion of goods to the United States. Chile's imports from the United States were nearly $1.35 billion.

The chief Chilean export is copper, followed by iron, and gold. U.S. businesses, in addition to exporting minerals, buy large quantities of fish and fish byproducts.

Economy Minister Carlos Ominami said the Chilean government was "interested in creating investment opportunities" and called the U.S. market Chile's "principle" one.

Ominami also said the Aylwin administration plans to send a law to the national Congress to regulate fines for violating industrial property rights, a subject of key interest to U.S. businesses in South America.

As U.S. Trade Representative Carla Hills did during a recent visit to Argentina, Mosbacher criticized the Chilean government's failure to protect patents, especially in the field of pharmaceuticals.

Mosbacher, in a meeting with Mining Minister Juan Hamilton, also signed an agreement Monday to hold the 1992 mining exposition, a biannual world meeting, in Chile.

#90169u1830 06/18/1990 ~United Press International

MUENSTER, WEST GERMANY (JUNE 18) UPI - As the Soviet and West German foreign ministers met in Muenster's historic City Hall to discuss German unification, Chancellor Helmut Kohl said Monday he was determined the two Germanies should unite in 1990.

''Nineteen ninety will be the year of German unity,'' Kohl told a meeting in Bonn of his conservative Christian Democratic Union, a conviction that put him at odds with East German Prime Minister Lothar de Maiziere.

De Maiziere Sunday effectively shelved a proposal for quick and full unification of the German states made by the arch-conservative German Social Union.

Meeting in Muenster's Gothic City Hall, where a peace treaty was signed in 1648 ending Europe's 30-Year War, Soviet Foreign Minister Eduard Shevardnadze and his West German counterpart, Hans-Dietrich Genscher, tried to resolve disagreements over German unification.

The one-day meeting is the eighth this year between Genscher and Shevardnadze and follows a similar meeting in the Soviet town of Brest 10 days ago.

Although few details emerged during the talks Monday, observers believed Shevardadze would flesh out Moscow's proposal for a united Germany's joint membership in NATO and the Warsaw Pact.

The West has largely rejected the idea of joint membership. And the issue of German affiliation with one alliance or the other has been the major sticking point in the so-called ''two-plus-four'' unification talks involving the two Germanys, and the World War II victors, Britain, France, the Soviet Union and the United States.

But in a break in the meetings, Shevardnadze Monday told Soviet television the two sides had ''not yet touched'' the issue of joint German membership in both alliances.

He did say they narrowed their differences ''on the structures of the military blocs, of future relations between the blocs, (and) bilateral relations.''

Both Germanys and the Western powers insist a united Germany belong to NATO, but the Soviets object to sole German membership in the Western military alliance.

It was not immediately clear whether Shevardnadze would forward any new proposals during the talks with Genscher, which precede a crucial round of two plus-four talks.

Kohl admitted Monday there will be some ''unavoidable transitional problems'' in uniting the nations and he acknowledged unification will be expensive. But he repeated his pledge that he will not raise taxes to meet the costs.

The chancellor also stressed that Germany will not sign a peace treaty formally ending World War II. Such a document would make it possible for several countries, including Poland, to issue massive war reparation claims against Germany.

The foreign ministers of the six nations are due to meet in East Berlin June 22 for the second session of the so-called two-plus-four talks. That meeting is expected to focus on the military angle of the unification process.

Economic union of the Germanys is already due to be implemented next month with the introduction of the West German currency in East Germany in early July.

#90169u1839 06/18/1990 ~United Press International

SHADYSIDE, OH (JUNE 18) UPI - The death toll in last week's flash flood disaster rose to 21 Monday, and authorities said they still had not accounted for another 14 people in Ohio's worst weather disaster in 21

years.

The body of the 21st victim of Thursday night's storm was discovered Monday morning, but Fire Chief Mark Badia did not release any other information. He said the number of missing dropped Monday from 16 to 14.

Intermittent rain overnight hampered the search effort and a brief thunderstorm Monday morning raised fears of more flooding.

''Around 7:30 (a.m.), it looked like it was 10 o'clock at night,'' Ray Ponzo, director of the emergency crisis center, said, ''with thunder, lightning, heavy rain.''

But the storm ended quickly and the only damage was to an area filled in with dirt Sunday by the Ohio National Guard.

The Thursday night flooding was the worst weather disaster in Ohio since July 4, 1969, when severe thunderstorms swept off Lake Erie in the late afternoon, killing 40.

The National Oceanic and Atmospheric Administration, parent agency of the National Weather Service, has begun an investigation into why no flash flood warning was issued that night.

Ed Heath, meteorologist in charge of the Akron-Canton bureau, told The Cleveland Plain Dealer the investigation was routine.

''The policy is whenever five people or more die, they have a review board check the areas of responsibility to see if there was anything we missed or if there are weaknesses,'' he said.

''As far as I'm concerned nothing broke down,'' Heath said, adding it was impossible to predict the amount of rain that fell in Shadyside based on what showed on weather radar.

Tom Allison, 38, who lost just about everything except his dog and the clothes he was wearing when he fled his house, said a warning would have been meaningless.

Had he seen one, Allison said he would have ''probably (done) nothing, because who would think of a flood on that creek? When they say flood in this area, you think of the Ohio River.''

At this point, Allison said he's more concerned about rebuilding his life. All that's been found of his most prized possesion, his truck, has been one tire.

''It's like being 16 again and starting all over,'' said Allison, wearing

clothes donated at a crisis center in Shadyside.

How long will it take to rebuild? The unemployed pipe fitter replied: ''About 20 years. That's how long it took me to put everything together.''

Ray Ponzo, a school teacher now running the crisis center, questioned how many of the people will move back to the creek area torn apart by what was described by one weather official as a once-in-a-thousand-year storm.

''I bet you some of these people won't even attempt to rebuild in that area,'' Ponzo said. ''A lot of them were in the category of retired. And there were a lot of rentals down there too.''

Unemployment also runs high in the area because of lost jobs in coal mines once the dominant employer in the region.

Officials have estimated that 60 to 70 homes were gone and another 30 to 40 could not be lived in again without extensive repair.

Most of the displaced people were living with friends and relatives. Only a few people were still living in a Shadyside school being used as the crisis center.

Local churches planned to hold a joint memorial service for the flood victims Wednesday at the high school football stadium.

NEW YORK (JUNE 18) UPI - A judge Monday told potential jurors in the trial of three youths charged with the rape and attempted murder of a woman jogger in Central Park that their job is not to ''resolve the issue of crime in New York City.''

Some 148 prospective jurors will undergo individual questioning, called voir dire, at state Supreme Court in Manhattan on Monday afternoon in an effort to pick 12 jurors and four alternate jurors.

The panel is expected to hear some two months of testimony in the case against the first three youths to go on trial. Then, the jury will begin deliberating the 13 charges against each of them.

Altogether, six youths were indicted for the April 19, 1989, crime spree in a moonlit Central Park. They were part of a gang of youths who randomly attacked victims during a ''wilding'' spree in the park, assaulting two male joggers and raping and beating the woman jogger and leaving her for dead.

The case stunned even streetwise New Yorkers, particularly because of the young ages of the defendants and the viciousness of the attack. It also drew international attention because it sullied the most famous sanctuary from frenzied city life: Central Park.

The 29-year-old investment banker has undergone a miraculous recovery and may be called as a witness.

Justice Thomas Galligan warned prospective jurors early Monday that their job is to deliberate a single case - not to clean up crime throughout New York City.

''We hear stories about crime in New York City, New York State or other places in the world,'' Galligan told the jury pool.

''You are not here to resolve an issue of crime in New York City or New York State. You have to decide whether these defendants are guilty of the crimes charged in this case,'' Galligan said.

WASHINGTON (JUNE 18) UPI - New York financier Mario Gabelli has taken a 6 percent stake in General Cinema Corp., according to documents filed Monday with the Securities and Exchange Commission.

A group of Gabelli subsidiaries, led by Gamco Investors Inc. and Gabelli Funds Inc., purchased 2.9 million shares of General Cinema common stock between March 13, 1990, and June 13 for $21 a share to $23.50 a share.

Gabelli through his subsidiaries now owns 6.15 percent of the Chestnut Hill, Mass.-based company's 47.4 million common shares. However, when the 22 million shares of class B stock issued by General Cinema are added to the total, Gabelli's stake falls to 4.2 percent of the company's stock outstanding.

The SEC filing said that Gabelli purchased the stock for investment only and that ''none of the (Gabelli subsidiaries) intends to seek control of the (stock) issuer or participate in the management of the issuer.''

CHICAGO (JUNE 18) UPI - The Chicago Cubs Monday placed center fielder Jerome Walton on the 15-day disabled list.

Walton, the 1989 National League Rookie of the Year, suffered a broken left hand after being hit by a Ken Howell pitch in the fifth inning of

Sunday's game at Philadelphia.

Walton was hitting .270 with no home runs and 12 RBI through Sunday's game which he left in the seventh inning.

The Cubs announced they would call up outfielder Gary Varsho from their AAA Iowa affiliate to replace Walton on the roster. Varsho was hitting .300 with seven home runs and 33 RBI for Iowa.

MEXICO CITY (JUNE 18) UPI - Cuba's 1989-90 sugar harvest surpassed 8 million tons, enabling the country to maintain its position as the world's leading sugar exporter, the official Cuban news agency Prensa Latina reported Monday.

In a dispatch monitored in Mexico City, Prensa Latina quoted Sugar Ministry sources as saying the 160-day harvest, employing 400,000 people - nearly 4 percent of the population - ended with production of 8.04 million tons.

It was the Caribbean island's fifth-best output but was down from the previous year's 8.12 million tons.

Ministry officials said reaching the 8-million-ton mark had become ''a question of honor'' following three years of lower production - from 1985 to 1988 - when Cuba had to borrow sugar from abroad to meet its own delivery commitments, Prensa Latina reported.

The agency said the increased exports would enable Cuba to earn more hard currency at a time when world sugar prices, in terms of U.S. currency, are about 15 cents per pound.

The Soviet Union buys most of Cuba's sugar at above-market prices.

#90169u1880 06/18/1990 ~United Press International

BUCHAREST, ROMANIA (JUNE 18) UPI - Anti-government protesters occupied the city's main square for a second day Monday, joined by growing numbers of workers appalled by President-elect Ion Iliescu's decision to unleash bands of vigilantes on the streets of the capital.

The Senate, which is dominated by Iliescu's National Salvation Front, expressed regret for the ''excesses'' of thousands of pro-government coal miners who terrorized Bucharest for two days.

''Before, we didn't have anything against Iliescu, but after seeing what the miners did I have no use for these criminals,'' said Valentine Dumitrascu, 47, one of about 500 demonstrators who gathered in the afternoon at University Square.

Chanting ''Down with Iliescu,'' they blocked traffic on a major boulevard leading to the square for the second straight day.

''Iliescu, you must pay for the spilled blood,'' one protester scrawled in giant letters on the street.

The miners cleared University Square of demonstrators last week in clashes that killed at least six people and wounded scores more.

University Square was the scene of a seven-week anti-government protest that was dispersed at dawn Wednesday by riot police. The move triggered a wave of violent demonstrations that were finally suppressed when thousands of club-wielding coal miners charged into the city.

In Washington, the State Department called Monday for the Romanian government to release immediately demonstrators wrongfully jailed by authorities last week. It again warned that U.S. economic aid will be held back until the new government in Bucharest respects human rights.

In Luxembourg, European Community foreign ministers debated Monday whether to suspend a trade pact with Romania because of the violent suppression of anti-government protests. The far-reaching trade and economic cooperation pact with Romania was initialled by both sides on June 8 but has not been signed.

British Foreign Secretary Douglas Hurd said he was very confident the agreement would remain frozen pending further developments in Romania.

Answering an appeal by Iliescu to restore order, the miners used hammers and ax handles to smash up the offices of two opposition parties and a newspaper and beat up scores of students, gypsies, journalists and virtually anyone else whom they regarded as suspicious.

Many of the protesters Monday were workers who had not participated in earlier demonstrations but said they wanted to express their outrage over last week's violence.

''No real Romanian can stay home now,'' said Dumitrascu, who works at a plastics firm. ''If the miners come back we will fight, and there will be blood on the streets as it never was before.''

The Romanian Senate, which met Monday for the first time since the unrest, passed a resolution calling on the government to ''take immediate steps

for the application of the country's laws to the letter and for the punishment of those who violate them.''

''The Senate expresses its regret that excesses occurred in the process of restoring order ... i.e., molestation of people not directly involved in events, storming of political parties' headquarters,'' the resolution said.

The senators used much harsher language to condemn the attacks Wednesday by anti-government protesters against the central police headquarters and television station.

''The savageness and cruelty of the methods used remind of past sinister practices of the legionary-fascist type,'' it said.

Sunday, hundreds of protesters returned to University Square for the first time since the violence, demanding Iliescu's resignation and calling for the release of those arrested during three days of unrest.

Police began looking for fingerprints and other clues pointing to the owners of miners' tools left behind at the devastated offices of the Liberal Party and National Peasants Party, but opposition officials doubted any miners would be arrested.

''They are investigating but it is only a show,'' said Domitru Trian of the Peasants Party.

The protesters Sunday demanded the government free more than 1,000 people arrested in last week's unrest and account for several students and other activists who were missing. ''We want them back!'' they chanted. Most of the protesters had dispersed by midnight.

CHAAM, HOLLAND (JUNE 18) UPI - A third suspected member of the Irish Republican Army was arrested Monday, still wearing handcuffs two days after escaping from custody in Belgium, police said.

The three arrests were described as a police breakthrough in its investigation of a recent spree of attacks in northern Europe linked to the IRA, which opposes British rule in Northern Ireland.

The suspect, identified as Michael Collins, 31, of Ireland, was captured by Dutch police near the Belgian border after a massive manhunt.

Another man was also sought after allegedly driving through a police roadblock in a British-registered car shortly before Collins was arrested. Police said they believe he was another IRA member trying to ''recover'' Collins before police could collar him. The car was later found abandoned.

Collins had been sought since Saturday, when a farmer in northern Belgium overheard target practice in a wooded area near the Dutch border and called police.

A woman, identified as Donna Maguire, 23, of Ireland, was arrested in the woods, but Collins and another man with her escaped. The other man, identified as Gerard Harte, 26, was arrested on Saturday in Holland.

West German authorities are expected to seek the extradition of Maguire, who is wanted for questioning in connection with a June 1989 attack on a British army barracks and the July 1989 slaying of a British soldier.

She was ordered held in custody by a magistrate in Turnhout, Belgium, on charges of illegal firearms possession, carrying a false U.S. passport and criminal association.

A cache of weapons was found buried in the woods near the site where the three were first discovered.

BOSTON (JUNE 18) UPI - A barge carrying 5 million gallons of light diesel oil ran aground in Buzzards Bay Monday not far from the spot where a passenger liner ripped open its hull on the bottom last week, Coast Guard officials said.

The 465-foot barge, owned by the Bouchard Shipping Co. of New York City, ran aground about 10:26 a.m. in foggy weather, rupturing four of its storage tanks. Officials said the threat of a serious oil spill appeared remote.

Coast Guard spokesmen said between 5 and 10 gallons of the No. 2 diesel oil leaked into the water. They said other barges would be brought in to offload the oil before the damaged vessel is moved.

The accident occurred about one mile from the location where the cruise ship Bermuda Star ran aground June 10 and leaked about 7,500 gallons of heavy, sticky fuel oil into Buzzards Bay, soiling beaches and threatening a rare species of seabird.

The 617-foot cruise ship remained at anchor near the site of its grounding Monday with a patchwork of specially-treated plywood covering a 90-foot gash in its hull.

The Coast Guard said the nature of the oil aboard the barge and the damage to its hull made it unlikely another serious spill would occur. The light diesel oil floated atop the water that gushed into the barge's storage tanks and was sealed inside, officials said.

The small amount of oil that leaked into the water was expected to evaporate quickly, said Coast Guard spokesman Steve Aitkins.

The cause of the accident was not immediately known, but the Coast Guard said visibility was only about one-quarter of a mile in fog at the time of the grounding, about 5 nautical miles from the entrance of the Cape Cod Canal.

The Coast Guard cutter Point Turner and another vessel were on the scene and officials of the Coast Guard's Marine Safety Office were attempting to determine the cause of the accident.

(JUNE 18) UPI - A bloody shooting spree in Jacksonville, Florida...

Nelson Mandela urges continued economic pressure against South Africa... Bulgarian socialists score victories... and the Romanian opposition calls for an investigation. All this, and much more, is coming to you next on the U-P-I wire.

Police say a man armed with an automatic rifle today opened fire in a finance office in Jacksonville, Florida, killing seven people and injuring at least six. The gunman also was killed, though it's NOT clear if he shot himself.

The shooting occurred in a General Motors Acceptance Corporation auto finance office near downtown. Investigators say the gunman's vehicle had recently been repossessed, but they doN'T know if that was his only motive.

The attacker walked through the front door of the office and began shooting customers, some of whom were at the counter. He then went through the office, gunning down employees... some of whom who had ducked beneath their desks.

Four of the survivors are listed in critical condition... one in serious condition... and one in fair condition. Each suffered multiple gunshot wounds.

Police say the man was under investigation for two weekend shootings in his neighborhood which involved the same type of gun used in today's bloodbath... a 30-calibre rifle. The UNidentified gunman also used a 38-calibre revolver.

PORTLAND, OR (JUNE 18) UPI - Louisiana Pacific has announced a joint venture to explore the possibility of importing Soviet timber in an effort to solve timber supply problems.

In conjunction with another forest products company, which has not been identified, LP has imported about a truckload of Soviet logs to undergo sawing and grading tests at West Coast mills.

The logs, Siberian pine and larch, are currently in San Francisco at the Department of Agriculture where experts are inspecting the insects in the wood.

''We have a lot homework to do before we know if the logs will be economically feasible to import and mill,'' said Western Division Manager Joe W. Wheeler Jr. The company has been working on the deal for a number of months, he said.

Among the possible drawbacks on the deal are the limited capacity of Soviet Pacific ports for logging shipments, competition with the Japanese and discrepencies between U.S. and Soviet timber species.

''We have to study the tree species and then see how they fit into our domestic lumber grades,'' Wheeler said.

Bob Morris, a spokesman for Louisiana Pacific, said deciding whether the two types of insects in the wood pose a threat to North American forests could take time ''because not many people know much about Russian insects.''

#90169u1922 06/18/1990 ~United Press International

(JUNE 18) UPI - South African black nationalist Nelson Mandela today told the Canadian Parliament that the only way to end apartheid is if Western nations maintain economic sanctions against South Africa.

Mandela.. who arrived in Ottawa yesterday... told Canadian lawmakers NOT to be fooled by recent actions taken by the South African white minority government's. Actions taken in Johannesburg include the release of some political prisoners, the partial lifting of the state of emergency as well as Mandela's release from jail.

A senior Canadian official says Mandela's pleas for continued sanctions were directed more toward Europe.

Canada already has pledged to keep up economic pressure until apartheid is abolished despite British contentions that sanctions are ineffective means of catalyzing reform.

Official election results made available today from yesterday's vote in Bulgaria gives former communists slightly more than half the seats in the 400-member Grand National Assembly.

The Electoral Commission says the communists... now re-named the Socialist Party... won 211 seats, or nearly 53 percent of the vote.

Finishing second after two rounds of voting is the main opposition group... the Union of Democratic Forces... which garnered about 36 percent of the seats.

The 81 constituencies which held polling yesterday had NO candidate receive a majority in the first round on June 10th.

The first round was replete with opposition accusations that the former communists rigged the voting to favor their candidates.

Bulgaria is the second East European country to restore communists to power, following Romania.

#90169u1933 06/18/1990 ~United Press International

(JUNE 18) UPI - Opposition leaders in Romania today vowed to pressure the government to explain last week's vigilante violence by coal miners.

About 200 protesters returned to Bucharest's main University Square, which the miners brutally cleared of demonstrators three days ago. The clashes killed at least six people and wounded dozens more.

Police report NO violence today. But Romania's state-run news agency quotes government officials as saying force will be used to put down further street demonstrations The officials reportedly termed demonstrations against the government as destabilizing and anarchistic.

The head of the opposition Liberal Party called on the government to prosecute those responsible for the violence. He also accused the government of inciting the attacks by inviting workers to take the law into their own hands.

Soviet soldiers today reportedly gained the upper hand over prisoners rebelling in central Russia while inmates at a Ukrainian jail continued an uprising.

Government news reports say an unknown number of prisoners were killed and wounded in the UNrest which was sparked by shoddy prison conditions. There's NO word if the riots were linked.

The riot that ended today erupted yesterday at a prison in the eastern foothills of the Urals about 900 miles east of Moscow. Soviet troops stormed the facility when some one-thousand rioters refused to release guards who had been taken hostage.

But holdouts remain at a rebellion started three days earlier at a prison in Dnepropetrovsk... located in the Ukraine about 550 miles south of the Soviet capital. At least one person is known dead there.

The Soviet news agency Interfax says one-thousand of the prisoners have surrendered but an UNspecified number armed with spades, axes and pitchforks still hold the facility and are negotiating with authorities.

#90169u1935 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The Senate opened debate Monday on the first major housing bill since 1968 with the Democrats' manager voicing optimism that an agreement can be worked out to meet administration objections.

Sen. Alan Cranston, D-Calif., said that he felt, on the basis of a meeting earlier in the day with Secretary Jack Kemp of the Department of Housing and Urban Development and budget director Richard Darman, that the ''major'' objections can be met.

The bill would revamp the nations's housing policy and create a new compact between the federal government, the states, local communities and the private sector to create affordable housing.

Kemp and Darman cited four policy demands: the administration called for greater emphasis on rehabilitation compared with construction; wanted the bill aimed at the poorest people; and insisted on provisions to make the Federal Housing Administration mortgage loan program sound.

The fourth concern of the administration cited at the meeting was the cost of the bill which is $17.6 billion in fiscal 1991, $3.1 billion of which is for new authorizations programs. The remainder would maintain rent subsidies and other programs at current levels.

The administration's budget did not recommend any increase in federal money for housing programs.

Cranston reported that Darman said ''if we can work out the policy issues we are prepared to go well over our budget'' and Kemp assured Cranston that ''we are not making any veto threat'' on the basis of the legislation's cost.

Cranston estimated the cost for new authorizations could be held to around $3 billion, adding, ''We should be able to work out the budget amount.''

Administration and Senate housing subcommittee staff aides immediately began trying to find compromises on the ''major'' policy objections. Cranston said a ''host'' of minor complaints were also raised, none of which he said would lead to a veto.

#90169u1964 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - A jury consisting mostly of black women was seated Monday to hear the drug and perjury trial of Mayor Marion Barry.

The jury of 12 regulars and six alternates consisted of 15 women and three men. Thirteen members of the panel are black, including 12 women. Five are white.

It will not be revealed until deliberations which 12 are members of the jury and which six are alternates.

Barry is one of the nation's most prominent black politicians, and many of his supporters have cast the federal case against him as part of an effort by the white establishment to undercut black leaders.

Among those who made the final 18-member panel was a woman who earlier ''equivocated'' when asked if she could find Barry guilty, and another who said she thinks he is innocent but would weigh the evidence.

On the eve of the trial, Barry admitted to smoking crack cocaine during a Jan. 18 FBI-police sting operation, but said he did not believe a jury in Washington would convict him.

''I think the prosecutors know that in this town all it takes is one juror saying, 'I'm not going to convict Marion Barry. I don't care what you say ''' the mayor said.

Although questioning had taken two weeks, the jury was seated Monday in only about an hour, and then sequestered. Opening arguments were scheduled for Tuesday morning.

''We'll begin the trial proper tomorrow with my instructions to you and the opening statements,'' U.S. District Judge Thomas Penfield Jackson told the jury. ''I am generally pleased at your willingness, if not enthusiasm, to serve as jurors in this case.''

The trial is expected to last about a month.

One panelist, Marsena Hall, who works for the D.C. Public Schools, said in questioning last week that she thought the mayor was innocent, but said she could find him guilty if the prosecution proved its case. She also

told Jackson last week she did not want to sit on the jury.

Margaret Batson, 70, made the final 18 even though she initially said she thought all politicians are ''not honest.'' Under questioning she said she could separate Barry the man from Barry the politician. ''I look for the human being, not for who or what he is.''

The prosecution last week had sought to disqualify one woman, Johnnie Hardeman, who eventually was named to the 18-member panel. Assistant U.S. Attorney Judith Retchin had said Hardeman ''hestitated then equivocated'' when asked if she would convict Barry if evidence proved him guilty.

Jackson, however, kept Hardeman in the pool saying: ''I'm going to have to go on a hunch.''

Several jurors work, or have worked, for the D.C. government - which Barry has headed for 12 years. One woman worked for the FBI but currently is employed by the Interior Department.

The finalists had passed through 10 working days of questioning aimed at eliminating those with glaring preconceptions based on pre-trial publicity the FBI-police sting operation that led to the mayor's arrest or Barry's status in the city.

Jury selection began June 4 with a pool of 250 potential jurors. When the process lagged behind schedule, Jackson ordered the first phase of jury selection to end Friday and told defense lawyers and prosecutors to make their final choices for the panel on Monday.

Defense attorneys had 12 strikes that allowed them to excuse that many prospective jurors without giving a reason - and prosecutors had seven.

Attorneys for Barry used nine of their 12 strikes to dismiss whites from the jury. All seven strikes by the federal prosecutors were of blacks.

Barry last week announced he would not run for a fourth term in office, fueling speculation that his announcement could lead to a plea agreement. But his lead attorney, R. Kenneth Mundy, said the trial will proceed as scheduled.

The government's most damaging evidence against Barry is expected to be a videotape of the Jan. 18 undercover FBI-police operation that led to his arrest. The videotape allegedly shows the mayor smoking crack cocaine at the Vista International Hotel in downtown Washington. He was later indicted on 14 drug and perjury counts.

Barry is charged with three felony counts of perjury for allegedly lying to a grand jury, 10 misdemeanor counts of cocaine use, and one misdemeanor

count of conspiracy to possess cocaine as long ago as 1984.

-30- 4615
#90169u1969 06/18/1990 ~United Press International
(JUNE 18) UPI - The U-S Supreme Court today upheld the practice of videotaping suspected drunken drivers, but placed limits on the kinds of questions police may ask.

The high court held that using a videotape of a suspect as evidence at a drunken driving trial does NOT violate a person's constitutional right against self-incrimination.

However, the court said police must NOT ask questions that ''trick'' suspects.

Justice William Brennan said that questions asked of the suspect in a Pennsylvania case were necessary and ''NOT likely to be perceived as calling for any incriminating response.''

The ruling came less than one week after the high court upheld roadside sobriety checkpoints.

In another case, the court agreed to decide if a failed Texas savings and loan shareholder can sue the federal government for not policing the savings and loan association.

Opening statements will be heard tomorrow in the drug and perjury trial of Washington, D-C, Mayor Marion Barry.

Lawyers in the case finally managed to sit a jury today after two weeks of legal ping-pong.

The presiding judge, U-S District Judge Thomas Penfield Jackson, has ordered the jurors to be sequestered later today.

The 12 regulars and six alternates consisted of 15 women... a dozen of them black... and three men.

Many of Barry's supporters have said the federal case against him is part of an effort by the white establishment to undercut other black politicians, and the issue of race took on new importance in the selection process.

Defense attorneys used their strikes from the pool of 82 potential jurors primarily to dismiss whites while prosecutors dismissed blacks.

With the trial one day away, speculation there could be a last-minute plea

agreement is dying down.

Barry's lawyer says there's NO bargain in the works and NO body is waiting at home for the phone to ring.

(JUNE 18) UPI - President Frederick de Klerk may try to align South African blacks behind his government in an attempt to undercut the power and popularity of the African National Congress.

Government sources say De Klerk today met with government-appointed black officials and other leaders in a bid to counter the A-N-C, which supports trade sanctions against white-ruled South Africa.

After the meeting, the delegates issued a joint statement that underlined de Klerk's call for- in their words- ''real negotiations for a new constitution.''

The statement also urged an end ''to intimidation and political violence.''

The Cape Town meeting took place as the head of the A-N-C's military wing returned to South Africa from Zambia after 16 years in exile.

#90169u1980 06/18/1990 ~United Press International
WASHINGTON (JUNE 18) UPI - An environmental group urged consumers Monday not to buy products containing methyl chloroform, a little-known ozone-depleting chemical found in at least 141 items, including hair sprays, glues, spot removers and bug-killers.

The Natural Resources Defense Council said while consumers knew about the ozone-damaging properties of spray products containing chlorofluorocarbons or CFCs, few were aware that methyl chloroform - also known as 1,1,1-trichloroethane - also was eroding Earth's protective ozone layer.

''It's time for consumers to look again at the cans and bottles they buy '' the group said in a new report on methyl chloroform in consumer products. ''Many aerosols and other consumer products today contain the ozone-destroying chemical, 1,1,1-trichloroethane.

''The latest scientific evidence shows that the rapid elimination of 1,1,1-trichloroethane is essential to repairing the ozone layer,'' it added.

''Just as with CFCs in the 1970s, 'green' consumers once again have the opportunity to press for environmentally safe products in defense of the ozone layer.''

The report identifies 141 products containing methyl chloroform, including such well-known items as Scotchgard upholstery protector, Elmer's contact cement and Raid flea and roach killer.

The listed products included wood and countertop adhesives and contact cements; art supplies such as varnishes and fixers; automotive cleaning sprays and lubricants; carpet cleaners; nail polishes; typewriter, photocopier and circuit board cleaners; fabric cleaners and spot removers; stain and water repellants; hair sprays; insecticides; crack sealants; and shoe and leather cleaners and polishes.

Most of the products come in aerosol spray cans, but the report noted methyl chloroform was not used as a propellant but for other purposes.

For example, methyl chloroform is the active ingredient in most cleaning agents because of its degreasing properties. In other items, such as bug sprays, it is used as a solvent to dissolve pesticide so it can be easily applied.

The council said while federal law required methyl chloroform to be listed

as an ingredient in some products, such as cosmetics, it did not have to be listed on many others, such as pesticides.

The report comes as delegates from some 80 nations prepare for a conference in London this week to strengthen an international treaty to protect the ozone layer, which shields out harmful levels of ultraviolet radiation from the sun.

Scientists say elevated ultraviolet radiation could cause millions of additional cases of skin cancer and cataracts and also stunt plant growth and disrupt ocean ecosystems.

Among other issues, delegates to the conference are expected to agree on measures to begin phasing out methyl chloroform, with environmentalists pressing for its elimination by 2000.

Congress already is moving in the clean air bill to halt U.S. production of methyl chloroform, with the Senate setting a deadline of 2000 and the House version 2005.

While methyl chloroform is not as ozone-depleting as CFCs on a pound for pound basis, it is produced and emitted in such huge quantities that scientists say it is responsible for 16 percent of the ozone-destroying chlorine now in the atmosophere due to human activities.

Industry reports to the Environmental Protection Agency show 724 million pounds of methyl chloroform was produced in 1988 by three U.S. companies: Dow Chemical, PPG Industries and Vulcan Chemical.

#90169u2006 06/18/1990 ~United Press International
NEW YORK (JUNE 18) UPI - Elegantly attired ladies in wide hats and impeccably dressed gentlemen crushed together with fans in the ''Little Church Around the Corner'' Monday to honor the memory of actor Rex

Harrison.

''Let the angels beware,'' warned his son, Noel Harrison, ''there is an unreconstructed man among you who hates the sanctimonius.''

He recalled that only a few days before his father died of pancreatic cancer at the age of 82 on June 2, he said, ''I've got a new philosophy of life, don't cower, charge.''

Harrison's outbursts against ''overbearing directors (and) leading ladies '' were gleefully recalled by more than one of the five speakers at the service.

Among the crowd in the simple, red brick church on 29th Street just off Fifth Avenue - actually named the Church of the Transfiguration - were old Harrison friends Douglas Fairbanks Jr., Cliff Robertson, Claudette Colbert and Kitty Carlisle Hart, whose late husband, Moss Hart, directed Harrison in ''My Fair Lady.''

Harrison's famous role as Professor Henry Higgins in the musical was fondly remembered.

''Who else but Rex Harrison could make a cardigan sweater seem like the height of chic?'' said writer Brendan Gill.

Maggie Smith, donning Eliza Doolittle's cockney accent in a tirade against Higgins, ended her eulogy with a calm and cultured takeoff of Harrison: ''Eliza, where are my slippers?''

The church erupted in applause.

Another son, Carey Harrison, recalled that his father had been starring in ''The Circle'' on Broadway just three weeks before his death.

''He was famous for his bark ... and when he barked you flinched, but when you looked to see the bite marks he left on you there were none,'' he said. ''He was not vindictive.''

The Sol Yaged jazz sextet played some of Harrison's favorites during the service, ''There's that Rainy Day Again,'' ''Cecilia,'' and ''Take the A Train.''

The rector of the church, the Rev. Norman Catir, admitted, ''Rex was no saint in the conventional sense,'' touching off a ripple of laughter among the first few rows who could hear.

Maggie Smith recalled ''the charm, the elegance the wit'' of the actor, adding to laughter that he was ''not always charming. He seldom suffered

fools gladly.''

She advised acting students, ''The wit and timing of Rex Harrison is present in his many movie performances, perhaps not as magical as in the theater but it is there.''

She told them to watch those performances ''over and over.''

PINE BLUFF, AR (JUNE 18) UPI - A convicted killer, described as the most dangerous on Arkansas's death row, was kept under constant supervision while waiting electrocution Monday night in the state's first execution in 26 years.

John Edward Swindler, 46, a husky, red-faced native of Columbia, S.C., faced execution for the 1976 shooting death of Randy Basnett, 30, a police officer in Fort Smith, Ark.

''He is under constant supervision,'' a prison spokesman said. ''He is receiving meals routinely.''

Officials said his only visitors Monday were his lawyer and religious adviser. Attorney Thurman Ragar of Van Buren said he just wanted to meet with him one last time and tell him everything possible was done to save him.

Swindler, who also has been convicted of killing two teenagers in South Carolina and was charged with killing a Pennsylvania student in Florida, was scheduled to die at 9 p.m. CDT at the state's Cummins prison unit about 20 miles southeast of Pine Bluff.

Death will be accomplished by strapping the 6-foot, 250-pound Swindler into a wooden chair called ''Old Sparky'' and sending 2,300 volts of electricity through him for four minutes.

His attorneys, whose request for a U.S. Supreme Court stay of execution was rejected Saturday on a 7-2 vote, said they planned no last-minute appeals because they had no new grounds. They also said they knew of no attempts at intervention by outside groups.

Swindler was to be the first person executed in Arkansas, and the 130th in the nation, since the Supreme Court reinstated the death penalty in 1976. He would be the 10th prisoner in the nation to receive the death penalty in 1990. Charles Franklin Fields, a convicted rapist, was in 1964 the last person to be executed in Arkansas.

About 50 Amnesty International protesters wearing black arm bands held a silent vigil on the steps of the state Capitol in Little Rock Sunday, asking Gov. Bill Clinton to halt the execution.

Swindler spent Sunday writing letters, watching televison and praying, authorities said. The Rev. John O'Donnell, a Catholic priest from North Little Rock, said the prisoner was nervous and apprehensive.

''He doesn't have any anger,'' O'Donnell said. ''He didn't voice anything about he's getting a bad deal.''

Swindler has claimed in the past to be a Satanist, but O'Donnell said he will have a Christian funeral and will be cremated. O'Donnell will claim the body because a brother of Swindler's said the family would not.

Correction Department spokesman David White said Swindler was calm and presented no behavior problems Monday, although White said he was the most dangerous man on death row because of his size and unpredictability. For a last meal, Swindler requested only what the prison's general inmate

population was receiving.

Swindler, after being released from Leavenworth prison in Kansas in September 1976, allegedly abducted Dorothy Ann Rhodes, 18, and her boyfriend, Greg Becknell, 19, in Columbia, S.C. Becknell was sexually assaulted and both were shot in the head.

After leaving Columbia, Swindler later told police he headed for Kansas intending to shoot as many Kansans as he could because he was angry at his treatment at Leavenworth.

Instead, because he could not read, he became lost and ended up in Fort Smith, stopping at a service station to ask directions. Basnett was at the station, recognized Swindler by his description and confronted him. Swindler shot him twice in the chest. He sped away but surrendered in a wooded area a short distance from the station after being surrounded by police.

He also was charged but never tried for the slaying in Florida during the Christmas holiday period of 1975 of Jeffrey McNerney, 19, of Pittsburgh, who was on holiday break from college.

ANKARA, TURKEY (JUNE 18) UPI - A Soviet pilot stole a small civilian aircraft Monday and flew it to a Black Sea beach in northwestern Turkey where he landed it and asked for political asylum, officials said.

There were no passengers on board the single-engine Anton-2 plane, which took off from the Soviet city of Izmail on the Danube River in the southwestern Ukraine, they said.

The pilot was identified as Valerie Yurevic, 29, a former commercial aviator.

Turkish air defense kept his 12-seat plane under surveillance for nearly three hours after it entered Turkish air space, but did not prevent it from landing on a Black Sea beach near Kocaeli, 200 miles northwest of Ankara.

Earlier, the official Soviet news agency Tass said the plane was stolen

from Izmail. It said Yurevic had resigned from the Soviet flag-carrier Aeroflot several months ago. His motives for taking the plane and his defection were not immediately known, Tass said.

Yurevic was taken to a nearby gendarmerie (paramilitary rural police) post where he asked for political asylum, a Foreign Ministry source said. His request was being considered, the official said.

There was no immediate word on the Anton-2 after Yurevic left it on the beach. Officials also did not say why the plane landed on a beach instead of at a nearby airfield.

The Tass report said the plane took off just after 9 a.m.

In Ankara, officials said they were surprised by Yurevic's asylum request, in view of Perestroika and the strides taken toward human rights in the Soviet Union in recent months.

Last year, a Soviet air force pilot landed a MiG-29 on a Turkish air base on the Black Sea, seeking political asylum in the United States. The incident led to a near-crisis between Ankara and Moscow.

MONROE TOWNSHIP, NJ (JUNE 18) UPI - A New York state trooper's cross-country bicycle tour to raise awareness of drunken driving ended just 35 miles short of its goal when a drunken driver smashed into him, police said Monday.

Monroe police said Joseph Cyran, 32, of West Seneca, N.Y., was bicycling on the shoulder of U.S. Route 322 in Gloucester County when a car driven by Ricky Ragunan, 28, of Moorestown, crossed the four-lane highway and struck the trooper at about 12:30 p.m. Saturday.

''He took an awful shot,'' police Sgt. Jim Mentzer said.

Police said Cyran was carried more than 100 feet on the Plymouth Duster's windshield, which was nearly destroyed by the impact.

Cyran was airlifted to Cooper Hospital/University Medical Center in Camden where he was listed in stable condition after surgery Monday to repair multiple fractures.

Hospital officials did not say when, or whether, he would be able to bicycle again.

Cyran began his trip in Los Angeles on May 27, and had been averaging 180 to 200 miles per day, according to a friend, who asked that her name not be used. ''He originally wanted to raise money for the Heart Foundation or for children who had been struck by drunk drivers,'' said the friend.

Police said Cyran was about 35 miles from Atlantic City, his final destination, when the accident occurred.

New York state police Sgt. Patrick O'Reilly, of the Alden barracks where Cyran worked, said the injured trooper's colleagues were stunned by news of the accident.

''We were all shocked that this could happen to Joe, with the great intentions that he had. And to have this happen to him by an intoxicated driver, especially when he was so close to his goal, it's really tragic,'' O'Reilly said.

''It was just something personal he undertook,'' O'Reilly said of the trooper's bike tour, adding that the seven-year veteran of the force was heavily involved in anti-DWI efforts.

O'Reilly said Cyran's accident sadly underscored the need for more education about the hazards of driving while intoxicated. ''It just illustrates how common it (drunken driving) can be,'' he said.

Police said Ragunan was charged with drunken driving, driving without a

license, violating seatbelt laws, using fictitious tags and driving without insurance and registration.

Mentzer said Ragunan, an employee at the Atlantic City Race Course, apparently fell asleep at the wheel. He said the results of blood tests were pending.

(JUNE 18) UPI - Authorities in Jacksonville, Florida, say they have established a tentative I-D for the man who charged into a loan office and fatally gunned down seven people before taking his own life. The assailant has been tentatively tagged as 35-year-old James Pugh.

South African black leader Nelson Mandela today told Canada's Parliament in Ottawa that only continued economic pressure from the West will end aparthied in South Africa. Mandela is on a six-week international tour which includes the United States.

The third Bensonhurst racial murder trial got under way today in New York. Prosecutors accused defendant John Vento of knowing ''a gun was on the scene'' when he helped recruit a gang that killed a black youth. Vento's lawyer denied the accusation.

The Supreme Court today ruled that the federal government may force companies to resume funding pension plans if the companies are financially able. The government said without that power, companies could pass off their pension fund debts for UNlimited government bailouts.

The State Department today called for Romania to immediately release demonstrators it says were wrongfully jailed last week in violent clashes

between vigilante groups and anti-government protesters. Washington also warned that U-S aid will be held back until Bucharest respects human rights.

Sources say Cambodia's Communist Politburo ousted three reform-minded liberals from high positions. Analysts say the move shows Vietnamese-backed conservatives are gaining influence.

A federal appeals court in Richmond, Virginia today upheld six-figure settlements to each of four former employees of Du Pont. The workers claimed the manufacturer failed to warn them of the danger of products containing asbestos.

Officials say U-S and Soviet scientists will team up to study the possible effects of a global warming. The team is scheduled to spend the summer gathering data from the forests of Siberia, Alaska and Minnesota.

The man known as ''Mr. Potato'' today won the 200-thousand-dollar World Food Prize. The award goes to food scientists who have helped world peace by feeding hungry populations. Prize-winner John Niederhauser developed a blight-resistant potato.

#90169u2117 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The Supreme Court refused Monday to step into a bitter dispute over song royalties involving the son and illegitimate daughter of the late country-western singer Hank Williams.

The high court declined to hear arguments in the case brought by Williams' legitimate son, Hank Jr., who was seeking to be judged the sole heir to royalties of more than 100 songs his father wrote.

Williams appealed a lower court ruling in Alabama that found Cathy Stone was the natural daughter of the late singer and may have certain rights to royalties under federal copyright laws.

''The next step is for Hank Williams Jr. to come to the Montgomery Circuit Court to give an accounting of how much money is flowing to him from assets from the estate of his father,'' said Stone's attorney and husband, Keith Atkinson.

In a related case, the Supreme Court also declined to review a ruling that found Stone was entitled to receive her proportionate share of any proceeds of the estate of the late country music star, including income, interest and renewal copyright royalties.

That case was also brought by Hank Williams Jr. after a lower court said Stone was entitled to her share of the estate from the date she gave notice of her claim, Aug. 5, 1985.

Atkinson estimated that Stone stands to make some $500,000 a year on renewal copyright royalties alone.

Stone, 37, who made her singing debut a year ago under the stage name Jett Williams, said the money is not as important to her as knowing who her father was.

''To know that he wanted me and started to prepay for me - he prepaid my doctor bills to deliver me - to get that gift I was so fortunate,'' she said. ''Especially being an adopted child, I was so fortunate to get concrete answers to my questions, like who my father is and did he know I

was going to be born.

''I know who I am and that my dad wanted me. ''I've got peace of mind and peace of heart and you can't buy that.''

The U.S. Court of Appeals for the 2nd Circuit in Montgomery, Ala., ruled that Williams was the sole heir to his father's royalties. It also said Williams' illegitimate daughter was not entitled to any royalties.

Stone successfully sought a rehearing, however, and the court ruled she was the natural daughter of Williams and may have certain rights to royalties under federal copyright laws.

Stone was born out of wedlock to Williams and Nashville secretary Bobbie Jett five days after the 29-year-old musician died on Jan. 1, 1953. Stone was adopted by Williams' mother, Lillian Stone. After her death a short time later, Cathy Stone was adopted by a couple in Mobile, Ala.

When Cathy Stone reached age 21 in 1974, she was told by her adoptive mother that Williams could be her biological father, entitling her to money from his works.

In 1985 Stone sought in federal court to be deemed the natural daughter of Williams and sought to collect a portion of royalties from her father's music. The court held she was Williams' daughter but ruled she had ''unreasonably delayed'' her claims and was therefore not entitled to any money.

The appeals court affirmed the lower court's ruling in April 1989, but three months later, it granted her motion for a rehearing. In a rare move, the appellate court vacated its earlier ruling, reversed the lower court's opinion and reinstated Stone's case.

Stone also appealed the federal court's ruling to the Alabama Supreme Court, asking to have her father's estate reopened to obtain her proportionate share. The court found that Williams Jr. and his family had fraudulently conspired to keep Stone from knowing her identity and potential claim to Hank Williams' estate and royalties.

The court excused Stone's delay in asserting her claims to the royalties and found ''substantial evidence'' that could indicate to a trial judge or jury that the Williams family fraudulently concealed her identity.

Hank Williams Sr. set the standard for hard living and country-western song writing, producing hits that included ''Cold Cold Heart'' and ''Hey Good Lookin'.''

Stone said she and her husband have written a book, due out in September,

on her life story called ''Ain't Nothin As Sweet As My Baby,'' named after one of her father's songs.

#90169u2119 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - The major bank creditors of besieged dealmaker Donald Trump pursued talks Monday on an elusive restructuring deal that would allow him to make overdue casino bond payments and avoid bankruptcy.

Scuttlebutt in the Manhattan real estate industry, meanwhile, was of possible sales of Trump trophies like the Plaza Hotel, which he bought two years ago for $390 million, and the midtown Grand Hyatt Hotel.

Yet prospects for Trump working out his financial woes were shadowed by news reports that as much as $500 million of the $2 billion in debt burdening his tottering empire is backed by no more than his word.

Late last week, Trump missed more than $42 million in interest and principal payments on bonds for his Trump's Castle casino in Atlantic City raising the possibility of default after a 10-day technical grace period.

Despite the blow to Trump's credibility and the plummeting prices of the junk-bond debt instruments, which were downgraded last week by Moody's Investors Service, some were not writing off the developer.

''It's not over till the fat lady sings,'' remarked casino bond analyst Larry Klatzkin of Shearson Lehman Hutton.

Klatzkin said that Trump may be able to pay off what is owed by the deadlineand that even if his casino funding company goes into bankruptcy reorganization the gaming establishment is likely to be able to continue.

Facing a new deadline, about 30 to 40 bankers and lawyers huddled on the 26th floor of Trump Tower on Fifth Avenue, headquarters of the developer known for for his brash confidence, seeking a solution.

Trump and his creditors seemed as far as ever from patching together a deal that seemed in the bag a week earlier. That would have given him $60 million in new cash and suspended some interest payments.

But a banking source said some of the institutions involved have since raised objections to terms of the ''workout'' deal.

''There's been some backing and filling in their positions as this thing has worn on,'' said the banker, who spoke on condition he not be named. ''They are not totally in sync in terms of an agreement.''

He said that, ''over time, as the deal has gone on, more and more people have joined the negotiating, more have become involved.''

Directly in talks were six large banks: Citibank, Bankers Trust Co., Chase Manhattan Bank, Manufacturers Hanover - all New York money center banks - and First Fidelity Bancorp and Midlantic Bank, both based in New Jersey.

Citibank and Bankers Trust have the most at stake. The former reportedly lent $300 million to the developer, while the latter's exposure totals $100 million. The two banks were to have put up 75 percent of the new cash.

Approval must also be obtained from scores of other subsidiary lenders to the Trump kingdom as syndication partners in loans.

Real estate sources, meanwhile, said rumors were circulating that Trump might be on the verge of selling the jewel of his holdings - the prestigious Plaza Hotel at Fifth Avenue and Central Park South.

But Stephen Miller, an executive with Flic (USA) Inc., a firm specializing in placing Japanese real estate investments, said that he believed Trump paid too much for the hotel and that Trump might be unable to unload it.

''He can't, because he's fully leveraged on it,'' Miller said. Creditors could prevent a sale for any less than what Trump owes them.

A Japanese investor is unlikely to come to Trump's rescue in the current soft market. ''The Japanese may still be the most aggressive buyers, but the prices at which they will buy have gone down,'' Miller said.

But Mara Spiegel of the Harry B. Helmsley real estate firm said the Plaza remains a highly coveted trophy building. ''Everybody is sniffing around '' she said. ''There's tremendous interest in this sort of thing.''

But she said she thought the first piece of Trump's real estate portfolio to go would be his interest in the Grand Hyatt Hotel - his first big Manhattan real estate deal - next to Grand Central Station.

''It's a cash cow, the biggest moneymaker he has,'' Spiegel said, speculating that Hyatt Corp. might want to buy out Trump's interest if it has not been pledged in collateral against his pile of debt.

One hoteliers organization recently estimated the 42nd Street hotel was worth some $350 million, she added.

#90169u2135 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - Exxon Corp. Monday said two units of its Benicia

refinery in the San Francisco bay area were shut down as a result of a small fire, but the company declined to say how much gasoline production will be affected.

"We have not said what the impact will be on operations," said Les Rogers, spokesman for Exxon U.S.A. in Houston. He added, "No product supply interruptions are anticipated" from the "operational upset." Rumors of the shutdown supported gasoline prices early in the day on the New York Mercantile Exchangee.

A small fire at a lube oil unit Sunday night shutdown the catalytic cracking and coker units of the 130,000 barrels-a-day Benicia refinery, Rogers said. He said an evaluation of damage and a schedule for restarting the units are underway.

Exxon last week said an estimated four million gallons of gasoline would be lost for about a week from its Baton Rouge, La. refinery because of a fire at one of the refinery's crude distillation unit.

Rogers said Monday that the Baton Rouge unit is expected to return to operation the middle of this week as scheduled. He also said Exxon's huge Baytown, Texas 480,000 barrels-a-day refinery and 130,000 barrels-a-day refinery at Bayway, N.J. are expected to return from their annual maintenance turnarounds from heating oil to gasoline production before the end of the month as scheduled.

LIMA, Peru (JUNE 18) UPI - An Amazon riverboat sank on a voyage from the Brazilian-Colombia border area to Peru, drowning two of its 47 passengers, a Peruvian official said Monday.

The surviving 45 passengers - all apparently Peruvian citizens - were able to get into lifeboats before the boat sank Sunday morning near San Pablo, about 150 miles away from the Amazon port of Iquitos, Cmdr. Carlos Aznaran Diaz told United Press International Monday.

Earlier, a Lima radio station reported nearly 50 people died when the boat sank.

The owner of the 67-ton, wooden-hulled vessel said it sank after hitting a submerged object.

On March 6 the Amazon riverboat ''El Andresito'' sank with 220 passengers on board when it collided with an anchored vessel as it was leaving Iquitos. In that accident 54 persons drowned.

#90169u2154 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - Former Sen. J. William Fulbright expressed disappointment with his successors in government Monday, saying it is a ''great tragedy'' that politicians have shifted their attention from world events to debate a constitutional amendment to ban flag burning.

The 85-year-old Democrat from Arkansas invited reporters to his home to call for greater funding for the scholarship program that bears his name and has helped nearly 180,000 students worldwide attend universities in other nations.

But Fulbright, the longest-serving chairman of the Senate Foreign Relations Committee and an early congressional foe of the Vietnam War, also surveyed the world scene and found much to his liking.

''I feel more optimistic about the international situation than anytime I was in the Senate,'' he said, adding that he believed even the Chinese would ''come around'' and join the world move toward democracy.

But Fulbright was clearly troubled by the response of American politicians faulting President Bush for refusing to cut defense spending or raise taxes, criticizing the invasion of Panama and the funding of the Contra rebels in Nicaragua, and accusing Democrats in Congress of timidity.

Asked to comment on the flag amendment, he said, ''I think it's a great tragedy that in this time of very promising issues that we should be diverted by such an ... utterly emotional and unimportant issue.''

''I just don't understand it,'' Fulbright said. ''But I thoroughly disapprove of fooling with it. I think it ought to be left alone.''

Fulbright said the United States remains an economic power but Bush's refusal to raise taxes and thereby reduce the federal deficit has put America at risk.

''We have a major problem now. We don't pay any taxes,'' he said. ''I don't see any justification for no new taxes.''

However, Fulbright did not assign all the blame to Bush. Of Democrats in Congress, he said, ''I don't think they're doing a very good job.''

''They don't seem to say much or do much,'' Fulbright said, adding, ''I think they're afraid to say much about taxes.''

Although Fulbright, a member of Congress from 1932 to 1974, repeatedly referred to himself as an ''old man,'' he was set to leave this week on a trip overseas to receive honors in Britain and the Soviet Union.

On June 23, a quadrangle of Pembroke College at Oxford University, where Fulbright studied as a Rhodes scholar, will be named after him. On June 28 Fulbright will receive an honorary doctorate from Moscow State University.

Stressing the importance of international educational exchanges, Fulbright said the Fulbright exchange program created by 1947 legislation was his ''principal'' accomplishment in Congress.

''I look at it as being a very sound business proposition. ... I call it an intelligent investment of your time and money,'' he said. ''I think if President Johnson had a Fulbright to Japan or somewhere, he would have never ventured over there (in Vietnam).''

NEW YORK (JUNE 18) UPI - The Dow industrials weighed in Monday with their biggest loss since twice plunging 70 points in January as the broad market had one of its worst showings of the year. Trading, however, was very light.

The Dow Jones industrial average, which rose 7.67 Friday to a record high of 2935.89, sank 53.71 to close at 2882.18.

The loss was the third biggest of the year for the blue-chip index, coming after a 77.45-point slump on Jan. 22 and a 71.46-point tumble on Jan. 12.

Among broad market gauges, the New York Stock Exchange composite index fell 2.93 to 194.93. The price of an average share sank 53 cents. Standard & Poor's 500-stock index lost 6.03 to 356.88.

Declines thumped advances 1,205-349 among the 2,002 issues crossing the NYSE tape, giving the broad market one of its weakest days this year.

But volume only amounted to about 133,470,000 shares, compared with 205,147,430 traded Friday, when ''triple-witching-hour'' expirations of stock-index futures and options and of options on individual stocks inflated volume.

Analysts blamed the sharp drop mainly on program selling in a market where little else was going on, as evidenced by the light volume. The computer-driven selling, used to profit on price spreads between stocks and stock index futures, was thus able to shove prices down with little resistance.

They cited nervousness in the market about the record levels the Dow industrials have reached as keeping many players out of the market.

''There's a lot of nervousness about these higher levels,'' said James Andrews, first vice president in charge of institutional trading at Janney Montgomery, Scott Inc. in Philadelphia. ''I'd say that nervousness plus the programs was what brought us down today.''

Edward Nicoski, chief technical analyst at Piper, Jaffray & Hopwood in Minneapolis, also blamed program selling for the decline but gave a couple of reasons why it may have reared its head Monday.

''It represents a reversal of the unwinding (of positions in futures and options) we saw last week,'' he said. ''Usually after the expirations, the market tends to do the reverse of what it did during the expiration process.

''Second, the bond market was weak Friday and today after industrial production was reported much stronger than anticipated.''

Treasuries were down as much as 3/8 point in late trading after losing as much as 7/8 point Friday, when the government reported industrial output rose 0.6 percent in May, above expectations for a 0.4 percent rise. Hopes faded that the Federal Reserve would lower interest rates any time soon.

''The real leadership we had in May stemmed from two factors - the cash that was piled up in mutual funds and the feeling rates would go down,'' said Nicoski.

On the trading floor, Southeast Banking was the most active issue, down 3/4 to 10 1/2, after Friday cutting its dividend, agreeing to sell certain assets of its mortgage unit to Sears Mortgage Corp. and saying that it did not expect a profit for the second quarter or for 1990.

Global Marine followed, down 1/2 to 4 3/8. Barron's magazine reported that a money manager who specializes in short selling has targeted three stocks as among his favorites to sell short. The other two were Stone Container, which finished down 1 3/4 to 17 3/4, and Cablevision Systems, down 1 to 29 1/8.

AT&T was third, falling 7/8 to 41 7/8.

Among other blue chips, IBM lost 1 3/4 to 118 5/8, General Electric fell 1 1/8 to 69 1/8, Philip Morris fell 1 1/4 to 42 3/4, Merck sank 1 3/8 to 81 1/2, Eastman Kodak slumped 1 1/8 to 40 7/8, General Motors dropped 1 1/8 to 49 1/8 and USX fell 1 1/4 to 32 3/4.

Elsewhere, Compaq Computer tumbled 4 3/8 to 123 5/8, hit by heavy profit taking after a big run up last week.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 161,648,090 shares, compared with 231,045,000 shares traded in the previous session.

Prices closed sharply lower in moderate trading on the American Stock Exchange.

The Amex Market Value index fell 3.27 to close at 360.76. Declines pounded advances 406-159 among the 823 issues traded. The price of an average share fell 13 cents. Composite volume totaled 12,787,800 shares, compared

with 14,524,510 shares traded Friday.

Energy Service led the Amex issues, off 1/8 to 4 3/8.

The National Association of Securities Dealers composite index fell 6.77 to 460.78.

RIO DE JANEIRO, BRAZIL (JUNE 18) UPI - Workers at two petroleum refineries Monday joined a nationwide walkout protesting layoffs under a government austerity plan.

A spokesman for Petrobras, the Brazilian state oil company, said employees at the Duque de Caxias refinery near Rio de Janeiro and the Landulfo Alves refinery in the northeastern state of Bahia walked off their jobs after midnight early Monday.

The walkout at the two refineries Monday means workers in at least six of Brazil's ten refineries are on strike. The strike began Thursday, and since then it has extended to most of Petrobras' 82,200 employees as local labor assemblies approve the job action.

In Rio de Janeiro, employees of the city's electrical company went on strike, leaving 13 neighborhoods in the city without electrical power for several hours.

Employees of the Sao Paulo electricity company Furnas have been on strike since June 8, but skeleton crews are keeping electricity operations going. Furnas supplies 40 percent of the electrical needs of Brazil's industrialized south.

The electricity strikes, like the petroleum walkouts, were called to protest government layoffs. President Fernando Collor de Mello, intent on cutting the deficit, had vowed to reduce the state bureaucracy, including state companies controlling the power and petroleum industries, by 354,000 jobs as of June 18.

But the official newspaper, Diario Oficial, has published the names of just 10,708 who will be placed on paid leave - a cutback of only a fraction of the jobs Collor vowed to eliminate.

WASHINGTON (JUNE 18) UPI - Dairy herds in the 21 major states produced 11.2 billion pounds of milk last month, 2 percent more than in May 1989 and the fourth month in a row for increased production this year, the government said Monday.

If production in the remaining states followed the same trend last month, U.S. milk production during May totaled 13.2 billion pounds.

The Agriculture Department said production in the 21 leading states totaled 11.2 billion pounds, an increase of 200 million pounds, or 2 percent, from May 1989.

Production per cow averaged 1,317 pounds last month, up 22 pounds from one year earlier. There were 8.51 million milk cows on dairy farms in the major states during May, 6,000 less than in May 1990 but 3,000 more than this April.

Wisconsin, the nation's No. 1 dairy state, produced 2.23 billion pounds of milk in May, up 1 percent from last year. California, the No. 2 dairy state, had the largest increase, 8 percent, for a total of 1.83 billion pounds.

North Carolina showed the largest decrease, down 5 percent for a total of 131 million pounds.

Agriculture Department economists have estimated milk production this year

would be up 2 percent from 1989's 144.25 billion pounds. Prices paid to farmers, which hit high levels during the winter, have been dropping this spring. The department has forecast prices this year would average 4 percent to 9 percent below last year's average of $13.51 per 100 pounds of milk.

MANAGUA, NICARAGUA (JUNE 18) UPI - The opposition Sandinista Front announced Monday it would hold a national congress next year to elect new leaders in a secret vote that could conceivably replace former President Daniel Ortega as leader of the party.

About 300 militants of the Sandinista National Liberation Front, or FSLN, met Saturday and Sunday to discuss the organization's future as an opposition party and analyze the causes of their Feb. 25 election defeat at the hands of President Violeta Chamorro's National Opposition Union, known as UNO.

Members agreed to stage a party convention in February, 1991 and hold a secret ballot to choose a new leadership.

Ortega, Tomas Borge, Victor Tirado, Ballardo Arce, Henry Ruiz, Luis Carrion, Carlos Nunes and Jaime Wheelock have been members of the FSLN directorate since the Sandinistas overthrew dictator Anastasio Somoza in July, 1979.

Ortega's brother Humberto, the ninth member, resigned his position in the party to remain as head of the armed forces when Chamorro took office April 25, respecting a transition agreement that barred members of the military from participating in party politics.

Ruiz said the elections will cover positions at all levels within the Sandinista leadership.

UNO leaders have predicted that Ortega will be removed from the party

leadership as a result of bitterness among members over the 55-percent to 41-percent election loss.

During the assembly, party members examined the elections and concluded that ''the principal cause of the defeat was American aggression,'' referring to U.S. economic sanctions and the eight-year war waged against the Sandinista government by U.S.-funded Contra rebels.

''The economic and military aggression, slanderous propaganda, the blockade and blackmail against friendly and allied governments tending towards the isolation of Nicaragua led to the worsening of the economic crisis,'' the communique said.

Members also agreed that the FSLN would remain an important part of Nicaraguan society.

''No substantive change, such as economic development, peace and the maintenance of popular cultures are possible without the participation of the Sandinista Front,'' the communique said.

Members said they would attempt to regain government through elections - next scheduled for 1996 - and ''vigorously reject any attempts at restoring the past policies of Somoza.''

The leftist Sandinista Front, which ruled Nicaragua for more than 10 years has maintained considerable influence under Chamorro's government, particularly in the armed forces.

A five-day general strike last month by government workers threatened to paralyze the country and gave Chamorro her first test of power against the Sandinista-controlled unions.

WASHINGTON (JUNE 18) UPI - In a bow to environmentalists, White House staffers were alerted Monday that an aluminum can and newspaper recycling program will begin in four weeks.

Paul W. Bateman, deputy assistant to the president for management, said containers for recyclable materials will be placed in the restrooms, copier rooms and other areas in the East and West Wings of the White House the Old and New Executive Office Buildings and other buildings where White House employes are assigned.

In a memo, Bateman said the cans and newspapers may be dropped at the designated collection points beginning July 16.

''We encourage everyone's participation,'' he said.

#90169u2290 06/18/1990 ~United Press International

LARAMIE, WY (JUNE 18) UPI - A woman unsuccessfully prosecuted on a child abuse charge for alleged excessive drinking while pregnant has given birth to an apparently healthy baby.

''He's a beautiful, healthy 7-pound boy,'' said Dr. Katherine Kohler, Diane Pfannenstiel's obstetrician. ''As far as anyone can identify, he seems to have no problems. The mother is also doing well. We are all very pleased.''

Pfannensteil was arrested and jailed on Jan. 4 on a charge of child abuse after tests indicated she had a blood alcohol level in excess of the 0.1 percent level considered intoxicated in Wyoming.

The tests were administered by police after Pfannenstiel, who was about 14 weeks pregnant at the time, had been taken to a Laramie hospital for treatment of injuries she suffered in an alleged assault by her husband, Ron Pfannenstiel.

The child abuse charge was dismissed at a preliminary hearing on Feb. 1 when Judge Robert Denhardt determined Albany County Attorney Cal Rerucha could not provide evidence that Pfrannenstiel's fetus had been injured by the alleged drinking.

''If prosecutors had had their way, she would have had this baby in jail '' said attorney Mary Elizabeth Galvan, who represented Pfannenstiel in the case.

#90169u2312 06/18/1990 ~United Press International

(JUNE 18) UPI - The death toll from this morning's massacre at a Jacksonville, Florida, loan office has risen to nine. An automatic weapon-toting gunman fatally shot eight people at the office before ending his own life. Police have NOT determined a clear motive in the bloodbath, although the assailant's car was recently repossessed. Authorities say the man was a suspect in at least two weekend slayings in his neighborhood that involved a 30-caliber automatic rifle... the same type of weapon used in today's shootings.

NO 11th hour appeals are in the works to try and save convicted killer John Edward Swindler from going to the electric chair in Arkansas tonight. The North Carolina native was sentenced to die for killing an Arkansas police officer in 1976. Prison officials say they're keeping a constant

eye on Swindler, whom they consider the most dangerous inmate on death row.

Iraqi President Saddam Hussein today reportedly underscored a threat that his country would respond in kind to an attack by Israel against any Arab nation. Egypt's Middle East News Agency says Hussein told an audience at the Popular Islamic Conference in Baghdad that in case of Israeli aggression, Iraq would- QUOTE- ''wipe out half of Israel.''

In Ottawa, Canada, Nelson Mandela today predicted the United States and the European Community will honor his desire to maintain economic sanctions against South Africa. Mandela also appeared to relax a key plank of the African National Congress to nationalize important industries. Mandela is scheduled to arrive in the United States Wednesday.

Soviet and West German foreign ministers apparently are inching toward agreement regarding Germany's military future... but important differences remain. Soviet foreign minister Eduard Shevardnadze and his German counterpart, Hans-Dietrich Genscher, say their meeting today in Muenster, West Germany, produced some progress. The two sides agreed to meet again at an UNspecified later date.

#90169u2320 06/18/1990 ~United Press International

(JUNE 18) UPI - U.S. crude oil prices nosedived Monday on the New York Mercantile Exchange to below $16 a barrel for the first time in nearly 19 months, after the president of the OPEC cartel warned of a price collapse.

The benchmark West Texas Intermediate crude for July delivery finished the day on the Merc at $15.94 a barrel, down 68 cents from Friday. It was the lowest Merc closing price since the $15.84-a-barrel settlement of Dec. 9, 1988.

Sun Co., based in Radnor, Pa. cut the posted price it will pay for crude at the wellhead by 50 cents for WTI to $15 a barrel - the lowest posted price since Dec. 13, 1988.

Early in the day, it was reported that Sadek Boussena, president of the Organization of Petroleum Exporting Countries, had warned of a world price collapse unless the cartel's May accord on production quotas is strictly adhered to.

Monday's Middle East Economic Survey, a respected industry newsletter based in Nicosia, Cyprus, reported Boussena as having said in a June 11 letter that ''things may soon get out of control'' if corrective measures were not adopted soon.

Algeria's oil minister, Boussena is president of the 13-nation OPEC, which

has failed in recent efforts to support higher crude prices by limiting cartel output.

At an emergency meeting in early May, the cartel agreed to cut daily output 1.4 million barrels to 22 million barrels. Production, however, has remained above 23 million barrels a day.

''The market doesn't like to hear these warnings because it means OPEC members are not doing what they're supposed to be doing,'' said Robert Baker, senior energy analyst with Prudential-Bache Securities Inc. in New York.

The impact on the market was ''more psychological than anything else,'' said Peter Beutel, a financial consultant with Merrill Lynch Futures Inc.

After the news, the WTI price moved down through $16.25 a barrel, the key support level from which prices have bounced back in recent months.

''That was pretty significant from a technical standpoint,'' said Tom Bentz, director of trading for United Energy Inc. of New York.

Wednesday is the last day of trading the July contract on the Merc, ''and the feeling is starting to grow that the August contract will follow the July,'' Bentz said.

August delivery WTI settled at $16.95, down 64 cents from Friday's close.

Before being pulled down by crude selling, gasoline prices were supported by news of a fire at Exxon Corp.'s Benicia refinery in the San Francisco area and the spread of a Brazilian oil workers' strike to two more refineries run by the state-own Petrobras oil company.

Strikes were called last Thursday at four of Petrobras' 10 refineries as workers protested a government plan to lay off 354,000 public employees in budget belt-tightening. Petrobras exports gasoline to the United States.

Exxon would not say how much gasoline production was affected by the fire. A spokesman would only say the company anticipated no interruption in product deliveries.

On the Merc, July delivery unleaded gasoline was up 0.05 cent to 61.56 cents a gallon after trading as high as 62.50 cents a gallon.

Prompt delivery unleaded was bid 67.05 cents a gallon, up 0.05 cent, on the New York Harbor cash market while losing 0.55 cent on the U.S. Gulf Coast spot market to 62.30 cents a gallon.

Gasoline prices, which have been buoyed by tightness in the California

market, rose 4.52 cents a gallon last week and have been the oil market's major support.

''If gasoline ever gives up, that'll be the end of it,'' Bentz said.

On the European crude spot market, Britain's widely traded North Sea Brent was down 30 cents to $15.25 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - lost 35 cents to $12.85 a barrel.

On the U.S. Gulf Coast crude market, prompt delivery WTI fell 70 cents to $15.90 a barrel.

#90169u2325 06/18/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - The Supreme Court decided Monday not to join the latest jurisdictional dispute between the Securities and Exchange Commission and the Commodity Futures Trading Commission over new equity instruments based on market indexes.

The Supreme Court said Monday it would not review a 7th U.S. Circuit Court of Appeals ruling that certain language in the Commodities Exchange Act of 1974 gives the CFTC sole jurisdiction over these investment vehicles.

''We did not expect to win this in the courts,'' said Kenneth Leibler, president of the American Stock Exchange. ''After the 7th Circuit decision we knew it would be an uphill battle.''

The Amex and the Philadelphia Stock Exchange had asked the Supreme Court to review the appeals court decision on so-called index participations, which are baskets of stocks based on the Standard & Poor's 500 stock index that allow individual investors to bet on the direction in which the market is moving.

Since these instruments are viewed by some as hybrid products that contain elements of both securities and futures, the exchanges had argued that either the SEC or the CFTC could approve their sale.

In fact, the exchanges in May 1989 received SEC permission to sell IPs.

The CFTC quickly cried foul.

The Chicaco Mercantile Exchange, which is regulated by the CFTC, filed suit charging that the SEC lacked the authority to approve the investment instruments and the appeals court agreed.

In seeking Supreme Court review, the Philadelphia Stock Exchange had said the effect of the appeals court ruling was to ''call into question whether any new and innovative financial products can be developed by or traded on securitites exchanges and, in many cases, be traded at all in the United States.''

The Chicago Mercantile Exchange argued against review, saying an IP is ''just a stock index futures contract wrapped in a different label'' and contended the lower court ruling does not bar it from being traded in the United States.

In any event, the exchanges are hoping to win in Congress the battle they lost in court.

The Bush administration has proposed legislation that would modify the exclusivity clause in the Commodity Exchange that allows hybrid products to be sold under either the Commodities Exchange Act or federal securities law.

The Bush proposal, entitled the Capital Markets Competition Stability and Fairness Act of 1990, probably will be introduced as an amendment to the Futures Trading Practices Act.

#90169u2326 06/18/1990 ~United Press International

ANTIGUA, GUATEMALA (JUNE 18) UPI - Secretary of State James Baker met with Central American presidents Monday and proposed a development plan that got a favorable but uneasy reaction from the heads of state.

Baker proposed the formation of a group of industrialized Western nations to oversee development and aid for the staggering economies of Central America. Under the plan, the United States, Japan, the European Community and possibly one other country would act as co-chairs.

''We showed Secretary Baker we were pleased with this proposal presented by the United States and specified our will that it be the Central American countries that form part of the administration to oversee the results,'' said Salvadoran President Alfredo Cristiani, acting as spokesman for the six heads of state.

The presidents of Guatemala, El Salvador, Honduras, Costa Rica, Nicaragua and Panama held a two-hour breakfast meeting with Baker in Antigua, about 30 miles from Guatemala City after their two-day economic summit. Baker also met separately with each of the presidents.

His preliminary proposal called for a group of nations similar to the G-24 group that oversees Western aid and development of Eastern Europe.

Baker said before traveling to Guatemala that Central Americans and Latin Americans should not worry that changes in Eastern Europe will divert the United States away from this region ''at the moment of maximum opportunty.''

''We remain fully engaged in this region,'' he said.

Baker's proposal did not include a direct role for Central America in the administration of the aid and foreign development assistance, and the regional presidents indicated they would push for such a role.

''Secretary Baker said he would try to firm up the idea with the so-called G-24 countries with the aim that at the next Central American summit, we have a formal expression of the countries' position,'' Cristiani said.

Costa Rican President Rafael Calderon said, ''What we are talking about is an atmosphere for building a mutual instrument to allow an influx of more funds.''

The presidents said they were pleased with the apparent effort by the United States to deal with Central America as a region instead of with each country individually.

Monday's meeting followed two days of deliberations in which the Central American leaders formed wide-ranging agreements on economic cooperation that call for unprecendented integration on everything from tariffs and export marketing to infrastructure improvements and debt reduction.

The presidents were optimistic that with regional conflicts appearing near

an end, they can concentrate on economic growth and begin to reduce their dependency on developed countries.

The U.S. proposal has been seen by many of those at the summit as another attempt by the United States to tighten its reigns of control over the region, international agency sources close to the summit told United Press International.

But they said if the new G-24-style formation comes with substantial foreign aid, it is unlikely to be rejected.

#90169u2327 06/18/1990 ~United Press International

WEST ALLIS, WIS (JUNE 18) UPI - Fiserv Inc., a data processing services company, said Monday it had been approached by another company for a possible merger.

Fiserv, which provides data processing services to financial institutions, said it had preliminary discussions with that company, which it declined to name.

It said only that it had been approached with respect ''to a possible corporate combination'' and that it could not predict the outcome of the discussions.

''Certainly, they (Fiserv) weren't looking to be acquired,'' said Paul Shain, an analyst with Robert W. Baird & Co., an investment firm. ''Their strategy for growth has consistently been to grow through acquisitions.''

Fiserv, based in West Allis, has grown rapidly since its birth in 1984 by acquiring local and regional providers of data processing services.

-30- 1029

#90169u2329 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - The Defense Department acknowledged Monday that at least two and possibly three of the 23 American servicemen killed in the Panama invasion died as a result of ''friendly fire'' by other Americans.

In addition, the Pentagon disclosed for the first time that at least 19 and perhaps as many as 40 of the 347 Americans wounded during the Dec. 20 invasion were hit by ''friendly fire.''

The Pentagon made the disclosures in response to a Newsweek magazine article Sunday that said the U.S. military operation against Manuel Noriega was far from flawless, with nine of the 23 Americans killed by

''friendly fire.''

Quoting ''well-placed military sources,'' the magazine said as many as 60 percent of the 347 American casualties may have been caused by fire by the American soldiers themselves and nine of those who died were accidentally slain by comrades.

''The apparent reason: the Americans did most of the shooting,'' the magazine said of the high rate of so-called friendly fire victims.

In response, the Joint Chiefs of Staff issued the following statement at the Pentagon:

''Of 23 American servicemen killed in action in Operation Just Cause, it has been determined that two were killed as a result of friendly fire at Rio Hato. In the case of one additional serviceman killed in action, it has not been determined if his death was a direct result of friendly or enemy fire. The circumstances of his death are under investigation.

''Of the 324 American servicemen wounded in action during Operation Just Cause, 19 were definitely the result of friendly fire. An additional 21 were injured by either friendly or enemy fire during the intense night fighting in the vicinity of the Commandancia (headquarters of Noriega's Panama Defense Forces). We cannot distinguish which of the 21 were hit by friendly or enemy fire.''

It was the first time the Pentagon had disclosed that some of the Americans who died in Panama had been killed by other Americans and it raised questions about the administration's previous portrayal of the invasion as flawless.

Col. Bill Smullen, a spokesman for the Joint Chiefs, declined comment on other aspects of the Newsweek article.

Among other points, Newsweek said that, although the invasion was intended to be a surprise attack, it was compromised by 12 to 15 different security leaks.

Former Panamanian leader Noriega, now awaiting trial in Florida on drug charges, was warned by the Panamanian Defense Forces at 10 p.m. on the night of the invasion that the Americans planned to attack three hours later, but he ignored the warning, the magazine said.

The magazine said the leaks came from U.S. soldiers' local girlfriends, Panamanian customs agents who warned the PDF of incoming cargo planes, and a Panamanian telephone operator at Fort Clayton monitoring calls about the invasion.

ATLANTA (JUNE 18) UPI - The U.S. death toll from AIDS has surpassed 83,000 - more than the number of Americans who died in battle in the Vietnam and Korean wars combined, the federal Centers for Disease Control reported Monday.

From the time AIDS was first recognized in 1981 through May 31, a total of 136,204 AIDS cases have been reported to the CDC. Of those patients, 83,145 have died - more than the 47,253 soldiers killed in the Vietnam War plus the 33,006 combat fatalities from the Korean War.

Most of the AIDS patients were between the ages of 25 and 50, but 2,315 were children under age 13 and 1,976 were over age 65.

CDC statistics also show blacks and Hispanics were overrepresented in the AIDS toll.

Whites accounted for 75,684 of the AIDS cases reported through May 31, while 37,850 of the AIDS patients were black and 21,319 were Hispanic.

Hispanics account for 8 percent of the U.S. population while blacks make up about 12 percent.

Another 835 of the AIDS patients were Asian or Pacific Islander, 185 were American Indian or Eskimo and 331 were of undetermined racial group.

About 60 percent of the adult AIDS cases were reported among male homosexuals, nearly 21 percent were among intravenous drug users, 7 percent were among male homosexuals who also used intravenous drug, 5 percent were among heterosexuals, more than 2 percent of the cases were among those infected through blood transfusions and 1 percent were hemophiliacs who received infected blood products. The remainder of the cases were undetermined.

#90169u2393 06/18/1990 ~United Press International
NEW YORK (JUNE 18) UPI - The dollar dropped sharply against the West German mark and the Swiss franc and lost ground against all other major world currencies on mostly technical factors Monday in thin New York trading.

Currency traders said participants were focusing on technical chart levels in the absence of new indicators following last weeks barrage of U.S. data which tended to argue against any rapid monetary policy change.

They said the dollar dropped suddenly in morning dealing without any apparent cause. ''I really can't give you too much of a strong reasoning for that,'' said trader David Jaques of Barclays Bank.

''It was a sharp move on not a lot of news,'' said Maria Nordone, a corporate trading manager for Security Pacific International Bank in Los Angeles, citing a lack of liquidity in the currency marketplace.

''We've just broken out of the downside of the (dollar's) range'' against the strongest of the European currencies, she added.

In late New York trading the dollar was quoted at 1.6740 West German marks down more than a pfennig from 1.6875 marks late Friday. Against the Japanese currency it was quoted at 153.45 yen, down from 153.90.

Nordone said she believed the surge by the Swiss franc, which triggered the dollar's dive, was caused by a big order on the International Monetary Market in Chicago, a futures exchange. The cash market followed as bank arbitrageurs acted on the Swiss franc futures rally, she said.

Other dollar rates: 1.4150 Swiss francs, down from 1.4340; 5.6320 French francs, off from 5.6790; and 1,229 Italian lire, down from 1,239.50.

The British pound rose to $1.7150 from $1.7100.

In Europe sessions the dollar ended lower after trading in narrow ranges amid uncertainty on U.S. economic data expected later this week.

Currency traders said players were selling the dollar aimlessly, looking for a safer currency. They reported high anxiety about the release Thursday of first-quarter U.S. gross national product figures.

''The major problem is that there doesn't seem to be a currency to turn to '' one London dealer said.

''They're worried about the dollar because they're looking for interest rates to be cut,'' she said. ''They're worried about the deutsche mark because of German unification, and worried about the pound because it could be devalued.''

In Frankfurt, the dollar slipped to 1.6835 marks against 1.700. In Zurich it declined to 1.4285 Swiss francs from 1.4445.

In London, the pound rose against the weaker U.S. unit to $1.7125 compared with $1.7050.

The dollar was down in Paris, Brussels and Milan, at 5.6745 francs against 5.6985, 34.67 Belgian francs against 34.93, and at 1,238.50 lire aginst

1,242.75.

Earlier in Tokyo, the dollar eased against the yen in moderate trading amid conviction the U.S. monetary stance would not change in light of stronger data last week, closing at 153.88 yen compared with 154.52 yen.

Gold rose in Zurich to $349.50 an ounce against $347.50 Friday. It was up in London too, at $349.25 an ounce against $347.50.

Republic National Bank in New York closed cash gold at $$348.75 an ounce, unchanged from Friday's close. The New York Commodity Exchange settled gold at $349.30 an ounce, down from $349.50 last week.

Silver was unchanged in Zurich at $4.85 an ounce, but was higher in London at $4.85 an ounce compared with $4.82 late last week.

Republic closed cash silver at $4.845 an ounce, up one cent from $4.835 last week. Comex silver settled at $4.825 an ounce, up from $4.811.

#90169u2427 06/18/1990 ~United Press International

WASHINGTON (JUNE 18) UPI - Consumers and the government would get the best deal, judged by pocketbook costs, if Congress were to retain the current system for running the dairy program, a consumer group said Monday.

Retention of the current system also would lead to larger sales of dairy products than under rival proposals, the group, Public Voice for Food and Health Policy, said. Its statements were based on an analysis done by Sparks Commodities Inc. and commissioned by Public Voice.

''Our study highlights the enormous stake that consumers and taxpayers, as well as dairy farmers, have in the 1990 farm (policy) bill,'' said Ellen Haas, executive director of Public Voice.

In 1985, Congress adopted a system in which the dairy support price is raised or lowered depending on the size of federal purchases of surplus dairy products. That formula led to a 50-cent reduction in the support price to $10.10 per 100 pounds of milk at the start of this year.

''A continued reduction of price supports when surpluses are expected offers the best hope to achieve (the goal of balancing consumer needs, the welfare of dairy farmers and limiting federal spending),'' Haas said.

So far, the Senate and House Agriculture committees have favored a somewhat different approach.

The House panel, in a bill approved last week, voted to make $10.10 the

minimum price through 1995 although adjustments could be made above that level to encourage production or battle surpluses. After 1991, the government could implement an ''inventory management program'' if purchases of dairy surpluses are forecast to exceed 7 billion pounds of milk. A two-tier price probably would be the only program that could satisfy the restrictions in the bill.

Senate Agriculture Committee chairman Patrick Leahy, D-Vt., has proposed similar language for his panel's version of the farm bill.

The study commissioned by Public Voice said retention of the current system would mean smaller federal purchases of surpluses, increase dairy consumption by 13 billion pounds above current levels and reduce consumer costs by $25 billion below the likely cost if the support price were frozen. The system was compared to a support price freeze and one version of a two-tier support price.

The Bush administration has proposed continuation of the current system but with finer adjustments in the support price.

House Agriculture subcommittee members initially voted to raise the support price to a minimum of $10.60 as a way to protect farmer income. The increase was eliminated as part of a decision by committee leaders to freeze support prices to rein in the cost of the new farm bill.

Milk producers advocated a 50-cent increase in the support price and levying an assessment on overproduction of milkfat, the only milk component in surplus recently. If that failed, producers said, the government should impose production controls, such as a herd buy-out or a two-tier price system.

Dairy farms produced 144.25 billion pounds of milk last year. Production was forecast to rise 2 percent this year with prices averaging slightly under last year's $13.51 per 100 pounds of milk.

Federal purchases of dairy surpluses were expected to total 7.8 billion pounds this fiscal year with total cost of the program $617 million.

LOUISVILLE, KY (JUNE 18) UPI - The last of Ford Motor Co.'s C-Series heavy trucks rolled off the assembly line of Ford's Kentucky Truck Plant Monday driven by the same person who took the first such model off the line back in 1955.

The event ended a production run of more than 250,000 C-Series vehicles built in the last 35 years, the longest continuously produced truck body style in North America.

It will be replaced in October at the Chamberlain Lane plant by the Cargo truck, built at a Ford plant in Brazil since 1985 and imported into the United States for points throughout the North American continent.

Driving the last C-Series truck from the assembly line was Whayne Wyatt, 58, of Louisville, now a quality control engineer who joined Ford in 1953.

Wyatt said he will ''most definitely'' still be on the job in October when production starts on the Cargo model.

''I worked for Ford all my life, ever since I came out of service in 1953 '' he said. ''When I decide to retire I'll probably find a way to haul trucks or work on trucks. I'll still be around trucks in some capacity.''

Ford also announced Monday some personnel moves involving its Kentucky Truck Plant, including Jim Whyte, who was promoted by Ford to be heavy truck engineering and manufacturing manager in Detroit. He replaces W.C. Ford Jr., a member of the Ford family who has moved on to another position.

George Kormanis was appointed manager of the Kentucky Truck Plant effective July 1, replacing Whyte.

''The C-Series dominated markets for city delivery trucks, fire engines and waste trucks for many years with its set-back rear axle and low profile,'' Kormanis said. We expect inventory of the C-Series to coincide with the production start Cargo model.''

The final C-Series vehicle was sold to Ron Ewers, executive vice president-production of Emergency One in Ocala, Fla. The company adapts trucks for fire engine and other rescue equipment use.

Kormanis said the truck plant, built in 1969, employs 1,900 hourly and 400 salaried workers producing 260 vehicles on one 6 a.m. to 3:30 p.m. shift each day. He said one advantage of building the Cargo in Louisville is the additional options a purchaser will have in buying the truck.

The modern Cargo is a more sophisticated truck which has proven to be a popular replacement for the C-Series, said Kenneth Smith, Ford heavy truck general operations manager.

''While demand for the C-Series remains significant, the design is simply too old for the demands of today's trucking industry,'' Smith said. ''The C-Series served the American public more than twice as long as the Model-T truck, which created the American trucking industry.''

Kormanis said there were no layoffs in Brazil with the transfer of Cargo operations to Louisville.

ROCKVILLE, MD (JUNE 18) UPI - GE Information Services said Monday it will lead a consortium selected by the European Commission to carry out one of the projects in the EC Impact Road Transport field. Terms were not disclosed.

GE Information Services will lead its partners, Saritel of Italy, a subsidiary of Stet, and Transpotel of West Germany, in developing a two-year project called Osiris - Open Systems Integrated Roadfreight Information Services.

The project will use the networking and systems integration of GE Information Services, a freight database from Transpotel and the electronic publishing ability of Saritel, GEIS said.

The development of a common software platform and workstation will allow access to the partners' national and international freight-exchange services, allowing improved Europe-wide access to data on available truck capacity by destination and goods required to be transported.

#90169u2509 06/18/1990 ~United Press International

JACKSONVILLE, FLA (JUNE 18) UPI - A man whose car had recently been repossessed sprayed a loan office with semi-automatic rifle fire Monday, killing eight people and injuring at least five, authorities said. The gunman then killed himself.

Duval County Sheriff James McMillan said the gunman, James Edward Pough, 42, of Jacksonville, also was being investigated in two weekend killings.

''It is one of the worst things I've seen in my 20 some odd years of police work,'' said McMillan, adding that one of the wounded was a police officer's wife. The attack matched the worst single-gunman massacre in Florida history, when eight people were gunned down in a Miami machine shop in August 1982.

Pough walked through the front door of the General Motors Acceptance Corp. auto finance office near downtown Jacksonville about 11 a.m. EDT and began shooting customers with a .30-caliber semi-automatic carbine, McMillan said. There were between 100 and 125 GMAC employees in the office.

Pough, also carrying a .30-caliber revolver, then went through the office

firing at employees, some of them hiding under desks, before shooting himself in the head, the sheriff said.

Seven people, including Pough, died at the scene and seven more were taken to hospitals, where two more died later, McMillan said.

McMillan said Pough's car recently had been repossessed by GMAC, but added: ''We do not know if that is the sole motive.''

Police were investigating whether Pough had been involved in at least two weekend killings in his neighborhood that involved a .30-caliber rifle like the one used at the GMAC office, McMillan said. The description of the suspect in the weekend killings matched Pough's.

Describing Monday's massacre, GMAC employee Rich Langill, who works in the office's back room, said Pough ''shot at a couple of customers on his way to the counter, and then started picking us off. A lot of the people were just like myself. At first, back where we were, the noise of it sounded like a copy machine or something had blown up.

''Anyway, somebody said get down, and we got down and then realized it was shots,'' Langill said.

GMAC employee Jean Waggoner said, ''We locked our doors and kept a lookout for more people coming in, and they were hysterical and they were going into shock. We had one lady faint on us. We more or less turned our office into a hospital.''

Nita King, assistant deputy clerk for Marion County in Ocala, said she received a telephone call unrelated to the massacre from a woman from the GMAC office about the time the shooting started.

''I answered the phone and didn't get an answer a couple of times ... and she says, 'Help! Help! Help!' ... We're being robbed. Please help,''' King said. ''About that time I could hear some gunshots in the background. ... (The caller) was under her desk. ...

''You could hear the gunshots,'' she said. ''I heard at least 8 or 10, I guess, people screaming and carrying on. The girl was so upset, she kept begging for help.''

Two women and a man from the GMAC massacre were taken to University Medical Center, where one of the women, Denise Highfill, a wife of a Jacksonville police officer, died about a half hour later, hospital spokesman Vince Scolari said. The other woman, Jewell Belote, 50, was in fair condition, and the man, Ron Ecchevaria, 49, was in serious condition.

Another victim, Lee Simonton, 33, was taken to St. Luke's Hospital, where

he died in surgery, hospital spokeswoman Kim Price said.

Sheriff's spokesman Asa Higgs identified the other dead only as Cindy Perry, Drew Woods, Jan David, Sharon Hall, Barbara Holland and Julie Burgess.

Three other injured, Nancy Dill, 30, Phyllis Griggs, 35, and Dave Hendrix, 24, were taken to Baptist Hospital in cricital condition with gunshot wounds, spokeswoman Cindy Hamilton said.

The attack tied for the worst massacre by a single gunman in Florida history. On Aug. 20, 1982, eight people in a Miami machine shop were killed and three were wounded by Carl Robert Brown, 51, who was angry over a welding bill. Brown was killed by a car that rammed his bicycle as he fled.

On April 23, 1987, William B. Cruse stalked two Palm Bay shopping centers and killed six people and wounded 14 others. He was sentenced to death and is now on death row.

#90169u2538 06/18/1990 ~United Press International

AUSTIN, TEXAS (JUNE 18) UPI - The Public Utility Commission's general counsel said Monday that $1.1 billion of the cost of the $9.2 billion Comanche Peak nuclear plant should not be passed on to customers of TU Electric Co.

In formal testimony filed with the commission, General Counsel Bob Rima said consultants hired by his office concluded that imprudent management caused the 2,300-megawatt plant to soar in cost by $713 million.

But the report said most of the cost overruns and construction delays during the past decade were caused by new and tougher regulations.

State law says electric utilities can charge ratepayers only for construction costs that have been prudently spent.

The commision staff has also determined that $447 million of the $707 million that TU Electric spent to repurchase part of the plant from three former co-owners should be viewed as shareholder costs.

TU Electric has a request for a 10 percent rate hike pending before the three-member utility regulatory agency. The company is seeking to include $5.8 billion in Unit 1 capital costs in its rate base.

''TU ratepayers should be pleased with our consultant's thorough and accurate examination of this massive capital investment,'' Rima said.

''Approval of these recommendations could save TU Electric ratepayers over a billion dollars.

Unit 1 of the twin-unit Comanche Peak near Glen Rose, about 75 miles southwest of Dallas, began supplying electricity to customers April 24. Unit 2 is scheduled to become operational in 1993.

TU Electric hopes to serve many of its current 2.1 million customers in North Texas with power from Comanche Peak.

The Somerville County plant has been burdened by huge cost overruns and construction delays since it was proposed 17 years ago at an original price tag of only $780 million. Consumer groups say they expect the plant's final cost to be nearly $12 billion.

The report for Rima's office was completed by The Nielsen-Wurster Group, Inc., at a cost to the commission of $2.3 million.

The consultant's findings of imprudence by TU Electric included:

- Lapse of the construction permit issued by the Nuclear Regulatory Commission.

- Unreasonable performance of heating, air conditioning and ventilation work by a subcontractor.

- Unreasonable performance of certain electrical work.

- Planning in connection with the resolution of quality assurance questions.

- Engineering imprudence connected with the reactor of Unit 2.

- Failure to resolve problems in quality documentation.

- Failure to maintain integrated project controls in 1980.

''TU Electric did a lot of things right, but they made a few real serious mistakes, too,'' Rima said. ''Ratepayers should not have to pay for the mistakes.''

The consultant's report said about $530 million of the imprudently-incurred costs are tied to Unit 1, and about $180 million relate to Unit 2.

The report also concluded that most of the cost increase and construction delays were caused by new regulations and tougher NRC standards.

#90169u2574 06/18/1990 ~United Press International
FOXBORO, MASS (JUNE 18) UPI - The Foxboro Co. said Monday it has strengthened its anti-takeover plan, thus signalling its intention to control any potential sale forced by dissatisfied stockholders.

The move eased speculative pressure on the process control maker's stock, which fell $1.25 in New York Stock Exchange trading to close at $34.875 a share on the news. However, the market was sharply lower with the Dow Jones industrial average down more than 50 points.

Foxboro shares had risen sharply last week after reports some descendants of the company's founders are pushing for a sale.

Also, the company last week said it was considering offers to buy or merge from more than one interested party.

A company spokesman, John C. Fuller, who is also a member of the founding Bristol family, said the change in its anti-takeover plan was ''so that we retain control of the process ... this business of seeking a strategic partner. You don't want somebody coming in out from left field making an unsolicited tender offer,'' he said.

Fuller said the company had signed ''several'' confidential agreements with others interested in a deal with Foxboro, but declined to provide further details.

As for the timing on a deal, he said, ''I guess the timetable is not days, but it isn't months either.''

#90169u2581 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - Integrated Resources Inc., the one-time national financial services company now in bankruptcy proceedings, Monday said it had sold the stock of its American Property Investors for $40 million as part of the company's continuing divestment program.

The sale, to an affiliate of Auburndale, Mass.-based Sterik Co., was the result of ''the highest unconditional offer,'' Integrated said in a statement.

The deal is subject to U.S. Bankruptcy Court approval.

Last Friday, Integrated announced the $45 million sale of its American Insured Mortgage Investors to Krupp Cos. of Boston.

Integrated filed for Chapter 11 bankruptcy in February, when its chairman said the company had outstanding debts of $1.6 billion and assets of $700 million.

The company had prospered in the early 1980s but suffered reverses when changes in tax laws made its main business of tax shelters unprofitable.

#90169u2591 06/18/1990 ~United Press International

NEW YORK (JUNE 18) UPI - Tobacco companies will no longer be allowed to distribute free or discount cigarette samples in public places in the city under a measure signed into law Monday by Mayor David Dinkins.

The legislation was part of a package of bills backed by the city health and consumer affairs commissioners to limit smoking by minors.

The most far-reaching measure, a proposal to restrict or completely ban

cigarette vending machines in the city, is still under consideration by the City Council.

Brooklyn Councilman Sal Albanese called the law banning cigarette sample giveaways a first step.

''This bill sends a clear message. We will not allow tobacco companies to target our young people,'' said Albanese, the chief sponsor of the legislation.

Albanese and others in favor of limiting cigarette sales point out that the majority of smokers pick up the habit when they are teenagers.

They charge that youths have little trouble buying cigarettes, even from vending machines located in bars, where minors are forbidden by law from entering.

But tobacco industry lobbyists argue that existing laws are sufficient to prevent smoking by minors if they are properly enforced. They charge that the legislation is unconstitutional, but have not threatened to sue the city.

#90169u2639 06/18/1990 ~United Press International

JORDAN, MONT (JUNE 18) UPI - Paleontologists Monday presented the most complete skeleton of a tyrannosaurus rex ever found, contorted in rigor mortis atop the green clay on which it roamed 65 million years ago.

''This will be the animal you'll see in the textbooks,'' exulted Greg Erickson, a crewmember of the Museum of the Rockies, after stepping out of the shallow 25-foot-square pit where brown hip, leg and backbone fossils poked several inches above the surface.

The 40-foot-long animal - only the seventh tyrannosaurus rex ever found, and the sixth from Montana - was preserved lying on its left side in the Fort Peck reservoir on the Missouri River in the badlands of northeastern Montana, about 400 miles northeast of Helena. There was no indication how it died.

Its neck had curled over its back as the muscles stiffened after death, Erickson said, and the skull had come loose but appeared to be complete.

Erickson said that on Sunday the crew uncovered what apparently was the detached tip of the nose after removing the plaster-and-burlap ''winter jacket'' that had protected the exposed fossils since fall.

Much of the tail had become detached, but the 10 crew members were still

optimistic they could find virtually all the bones.

Researchers earlier examined the animal's left arm and determined it could lift and hold 400 pounds even though it was the same length as man's.

Most of the skeleton remained encased in light gray sandstone formed atop the green clay from the sediments of a catastrophic flood that trapped and preserved the carcass shortly after the seven-ton, carnivorous animal died crew members said.

''It is the biggest meat-eating animal that ever walked on this earth,'' museum Curator Jack Horner said while strolling area around the dig site, where he recently found a 10-inch-long Tyrannosaurus tooth on the ground. ''It had a whole mouthful of steak knives.''

The remote dig site, situated in the sparsely grassed mud and sandstone badlands around Fort Peck Reservoir, will remain closed to the general public, but reporters and photographers were permitted to visit it Monday.

The paleontologists last week used jackhammers to remove up to 12 feet of sandstone covering the skeleton. For work on and near the bones, they relied on more delicate tools, including brushes, whisk brooms and a yellow mustard squeeze bottle filled with a plastic solution that both protected the bones and highlighted their red-brown color.

Back in the laboratory, technological advances will let researchers explore the structure of the bone and its blood vessels, which also are preserved in the fossil.

''You don't have to take it apart anymore,'' said crew member Scott Sampson. ''Nowadays you can throw things into CAT scanners and look inside the bones.''

Some scientists also are hoping to recreate dinosaur DNA by studying the minerals that replaced animal material in fossilized bone, Erickson and Sampson said.

The tyrannosaurus skeleton and its encasing rock will be removed in about five pieces, starting next week, dig supervisor Pat Leigge said.

It will be prepared in public view at the museum in Bozeman over the next three years, Horner said.

The fossil was found in 1988 by amateur hunters Cathy and Tom Wankel of Angela when they noticed a half-inch-wide light brown fossilized bone protruding 2 inches out of dried mud near the reservoir.

#90169u2736 06/18/1990 ~United Press International
(JUNE 18) UPI - A gunman whose car had been recently repossessed stalked through an auto loan office in Jacksonville, Florida, today... shooting people at random. Before he was done, authorities say he fatally shot eight people and wounded at least five others before turning the gun on himself. Investigators say the man... identified as 42-year-old James Edward Pough... is suspected in two weekend killings.

The Defense Department acknowledged today that two or three of the American soldiers killed during the invasion of Panama died as the result of so-called ''friendly fire.'' The Pentagon also disclosed that at least 19 and possibly as many as 40 of the 324 Americans wounded in the December invasion were hit by fire from other U-S troops. The announcements come in response to a report that as many as 60 percent of the dead and wounded were hit by friendly fire.

Central American leaders are greeting an aid proposal by Secretary of State Baker with some reservations. Baker met today with six Central American presidents in Guatemala and called for a group of industrialized Western nations to oversee a regional development plan. But sources close to the summit say the presidents see the proposal as another U-S attempt to tighten control over the region.

Romania's parliament today called on security forces to keep Bucharest's main square free of demonstrators. But police stayed away from the square, where hundreds of anti-government protesters gathered for the second day. The protesters were joined by workers appalled by the government's decision last week to unleash vigilante coal miners on demonstrators. In Poland, Solidarity union miners called on Romanian miners NOT to become tools for politicians.

(JUNE 18) UPI - The Coast Guard says booms have been set out to protect sensitive coastal marshlands, should oil spilled from the super-tanker ''Mega Borg'' reach the Texas Gulf Coast. Officials report the drifting 30-mile slick was slowed by prevailing winds and that the oil may NOT even reach the Texas shore. To be on the safe side, volunteers are picking up litter on beaches to make an oil clean-up effort easier.

Congressional investigators are accusing the National Institutes of Health of having a sexist attitude toward research. Chief investigator Mark Nadel says the N-I-H fails to include enough female patients in medical studies- despite the fact that diseases affect men and women very differently. He cited a recent N-I-H study on heart disease that involved only men... even though the disease is the number-one killer of both men and women.

The Supreme Court today refused to step into a bitter legal dispute over song royalties involving the son and illegitimate daughter of the late country-western singer Hank Williams. Hank Williams Junior wanted the court to judge him the sole heir to his father's royalties. A lower court in Alabama had ruled that Cathy Stone, as the senior Williams' natural daughter, was entitled to a percentage.

A movie analyst says ''Dick Tracy'' had a good opening last weekend, but NOT a great opening. Walt Disney says the film grossed a solid 22-and-a-half-Million dollars... making it the studio's highest-grossing debut ever. Despite the strong showing, ''Tracy's'' opening weekend was only the fourth largest this year. The largest so far is Arnold Schwarzenegger's ''Total Recall''... followed by ''Teenage Mutant Ninja Turtles'' and ''Back to the Future Part Three.''

#90169u2760 06/18/1990 ~United Press International

MEDINAH, IL (JUNE 19) UPI - The last man invited to the party walked off with the silverware Monday and in so doing re-wrote the record book of the U.S Open.

Hale Irwin not only won in the first sudden death playoff in the tournament's 90-year history, he became only the fifth three-time winner of the event. And at age 45 he is the oldest of the U.S. Open champions.

For the second day in a row, Irwin showed that being behind late in the day doesn't mean he is going to be a loser when the day is over.

He made a 40-foot putt on Sunday at the final hole to win his way into an 18-hole playoff with Mike Donald and then, after both players had shot 74 in regulation, Irwin holed a 10-foot birdie on the first hole of sudden death for the title.

''There were times,'' said Irwin, ''when I found it difficult to believe it could happen. But I just kept trying and kept trying. I guess it was my turn.

''I actually dreamed a few weeks ago I would win the Open. I don't remember anything specific about the dream except that winning was an ordeal - just like it turned out to be.''

Because of his two prior victories in the Open - in 1974 at Winged Foot and 1979 at Inverness - Irwin was awarded a special exemption from qualifying for this tournament by the USGA.

The invitation came in the mail just as Irwin was preparing to fill out

his application to enter the qualifying competition prior to the tournament.

Now, with a new 10-year exemption for his win, Irwin will have an invitation to play in the Open until he is 55.

''I guess since I am so old,'' Irwin said, putting special emphasis on the word old, ''I feel blessed. You wonder if you will ever have this sort of opportunity again. And when I got that opportunity, it looked for a while that it would only be an opportunity.

''I dug myself into a pretty good hole.''

Irwin dug a hole for himself because of an erratic, 2-over 38 on the front nine that left him one shot behind at the turn. But over the next two hours his experience paid off and brought him a $220,000 first-prize check. Donald's second-place finish was worth $110,000.

''I thought along about the 11th hole Hale looked pretty frustrated,'' Donald said. ''But he has been in these situations before and it paid off for him today.

''And I guess I let him off the hook, too. But I never knew before if I could contend in a major championship. Now I know I can.''

Neither player produced memorable golf during the 18 holes prior to sudden death, chiefly because of the blustery winds which turned the Medinah Country Club course into the kind of terror expected of it before the tournament began.

The 74s Donald and Irwin shot were the highest winning 18-hole playoff score in the Open since 1927, when Tommy Armour shot a 76 at the Oakmont Country Club to beat Harry Cooper by three shots.

Despite the lack of sensational play, however, the drama was first rate.

Donald began and ended the front nine with birdies, but in between he three-putted once and missed three greens. He scrambled his way to a 1-over 37, which gave him a one-shot lead over Irwin at the turn.

Donald missed a chance to go two shots in front when he three-putted for a bogey at the par-4 11th after Irwin had bogeyed the hole.

But a bogey by Irwin at the 12th after a poor drive gave Donald a two-shot cushion and birdies by both players at the par-5 14th kept the margin at two.

The day began to turn around at the long, par-4 16th, where Irwin faced a

second shot of 207 yards uphill and against the wind.

''It was the most solid shot I hit all week,'' Irwin said. The ball finished five feet away from the hole and the resulting birdie brought Irwin within a shot.

That one shot disappeared when Donald bogeyed the final hole, hooking his drive into the trees, gouging it out into a bunker in front of the green, blasting to within 15 feet and barely missing the putt that would have won the tournament.

During the first 50 years of the Open, if a playoff ended in a tie the players returned the next day for another 18 holes. But since that rule was changed - creating a sudden-death playoff in the event of a tie after 18 holes - there had been no playoff deadlocks.

So after 18 grueling holes Monday, Donald and Irwin stepped back to the first tee to make history by being the first players to settle the Open crown in sudden death.

Both players drove perfectly, but Donald's second shot was hit a fraction thin and did not reach the ridge in the middle of the green which would have sent the ball scooting toward the hole. He finished 30 feet away.

Irwin hit his second shot high in the air and it came to rest what he estimated was 10 feet away - although most of those who saw the putt felt it was a little shorter.

Donald's birdie putt never had a chance and Irwin's never looked anything but perfect. Before the ball reached the cup, Irwin was walking toward the hole to retrieve what turned out to be the winning putt.

''I actually don't remember hitting it,'' Irwin said. ''But I remember it going in.''

It was Irwin's first victory of any kind in five years and the 18th of his career. And by winning his third Open 16 years after his first, he put himself second in that department behind Jack Nicklaus - whose fourth Open crown in 1980 came 18 years after his first.

#90169u2768 06/18/1990 ~United Press International

BOSTON (JUNE 18) UPI - Charles M. Vest, a University of Michigan vice president, was elected Monday to be the 15th president of the Massachusetts Institute of Technology, and he pledged to continue military research at the university and revitalize science and mathematics literacy.

Vest, 48, unanimously elected by MIT's board of trustees, will take office in mid-October, succeeding Paul E. Gray, who will become chairman of the MIT Corp.

Vest, now provost and vice-president for academic affairs at the University of Michigan at Ann Arbor, told a news conference after the ratification vote that he would generally follow the guidelines set by his predecessors to maintain MIT as ''a wellspring of new scientific knowledge.''

He pledged to help MIT ''lead in the redefinition of engineering education in light of scientific change and of new global and social realities.''

Vest said he would be proud to continue MIT's traditional commitment to defense research. ''MIT has a long record of providing knowledge that has kept the nation secure, and that will continue,'' he said.

''The 1990s is a time when large segments of the nation have lost the will to excel and the belief in the central importance of higher education,'' Vest said, stressing that a broad curriculum was necessary to ''educate the young to be the very best ... as fellow citizens and as a community.''

Vest denied accusations by an MIT student group that he showed racial and ethical insensitivity during his tenure at the University of Michigan.

''Racial issues are an area of deep personal interest ... and they will be a priority,'' Vest said.

MIT Professor Robert Solow, chairman of the search committee that nominated Vest last week, said he ''has the experience, philosophy and the personality that just seems the perfect fit for MIT.''

Vest pioneered the application of computer tomography, the basis of CAT scanning coupled with optical techniques, to study fluid flow in three dimensions. He is the author of ''Holographic Interferometry,'' a standard work that has been translated into Russian and Chinese.

#90169u2836 06/18/1990 ~United Press International

BEVERLY HILLS, CALIF (JUNE 18) UPI - Pathe Communications Corp. said late Monday that it may try to extend the deadline for its $1.2 billion tender offer for MGM-UA Communications Co. beyond this Saturday.

Pathe's $20-a-share tender offer, first announced in March, has been extended on several occasions already. On Friday, when the offer was to expire, Pathe announced that it had been extended by one week.

Pathe, which is controlled by flamboyant Italian financier Giancarlo Parretti, has been scrambling for the past three months to line up the financing for the bid. The company said Monday that it is continuing discussions with Time Warner Inc., which has agreed to lend it $650 million for the deal, in exchange for distribution rights to Pathe and MGM-UA films and an interest in the 1,000-title United Artists film library.

Pathe has already made four $50 million down payments to MGM-UA, which is controlled by financier Kirk Kerkorian. It also said last week that it plans to raise $368 million from asset sales and bank loans.

(JUNE 15) UPI - SPORTS DIGEST

Baseball

Nolan Ryan of the Texas Rangers, who tossed his sixth no-hitter June 11 against the Oakland Athletics, was named the American League ''Player of the Week'' for June 11-17. Ryan, 43, baseball's all-time strikeout leader, became the oldest player ever to throw a no-hit game. ... The USA National Baseball Team, which will compete in the Goodwill Games and the World Amateur Baseball Championships this summer, released two players to reach its traveling roster limit of 25. ... George Brett is among 24 major-leaguers nominated for the 20th annual Roberto Clemente award, presented to the player who best represents the game on and off the field through humanitarian endeavors. The award will be announced in July 9 during the All-Star Game festivities in Chicago.

Basketball

Georgetown coach John Thompson has been offered $700,000 a year to become general manager of the Denver Nuggets, USA Today reported. Nuggets co-owners Bob Wussler, Bertram Lee and Peter Bynoe were met with Thompson over the weekend. Says Thompson: ''I would say I'll be coaching at Georgetown next year. ... (But) we are exploring our options. I think I owe it to myself to listen anytime somebody proposes something to me.'' ... Charles Barkley of the Philadelphia 76ers will undergo arthroscopic surgery June 25 to remove a bone spur in his right shoulder. The All-Star foward will spend six to eight weeks in rehabilitation and is not expected to miss training camp in the fall. ... Isiah Thomas, MVP of the Detroit Pistons second straight NBA championship, is not the target of a federal investigation into a nationwide gambling operation, a U.S. Attorney said. Thomas, whose name emerged in a grand jury gambling probe, contacted the FBI immediately to clarify the matter and clear his name. ... Youngstown, Ohio will host the third annual World Basketball League All-Star Game July

11.

Boxing

The U.S. Junior Olympic Boxing Championships will be held June 20-23 at Marquette, Mich. More than 180 boxers, representing 14 regional teams, are expected to attend the tournament, which features 17 weight categories and three-round bouts of two minutes each.

College

The University of Illinois complied with an NCAA deadline, submitting a response list to allegations of recruiting violations by the school's basketball program. The NCAA had sent a lettter of inquiry to the university in February, listing allegations that high school prospects were offered money and cars to attend U of I. The NCAA Infractions Committee is scheduled to meet in Colorado Springs, Colo., Aug. 11-14 and University officials have said they hope to make Illinois' case at that time. Illinois could be forced to suspend its basketball program for at least a year if found guilty of major violations.

Cycling

Six wild cards have been assigned for the June 30 Tour de France, completing the field for the world's premier cycle race. The six join the 16 teams automatically qualifying for the race, which begins in Potiers, France.

Horse Racing

The top 10 thoroughbreds, as polled by Thoroughbred Racing Communications: Criminal Type, Sunday Silence, Prized, Summer Squall, Housebuster, Ruhlmann, Unbridled, Bayakoa, Steinlen and Safely Kept.

Media

Home Box Office sent undercover investigators across the country Saturday night to see if bars were stealing the pay-TV company's telecast of the Mike Tyyson-George Foreman boxing double-header from Las Vegas, Nev. HBO said 40 percent of the 750 establishments it visited nationwide pirated the signal. ... CBS begins its ninth straight season of college football telecasts with a Sept. 15 double-header - Pittsburgh at Oklahoma in mid-afternoon and Michigan at Notre Dame in prime time. The 17-game schedule concludes with Army vs. Navy from Philadelphia Dec. 8. ... Vin Scully, longtime voice of the Los Angeles Dodgers and an NBC baseball and golf announcer for seven years, will join Hall of Fame catcher Johnny Bench to call the 1990 World Series for CBS Radio. Scully previously worked for CBS from 1977-82.

#90169u2912 06/18/1990 ~United Press International

(JUNE 18) UPI - Florida gunman goes on shooting spree... Supreme Court upholds pension funding... The Pentagon says ''friendly fire'' killed and wounded U-S troops in invasion of Panama... and the toll of the AIDS epidemic. All from U-P-I, next:

A gunman whose car had been repossessed turned a Jacksonville, Florida, auto loan office into a temporary emergency room and morgue today.

Authorities say eight people were killed and at least five others wounded at the General Motors Acceptance Corporation office near downtown Jacksonville. One of the wounded was a police officer's wife.

At the end of his attack the gunman- tentatively identified as 42-year-old James Edward Pough- shot and killed himself.

One office worker said he locked his door and hid during the shooting, then turned his office into a make-shift emergency room for people going into shock.

The attack matched the worst single-gunman massacre in Florida history, when eight people were killed in a Miami machine shop in 1982.

Police say Pough used a .30-caliber semi-automatic carbine and carried a 30-caliber revolver during today's bloody massacre.

Authorities also are investigating whether Pough was involved in two weekend killings in his neighborhood that involved the same caliber rifle used in today's shooting spree.

Labor Secretary Elizabeth Dole says workers and retirees can sleep better tonight after a Supreme Court ruling on the nation's pension funds.

Dole had words of praise for today's court decision that the federal government may order companies to resume funding pension plans.

The case was brought by a government corporation called the Pensions Benefit Guaranty Corporation. It guarantees pension plans like other government programs guarantee bank deposits.

Companies short on money can turn their pension plans over to the government body. At issue in this case is whether those companies can later make up any benefits employees may have lost... without taking back financial responsibility for the plan.

Federal lawyers warned that if companies were allowed to do this... they could use the government for UNrestricted pension bailouts, causing a financial crisis similar to the savings and loan collapse.

-30- 2432

#90169u2978 06/18/1990 ~United Press International

(JUNE 18) UPI - South African black nationalist leader Nelson Mandela says he's optimistic the United States will maintain economic sanctions against South Africa's white minority government.

The 71-year-old Mandela made the comments today in Ottawa, the latest stop in a world tour to rally support for his anti-apartheid cause.

In a historic address to Canada's Parliament today, Mandela warned that an end to struggles ''is beyond the horizon,'' only if nations continue to squeeze South Africa financially.

He also paid tribute to the thousands of South African blacks who have died in the fight against apartheid, saying- quote- ''we come from a people who... would NOT accept to be treated as subhumans.

Canadian lawmakers responded to his words with several rounds of standing ovations.

Mandela stops over in Toronto and Montreal before traveling to New York City on Wednesday.

A convicted killer has received his last two visitors while waiting to be electrocuted by Arkansas authorities tonight. John Edward Swindler's only visitors were his lawyer and his religious adviser.

Swindler was sentenced to die for the 1976 shooting of a 30-year-old police officer. He has also been convicted of killing two teen-agers in South Carolina, and was charged with killing a student in Florida.

Swindler is scheduled to die at Arkansas' Cummins prison unit about, 20 miles southeast of Pine Bluff.

The husky, red-faced native of Columbia, South Carolina, will be strapped into a wooden chair called ''Old Sparky'' and have 23-hundred volts of electricity jolt through him for four minutes.

The Supreme Court rejected stay of execution Saturday and lawyers for Swindler plan NO last-minute appeals.

-30- 1901

#90169u2993 06/18/1990 ~United Press International
(JUNE 18) UPI - The Natural Resources Defense Council today issued a warning to consumers NOT to buy products containing an ozone-depleting chemical called methyl chloroform.

The environmental group says the substance works much like chloro-fluorocarbons by eroding the Earth's protective ozone layer.

Researchers report that methyl chloroform is NOT as destructive pound-for-pound as fluoro-carbons. But it is produced and emitted in such huge quantities that it is believed responsible for 16 percent of the ozone-destroying chlorine now in the upper atmosophere.

The substance reportedly is used in about 140 products, including such well-known items as upholstery protector, contact cement, nail polishes, fabric cleaners and insecticides.

The news comes as delegates from 80 nations prepare for a conference in London this week to strengthen an international treaty to protect the ozone layer.

House Ways and Means Committee Chairman Dan Rostenkowski told U-S mayors today NOT to expect any money from the so-called ''peace dividend'' because the money is already earmarked to bail out the savings and loan industry.

The Illinois Democrat gave the bad news in an address to the annual mayors' conference in Chicago.

Rostenkowski says Congress needed BILLIONS to pay for the savings and loan mess, whose losses are estimated as high as 500-BILLION-dollars.

The word shattered the hopes of cash-starved city officials who looked for some of the money saved on U-S military expenses because of changes in the Soviet Union and Eastern Europe.

The conference host, Chicago Mayor Richard Daley, says a major investigation should have been conducted before any federal money was pledged to a S-and-L bailout.

Atlanta Mayor Maynard Jackson says more and more cities are beginning to believe Congress does NOT care about them.

-30- 2036
#90169u3041 06/18/1990 ~United Press International
(JUNE 18) UPI - Authorities say the man who opened fire in a Jacksonville Florida, loan office today had a violent criminal record. Duval County

Sheriff James McMillan says 42-year-old James Edward Pough served five years' probation for aggravated assault, and was once arrested for assault with intent to murder.

Eight people were killed and at least five people wounded when Pough sprayed the office with semi-automatic rifle fire. He then killed himself. McMillan says Pough also is a suspect in the weekend killings of two people.

Newsweek's assessment that the U-S invasion of Panama was far from flawless seems to be correct. The Defense Department admitted today that at least two and possibly three of the 23 American servicemen killed during the December operation were accidentally felled by their comrades.

About 500 anti-government protesters gathered in the main square in Bucharest, Romania, for a second day today. Police stayed away from the plaza, despite a call by the lower house of Parliament for authorities to keep the square clear of demonstrators.

In Luxembourg, the 12 foreign ministers of the European Community today froze ratification of a trade and economic co-operation agreement with Romania. The ministers cited the use of force by the Romanian government and its supporters in putting down last week's demonstrations.

A barge carrying five-Million gallons of light diesel oil ran aground in Buzzards Bay off Massachusetts today. But Coast Guard officials say the threat of a serious oil spill appears remote. The accident took place about one mile from where a cruise liner ripped open its hull on the bottom last week.

#90169u3060 06/18/1990 ~United Press International

(JUNE 18) UPI - The discovery of another body today in Shadyside, Ohio, raises the death toll from last Thursday's flash flood disaster to 21. Authorities say 14 people remain missing. Federal weather officials have begun an investigation into why NO flash flood warning was issued that night.

Another blast of searing heat hit the Southwest today... bringing 100-degree plus temperatures and high humidity to Oklahoma, Arkansas and Texas. For a fourth straight day, the National Weather Service issued a heat advisory in northern Texas.

Opening statements are scheduled tomorrow in the drug and perjury trial of Washington, D-C, Mayor Marion Barry. After two weeks of questioning, an 18-member panel of 12 jurors and six alternates- 15-women and three men- was seated today.

Lawyers for imprisoned P-T-L founder Jim Bakker asked a federal appeals court in Richmond, Virginia, today for a new trial in a bid to reverse Bakker's conviction and 45-year jail term. Says Bakker- ''I pray God will speak to the judges.''

Foster Parents Plan is changing its name. In an effort to grow faster, officials say the 53-year-old international relief organization that helps children in 26 countries will be known as PLAN International.

-30- 1403

#90169u3145 06/18/1990 ~United Press International

(JUNE 18) UPI - Police in Jacksonville, Florida, are calling it one of the worst massacres by a single gunman in state history. This morning, 42-year-old James Edward Pough... whose car was recently repossessed... walked into a General Motors Acceptance Corporation loan office and shot and killed eight people. Witnesses say Pough stalked employees- some of the hiding under desks- before turning the gun on himself. Pough is suspected in two other murders last weekend.

White House news secretary Marlin Fitzwater says the Bush administration is NOT ruling out the possibility that Libya is building a second chemical weapons plant. His comments follow a Washington newspaper report that a plant is being built beneath the desertm some 460 miles from Tripoli. Fitzwater says when it comes to Libya, the Bush administration is- quote- ''prepared to believe the worst.''

The president of Liberia today announced general amnesty for rebels. In other gestures of conciliation, President Samuel Doe legalized two opposition parties and said the rebels may form their own party. Western military officials say a nervous calm has fallen over the capital, Monrovia, two days after peace talks broke down. There's NO sign the rebels are fulfilling last week's threat to take the city.

Nicaragua's Sandinista Front says it will hold a party convention next year that could replace former President Daniel Ortega as leader of the party. 300 Sandinista militants met last weekend in Managua to discuss their party's future following February's election defeat. They agreed to hold a secret ballot in February 1991 to choose a new leadership.

-30- 1817

#90169u3163 06/18/1990 ~United Press International

(JUNE 18) UPI - The trial of the third defendant in the Bensonhurst racial slaying case opened today in a New York City courtroom. Prosecutors argued that 21-year-old John Vento ''knew a gun was on the scene'' when he helped recruit a gang that killed a black youth in Brooklyn last summer.

Vento is being tried for second-degree murder in the killing of 16-year-old Yusuf Hawkins. Defense lawyers say Vento did NOT know the convicted triggerman had a gun and did NOT want anyone killed.

A man considered a hero in the Soviet Union for averting what could have been an even more catastrophic Chernobyl nuclear disaster is fighting for his life. Anatoly Grishhenko is in critical condition in a Seattle hospital suffering from a lung infection. The helicopter pilot also has leukemia, possibly from his repeated explosure to radiation when he flew over Chernobyl's fractured core to cap it.

Two separate surveys show how tough it is to be a mom these days. Working Mother magazine polled some 17-hundred working mothers and 70 percent of them said taking care of a sick child is the top conflict between home and office. A Parents magazine survey found moms who work and moms who stay at home tend to want what the other has. Working mothers say they miss their children. Housewives say they miss the money.

A lot of ingredients go into dog food, but a man in Weaverville, California, knew high school rings areN'T part of the recipe. So when Preston Schwortz found a 1987 Utah high school ring in a box of Vita Bones he called the makers of the dog food in Ogden, Utah. It turned out a worker at the company had lost the ring, and was heart-broken. Schwortz mailed it back and hopes to meet the woman on a business trip through Ogden.

#90170b0017 06/19/1990 ~Business Wire

LOS ANGELES (JUNE 19) BUSINESS WIRE - Howard P. Hoffman has been named a managing director of Price Waterhouse's (PW) Real Estate Consulting Group, where he will direct the firm's expanded corporate asset re-deployment program, according to David A. Eisner, managing partner.

Hoffman has 30 years as a real estate consultant and adviser to such major corporations as Security Pacific National Bank, McDonnell Douglas Corp., American Express, W.R. Grace & Co., Olivetti Corporation of America and Litton Industries.

''One of PW's major strategic thrusts in the 1990s will be in helping both current and future clients of the firm to evaluate their real estate holdings,'' said Eisner. ''Mr. Hoffman's vast experience in doing just that -- advising corporations on realistic alternatives for their excess or surplus land and buildings -- adds another important level of expertise to PW's expanding portfolio of real estate services.''

The corporate re-deployment program, which will serve clients throughout the nation, is the latest expansion for PW's Real Estate Consulting Group,

which began its Southern California operations in January.

''The No. 1 hurdle we face when advising these corporations is convincing them that rather than just a quick sale of any excess properties, there may be other uses for the land that can bring a much higher return to the corporate bottom line,'' said Hoffman. ''Through these services, we are able to achieve that goal.''

Hoffman's background includes serving as advisor to Security Pacific National Bank during 1985 when the bank re-evaluated its downtown Los Angeles real estate holdings. In addition to selling its high-rise headquarters building, the company, on the advice of Hoffman, also assumed control of the never-occupied, but new, Beaudry Center just west of downtown Los Angeles.

Terms of the acquisition and subsequent lease commitment by some of the bank's mid-level divisions proved profitable for the bank. As part of its lease, Security Pacific had a participation in the equity of the building, which was subsequently sold at a profit with the bank staying as the major tenant.

DENVER (JUNE 19) BUSINESS WIRE - More than a quarter million pounds of material that used to be discarded in the trash has instead been recycled during the first two months of a comprehensive curbside recycling program that enables homeowners to recycle 35 different items.

The program was launched April 2 at the 2,700-home Ken-Caryl Ranch community, located in the southwest Denver metro area. Under the program Laidlaw Waste Systems collects recyclables from homeowners and transports them to TRI-R Systems Corp. (NASDAQ:RRRC). TRI-R sorts, packages and sells the recyclables to end-users.

During April and May, Ken-Caryl homeowners recycled 253,046 pounds of material, or nearly 50 pounds per household per month. Newspaper accounted for about half the total pounds, and other items included stainless steel, copper, brass, aluminum cans and miscellaneous aluminum, plastic and glass containers, and cardboard.

Among the items recycled during the first two months of the program were aluminum rain gutters; aluminum lawn chairs; stainless steel, copper and aluminum pots and pans; aluminum and copper wire; copper pipe; brass pipe fittings; and computer paper.

Headquartered in Denver, TRI-R Systems Corp. operates in Colorado, Wyoming and Arizona. The company purchases a wide range of reusable materials from consumers, business and government, processes these materials, and sells them to domestic and foreign manufacturers.

Commodities purchased including aluminum cans and scrap aluminum, glass, copper, brass, stainless steel, plastic containers, and a variety of paper products including computer printout paper, office paper, newspaper and cardboard.

The company's stock trades on the over-the-counter market (NASDAQ) under the symbol RRRC.

    #90170b0032 06/19/1990 ~Business Wire

ST. LOUIS (JUNE 19) BUSINESS WIRE - American Trading and Production Corp. (Atapco) has entered into an agreement with Pembridge Investments Ltd. of England to acquire John Heath and Co. Ltd., Birmingham, England, the second largest wholesaler of stationery and office products in the United Kingdom.

The acquisition was announced jointly by Irvin M. Zimet, president of the Atapco Office Products Group, and Martin E. Franklin of Pembridge Investments, which owns John Heath.

The John Heath operation will become a part of St. Louis-based Atapco Office Products Group, Zimet said. With the acquisition, Atapco's domestic and international office products business will have sales in excess of $350 million.

''We are delighted with the acquisition of John Heath,'' Zimet said. ''It is a strong business of excellent heritage, strong profit performance and with a significant market position. We see this acquisition as giving us an important springboard for a major European business.''

Franklin said the transaction fits squarely with Pembridge's philosophy.

''I am confident that in focusing on the development of the business, John Heath will flourish under its new owners,'' Franklin noted.

In making the announcement, Zimet said John Heath will continue to operate as an autonomous business unit. Terry Blyth, managing director of the English wholesaler, also will become a senior vice president of Atapco

Office Products Group.

In discussing the acquisition, Blyth said, ''Atapco represents a perfect partner for the business and the industry. The Heath team is excited with Atapco's ambitious U.K. and European plans. We gain a superb pedigree, a strong investment plan, a most valuable know-how link to the American marketplace and, significantly, the industry can see a corporate parent with a long-term commitment to the stationery products business.''

In addition to the John Heath acquisition, Atapco announced that its Canadian affiliate, Prestonia Office Products Ltd. of Stratford, Ontario, has agreed to acquire the stationery business of DRG Inc., Canada. Located in Georgetown, Ontario, DRG manufactures and distributes a wide range of filing systems, report covers, account books, writing pads and other stationery products.

The two acquisitions will further increase Atapco's global presence in both stationery manufacturing and distribution, Zimet pointed out. He said he expects both acquisitions to be completed by mid-July.

Baltimore-based American Trading is a privately held corporation with other business interests in manufacturing, real estate, oil and gas, and marine transportation.

SEATTLE (JUNE 19) BUSINESS WIRE - Roy Nutt, a pioneer of the computer software industry and a co-founder and director of Computer Sciences Corp. (NYSE:CSC), died in Seattle June 14 after a year-long bout with cancer.

He was 59 years of age.

Nutt was well-known both here and abroad for his participation in the development of today's widely used programming languages for business and scientific uses of computers and his many subsequent contributions to the advancement of software technology.

Upon his graduation with a degree in mathematics from Trinity College, Hartford, Conn., he joined United Aircraft Corp. in 1953 to work in programming research and development. He became one of the early experts in the field of systems programming, the basic instructions that control a computer and simplify its use.

As United Aircraft's representative to IBM's SHARE user organization, he

designed and developed the first widely used symbolic assembly program, called SAP and was one of the small team of programmers who developed the original FORTRAN language and compiler. FORTRAN is still the most widely used language for scientific and engineering computation, both here and abroad.

Foreseeing the demand for increasingly sophisticated systems software from computer manufacturers anxious to broaden their markets, he joined with another computer expert, Fletcher Jones, to found Computer Sciences in 1959. The two men, each 28 years-old, contributed equally to the company's $100 capitalization.

CSC was successful from the outset, largely due to the innovative solutions Nutt found to solve technical complexities generated by rapidly advancing hardware technology. His development of a commercial programming language and compiler called FACT (Fully Automatic Commercial Translator) substantially influenced the design of COBOL, the language still in use for most business applications.

Within a few years, the young company was called on to develop the entire software suite for the Univac 1107, an advanced machine of that day.

CARLSBAD, CA (JUNE 19) BUSINESS WIRE - International Totalizator Systems Inc. (NASDAQ/NMS:ITSI) has signed an agreement valued at $2.8 million (U.S.) with Tierce Ladbroke in Brussels, Belgium, part of the Ladbroke Group PLC.

The agreement calls for delivery of ITS's newly announced DATAMARK 20 reader/printer ticketing terminal for use in Tierce Ladbroke's nationwide offcource betting network in Belgium.

The DATAMARK 20 is the newest entry to ITS's family of ticket processing terminals. This product uses thermal roll stock paper for printing tickets compared to precut thermal stock in the previous products. Compatibility has been retained throughout the DATAMARK product line. This enables customers to mix and match to best suit their requirements.

President and Chief Executive Officer Jim Walters said: ''We are very pleased to be working with Tierce Ladbroke on the introduction of computerized wagering terminals in Belgium as this is our second project with the Ladbroke Group, having provided the terminals for their operation in The Netherlands. It is also rewarding to write this order for our new

DATAMARK 20 just two weeks after announcing the product.

''We see a great future for the DATAMARK 20, along with our complete family of wagering and airline ticketing terminals and systems.''

Bernard Browne, managing director of Tierce Ladbroke, market leader in Belgium, said: ''The introduction of new technology, throughout our nationwide 900+ P.O.S. retail betting network in Belgium, is in keeping with our strategic goal of providing a modern, flexible, 'user friendly' customer service. When in place, the new terminals will provide many new opportunities, due to their flexibility, for positive innovative changes in customer service.''

ITS, with headquarters in Carlsbad, was founded in 1978 and went public in 1981. ITS has a global presence in the design, manufacture and marketing of customized applications for computerized wagering, lotteries and automated travel industry products.

ANAHEIM, CA (JUNE 19) BUSINESS WIRE - General Automation (GA) Tuesday announced the appointment of Miyo Saiki to the newly created post of manager of dealer relations.

Reporting to Sherwood King, vice president of sales, Saiki's primary responsibility will be to facilitate and enhance all aspects of relations between GA, its dealer network and sales branches. According to King, Saiki will provide a vital interface between domestic dealers, branches and the company in order to expedite business in a smooth and efficient manner.

King emphasized that Saiki's role will be to augment rather than to replace and that GA dealers will still be encouraged to deal directly with all functions and departments currently supporting the expanded GA dealer network resulting from the recent acquisition of the assets of CIE Systems Inc.

Prior to joining GA in January 1990, Saiki was manager of sales administration for CIE Systems. She received her education at the University of Wisconsin.

General Automation designs and manufactures computer systems for the database-oriented business systems market. Its systems, related applications software and field service capability are distributed through

a multinational network of computer marketing and service support companies in the United States, the United Kingdom, Europe, Latin America and the South Pacific/East Asia Region (SGA).

GA's proprietary GA/Maxial Hotel Property Management system presently operates in 14 countries. Annual revenues of the multinational group are approaching $100 million.

PHOENIX (JUNE 19) BUSINESS WIRE - Monday, in the U.S. District Court in Phoenix, America West Airlines (NASDAQ:AWAL/PSE:AWA) filed suit against the National Mediation Board seeking a declaratory judgment and an injunction.

Last week, the NMB issued an order to proceed with a re-vote to determine whether the Association of Flight Attendants (AFA) should be designated as the collective bargaining agent for a portion of the airline's fully cross utilized customer service representative (CSR) workforce.

Michael J. Conway, America West's president and chief operating officer said, ''In my opinion, some of the provisions of the NMB decision do a grave injustice to the CSRs; and yet, other provisions are at cross purposes with the continuing success of America West. As I said last week, because we believe that these provisions are so fundamentally unfair, we intend to have these issues reviewed by the courts at every available opportunity.

''Chairman Edward R. Beauvais and I joined as co-plaintiffs with America West and filed a complaint for a declaratory judgment and injunction against the NMB in the U.S. District Court in Phoenix.

''In this lawsuit, we are contesting the NMB's plan to send a special 'Notice' about America West that we believe to be inaccurate and misleading, to those CSRs who will be allowed to participate in the re-vote. We believe that this notice has no valid legal basis because it refers to NMB findings which were arrived at without any type of due process.

''These finding deal with our implementation of promised work rule changes and our Future Care 401(k) Plan, as well as statements called 'critical' by the union and a profit sharing party which we both attended, all in early 1989.''

Still under study by the airline are timing and jurisdictional issues

surrounding the designation of the most effective forum for review of the voter eligibility and ''craft or class'' rulings which the NMB has adopted in this case.

The impact of the NMB's eligibility decision is that, although there are now approximately 2,500 fully cross utilized CSRs at America West, only about 1,000 of those who were allowed to vote in the initial election in early 1989, will be allowed to participate in the re-vote. Since the result of the vote will affect all CSRs, Conway believes that this disenfranchises most of the CSRs from a voice in their future.

A hearing on America West's complaint has been scheduled by U.S. District Judge Earl H. Carroll on July 3 in Phoenix.

SACRAMENTO, CA (BUSINESS WIRE) W. Greg Karr, president and chief executive officer of First Commercial Bank (NASDAQ/NMS:FCOB), announced the filing of an application with the California State Banking Department to open a new branch office at 865 Howe Ave., Sacramento.

Karr stated: ''The opening of this new office allows us to expand our presence in the dynamic Sacramento marketplace and will compliment our Sacramento head office and two Roseville offices.''

The new office is scheduled to open for business during the fourth quarter of 1990. Karr also stated: ''The opening of the new Howe Avenue office is our initial step in meeting one of the bank's strategic goals of expanding our office network in selected market areas.''

First Commercial Bancorp Inc., the holding company of First Commercial Bank, reported first quarter earnings of $1,545,000, which represented the 12th consecutive quarter of record earnings. Total assets at March 31 were $330 million. The company's strong primary capital to asset ratio of 9.90 percent as of March 31 provides this opportunity to expand the branch office network.

First Commercial Bank, founded in 1979, and a member of the Federal Deposit Insurance Corp., is an independent bank headquartered in Sacramento.

HOUSTON (JUNE 19) BUSINESS WIRE - Stewart Information Services Corp.'s board of directors declared a quarterly cash dividend of 10 cents per share, payable July 31, 1990 to common stockholders of record June 29, 1990.

This represents the same amount declared in the first quarter of 1990.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in 50 states, the District of Columbia and Canada through over 2,600 issuing locations. In issuing a policy, the title is first searched, examined and then closed.

Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry.

Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

#90170b0081 06/19/1990 ~Business Wire
SAN JOSE, CA (JUNE 19) BUSINESS WIRE - Cygnet Systems Inc. announced Tuesday that it has reached an agreement with Laser Magnetic Storage International Company (LMS) to exclusively integrate the LMS LaserDrive 510 write-once optical disk drive in the Cygnet Model 5250 jukebox.

LMS is fully supporting Cygnet in their continuing integration of the LD 510 into the Model 5250.

Cygnet will no longer produce jukeboxes for 5-1/4 inch drives from other manufacturers. In support of its current 5-1/4 inch customer base, Cygnet will continue to honor warranties, provide spare parts and furnish technical support for previously shipped units.

As a result of this agreement, Cygnet will be able to focus resources on the expansion of its Series 1800 product line for 12-inch optical disk drives, on its Jukebox Interface Management Systems (JIMS) software package and on the LMS/Cygnet 5-1/4 inch jukebox.

Cygnet has successfully supported multiple drive manufacturers with their Series 1800 jukeboxes for 12-inch optical drives since 1985.

Two primary factors contributed to the successful integration of the LMS drive. First, the LMS drive was specifically designed with jukebox applications in mind.

Second, Cygnet's Model 5250 requires vertical mounting of the optical drive and the LMS drive operates virtually problem-free when mounted vertically.

Laser Magnetic Storage announced the availability of its LaserDrive 510 5-1/4 inch WORM drive for integration into the Cygnet Model 5250 jukebox in June 1989.

LMS and Cygnet worked together to design an integrated loading mechanism that allowed split-second and reliable loading of media directly controlled by the Cygnet jukebox. The LD 510 can withstand in excess of 250,000 cartridge insertions.

The LMS LaserDrive 510 write-once optical drive is priced at $2,085 in OEM quantities. Compatible 510 write-once media currently sells for $113 in OEM quantities and provides 654 MB of user capacity per disk.

The Cygnet Model 5250 jukebox without drives and media sells for $17,450 at OEM quantity one. The Model 5250 can accommodate up to two drives and 25 cartridges.

Cygnet Systems Inc., headquartered in San Jose, is a peripheral products company that designs and manufactures robotic mass storage devices.

Cygnet products are provided exclusively to OEMs and VARs for system integration and value-added resale into global markets, primarily in image processing and mass data storage applications. Cygnet Systems Inc. is located at 2560 Junction Ave., San Jose, Calif., 95134-1902, telephone 408/954-1800.

Laser Magnetic Storage develops, manufactures and markets mass storage products and is a leading supplier of those products to OEMs, system integrators and VARs.

The LMS product line includes 3480-compatible tape subsystems, streaming tape drives, write-once optical drives and media in both 12-inch and 5-1/4 inch formats, and CD ROM drives. Laser Magnetic Storage International Co. a North American Philips Co., is headquartered in Colorado Springs, Colo. and has facilities in Valley Forge, Penn., and Eindhoven, The Netherlands.

LMS is located at 4425 Arrows West Dr., Colorado Springs, Colo., 80907, telephone 719/593-7900.

North American Philips Corp., a wholly owned subsidiary of N.V. Philips of the Netherlands, is one of the 100 largest industrial companies in the United States with operations is consumer products, lighting products, electrical and electronic components, medical diagnostic imaging systems and other professional equipment marketed under many well known brands, including Philips, Magnavox, Norelco, Philco, Sylvania audio-video and Genie.

NEW YORK (JUNE 19) BUSINESS WIRE - Dedicating a direct sales force to its enhancement-products division, AST Research Inc. (NASDAQ:ASTA) Tuesday announced the signing of agreements with manufacturer's sales representatives (MSRs) to sell AST's enhancement-products line to value-added resellers, distributors and major accounts.

In July, 17 MSR firms throughout the United States will represent AST's enhancement-products line including board-level memory/multifunction cards and data-communication products.

Additionally, representatives will be involved in account development by working directly with Fortune 500 companies to create end-user demand.

In cooperation and support of MSR sales efforts, AST will assist with marketing, joint major-account calls, sales, service and promotional acitivities. Representatives also will be provided with lead referrals.

With the MSR program, the division is attempting to build on its recent sales success.

AST Research is a leading manufacturer of high-performance desktop computing, enhancement and data-communications solutions. AST's board-level enhancements feature the RampagePlus and SixPak lines of memory products, including the newly announced RampagePlus/MC 386 board, for ISA and Micro Channel computers as well as VGA graphics adapter cards.

Connectivity products include the 5250 and 3270 lines for PC-to-mini and PC-to-mainframe communication as well as local area network products.

AST products may be purchased throughout North America and in more than 89 countries. AST Research corporate headquarters are located at 16215

Alton Parkway, P.O. Box 19658, Irvine, Calif. 92713-9658. Telephone: 714/727-4141.

LAUGHLIN, NV (JUNE 19) BUSINESS WIRE - The new Flamingo Hilton Laughlin, scheduled to open Aug. 1, has announced it will house the town's first Burger King restaurant.

As a franchised operation, the Flamingo's Burger King will serve the same items offered at other Burger King locations: hamburgers, fries, the famous ''Double-BKs,'' as well as a list of dessert items to finish the menu. Promotions, such as the recent Teenage Mutant Ninja Turtle give-a-way, will also be offered through the Laughlin restaurant.

For guest convenience and easy access, the Flamingo's Burger King will be located on the first floor of the California tower, adjacent to the six-story Hilton garage.

The Flamingo Hilton Laughlin is the third property in the Flamingo Hilton group with its sister properties in Las Vegas and Reno. When completed, the Flamingo Laughlin will have 2,000 river-front rooms, a swimming pool and more than 50,000 square feet of casino excitement.

For room reservations, call 1-800-HILTONS.

SAN FRANCISCO (JUNE 19) BUSINESS WIRE - Pacific Gas and Electric Co. has received the state of California's first Air Pollution Reduction Award for its pioneering work at The Geysers Power Plant in Sonoma and Lake counties.

The award was presented Tuesday to Richard A. Clarke, chairman and chief executive officer of PG&E, by Jananne Sharpless, state secretary of environmental affairs. It recognizes PG&E's strong commitment to a cleaner, healthier environment.

PG&E was cited for developing and applying a new process to remove hydrogen sulfide gas from geothermal steam and for reducing the volume of hazardous wastes at The Geysers by as much as 90 percent. The new technology sharply lowers the amount of chemicals needed at the plant.

''We are working to improve our electric generating facilities by increasing their efficiency and their compatibility with the environment '' Clarke said following the award presentation. ''PG&E's new technology at The Geysers is part of our effort to conduct all aspects of our business in an environmentally sensitive manner. Sound environmental policy and sound business practice go hand in hand.''

The Geysers Power Plant is the largest electric generating facility in the world powered by geothermal steam. The plant's 18 units are capable of generating 1.3 million kilowatts, enough electricity to meet the needs of more than one million people in Northern and Central California.

The Geysers is the oldest geothermal electric generating plant in the United States in terms of continuous service. It began operation in September, 1960.

#90170b0100 06/19/1990 ~Business Wire

NEW YORK (JUNE 19) BUSINESS WIRE - Wordtech Systems Inc. Tuesday announced its next generation of dBASE compatible products that will bring unsurpassed speed and power to database management.

Arago dBXL version 2.0, an interactive database management system, and Arago Quicksilver version 2.0, an .EXE compiler, will provide an alternative for DBMS users who need full dBASE IV compatibility in a reliable product at an affordable price.

The Arago family will offer full compatibility with Ashton-Tate's dBASE IV including full file, index and syntax support, dBASE III Plus command superset andmemo field compatibility. Additional enhanced performance features include:

-- Full featured CUA compliant windowing for multiple databases

-- Desktop publishing interfaces

-- Multidimensional arrays

-- User defined functions

-- EMS support

-- An onscreen tutor line and a fix option

-- A driver module that will provide access to a variety of

database servers.

Due to ship in November 1990, the Arago family is expected to become the new industry standard in speed and performance.

Along with Arago as the dBASE IV alternative, Wordtech will continue to ship its current dBXL and Quicksilver version 1.3R as the dBASE III Plus alternative.

The speed of the Arago product line has been our primary focus,'' said David Miller, president of Wordtech, ''and the result of a superior platform that lets users meet the demands of today's fast-paced business environment. Arago Quicksilver and Arago dBXL combine the latest in database management technology with speed that outperforms the competition.''

According to Miller, initial benchmarks performed at Wordtech with standard industry test suites show that the Aragon products are about twice as fast as FaxPro and about 10 times faster than dBASE IV.

The new products have a sophisticated CUA-compliant development environment for applications, and provides full mouse support. Michael Gardner, Wordtech's vice president of R&D, said: ''The CUA-compliant interface is very easy to use and provides users with all of the benefits of IBM's SAA specifications.

Arago Quicksilver is compiled in ''C'' and is compatible with all major ''C'' compilers. Arago Quicksilver compiles dBASE language programs into independently executable (.EXE) files for speed and easy software distribution without runtime or licensing fees.

Arago Quicksilver also includes an overlay linker and other programmer productivity tools such as an automatic runtime environment configuration and a Clipper compatible Extor and Extend ''C'' interface. Third party add-on products can be easily integrated into compiled Arago applications.

Arago dBXL is a comprehensive DBMS environment that allows users to work interactively to create and maintain databases, to write programs and to run their applications.

Arago dBXL includes an internal compiler, a debugger and an applications generator/screen painter. To date, Wordtech is still the only company providing users with both an interactive system and an .EXE compiler for a complete, integrated development environment.

Arago dBXL includes the market-proven R&R Relational Report Writer. This top-of-the-line report writer gives users unmatched flexibility in creating complete database reports. The Wordtech R&R Report Writer is also included with the current dBXL Diamond version 1.3R, giving existing dBXL users immediate access to the band-oriented reports that will be available with Arago dBXL.

Arago Quicksilver and Arago dBXL include a fully cross-referenced online help system that follows the Wordtech tradition of excellence in user support. The Arago product line also offers larger system capacities than competitive products, making it easier to create complex applications.

Wordtech presently provides dBXL in 10 different languages including Kanji French, German and Italian.

Arago Quicksilver version 2.0 retails for $695, with no additional runtime or licensing fees for compiled applications. Arago dBXL version 2.0 retails for $495.

Upgrades to the new Arago dBXL from the current dBXL version 1.3R will cost $49. Since dBXL version 1.3R currently retails for $249, this is nearly a $200 savings over buying Arago dBXL directly. Upgrades to Arago Quicksilver 2.0 from the present Quicksilver version 1.3R will cost $69.

For additional information on Wordtech's new family of Arago products, please call 415/254-0900.

#90170b0107 06/19/1990 ~Business Wire

INDIANAPOLIS (JUNE 19) BUSINESS WIRE - Lilly Industrial Coatings Inc., (NASDAQ:LICIA) today reported that sales for the second quarter ended May 31, 1990, were up 19 percent at $63.1 million compared with $52.9 million last year.

Net income for the quarter increased 17 percent to $4.0 million, or 42 cents per share, compared with $3.4 million, or 36 cents per share for last year's quarter. Sales and net income were new quarterly records.

Sales for the six months ended May 31, 1990, were $117.3 million, up 18 percent from last year's sales of $99.1 million. Net income for the six-month period increased 12 percent to $6.3 million, or 66 cents per share, compared with $5.6 million, or 59 cents per share for last year.

Sales continue to show improvement mainly because of acquisitions made during 1989. In addition, sales of domestic core products and powder coatings were both up for the quarter and first half. Foreign coatings sales were down from last year mostly due to depressed business levels in Canada. Operating income for the quarter increased by 13 percent mostly as a result of higher sales. Other non-operating income for the second quarter was up compared to last year due to a foreign currency gain partially offset by increased interest expense.

#90170b0108 06/19/1990 ~Business Wire

NEW YORK (JUNE 19) BUSINESS WIRE - AST Research Inc. (NASDAQ:ASTA) Tuesday announced a new program aimed at strengthening its leadership position with value-added resellers (VARs).

''AST has developed the Professional Solution VAR (PSV) program to improve communication with the company's VARs,'' said Dick Hoffmann, AST senior manager of reseller marketing. ''The program comes on the heels of this month's issue of VARBUSINESS, reporting AST as one of the top PC manufacturers among VARs.''

To qualify for the program, resellers must: have a minimum of one-year experience as a VAR; sell a total solution including hardware, software, installation, training and support; commit to an annual purchase level; meet defined service criteria.

AST's PSV program provides sales, marketing and service support to qualified dealers. Resellers immediately receive a co-op bonus to assist the transition to the AST product line. Special training programs will be followed by periodic hardware and software briefings from engineering and product-marketing specialists. In addition, application-specific seminars will be offered on a regular basis.

Sales-support benefits also include consultations with AST's major-accounts personnel for large-volume prospects, co-op advertising reimbursements and joint sales calls with an AST representative for major business. Additionally, the program provides lead referrals to vertical markets.

The professional-solution reseller also receives a free collateral start-up kit, a developmental system at a special discount, toll-free technical support, use of regional demonstration rooms for training purposes, advanced product direction information, camera-ready ads, customized brochures and trade show assistance including booth loans, personnel and literature.

PSVs will be authorized to sell AST's complete systems and enhancement-products line.

In a related announcement, AST launched a series of joint seminars with Independent Software Vendors (ISVs) to assist reseller network sales to vertical markets.

''AST's enhanced relationships with independent software vendors provides a great opportunity to pursue new vertical markets in association with AST resellers, including authorized PSVs,'' Hoffmann said.

Resellers interested in the VAR program may call reseller marketing at 714/727-7869.

AST Research is a leading manufacturer of high-performance desktop computing solutions. AST systems products include the cost-effective Bravo and high-performance Premium computer lines. The company offers desktop and tower configurations based on i486, 386 and 286 microprocessors using EISA and ISA technology.

Board-level enhancements feature the RampagePlus and SixPak lines of memory and multifunction products for ISA and Micro Channel computers. Connectivity products include the 5250 and 3270 lines for PC-to-mini and PC-to-mainframe communications as well as local area network products.

AST products may be purchased in North America and internationally through value-added resellers, value-added dealers and more than 1,500 retail locations. AST Research corporate headquarters are located at 16215 Alton Parkway, P.O. Box 19658, Irvine, Calif. 92713-9658. Telephone: 714/727-4141.

BOULDER, CO (JUNE 19) BUSINESS WIRE - EXABYTE Corp. (NASDAQ:EXBT), Tuesday announced the opening of two new European facilities to better support its customers worldwide.

The company opened a European sales and technical support office in Houten The Netherlands and a service/repair depot in Cumbernauld, Scotland.

''We opened both facilities to support our expanding European customer base,'' said EXABYTE President Peter Behrendt. ''We chose to base one facility in The Netherlands and the other in Scotland because both countries offer excellent communication and transportation links worldwide skilled labor pools and the availability of high-technology resources.''

The EXABYTE sales office in The Netherlands provides sales and technical support to EXABYTE distributors and large original equipment manufacturers (OEMs), such as Philips, Siemens and Nixdorf. The European sales office telephone number is 31-3403-51347.

The Scotland Repair Depot tests and replaces boards and tape decks returned by EXABYTE's major European customers. EXABYTE distributors, M & S Electronik (West Germany) and Phase IV-Tangent Techniques (England),

also are available to provide repair service to Europe. All repair inquiries should be directed to the Boulder office: 303/447-7578, or toll-free from Europe: 08-008-96082.

Earlier this month, EXABYTE announced the signing of four major European OEM agreements with Bull, Nixdorf, Philips and Siemens, representing a combined forecasted value of approximately $20 million over the next three years.

EXABYTE Corp. is a worldwide leader in providing high-capacity, cost-effective 8mm cartridge tape subsystems which are used primarily with workstations, network file servers and minicomputers.

The company markets to OEMs, value-added resellers, system integrators and distributors.

CINCINNATI (JUNE 19) BUSINESS WIRE - Fifth Third Bank announced today its intention to acquire Barney Rapp Travel and merge the travel agency with Fifth Third Travel Inc.

The combined sales of Fifth Third Travel Inc. and Barney Rapp Travel exceed $52 million resulting in one of the largest travel agencies in Greater Cincinnati.

Clement L. Buenger, chairman and CEO of Fifth Third Bancorp, states, ''Fifth Third Bank is pleased that Barney Rapp Travel will be part of the Fifth Third Travel team. Barney Rapp Travel has an excellent reputation in the travel industry, and its group and leisure travel departments, as well as its commercial division, will serve as a natural complement to Fifth Third Travel's strong commercial base.''

''We are proud to be affiliated with one of the most successful banks in the country and with one of Greater Cincinnati's leading travel agencies '' adds Ruby Rapp, president of Barney Rapp Travel.

The Barney Rapp Travel name will be retained in conjunction with the group and leisure division. Upon completion of the stock transaction, Fifth Third Travel Inc. will operate 10 travel offices in Greater Cincinnati; Dayton, Columbus, and Piqua, Ohio; and Connersville, Ind.

Fifth Third Travel Inc. is a subsidiary of Fifth Third Bank which is an affiliate bank of Fifth Third Bancorp. Fifth Third Bancorp has $7.0

billion in assets and has 14 affiliate banks with 209 locations throughout Ohio, Kentucky and Indiana.

EMERYVILLE, CA (JUNE 19) BUSINESS WIRE - ViewStar Corp. announced Tuesday its support for Windows 3.0 as the primary operating environment for its next generation of software products for document image processing and information management.

The first of these products, VS Retrieve, already available under Windows 2.X environments (286 and 386), is scheduled for release on Sept. 1, 1990. The announced move to Windows 3.0 is the first by a major vendor in the document image processing marketplace.

''ViewStar's strategy continues to provide a software environment for document management and information processing that can easily be used by both mainstream business professionals and knowledge workers,'' said Kamran Kheirolomoom, founder and chief executive officer of ViewStar. ''The combination of power and ease-of-use afforded by Windows 3.0 makes fulfilling this objective a much easier proposition,'' he said.

With the move to Windows 3.0, ViewStar is again taking the lead in supporting accepted industry standards. ViewStar expects to port its entire application environment for document image processing to Windows 3.0 by the end of the year.

This includes basic image storage and retrieval capabilities and advanced functions for document annotation, hyperlinking, intelligent routing and distribution, and work process automation. ViewStar's comprehensive application development tool kit, VS Developer, will be available in Windows 3.0 in the same timeframe.

''ViewStar sees Windows 3.0 as a key integrating technology that will benefit the market in a number of ways,'' said Kheirolomoom. ''First, Windows provides a level of consistency for applications running over LANs that were previously non-existent, so products across the board will be easier to learn and use.

''Second, the environment provides tools for application integration that, when coupled with ViewStar's object management technology, provide the basis for establishing intelligent associations between documents and the applications that create them.

''Finally, Windows provides additional tools that insulate application developers from many low-level programming details, freeing them to deliver real solutions to end-users. The bottom line is that Windows 3.0 is a standard which supports our core strategy of taking imaging into the mainstream of corporate computing.''

ViewStar will preview VS Retrieve running under Windows 3.0 at PC EXPO in New York on June 19-21. ViewStar's products will be featured in Compaq Computer's booth (booth 1122), where it will be used to highlight the power of Compaq workstations and SystemPro servers running distributed, client-server applications. Product demonstrations will include loan processing, contracts management, customer service records management and engineering design-change processing.

VS Retrieve is a Windows-based software application that provides tools for querying, retrieving, viewing and outputting of documents managed by ViewStar's back-end document data base management system. The product supports viewing both standard-size business documents as well as large-format engineering drawings, including E-size and larger drawings.

ViewStar products and value-added services are sold directly through its national offices located in Boston, New York, Washington, Dallas, Houston, Charlotte, Irvine, Burbank and Emeryville.

SAUSALITO, CA (JUNE 19) BUSINESS WIRE - Autodesk (NASDAQ/NMS:ACAD) announced Tuesday that its board of directors has declared a quarterly cash dividend of 10 cents per share of its common stock payable June 29, to shareholders of record at the close of business on June 22.

At the end of its first fiscal quarter on April 30, the company had $122.3 million in cash, cash equivalents and marketable securities and approximately 24.3 million shares of common stock outstanding. Autodesk reported net income of $13.4 million, or 55 cents per share of common stock, on revenues of $55.2 million for the first fiscal quarter ended April 30.

In announcing the dividend, Alvar Green, president and chief executive officer remarked: ''We're very pleased to be in a position to declare this dividend. We will continue working hard to reward the confidence of our shareholders.''

Autodesk Inc. develops, markets and supports a family of computer-aided design, engineering and animation software products for desktop computers and workstations.

#90170b0168 06/19/1990 ~Business Wire

SEATTLE (JUNE 19) BUSINESS WIRE - In a move to protect the rights of the North Pacific in-shore groundfish fishery, the North Pacific Seafood Coalition has denounced a recent recommendation made by the Alaska Factory Trawler Association (AFTA) to the North Pacific Fishery Management Council.

Under the recommendation proposed by AFTA, the council would exclude the catch history of former joint venture fishing vessels when determining groundfish allocations.

''If the council takes this recommendation seriously, these fishermen might as well tie up their boats,'' said John Iani, a spokesperson for the North Pacific Seafood Coalition. ''Right now, 80 percent of these smaller boats are delivering to in-shore plants. If their catch history is given to off-shore interests, or not considered at all, these catcher vessels and the in-shore processors they sell to will be seriously affected.''

In a letter sent to the North Pacific Fishery Management Council, AFTA has asked the council to base its groundfish resource allocations on the 1989 domestic processors fishery (DAP), without taking into account the catch history of the former joint-venture harvesters.

If this method of allocation is adopted, these U.S. catcher vessels would be excluded from future participation in the North Pacific groundfish fishery, the coalition maintains.

''Our boats were built in America and are owned and crewed by U.S. citizens. We pioneered the North Pacific groundfish fishery,'' asserted Doug Gordon, executive director of the American High Seas Fisheries Association, and member of the North Pacific Seafood Coalition. ''The factory trawlers would be happy to see us go, but we refuse to give up our historical percentage of the catch.''

The council is also considering another alternative, which the North Pacific Seafood Coalition supports.

This alternative would include dividing the joint venture catch history according to a review of the fishery from 1986 to 1989. Under this plan, 80 percent go to the in-shore interests and 20 percent to the off-shore interests.

''Because 80 percent of the harvesting vessels deliver their catch to in-shore plants, this alternative makes perfect sense,'' said Iani.

The North Pacific Seafood Coalition is an organization of in-shore fishermen and processors from Alaska, Washington, Oregon and California.

They have joined forces to seek the equitable allocation of the North Pacific groundfish resource between the in-shore catcher vessels and the

off-shore industrial factory trawler fleet. Members of the coalition include the American High Seas Fisheries Association, Fishing Vessel Owners Association and the Pacific Seafood Processors Association.

SAN JOSE, CA (JUNE 20) BUSINESS WIRE - Conner Peripherals Inc. and Seagate Technology Inc., Tuesday announced that they have agreed to resolve their dispute over supplies of thin film read/write recording heads.

As part of the resolution, Seagate will furnish Conner with thin film recording heads until early 1991 on typical industry terms and conditions.

Also, as part of the resolution, Conner will dismiss its lawsuit against Seagate filed in April, and both parties will release each other from all claims related to the dispute.

The two companies have agreed that neither will make any further comment on the issues raised by the lawsuit, now resolved, or on the terms of the agreement.

Founded in 1986, Conner designs, manufactures and markets high-performance 2.5-inch and 3.5-inch Winchester disk drives for the new generation of notebook, laptop, portable and desktop microcomputers and workstations. The San Jose-based company reported third-year revenues of $704.9 million in 1989, making it one of the fastest-growing manufacturing startups in American business history.

     #90170b0196 06/19/1990 ~Business Wire
HOUSTON (JUNE 19) BUSINESS WIRE - Tel Offshore Trust (NASDAQ:TELOZ)

announced the trust's quarterly income distribution for the second quarter of 1990.

The amount available for distribution will be $991,042.25 or 20.8575 cents per unit. The second-quarter distribution will be payable on July 9, 1990 to unitholders of record on June 29, 1990. The current estimate of future capital costs to be incurred resulted in a refund from the special cost escrow account amounting to $16,000 in the second quarter of 1990. Chevron, the working interest owner, currently anticipates drilling the West Cameron 643 No. 6 well in the fourth quarter of 1990.

Additional deposits could be required in future quarters in connection with drilling projects and other capital expenditures. Revenues attributable to production for the second quarter of 1990 decreased approximately 22 percent compared with the first quarter of 1990. Gas revenues decreased due to lower prices received and decreased production on Eugene Island 339 due to decreased takes in order to allow the makeup of existing gas imbalances.

Gas prices averaged $1.79 per mcf compared with $2.07 per mcf in the previous quarter. Crude oil and condensate revenues decreased slightly as production fell from 219,000 barrels in the first quarter of 1990 to 196,000 barrels in the second quarter of 1990.

Similarly, the average price of crude oil and condensate fell from $19.21 per barrel in the first quarter of 1990 to $18.83 per barrel in the second quarter of 1990. Operating expenses during the second quarter increased approximately 24 percent due primarily to workover activity on Ship Shoal 182/183 and platform-maintenance expenses on West Cameron 643.

MILPITAS, CALIF (JUNE 19) BUSINESS WIRE - Adaptec Inc. (NASDAQ, NMS: ADPT) and Conner Peripherals Inc. Tuesday announced the signing of a contract under which Adaptec will supply a variety of single-chip peripheral controllers for Conner's current and next-generation hard disk drives.

Financial figures were not released.

The contract calls for Adaptec to supply Conner with controllers using the AT, Small Computer Systems Interface (SCSI) and Micro Channel Architecture (MCA), according to John G. Adler, Adaptec's president and chief executive officer.

The Adaptec controllers will be used in Conner's present and future 2 1/2-inch and 3 1/2-inch disk drives and across all storage capacities, he added. In addition, this is a significant opportunity for Adaptec as it represents the beginning of Adaptec's participation in Conner's high volume embedded AT disk drive business.

''We're pleased to continue this relationship that began when Conner was founded,'' Adler said. ''This relationship has proven beneficial to both companies over the years.''

''This recent contract demonstrates both companies' ongoing commitment to producing industry-leading prdoucts,'' Adler said. ''Furthermore, it establishes the framework for continued joint development between Conner and Adaptec.''

Adaptec is a leading supplier of high-performance I/O solutions. Product offerings include proprietary VLSI circuits for SCSI, AT and MCA interfaces, a broad line of SCSI- and ESDI-based controller boards and SCSI host adapter boards for personal computers, a family of SCSI development and test systems, and laser printer controllers.

#90170b0271 06/19/1990 ~Business Wire
AGOURA HILLS, CALIF (JUNE 19) BUSINESS WIRE - Traditional Industries Inc. (NASDAQ/NMS:TRAD) Tuesday announced results of operations for the nine

months ended March 31, 1990.

Revenues for this period decreased 8 percent to $40,795,000 as compared with $44,299,000 for the same period last year. The company reported a net loss for the nine months of $5,456,000, or $1.46 per share, as compared with net income of $4,656,000, or $1.31 per share, primary, $1.05 per share, fully diluted, for the nine months ended March 31, 1989.

Commenting on the results, Arland D. Dunn, chairman of the board and chief executive officer of Traditional Industries, said: ''We have experienced in the past two years an increase in cancelled sales, defaulted payments and slower collections.

''Part of this was due to the FTC settlement and a letter to all our customers offering the right to cancel. In addition, some of our discontinued acquisitions had a greater degree of bad accounts. In an effort to properly evaluate our Trade Contracts Receivables, we have provided an additional $6 million provision for bad debts during this period.

''The loss for the period resulted primarily from this change and the fact that sales have been reduced without a corresponding reduction in expenses.''

Traditional Industries is the nation's leading specialty marketer of photographic and video products and services.

#90170b0274 06/19/1990 ~Business Wire
DENVER (JUNE 19) BUSINESS WIRE - The following is a statement released by SCOTT'S LIQUID GOLD-INC.: ''Some truths are not self-evident -- particularly when Americans are misled by the less than half-truths presented to them by Mr. David Doniger of the National Resources Defense

Council.

''Mr. Doniger would have all of us believe that consumer products containing 1,1,1 trichloroethane are a hazard to the earth's ozone layer. The truth is that, at most, consumer products containing 1,1,1 have a potential impact of only 1 percent on the ozone layer. That is a fact. On that basis, is a consumer boycott of such useful products productive or necessary? We think not. Obviously, Mr. Doniger needs a cause.

''Further, Mr. Doniger omits any recitation of the positive characteristics of 1,1,1 trichloroethane. He does not, for example, tell us that it is an extremely safe solvent, one that is non-flammable, is non-carcinogenic, non-toxic to any measurable degree, and is not a greenhouse gas, as opposed to other solvents that are highly flammable, contribute to the global warming trend, are carcinogenic and are toxic.

''Nor does Mr. Doniger note that 1,1,1 is low in electrical conductivity, has a high solvency rate, and has a long shelf life, qualities which enhance its value for hundreds of products. Nor, does he tell us that 1,1,1 does not contribute to ground-level ozone formation.

''Millions of consumers use products containing 1,1,1 which is a super safe solvent that would pass any comprehensive environmental health and safety audit with flying colors. Come on, Mr. Doniger. If you believe that the American people have a right to know, for Heaven's sake (and we mean that literally), give them all of the facts, not simply your bias. Screaming that the sky is falling down has always been a little chicken.

''Now, as to the general use of 1,1,1 trichloroethane for degreasing and other industrial purposes (which accounts for about 94 percent of 1,1,1 usage as opposed to consumer product usage), the Montreal Protocol - a meeting of representatives of 70 countries - is reconvening this month to discuss, among other things, a gradual reduction and possible phasing out of the use of 1,1,1 over the next several years.

''We favor this approach because it provides an opportunity for U.S. chemical companies to develop effective substitutes for 1,1,1.

''Research on possible substitutes for methyl chloroform is just beginning. Good substitutes for some methyl chloroform applications will undoubtedly be developed, but much more research remains to be done.

''Because of the uncertainties concerning the environmental, health and safety effects of possible substitutes, sound policies for the reduction/phaseout of methyl chloroform could be developed appropriately within the framework of the 1994 Montreal Protocol assessment review process.

''Further analysis may, however, show that phaseout of methyl chloroform can only be achieved at very high cost and with serious adverse health and environmental consequences. In this case, human health and the environment might be better served by something less than a complete phaseout of this substance.

''Why should we place U.S. industry at a disadvantage relative to foreign competition by unilateral action on our part? It is time for the United States to tell the rest of the world that we are not going to be the only good guy.

''We at SCOTT'S LIQUID GOLD-INC. are hopeful that you will publish these comments. We do so in the belief that none of us should hold half-truths to be self-evident.''

#90170b0284 06/19/1990 ~Business Wire

PASCO, WASH (JUNE 19) BUSINESS WIRE - United Express announced Tuesday that it is offering discounts ranging from 30 to 65 percent off standard coach fares on all of its 226 daily flights for the period July 1-8 and, unlike many other airline discount fares, there are no advance purchase or overnight stay requirements.

United Express is operated by NPA, a subsidiary of WestAir Holding Inc. (ASE:WAH). The airline flies to 15 cities in Washington, Oregon, Idaho and Montana.

''The unrestricted discount fares offered by United Express are intended to stimulate leisure travel during the extended Independence Day holiday period,'' said Warren Wilkinson, director of marketing and sales for the airline. ''Customers can qualify for the discount fares by traveling roundtrip any time during the eight day period,'' said Wilkinson.

Wilkinson said that the lower fares will be available on every NPA/United Express flight during the first week in July, with more seats available at the low fares on off-peak flights.

Doing business as United Express through marketing agreements with United Airlines, NPA offers it's customers many United benefits including Mileage Plus frequent flier credits on all flights, worldwide reservations, advance seat selection and boarding passes. For additional information and reservations for United Express flights customers can call 800/241-6522.

WestAir Holding Inc. is the parent company of NPA/United Express,

WestAir/United Express and Atlantic Coast Airlines/United Express. All three airline units are offering similar discount programs during the July 1-8 period.

The WestAir Holding Inc. airline system serves 57 cities in thirteen states and has major hubs at Seattle; Portland, Ore.; San Francisco; Los Angeles; Fresno, Calif.; Sacramento, Calif.; and Washington, D.C. The company employs over 2,700 people and is headquartered in Fresno, Calif.

TUKWILA, WASH (JUNE 19) BUSINESS WIRE - Invention, Design, Engineering Associates Inc. (NASDAQ: IDEA), a manufacturer of automation equipment and electronic scales for the transportation industry, reported sales for the first nine months of fiscal 1990 of $4,917,000.

This is a 3 percent increase over sales of $4,788,000 for the comparable period of fiscal 1989. The company had net income of $504,000, or 23 cents per share, for the first nine months of this year as compared to net income of $322,000 (15 cents per share) for the same period last year.

Sales for the third quarter of 1990 were $1,557,000 compared to sales of $1,485,000 for the third quarter of 1989. The company had net income of $16,000, or 1 cent per share, for this third quarter compared to net income of $130,000, or 6 cents per share, for the third quarter of last year.

The decrease in earnings is due to costs associated with the acquisition of LODEC in addition to operating losses sustained by LODEC during the month of April (first month LODEC operations were consolidated with IDEA). Management anticipates a rebound in earnings in the fourth quarter due to reductions in overhead personnel at LODEC.

#90170b0610 06/19/1990 ~Business Wire
NEWBURY PARK, CA (JUNE 19) BUSINESS WIRE - HOH Water Technology Corp. (NASDAQ:HOHI, HOHIU, HOHIW) Tuesday announced that James E. Cruver, Ph.D., has been named to the position of president and chief executive officer.

Cruver replaces David C. Kravitz who left the company in February to rejoin his family in Montana. The company also announced that it has received orders from a water treatment distibutor in Puerto Rico for its first 300 production units.

The company's first product (non-electrodeionization) is an innovative under-the-sink system that features three disposable cartridges designed to house several combinations of proven water treatment methods. This product has, according to Cruver, ''distinct advantages over current comparable technology especially in the critical area of water conservation.''

HOH has secured a firm-commitment purchase order from a water treatment distributor in Puerto Rico for its first 300 units. These systems are scheduled to roll off the line at the company's Ponce manufacturing subsidiary by early July.

Cruver became a director of HOH in November 1986 and since December 1986

has provided consulting services through Salcor Inc., a company he founded in 1978. Salcor conducts engineering research and development and marketing studies in water, wastewater and toxic waste treatment.

Final bench testing of HOH's patented Electropure system is currently in progress on field units that are being placed throughout Southern California, Arizona and Puerto Rico.

Cruver holds a doctorate in chemical engineering from the University of Washington. In 1978 he founded a company that patented a process for fluid disinfection and pioneered the use of ultraviolet technology in water treatment. The company was profitably sold in 1982.

He previously served as vice president and general manager of Fluid Systems International, a subsidiary of Allied Signal Co. (formerly Signal Cos.). As such, Cruver was responsible for building the company's reverse osmosis gross annual sales to $45 million.

HOH Water Technology is engaged in the development and supply of a breakthrough line of water filtration and treatment systems for residential, commercial and industrial water treatment.

MILPITAS, CA (JUNE 19) BUSINESS WIRE - Michael L. Hackworth, 49, president and chief executive officer of Cirrus Logic Inc. (NASDAQ:CRUS) was named Entrepreneur of the Year by Ernst & Young.

''This award really belongs to all of the employees of Cirrus Logic, who have worked, resulting in the strong performance being recognized today,'' Hackworth stated.

As a founder of Cirrus Logic, Hackworth has steered the company to a leadership position in peripheral integrated circuit (IC) controllers for disk drives, desktop and laptop graphics, laser printers and data communications.

Revenues for fiscal 1990, ended March 31, were $85 million, more than double the fiscal 1989 revenues of $36.9 million. Net income for fiscal 1990 was $15.4 million, or $1.03 per share, as compared to net income of $4.1 million, or 32 cents per share, for the previous year.

Prior to joining Cirrus Logic in January of 1985, Hackworth spent 14 years at Signetics Corp. (a subsidiary of N.V. Philips), most recently as

senior vice president. Prior to Signetics, he held a variety of marketing and sales management positions at Motorola and Fairchild Semiconductor.

Hackworth will be honored at a banquet tonight at the California Academy of Sciences in San Francisco, along with seven other Entrepreneur of the Year award winners. The Entrepreneur of the Year awards are sponsored nationally by Ernst & Young, Inc. Magazine, and Merrill Lynch. All Bay Area award recipients are eligible to be chosen as the national Entrepreneur of the Year by a national judging panel.

#90170b0617 06/19/1990 ~Business Wire

SAN FRANCISCO (JUNE 19) BUSINESS WIRE - California Energy Company Inc. (AMEX/PSE:CE) Tuesday announced that an administrative law judge (ALJ) of the California Public Utilities Commission (CPUC) has issued a proposed decision which fixes at $5.25 million the company's maximum exposure for the cost of the construction of a new 220 kV electric transmission line connecting the company's geothermal electric generation facilities at Coso with the electric system of Southern California Edison Co. (SCE).

SCE's request sought to recover $50.3 million in costs for the interconnection. In his decision, however, the ALJ has determined that the cost reponsibility for the Coso Pojects for this transmission line is instead $10.5 million of which 50 percent would be the company's share.

The issuance of this order puts an end to rumored and elsewhere published speculation that the company's exposure was in the range of $50 million.

Commenting on the ruling, Charles T. Condy, the company's chairman and chief executive officer, said: ''We are encouraged that our opposition to SCE's $50.3 million request has been substantially vindicated. We remain of the considered opinion, however, that any costs allocated to the company should also be dismissed in due process.

We will have the opportunity to have the proposed decision and our comments on that order reviewed by the full membership of the Public Utilities Commission. Historic precedents in cases before the Commission, where bulk transmission facilities have been found to serve multiple purposes and have system-wide benefits, support our position.

No adverse financial impact will result to California Energy Co. or its partner since, as a matter of prudent business practice and in order to mitigate any adverse financial impact, these liabilities have already been accrued and funding has been accomplished on behalf of Coso Energy

Developers (CED) and Coso Power Developers (CPD), the two joint ventures involved in the proceeding.

California Energy Company Inc. is the operator-manager of the Coso Geothermal Project and owns a 47 percent interest in CED and 50 percent in CPD.

SAN JOSE, CA (JUNE 19) BUSINESS WIRE - Maxtor Corp. (NASDAQ:MXTR), a leading supplier of high-performance data storage products, announced it has signed a North American distribution pact with the Electronics Marketing Group of Wyle Laboratories.

Under terms of the agreement, Wyle will market Maxtor's entire line of 3.5-inch and 5.25-inch magnetic and optical disk drives, which span in capacity from 40 megabytes to 1.7 gigabytes and include the line of 3.5-inch disk drives formerly manufactured by MiniScribe Corp. Maxtor's bid for MiniScribe's assets was accepted by the U.S. Bankruptcy Court in Denver in April.

''Wyle is a very well-known specialized industrial distributor in the OEM market with particular strength in the western states and among second-tier OEMs,'' said James N. Miller, Maxtor's senior vice president of worldwide sales. ''We are glad to be able to add a distributor of Wyle's caliber to the Maxtor lineup.''

''The addition of Maxtor to Wyle's product offering provides our customers with a top-quality line of high-end disk drives,'' said Jim Hunt, group vice president for computer products marketing at Wyle.

''Also, Wyle's System Enhancement Center can customize these drives to user requirements by providing services such as pre-formatting, building disk subsystems and designing into a Novell network file server.''

Wyle Laboratories is one of the nation's leading marketers of high-technology electronic components and computer systems. The company is also a major supplier of research, engineering and testing services to the aerospace, defense and energy industries. Wyle's Electronics Marketing Group is based in Irvine.

Maxtor Corp. was founded in 1982 and has headquarters in San Jose. The company manufactures high-capacity Winchester and optical data storage

products in San Jose, Singapore and Malaysia, and has a worldwide sales and distribution network. Maxtor's products are designed for use in computer systems, workstations and local area networks.

MiniScribe is a high-volume producer of high-performance disk drives, including a new inch-high 3.5-inch disk drive, for the personal computer marketplace. Maxtor has been managing the operations of MiniScribe Corp. since April.

FORT WORTH, TX (JUNE 19) BUSINESS WIRE - June 19,1990. Paul I. Stevens, chairman and chief executive officer of Stevens Graphics Corp. (ASE:SVGA/SVGB) announced Tuesday that the company has signed a letter of intent to acquire all the outstanding stock of Scheffer Inc.

Scheffer's 1990 sales are expected to total $10 million.

Scheffer, a privately held company located in Merrillville, Ind., manufactures in-line finishing equipment, including rotary cutters, pre-folding, numbering and perforating, and gluing/segmented printing equipment for the commercial and business forms market segments.

Stevens stated, ''Acquiring Scheffer Inc. carries us another step forward in implementing our strategy of growing a company whose product lines will provide a complete systems solution for our customers. Scheffer's products are marketed worldwide and will not only add to our domestic sales but will also enhance our international marketing program.

''We are very pleased with this addition to our family of companies and believe that both our customers and shareholders should benefit from this accquisition.''

Stevens Graphics, has headquarteres in Fort Worth, is the only United States-based company that designs, manufactures, markets, and services web-fed offset, gravure, flexographic and intaglio printing and packaging systems, collators, and related pre-press, printing and post-press equipment on a worldwide basis.

The company serves the packaging, commercial, business forms, and currency/securities segments of the U.S./North American and international printing and packaging industries. Corporate strategy is to create a larger company, by internal growth and by acquisition, of industry-related companies, that provides ''complete systems solution'' lines of products.

EL SEGUNDO, CA (JUNE 19) BUSINESS WIRE - Aura Systems Inc. (NASDAQ:AURA) received a $420,000 U.S. Navy contract for its electromagnetic linear actuator, a breakthrough device with far-reaching commercial applications, it was announced Tuesday by Harry Kurtzman, president and chief executive officer of the company.

Under the terms of the contract, Aura's device, which is patented in the United States, Japan, Canada, Europe and Korea, will be used to eliminate vibration caused by machinery motion. The actuator will electromagnetically apply force to instantaneously stabilize vibrating areas.

''The electromagnetic actuator is breaking through technological boundaries for movement control,'' said Kurtzman. ''Aura's technology, which is highly practical and cost efficient, will play a major role in engineering for the U.S. Navy and many other commercial industries worldwide.''

In another application, Aura's actuator is being developed for use in automobiles as an electromagnetic automotive suspension system. The actuator is capable of electronically monitoring vehicle wheel and body positions and vibration levels to produce a bump-free ride in response to road conditions.

The actuator is being designed for use in a variety of other commerical applications, including a high-power audio speaker, a lightweight, low-power engine valve lifter, and a linear motor.

Aura Systems Inc., founded in 1987, is a leader in magnetic suspension technology, electro-optic projection systems and advanced computing systems. The company has headquarters in El Segundo.

QUINCY, MA (JUNE 19) BUSINESS WIRE - Clean Harbors Inc. (NASDAQ:CLHB) Tuesday announced the appointment of Clyde D. Keaton, vice president of corporate marketing and sales for General Electric Co., as its president and chief operating officer.

In his new position Keaton will direct Clean Harbors' top management group in improving financial performance and accelerating the company's growth. Keaton will serve as vice chairman and will work closely with Alan S. McKim, Clean Harbors' chairman, CEO and principal stockholder.

McKim said, ''We are delighted to have a person with Clyde Keaton's experience and abilities join our top management team. His performance in growing profitable businesses will be extremely valuable in leading Clean Harbors to consistent profitable growth in the years ahead. Having a seasoned GE executive who has successfully managed both a $100 million business and a billion dollar plus business is a significant benefit to Clean Harbors.''

For the last 15 months Keaton has been in charge of GE's marketing and sales efforts which included auto industry programs, national area management, communications and customer service. From 1984 to 1989, Keaton was vice president and general manager of GE's Industry Sales and Services Division, a billion dollar technical services organization with over 200 locations and nearly 10,000 employees.

From 1979 to 1984 Keaton was general manager of GE's Mechanical Drive Turbine and Compressor Department, a $100 million worldwide manufacturing business with more than 1,400 employees.

Keaton said, ''I am excited about joining Clean Harbors and to be working with Alan McKim to build a customer-oriented management structure that will lead Clean Harbors into the Fortune 500.''

A native of Woodstown, N.J., Keaton, 47, holds a bachelor of science degree in mechanical engineering from Villanova University and a master of science degree in mechanical engineering from Renssalaer Polytechnic Institute.

Keaton's new position will include the former responsibilities of J. Edward Fixari, who recently announced his retirement.

NEW YORK (JUNE 19) BUSINESS WIRE - Marking the Pandora Group's establishment of a domestic U.S. television distribution operation, the European-based investment and international distribution company has acquired the domestic assets and library of Vestron Television Inc.

The acquisition was announced Tuesday by Christian Bourguignon, president and chief executive officer of Pandora.

Under the new Pandora banner, the Vestron TV products will continue to be distributed through offices in New York and Los Angeles. Responsibility for sales will be assumed by Pandora International Entertainment Group, which is based in Los Angeles. The company is currently in discussion with several candidates to head its U.S. sales activities.

''Our expansion into the American television market through this acquisition will continue our strategy of serving the global television market,'' Bourguignon noted. ''It will further broaden our ability to acquire and distribute quality product on a worldwide basis. The newly acquired operation will provide an opportunity for growth in North America.

The Pandora Group consists of Luxembourg-based Pandora Investment, which acquired the Vestron television assets and Los Angeles-based Pandora International Entertainment Group Inc., which has been primarily concerned with the acquisition of U.S. TV product for worldwide distribution.

Pandora S.A., with headquarters in Paris, oversees all distribution activities, including the management and marketing of the acquired product.

Pandora has been pursuing a carefully planned expansion into the American market since the opening, 2-1/2 years ago, of Pandora in Los Angeles. ''We believe this acquisition to be a unique opportunity for our companies to expand our distribution capabilities to North America.

''As a result of this acquisition, Pandora's distribution activities now include every major market in the world,'' stated Bourguignon.

Vestron Television has been distributing programming to all domestic television markets since December 1986. The library acquired by Pandora consists of approximately 180 feature films, specials and series, including three feature packages currently available in the syndicated broadcast market: ''Hot Tickets''; ''First Images,'' which includes the hit movie ''Dirty Dancing'' and ''Empire of Terror.''

Also included are are several specials, including ''Dirty Dancing -- Live in Concert'' and ''Eyes of War.'' Various feature packages from the library have been sold to pay and basic cable, as well as to pay-per-view.

LOS ANGELES (JUNE 19) BUSINESS WIRE - Carolco Pictures Chairman Mario Kassar announced Tuesday that Rene Bonnell, chairman of Canal Plus Productions, has been appointed to the board of directors of Carolco Pictures Inc.

As previously announced, Canal Plus Productions has purchased a $30 million equity stake in Carolco. Kassar stated: ''We are very pleased to have Rene Bonnell join the board of directors of Carolco. Rene Bonnell brings to the board a great deal of knowledge and expertise about the worldwide entertainment industry and he will be a valuable contributor to the future efforts of Carolco.''

Kassar also announced that ''Total Recall,'' starring Arnold Schwarzenegger and directed by Paul Verhoeven, has grossed $68 million its initial 17 days of theatrical release in the United States. This figure includes $10.3 million for the weekend of June 15. ''Total Recall'' grossed $25.5 million in its initial weekend of theatrical release, making the film 1990's biggest opener and leading summer box-office hit.

Carolco's next theatrical release is ''Air America,'' starring Mel Gibson and Robert Downey Jr. ''Air America'' is scheduled for an Aug. 10 release. Carolco also has two films scheduled for release this fall. The first is ''Narrow Margin,'' starring Gene Hackman and Anne Archer in an action-adventure to be released in September.

Following ''Narrow Margin'' will be ''Jacob's Ladder,'' the first film from director Adrian Lyne since his smash hit ''Fatal Attraction.'' ''Jacob's Ladder,'' starring Tim Robbins, Danny Aiello and Elizabeth Pena, is scheduled for a November release.

Carolco Pictures is a diversified entertainment company formed for the purpose of financing, producing and leasing motion pictures for exhibition in domestic (United States and Canada) and foreign theatrical markets and for later worldwide release in all media including home video and pay and

free television.

In a continuing plan to broaden its distribution systems and product base, Carolco acquired Orbis Communications, a leader in the television distribution and advertising sales industry and the IndieProd company, an independent motion picture production company headed by Dan Melnick.

Carolco Licensing arranges licenses for characters and similar rights for motion pictures controlled by Carolco, as well as in other quality products. Carolco Music handles the development and exploitation of music publishing rights. Carolco owns a 48 percent voting interest in LIVE Entertainment Inc. LIVE is a diversified entertainment software producer, distributor and retailer with headquarters in Los Angeles.

LIVE is the parent company of Los Angeles-based International Video Entertainment Inc., one of the nation's leading producer/distributors of home video, Minneapolis-based Lieberman Enterprises, one of the country's top rackjobbers of home video, music and personal computer software; and the specialty retail group which includes Strawberries Records, Tapes and CDs and Waxie Maxie Quality Co., a specialty-music retail chain with 125 stores located in the Northeast. Carolco owns a 33 percent interest in the Vista Organization Ltd.

#90170b0640 06/19/1990 ~Business Wire

SALT LAKE CITY (JUNE 19) BUSINESS WIRE - Dayna Communications Inc., Tuesday announced shipment of EtherPrint, and EtherTalk to LocalTalk protocol converter for LocalTalk network printers.

EtherPrint is a 5.5-inch x 7.5-inch x 1.5-inch box with a built-in Ethernet transceiver and a LocalTalk port. An AUI port allows thick Ethernet, twisted-pair or fiber-optic cables to be attached through an external transceiver. The device comes with a power supply, an Ethernet T-connector, and cables to connect to LocalTalk printers with 8-pin or 9-pin ports.

By plugging EtherPrint into the printer and then connecting the Ethernet cable, Macintosh users on Ethernet can access the printer directly or through network print queues. Users of IBM compatibles can also access the printer, provided they have AppleTalk printing software.

''Users have been asking for an affordable Ethernet connection for their LocalTalk printers and now we've given them one,'' said Boyd T. Jones, president and chief executive officer of Dayna. ''Before EtherPrint, the

only way to connect a LocalTalk printer to Ethernet was through a bridge or router at a cost of $2,000 or more. We've slashed the price of making that connection.''

EtherPrint supports any LocalTalk-compatible network printer, including the Apple LaserWriter and ImageWriter families, the IBM 4216 Personal Page Printer II, the Hewlett-Packard DeskWriter, and QUME printers. EtherPrint supports AppleTalk Phase 1 protocols, as well as the Phase 2 protocols which allow the network to be divided into multiple zones.

EtherPrint is the first product in a new line of Ethernet hardware from Dayna. The company recently announced its DaynaPORT Ethernet cards for the Macintosh II and SE/30 series computers, which are expected to ship by the end of July. PRICING AND AVAILABILITY

EtherPrint is available immediately at a U.S. suggested retail price of $499. Resellers can order the product through Softsel/Macamerica and Ingram/Micro D. Contact Dayna for information on foreign distributors.

Dayna Communications Inc. is a privately held company that designs and manufactures a range of products to meet the connectivity and productivity needs of personal computer users.

NEW YORK (JUNE 19) BUSINESS WIRE - Molecular Biosystems Inc. (NYSE:MB) announced that as of Tuesday, June 19, its shares will initiate trading on the New York Stock Exchange under the trading symbol ''MB''.

Previously, the company's common stock was traded on the NASDAQ National Market System under the symbol ''MOBI''. In addition, Molecular Biosystems options are being traded on the American Stock Exchange also under the symbol ''MB''. As of Monday, MBI had approximately 9,432,080 shares outstanding. MBI's common stock closed Monday at a price of $19.625 per share.

MBI's chairman and chief executive officer, Dr. Kenneth J. Widder, said the NYSE listing ''gives Molecular Biosystems and its shareholders the advantages of expanded coverage in daily stock tables across the country, as well as greater visibility and increased public interest in our company.

''The listing is an important step in further broadening ownership of MBI stock as we continue to build MBI into a fully integrated and diversified medical products company,'' Widder said.

Molecular Biosystems Inc., located in San Diego, is a leading biomedical firm developing proprietary medical products that diagnose human disease, including Albunex, an injectable contrast agent for use in ultrasound imaging. In addition, it is a leading developer of direct, non-radioactively labelled genetic probe products.

NEW YORK (JUNE 19) BUSINESS WIRE - Apple Computer Inc. Tuesday announced a program that will make it easier for developers to offer the Macintosh computer's consistent interface when providing networking services.

The source code and object code licensing program provides low-cost access to the company's AppleTalk networking software. AppleTalk is a set of local-area networking protocols built into every Macintosh and used for connecting Apple and other manufacturer's computers with each other and with shared resources.

The AppleTalk Licensing Program makes it easier for mainframe, minicomputer and personal computer manufacturers, as well as networking companies, to offer a comprehensive set of network services that are compatible with the millions of Macintosh personal computers networked today. This program is part of Apple's goal to extend AppleTalk to all prevalent computer environments.

The AppleTalk Licensing Program allows networking companies to obtain AppleTalk software directly from Apple, instead of writing it from scratch. By using the AppleTalk software, these companies can quickly deliver network services to Macintosh users and eliminate the need to develop client software for the Macintosh.

BROOMFIELD, COLO. (JUNE 19) BUSINESS WIRE - Pentax Technologies Corp. Tuesday announced immediate availability of its IQ Scan legal-size flatbed scanner model SB-L301 -- a compact, flatbed, 300-dpi, optical-page scanner designed for use in optical-character recognition (OCR), document storage and retrieval, facsimile transmission and desktop publishing.

According to Pentax Marketing Manager Steven J. Juhasz: ''The IQ Scan provides exceptional imaging because of a unique, one-piece, image-read head and proprietary, folded optical path that produces superior reliability, less distortion and greater depth of field -- a requirement for accurately scanning books or other bound materials. This technology is a result of Pentax's decades of experience in producing high quality optics, most notably in the camera industry.''

In addition to bundle offerings, the Pentax scanner is compatible with numerous other software offerings in each of the application areas.

Legal-size or smaller documents can be placed directly on the glass platen for scanning. An optional, automatic document feeder is available for unattended scanning.

Unlike most scanners which operate exclusively in sheetfeed mode when an automatic document feeder (ADF) is used, the Pentax scanner maintains flatbed operation when the ADF is installed. In addition the ADF can easily be moved out of the way for scanning books or other large format documents. The Pentax ADF features a 30-document input bin, and is both user-installable and controlled by the IQ scan itself.

Pentax Technologies Corp. is a wholly owned subsidiary of Asahi Optical Co. Ltd., a 70-year-old corporation that develops, manufactures and markets products worldwide under the Pentax label. Pentax Technologies Corp. was formed in 1985 to develop, sell and service precision optical equipment to the computer peripheral industry.

CORAL GABLES, FL (JUNE 19) BUSINESS WIRE - BLOC Development Corp. (NASDAQ: BDEV) announced Tuesday that they have entered into a definitive corporate licensing agreement with Deluxe Corp. (NYSE:DLX) of St. Paul, Minn., relating to BLOC's F3 Forms Automation System.

''We are excited to be entering into a relationship with such a significant player in the business forms arena,'' said Frank Millman, BLOC's chairman and CEO.

''Initially, BLOC's F3 software is slated to be marketed to large forms manufacturers, so, corporations such as Deluxe are an important link to

our marketplace,'' Millman continued.

The F3 Forms Automation System is a line of professional, advanced software products for complete business forms composition and processing.

''BLOC's F3 System will reduce turnaround on time-critical financial document and forms printing,'' said Steve Jensen, vice president of Information Services for Deluxe. ''The system will also help us to contain costs.''

Deluxe Corp., based in St. Paul, is the nation's largest check printer. In addition, the company produces a variety of computer and business forms for small businesses and professional practices and is a leading supplier of health care forms to doctors and dentists in individual and small group practices.

Based in Coral Gables, BLOC develops, publishes and markets business, personal productivity and information management software products for the IBM PC, PS/2, IBM compatible and Apple Macintosh markets. In addition, the company provides business automation services to small and mid-size businesses.

#90170b0650 06/19/1990 ~Business Wire

NEW YORK (JUNE 19) BUSINESS WIRE - Cabletron Systems Inc. (NYSE:CS) Tuesday introduced the Intelligent Repeater Bridging Module (IRBM), a combination repeater, bridge and analyzer module that merges analyzing functionality and network management capability into the smart hub.

The new module can be integrated into Cabletron's Multi Media Access Center (MMAC) hub to connect 10 Megabit per second (Mb/s) Ethernet local area network segments.

The combination of Cabletron's IRBM and Remote LANVIEW/Windows software will provide sophisticated, detailed network management for the entire MMAC product line. By combining both functions, the IRBM becomes an integrated, high-performance, local Ethernet bridge that provides complete monitoring and control to the individual to the individual port level.

The IRBM was developed to enhance Cabletron's Integrated Network

Architecture (INA), a product strategy that provides a framework for seamless network evolution and expansion, and connects groups of disparate networks into a single system in which all devices can be managed from a remote network management station.

The IRBM is an integration of an IEEE 802.3 repeater, a high-performance Ethernet bridge, LAN analyzing technology, and network management software onto a card which occupies a single slot in the MMMAC-8 or MMAC-3 hub. The product was developed to provide increased functionality and management capabilities while reducing overall network traffic.

The IRBM is the first Cabletron product to be incorporated into the enhanced version of Remote LANVIEW/Windows (Version 1.2) software. The version provides a graphical user interface for the IRBM that features strip and barcharts representing real-time network utilization, error rates and collision rates. Also included in the latest version are extended alarm capabilities that include setting alarms on PORT status (ON-OFF-SEG), LINK status (LINK-NO LINK) and error thresholds (Cyclical Redundancy Check, or CRC errors, misalignments, etc.)

The IRBM module will be available in July and is priced at $6,500.

Headquartered in Rochester, N.H., Cabletron is a leading independent developer and manufacturer of standards-based network management solutions including software, hardware and connectivity products. The company currently has a worldwide installed base exceeding 1.3 million nodes.

Cabletron recently reported record annual revenues of $104.7 million and earnings of $22.3 million for the fiscal year 1990. The company has reported 130 percent revenue growth and 255 percent earnings growth annually since 1986.

SAN DIEGO (JUNE 19) BUSINESS WIRE - UniSyn Fibertec Corp. (NASDAQ:SBIO) announced Tuesday that it has appointed Glenn P. Ambra as vice president of marketing and sales.

Ambra brings with him over 18 years experience in the biotechnology field.

In addition to his extensive sales and marketing experience, which

includes management positions at E.I. Du Pont, the Biosearch subsidiary of New Brunswick Scientific, and, most recently, director of marketing and sales for the Milligen/Biosearch division of Millipore Corp., he also is experienced in setting up operational manufacturing facilities in this field.

Ambra has a degree from the University of Massachusetts in biochemistry.

He will immediately be responsible for all sales and marketing operations at UniSyn Fibertec, as well as the integration into UniSyn of the biotech project of CD Medical Inc., a wholly owned subsidiary of Dow Chemical Co., pending final acquisition approval of both boards of directors.

UniSyn Fibertec will integrate the operations of the CD Medical Biotech Project into its existing mammalian cell culture business strategy. UniSyn Fibertec has developed unique processes related to the scale-up and propagation of mammalian cell cultures derived from both anchorage dependent and suspension cell types.

UniSyn Fibertec's proprietary hollow fiber processes provide significant cost reductions in the manufacture of cellular products applied to viral vaccines, recombinant proteins for therapeutics and diagnostic applications, human and murine monoclonal antibodies and direct utilization of cells produced for cell replacement therapies.

Synbiotics Corp. is a leader in the development, manufacturing and marketing of high-technology veterinary therapeutics and diagnostic products. Through wholly owned subsidiaries, the company also develops and manufactures novel human pharmaceutical compounds.

#90170b0655 06/19/1990 ~Business Wire

ALAMEDA, CA (JUNE 19) BUSINESS WIRE - Rich Shapero, president of TOPS, Tuesday announced that the company has been renamed the Sitka Corporation.

The name was inspired by the small town of Sitka located on the Alaskan coast. Originally a center for Northwest coast Indian culture, later the capital of Russian America, and today, an important seaport for present-day Alaska, Sitka and its population are a unique example of different cultures co-existing.

''We wanted a straightforward name that symbolically expressed the qualities of our product line: Our growing family of networking products enable people using diverse computer platforms -- MS-DOS compatibles, Apple Macintosh computers, and Sun Workstations -- to communicate and work together,'' said Shapero.

''The TOPS of the '90s is a much different company than the TOPS of the '80s,'' said Shapero. ''The time is right to create a new identity that matches our new position in the network market. We've established ourselves as an independent corporation, autonomous from Sun Microsystems. We have an independent board of directors, and we've broadened our product family to go beyond file-sharing and address the needs of enterprise-wide network computing.''

The company originally established a reputation with TOPS, a simple, entry-level file-sharing local area network product designed to connect Macintoshes and industry standard personal computers. With the January 1990 introduction of Network Bundle for DOS, Network Bundle for Macintosh, and the powerful new electronic mail programs InBox 3.0 and InBox Plus, along with enhanced connections to Sun workstations and enterprise computing environments, the company's product line has evolved to include a suite of strategic business tools for enterprise-wide applications in a growing number of corporations.

TOPS was purchased by Sun Microsystems Inc. of Mountain View, Calif. in 1987, and in January 1990 became an independent corporation. The company has the world's second-largest installed base of LAN software, with over 700,000 users worldwide.

Sitka Corp.'s products will retain their names: the Network Bundle for DOS, the Network Bundle for Macintosh, InBox, and InBox Plus.

To celebrate the name change, Sitka Corp. will initiate and sponsor an educational exchange program between students in Alameda and students in Sitka, Alaska.

#90170b0656 06/19/1990 ~Business Wire

LOS ANGELES (JUNE 19) BUSINESS WIRE - The Foothill Group Inc. (NYSE:FGI) announced Tuesday that Foothill Capital Corp. (''Foothill Capital''), its largest subsidiary, has completed the placement of $50 million in medium-term senior notes.

This medium-term placement consists of $15 million in 10.18 percent Senior notes due in June 1993, $15 million in 10.23 percent Senior notes due in December 1993, $5 million in 10.27 Senior notes due in June 1994 and $15 million in 10.35 percent Senior notes due in June 1995.

The company also executed $50 million in interest rate swap agreements. For the $50 million notional amount of the swaps, the company will recieve a fixed interest rate tied to the applicable Treasury Note rates and will pay a variable interest rate tied to the applicable commercial paper rates.

This swap ensures interest-sensitive assets and liabilities will continue to be aligned and initially reduces the effective cost of the medium-term notes.

David C. Hilton, chief financial officer of Foothill Capital, stated: ''This financing is very significant to Foothill as it reduces reliance on short-term borrowing facilities and enables Foothill Capital to more closely match finance recievable and borrowing maturities.

''It also gives Foothill Capital additional funds for new loan growth and marks the first time the company has privately placed medium-term notes.''

The Foothill Group specializes in providing innovative financial services through its three highly specialized, yet complementary, operating units. Foothill Capital offers asset-based financing tailored to businesses whose credit needs require more unique, sophisticated types of loan

programs.

Foothill Thrift and Loan specializes in commercial and industrial lending in California. The Capital Markets Division focuses on asset-management activities, arbitrage trading and investing in companies in reorganization.

#90170b0658 06/19/1990 ~Business Wire

SAN JOSE, CA (JUNE 19) BUSINESS WIRE - DEST Tuesday introduced Recognize! for the Macintosh omnifont optical character recognition (OCR) software -- the newest addition to the company's complete line of scanner technology products.

Recognize! for the Macintosh is DEST's first unbundled software product. It operates not only with DEST's PC Scan series of scanners, but also with Hewlett-Packard Scan Jet and Scan Jet Plus scanners, and the Apple Scanner.

Recognize! for the Macintosh requires only a 1-Mbyte system.

Recognize! for the Macintosh is available immediately at a suggested retail price of $69, through Ingram Micro D and all DEST authorized resellers.

Recognize! for the Macintosh incorporates XTND Technology. XTND is a document interchange standard developed by Claris Corp. that allows users to import and export files within multi-application and multiplatform environments. Recognize! is the first OCR product in the industry with XTND.

Recognize! for the Macintosh can be used with Macintosh Plus, Macintosh SE and Macintosh II computers, with only a minimum of 1 Mbyte of system memory. A hard disk drive is required.

Recognize! for the Macintosh can read from a broad range of original documents, including typewritten, laser, draft-quality dot matrix, and impact computer print. The high-performance, versatile omnifont OCR software can read font sizes from 8 to 18 points, as well as monospaced, proportionally spaced, and typeset styles.

Recognize! for the Macintosh automatically detects document structure, including single and multiple columns, variable column widths, tables, bold fonts, underlining, centering, tabs and lists. It also translates mixed text and graphics to text-only format for input to word processing applications.

Adaptive masking is a proprietary DEST technique. This flexible technique allows Recognize! for the Macintosh to alter its recognition process to meet the specific requirements of each page. DEST's unique combination of OCR techniques is responsible for the highest accuracy rate in the industry, according to Fry.

Recognize! for the Macintosh allows scanned text to be easily accepted by desktop publishing and word processing applications. Compatibility with these Macintosh programs is virtually unlimited with XTND. Through Claris XTND Technology, output is formatted automatically and specifically for most word-processing products, including Microsoft Word, MacWrite II, MacWrite 5.0, Microsoft Write, WriteNow and WordPerfect, as well as other popular applications. Recognize! for the Macintosh supports other industry-standard formats, such as ASCII text, TIFF and PICT.

Fry also said, ''Our interface is by far the easiest to use -- with one keystroke the user can scan and recognize documents. Document formats for tabs, underlining and centering are automatically maintained, and multiple columns are optionally converted to a single column for easy editing.'' All scanner and software selections are visible and controlled in one window. Fonts and point sizes may be changed in the output document.

New DEST Corp., based in San Jose, is a leading designer, manufacturer, and worldwide distributor of desktop scanners. DEST pioneered optical character recognition solutions and image processing software for business and office environments, and has an installed base of more than 40,000 customer sites.

#90170b0659 06/19/1990 ~Business Wire

SAN JOSE, CA (JUNE 19) BUSINESS WIRE - DEST, a major manufacturer of OCR and image scanning products, Tuesday became the first scanner manufacturer to implement Claris XTND Technology, a document interchange standard.

Recognize! for the Macintosh -- an omnifont OCR software package introduced today by DEST -- is the first DEST product and the first OCR product on the market to feature XTND Technology. The Claris XTND Technology allows users to import and export files within multi-application and multiplatform environments. DEST plants to incorporate XTND in all of its Macintosh software products.

''DEST's aim is to provide products and solutions for any user's needs, with the most up-to-date technology, at an affordable price. Licensing XTND is an example of our commitment to that goal,'' said DEST President Tom Griffiths. ''With XTND, it's even easier for DEST users to translate scanned data into a greater number of popular Macintosh applications. Using XTND in an OCR application is an industry first that we're proud to have accomplished.''

''DEST's use of Claris XTND is a great example of developers providing transparent solutions that give Macintosh users real benefits, when it comes to sharing documents,'' said Yogen Dalal, Claris vice president of product development. ''DEST's implementation of Claris XTND is an important step toward all major Macintosh developers addressing these user needs.''

Before XTND, it was necessary to support unique translators for each word processing, graphics or spreadsheet application. Recognize! for the Macintosh utilizes state-of-the-art technology, which offers users a wide range of application interfaces and an automated upgrade path.

Through Claris XTND Technology, text scanned by Recognize! for the Macintosh is formatted automatically and specifically for most word-processing products, including Microsoft Word, MacWrite II, MacWrite 5.0, Microsoft Write, WriteNow and WordPerfect, as well as other popular applications.

Claris Corp. is a leading vendor of Macintosh software. The company's product line includes Macintosh products for word processing (MacWrite II) data base management (FileMaker Pro), planning (MacProject II), computer-aided design (Claris CAD), and electronic forms processing (SmartForm Series). Claris has headquarters in Santa Clara, Calif.

New DEST Corp., based in San Jose, is a leading designer, manufacturer and worldwide distributor of desktop scanners. DEST pioneered optical character recognition solutions and image processing software for business and office environments, and has an installed base of more than 40,000 customer sites.

#90170b0660 06/19/1990 ~Business Wire

AKRON, OH (JUNE 19) BUSINESS WIRE - The Goodyear Tire & Rubber Company announced today that it expects to book approximately $35 million in pre-tax charges in the second quarter for costs associated with tire and other contemplated restructuring of its North American operations.

Chairman Tom H. Barrett said the tire restructuring complements company strategy to better serve a changing marketplace and improve the cost effectiveness of wholesale and retail marketing. A streamlined sales and support organization is expected to provide a more effective approach to marketing products, Barrett said.

Approximately 1,100 employees in various field operations will be affected as Goodyear, the North American market leader, sharpens focus on the needs defined by dealers, the company said. It added that employee reductions will result from the elimination of five regional operations for a flatter more responsive organization and from reductions in various retail, wholesale and support groups.

The chairman also announced that continued competitive pressures in the tire industry and the lingering sluggishness of the auto market, combined with restructuring charges, the impact of Brazil's economic reforms, and a prolonged strike in Turkey, are contributing to an expected second quarter net loss of up to $10 million after taking the previously mentioned restructuring charge.

He added that because of continued competitive pressures and an economy that is weaker than anticipated, Goodyear's second half results are now expected to approximate the company's 1989 second half.

#90170b0662 06/19/1990 ~Business Wire

REDMOND, WA (JUNE 19) BUSINESS WIRE - Microsoft Tuesday announced the immediate availability of a new Mouse package that offers a cost-effective alternative for users who already have mouse-supported software.

The new package is identical to other Microsoft Mouse packages except that it provides no application software. Like the other packages, it offers Microsoft's award-winning high-resolution Mouse, industry-standard driver software, adapters, user's guide and Mouse menus. The menus include 14 custom menus that add Mouse support to popular character-based applications, as well as MenuMaker, a utility that lets users create their own Mouse menus. The new Mouse package has a suggested retail price of $125.

''The interest that's been generated in the Windows graphical environment means a lot of users will be adding a mouse to their system,'' said Steve Ballmer, senior vice president of the systems division at Microsoft Corp. ''The Microsoft Mouse is the most advanced mouse available for the Windows environment and other mouse-supported environments.''

Microsoft introduced the new package in response to customer demand. Previously, the company sold the Mouse in combination with mouse-supported application software. However, with the increasing availability of mouse support in popular character-based applications, plus the growing popularity of graphical environments such as Microsoft Windows, many potential mouse users already have numerous applications with mouse support. For these users, the new Mouse package is the ideal solution. Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs as well as books, CD-ROM products and hardware for the microcomputer marketplace.

#90170b0663 06/19/1990 ~Business Wire

FT. MITCHELL, KY (JUNE 19) BUSINESS WIRE - Sunrise Federal Savings and Loan Association will change its name to Sunrise Bank for Savings, F.S.B. (Federal Savings Bank) effective July 1.

The announcement was made Tuesday by James C. Davis, Sunrise Federal president. Sunrise Bank will remain a wholly owned subsidiary of Sunrise Bancorp Inc. (NASDAQ:SRSL).

''We are positioning ourselves to be more competitive in the new banking environment by offering products previously reserved only to banks,'' says Davis. ''It is a clear indication of our strength in the community and our commitment to offer the people of Northern Kentucky the widest choice of banking products available.''

''The new insurance fund managed by the FDIC (Federal Deposit Insurance Corporation) gives deposits at Sunrise Bank the same protection given to federally insured banks. The important point to remember is that federal deposit insurance coverage of savings and loans is the same as for banks in terms of benefits to the depositor.

''Two government agencies, Bank Insurance Fund and Savings Association

Insurance Fund, manage the two funds under the FDIC,'' says Julianne Bruzina, vice president of Funds Acquisition and Director of Marketing. ''Each depositor is insured up to at least $100,000.''

Prior to 1989, regulations limited business checking accounts at Sunrise. The savings bank could only offer checking account services to businesses which had a loan relationship. New regulations allow Sunrise to develop and promote business checking accounts to all business customers.

According to the Pace Report, Sunrise is a leading mortgage lender in the Northern Kentucky area. In keeping with its commitment to meet the credit needs of the community, Sunrise continues to develop loan products which encourage and make homeownership a reality for the consumer.

For example, Sunrise bank has initiated an FHA lending program. Sunrise Bank currently offers residential, commercial and consumer loans. Sunrise Bank for Savings is one of the largest thrifts headquartered in Northern Kentucky, with $273 million in assets. The common stock of its parent company, Sunrise Bancorp Inc., is currently traded over-the-counter on the NASDAQ system under the symbol ''SRSL.''

#90170b0664 06/19/1990 ~Business Wire

SAN JOSE, CA (JUNE 19) BUSINESS WIRE - DEST Tuesday announced another breakthrough in scanning technology -- Personal Scan, a combination full-page hand-held and 10-page capacity edge-feed scanner.

Personal Scan comes complete with a scanner interface card and Recognize! for the DEST Personal Scan, Version 2.0, DEST's powerful omnifont optical character recognition (OCR) software. This comprehensive, unique scanning solution is competitively priced at $995 and is available immediately.

Personal Scan is designed for inputting text into word processing, desktop publishing, spreadsheet, and data base programs on IBM AT (286 and 386) and compatible computers. It is ideal for single-user applications, such as OCR, in small- or medium-size businesses, in which scanning solutions priced under $1,000 are essential.

Personal Scan is distributed by Ingram Micro D and is also available at all DEST authorized resellers.

Personal Scan is the first scanner in the industry to combine full-page

(8.5-inch wide), one-pass hand-held scanning with 10-page-capacity edge-feed scanning, in one desktop unit. Free-hand full-page scanning is especially useful for scanning odd-size documents, such as books, maps, and technical documentation.

Personal Scan's one-pass hand-held capability is unique because virtually all other hand-held scanners on the market today do not scan a full page.

When placed in the desktop feeder, the versatile Personal Scan hand-held unit becomes an edge-feed scanner, capable of handling up to 10 pages at a time of any type of printed material, from photocopies to typewritten reports to laser-printed manuscripts.

Personal Scan features 300 dpi resolution, and 64 levels of halftone and bi-level scanning. In the full-page hand-held mode, the unit can scan virtually any type or size document and in desktop feeder mode, it can handle any size sheet, from 4-inch x 4-inch to 8-1/2-inch x 14-inch and 16- to 30-pound stock. Personal Scan has a standard internal serial interface and comes complete with a 16-bit PC interface card, with is included in the $995 price.

Personal Scan also comes with Recognize! for the DEST Personal Scan, Version 2.0, DEST's omnifont OCR software product. Recognize! combines omnifont recognition, full text formatting control, and high recognition accuracy across a wide range of type fonts.

To establish Personal Scan as a new product line, DEST plans to add increased capability, such as image capture, to the product later this summer. This image capture capability will be available as an upgrade for Personal Scan users.

DEST also offers two lines of higher end scanner hardware products -- the PC Scan 2000 Series and the PC Scan 3000 Series. PC Scan 2000 Series are edge-feed, 256-gray-scale scanners, which feature a choice of scanning modes, 8-bit gray-scale bi-level or halftone, and variable resolution to 300 dpi.

PC Scan 3000 Series are intelligent, multifunctional, 256-gray-scale flat bed desktop scanners, which feature variable 300-dpi resolution; bi-level, halftone or 8-bit gray-scale (up to 256 levels of gray) modes; sizing and scaling; and five levels of contrast and 16 levels of brightness.

Both series are designed for inputting graphics, photographs and text into IBM PC or PS/2 and Macintosh computers and for versatility and performance in desktop-publishing and text-processing applications in multi-user environments.

New DEST Corp., based in San Jose, Calif., is a leading designer,

manufacturer and worldwide distributor of desktop scanners. DEST pioneered optical character recognition solutions and image processing software for business and office environments and has an installed base of more than 40,000 customer sites.

#90170b0665 06/19/1990 ~Business Wire

SAN JOSE, CA (JUNE 19) BUSINESS WIRE - DEST Tuesday unveiled the first upgrade of its high accuracy omnifont optical character recognition (OCR) software -- Recognize! for the PC, Version 2.0 -- only five months after the package was first introduced.

Recognize! for the PC, Version 2.0, can now be used with scanners from other manufacturers, in addition to DEST scanners, and has three new features and increased speed.

Recognize! for the PC, Version 2.0, is available immediately through Ingram Micro D and all DEST authorized resellers, at the suggested price of $695. DEST offers Recognize! for the PC, Version 2.0, to current users as a standard upgrade for $95.

''By upgrading and unbundling Recognize! for the PC, DEST is meeting the demands of its customers and the needs of today's businesses,'' said Tom Griffiths, DEST president and chief executive officer.

''We've made the most accurate omnifont OCR package, the fastest OCR software package in its class on the market, and added capabilities that are essential for true desktop scanning and desktop publishing. Recognize! for the PC is an unbeatable OCR solution.''

''Recognize! for the PC, Version 2.0, is 40 percent faster than its predecessor, making it the fastest OCR software package in its class on the market today,'' said Stan Fry, DEST chief technical officer and vice president of research and development.

The three new features of Recognize! for the PC, Version 2.0, are: landscape page processing, column processing, and transparent integration with DEST's Text Pac. In the landscape page processing mode, Recognize! will automatically rotate pages while scanning.

Landscape page processing is particularly useful when reading documents

such as spreadsheets and tables. The original version of Recognize! automatically handled columns of text by appending one column to another, producing a continuous stream of text output. Version 2.0 has several new additional options for columnar and mailing list processing.

Recognize! for the PC, Version 2.0, also incorporates DEST Text Pac software, which is used to interface to popular word processing applications. Previously, Text Pac had to be purchased separately. Today Text Pac is transparently integrated into Recognize! for the PC, Version 2.0.

Recognize! for the PC, Version 2.0, like Recognize! for the Macintosh, is hardware independent. It can be used with the Hewlett-Packard Scan Jet and Scan Jet Plus, and Microtek scanners as well as DEST's complete line of scanners, including the PC Scan Series scanners. Recognize! is also packaged with DEST's new combination hand-held and edge-feed scanner, Personal Scan.

Recognize! for the PC, Version 2.0, can read typewritten, typeset, laser, draft-quality dot matrix, and impact computer print; 8- to 18-point font sizes; and monospaced, proportionally spaced, and typeset styles. It uses a proprietary multiple intelligent character recognition (ICR) process, combining shape analysis, lexical analysis, context evaluation, adaptive masking and font pattern-matching. Tables, bold fonts, underlining, centering, tabs, lists and other document structure elements are detected automatically by the software.

New DEST Corp., based in San Jose, is a leading designer, manufacturer, and worldwide distributor of desktop scanners. DEST pioneered optical character recognition solutions and image processing software for business and office environments, and has an installed base of more than 40,000 customer sites.

#90170b0668 06/19/1990 ~Business Wire

MOUNTAIN VIEW, CALIF. (JUNE 19) BUSINESS WIRE - Sun Microsystems and FPS Computing on Tuesday announced that they have signed a joint marketing agreement that covers their respective SPARC systems.

The two companies will make joint sales calls and engage in other activities to promote customer solutions that include SPARC workstations

and servers from Sun and a new SPARC supercomputer to be introduced by FPS.

The company has signed an agreement to license Sun's SPARC RISC architecture and Sun's UNIX operating system, SunOS, for use in the modular supercomputer, called the Model 500EA. Aimed at specific high-performance computing applications, the system will contain up to eight SPARC chips and will be unveiled by the end of the year.

The addition of a SPARC supercomputer to the selection of SPARC systems now available from Sun and other SPARC-compatibles vendors will enable Sun and FPS to penetrate markets now dominated by large computer manufacturers offering a range of systems, from laptops to mainframes.

''One of SPARC's advantages over the diverse systems of large vendors is that SPARC systems are binary compatible, which means they can run the same applications,'' said Scott McNealy, president and chief executive officer of Sun.

Applications for the Sun/FPS solution include oil exploration, computational chemistry, signal processing and high-end design engineering such as finite element analysis. For example, a typical user site would contain a Model 500EA and six to 10 SPARCstation graphics workstations from Sun. All systems would be connected in a network.

Sun Microsystems Inc., with headquarters in Mountain View, is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

FPS Computing designs, manufactures and markets high-performance computing solutions for scientific, engineering and technical applications throughout the world. The company has one of the largest installed bases of high-performance computing equipment in the industry. Its product line includes UNIX supercomputers and array processors.

#90170b0672 06/19/1990 ~Business Wire

BEAVERTON, ORE. (JUNE 19) BUSINESS WIRE - FPS Computing Tuesday announced that it has sold and installed its Model 522EA UNIX supercomputer at the head offices of Simon-Horizon Ltd., in London.

The order, valued at more than $1.3 million, has options for additional FPS Computing supercomputers to be purchased over the next two years to support Simon-Horizon's worldwide seismic processing network. UNISEIS, Simon-Horizon's well known seismic software package, is currently being ported to the Model 522EA.

''This purchase demonstrates a continuing commitment towards further development of our seismic processing services and reflects our confidence in the future of the geophysical business,'' commented Paul Haskey, Geophysical Director of Simon-Horizon Ltd. ''In making this investment in our future, we needed to select a company with a product strategy that ensured a technically superior product both now and in the future. In addition to an excellent product, FPS Computing has a proven support record of more than 15 years in the industry.''

The Model 522EA delivered to Simon-Horizon is configured with two RISC-based scalar processors, delivering up to 67 MIPS, two high performance vector processors, providing a total of 167 MFLOPS, and 256 Mbytes of memory. System software includes the UNIX operating system, X Windows, a highly efficient vectorizing FORTRAN compiler, and highly tuned FPS Math library.

Simon-Horizon Ltd. specializes in marine, land, and transition zone seismic data acquisition, processing, and interpretation. The company has offices in the United Kingdom, United States, Australia, Brazil, Canada and Indonesia. Simon-Horizon is part of Simon Geophysical Services, a division of the U.K.-based Simon Engineering Group.

FPS Computing has one of the largest installed bases of high performance computing equipment in the industry. The firm designs, manufactures and markets high performance computing solutions for scientific, engineering and technical applications. The FPS Computing product line includes UNIX supercomputers, matrix supercomputers, and array processors. Founded in 1970 as Floating Point Systems Inc., FPS Computing is headquartered in Beaverton.

#90170b0679 06/19/1990 ~Business Wire

MELVILLE, NY (JUNE 19) BUSINESS WIRE - Miltope Group Inc. (NASDAQ:MILT) announced Tuesday that it had received an $8 million production contract, from the U.S. Navy, for militarized rigid disk systems.

The systems will update equipment currently used on board the Navy's premier anti-submarine warfare (ASW) aircraft.

The award was made on the basis of the successful evaluation of systems delivered by Miltope to the Navy. Shipments are scheduled to begin in October 1990 and should continue through mid-1992.

Richard Pandolfi, Miltope's president and CEO, stated, ''Miltope continues to actively pursue contracts in areas such as command, control, communications and intelligence (C3I), ASW systems and other niche markets that are anticipated to experience growth in the shrinking budget environment of U.S. defense procurement. Today's U.S. Navy award lends further credence to our strategy and efforts to pursue contracts in these areas.''

Miltope Group Inc., through its wholly owned subsidiaries, Miltope Corp. and Miltope Business Products Inc., is engaged in the design, development, manufacture and testing of microcomputer and computer peripheral equipment for military, rugged and other specialized applications requiring operations in severe land, sea and airborne environments.

The company provides disk mass memories, high speed printers, digital magnetic tape products, bubble memoreis, transportable microcomputers, and a complete line of ruggedized Hewlett Packard 32-bit computers and related peripherals.

STOCKHOLM, SWEDEN (JUNE 19) BUSINESS WIRE - Ericsson (NASDAQ:ERICY) has received an additional contract for Combat Net Radio 8000 valued at $13 million from the Swedish Armed Forces.

The total project is now valued at approximately $180 million. Deliveries started in December 1989.

The additional order includes mainly portable radio sets, vehicle mounted radios and system integrated data terminals. It also includes spare parts and additional functions.

Production of the equipment will take place both at Ericsson Radio Systems in Sweden and at Marconi Secure Radio in the United Kingdom, the main subcontractor.

Combat Net Radio 8000, called StarCom in its export version, is equipped with frequency hopping encryption to avoid jamming and/or overhearing.

Ericsson is an international leader in telecommunications, recognized for its advanced systems and products for wired and mobile communications in public and private networks. Ericsson's wholly owned North American subsidiary is based in Richardson, Texas. Ericsson ADRs are traded on NASDAQ under the symbol ERICY.

ROCKY HILL, CT (JUNE 19) BUSINESS WIRE - Stephen L. Pistner, chief executive officer of Ames Department Stores Inc. (NYSE:ADD) Tuesday announced the company has included substantial charges in its first quarter results to reflect store closings and non-recurring inventory write-downs.

For the first quarter ended April 28, Ames reported a net loss of $430.9 million or $11.56 per share. Net sales for the quarter were $934.8 million. Included in the loss is a $225 million charge to cover expected

costs of Ames' previously announced plan to close 221 stores, a $104.5 million charge to cover additional anticipated markdowns, and an $18 million write-off of deferred financing costs. Ames' store closing program is subject to U.S. Bankruptcy Court Approval.

For the first quarter of the previous year, Ames had a loss of $16.5 million or 52 cents per share, restated to reflect the adoption of FAS No. 96. Net sales for the period were $1 billion.

''The majority of our loss in the first quarter reflects actions which are absolutely necessary to stabilize our business and reduce losses,'' said Pistner. ''The store closings and write-down of inventory represent an important first step toward our objective of emerging from Chapter 11.''

Ames said that the operating loss (before non-recurring charges, interest, taxes and corporate expense) in the 221 stores identified for closing was $21.3 million. Operating earnings for the 458 remaining stores were at an approximate break-even level for the quarter.

''Following Ames' Chapter 11 filing, we have taken swift and decisive action to downsize, cut losses, reduce expense and save the company,'' said Pistner. ''We have identified stores and distribution centers to be closed, and inventory to be liquidated in all stores. We have also made excellent progress in building our management team.''

Ames filed for protection under Chapter 11 of the U.S. Bankruptcy Code on April 25. The company sought court protection to restructure its business and finances.

LYNBROOK, NY (JUNE 19) BUSINESS WIRE - The board of directors of First Central Financial Corp. (ASE:FCC), has declared a dividend of 2-1/2 cents ($.025) per share of the company's common stock payable Aug. 17, to shareholders of record at the close of business on July 24.

The company's ongoing dividend payment program indicates First Central Financial Corp.'s strength, chairman and president Martin J. Simon said.

Its wholly owned subsidiary, First Central Insurance Co., in the quarter

ended March 31, had a statutory combined ratio of 92.6 percent compared to the property/casualty insurance industry's combined ratio of 109.2 percent for the same period. For the year ended Dec. 31, 1989, First Central Insurance had a statutory combined ratio of 94.7 percent compared to 109.7 percent for the property/casualty insurance industry.

First Central Financial Corp. has appointed its first general agent in the State of Maryland, Simon said, and plans are in effect to do business in other states, implementing the company's goal of being a regional carrier.

#90170b0710 06/19/1990 ~Business Wire

BRAINTREE, MA (JUNE 19) BUSINESS WIRE - Grossman's Inc. (NASDAQ:GROS) announced that today it sent the following letter to its stockholders.

Grossman's, a major retailer of lumber and building materials, operates 157 stores in nine Northeastern states and in California.

June 19, 1990

Dear Stockholder:

A Hawaii-based real estate investor named Jay H. Shidler and another real estate investor named Robert W. Holman, Jr. recently filed documents with the Securities and Exchange Commission stating their intention to remove your entire Board of Directors, and to elect instead themselves and their hand-picked (and as yet unnamed) nominees, through the solicitation of consents from Grossman's stockholders. The Shidler/Holman SEC filings were made just two days after Grossman's rejected a Shidler/Holman proposal under which, among other things, most of Grossman's owned properties would have been sold to a Shidler/Holman affiliate, and leased back to Grossman's, on terms which we believe were highly unfavorable to Grossman's.

YOUR BOARD OF DIRECTORS UNANIMOUSLY OPPOSES ANY SHIDLER/HOLMAN EFFORT TO TAKE CONTROL OF THE BOARD OF YOUR COMPANY.

Shidler and Holman have not disclosed any specific plan or proposal for Grossman's if their efforts were to succeed, nor have they disclosed whether they would seek to impose on Grossman's the sale-leaseback and recapitalization transaction they so recently proposed. If Shidler and Holman carry out their threatened consent solicitation, we will send to

you a complete response to their consent solicitation materials. Until that time,

WE URGE YOU TO DISCARD, AND NOT TO SIGN, ANY CONSENT SOLICITED BY SHIDLER AND HOLMAN.

THE SHIDLER/HOLMAN SALE-LEASEBACK AND RECAPITALIZATION PROPOSAL

Grossman's determined that the Shidler/Holman proposal was not in the best interests of the company and its stockholders. Among other things:

o 81 of Grossman's owned properties would have been sold to a Shidler/Holman affiliate at a price ($85 million) we believe to be well below market value, and leased back to Grossman's at escalating rents.

o Grossman's could have repurchased the properties in five years only at the higher of $98.5 million or the then market value. In other words Shidler/Holman, not your Company, would have received the benefit of any future increases in the value of the properties for at least five years (or longer if the repurchase option were not exercised).

o After a portion of the sale/leaseback proceeds was used to pay down some existing debt, the remaining proceeds from the sale-leaseback transaction and all of Grossman's existing cash reserves would have been exhausted to finance a buyback of Grossman's shares.

o The heavy additional financial obligations contemplated by the Shidler/Holman proposal would reverse our successful efforts over the past years to pay down debt and strengthen your company's balance sheet.

o The financial burdens of the proposal, we submit, would have jeopardized our plans for store renovations and merchandise enhancement and for expansion into selected new markets.

THE GROSSMAN'S RECORD OF ACHIEVEMENT FOR STOCKHOLDERS

Since emerging from the Evans Products Company Chapter 11 proceeding in November 1986 burdened by debt and with minimal net worth, Grossman's has vigorously sought to enhance the value of your investment and to restore your Company's financial strength. Exploration of Strategic Alternatives

In order to maximize stockholder values, your Board of Directors decided in February 1989 to explore Grossman's strategic alternatives, including the possible sale of the Company or substantial parts of its business. Grossman's retained Shearson Lehamn Hutton Inc. as financial adviser. Over 100 prospective purchasers of the Company or its businesses were contacted.

Although no satisfactory bids for the Company as a whole were received, the 59-store Moore's Division and the 28-store Northwest Division were sold on terms we determined to be advantageous to Grossman's and its stockholders. The $105.7 million in net cash proceeds from these successful sales have been applied to reduce debt and to finance Grossman's program of store renovation, merchandise enhancement and expansion into selected new markets. The Previous Flawed Proposals of a Shidler/Holman Affiliate

Among the responses to your Board's solicitation of bids were several conditional proposals for the acquisition of the Company, at various prices, from an organization called Momentum Partners, L.P. According to the Shidler/Holman SEC filings, a Shidler/Holman affiliate would have had at least an 80% profits interest in any acquisition by Momentum.

Your Board found the Momentum proposals to be unsatisfactory. All of the Momentum proposals involved high leverage. All were subject to various conditions, including the arrangement of financing. In addition:

o Despite numerous requests, Momentum never supplied commitment letters for the equity financing required under any of their proposals, and never identified what their sources of equity financing might be.

o Only one of Momentum's offers was supported by commitment letters for the necessary debt financing. Even in that case the senior debt commitment was subject to receipt of $100 million in sale-leaseback financing from a Shidler/Holman affiliate, for which no documentation was provided. The availability of debt financing for an earlier proposal was supported only by a so-called ''highly confident'' letter from Drexel Burnham Lambert.

o To our knowledge Momentum has never before (or since) completed a similar leveraged acquisition or any other significant transaction.

In short, your Board concluded that the final Momentum proposal was not fair and adequate, and we seriously doubted whether Momentum had the financial ability to close a purchase.

GROSSMAN'S STRENGTH TODAY

In just three years, from December 31, 1986 to December 31, 1989:

o Grossman's ratio of debt to stockholders' equity has improved dramatically from over 9:1 to less than 1:1 (and our debt has been further reduced during 1990).

o Grossman's stockholders' equity has increased from $25.2 million to $117.1 million, a per share increase of 255% (from $1.26 per share to

$4.48 per share).

We have also broadened and strengthened our management team. On June 4, 1990, after a search of many months, we announced the appointment of a new President and Chief Operating Officer, Thomas R. Schwarz. Mr. Schwarz, who will become Chief Executive Officer in October 1990, comes to us with an outstanding record of experience in retailing, including the past eight years as President of Dunkin' Donuts.

In an era when high leverage has destroyed former giants in the retailing industry, we submit that your Board is building financial strength. Grossman's is now positioned to meet the competitive challenges of the 1990's. We are confident that our programs of store renovation, merchandise enhancement and expansion into selected new markets will serve Grossman's and its stockholders well in the years ahead.

Your Board appreciates the support we have received from stockholders as we have strengthened our Company by selling our less productive divisions and reducing our debt. We remain dedicated to protecting and enhancing the value of your investment.

For the Board of Direcctors,
Mike Grossman
Chairman of the Board,
President and Chief Executive Officer

SPARTANBURG, SC (JUNE 19) BUSINESS WIRE - TW Holdings Inc. (NASDAQ:TWFS) announced Tuesday that its TW Services subsidiary has completed a new territory development agreement with Hardee's Food Systems Inc. allowing TW Services to add 145 new Hardee's restaurants over the next five years.

TW Services is the largest franchisee of Hardee's Food Systems Inc. and currently owns and operates 470 Hardee's restaurants in the Southeast and Ohio.

The new development agreement, which extends through Dec. 31, 1994, allows TW Services to add 101 new Hardee's in Ohio and western Pennsylvania and 44 Hardee's in TW's existing Southeastern territory that includes Alabama, Florida, North Carolina, South Carolina, Tennessee and Virginia.

''This gives us an opportunity to continue to grow in the Southeast, where we are strong, and to expand to new territory where we have experienced good initial results,'' said H. Stephen McManus, vice president for TW Services.

Average unit volume for TW Services' Hardee's restaurants rose 9.1 percent to $255,706 for the first quarter of 1990 compared with $234,484 for the same period in 1989.

For the 12 months ending March 31, 1990, average unit volume was $1,062,000. Customer traffic at Hardee's rose 5.4 percent during the first quarter of 1990.

TW Services, which became a wholly owned subsidiary of TW Holdings on Dec. 6, 1989, is the fourth-largest food service company in the United States based on 1989 revenues of $3.5 billion.

The company is engaged in contract food and vending services, recreational services and restaurant operations through its Canteen, Hardee's, Quincy's Denny's and El Pollo Loco business units.

SAN ANTONIO, TX (JUNE 19) BUSINESS WIRE - Kinetic Concepts Inc. (NASDAQ: KNCI) said Tuesday that the United States District Court for the Eastern District of Pennsylvania has denied Mediq Incorporated's motion seeking a preliminary and permanent injunction enjoining Kinetic Concepts from acquiring Medirec.

Kinetic Concepts Inc. and Medirec announced on May 9, 1990, that they had signed a letter of intent under which Kinetic Concepts agreed, subject to certain conditions, to acquire Medirec. KCI and Medirec have subsequently signed a definitive merger agreement and expect to move quickly to close the acquisition as soon as certain conditions are satisfied. Mediq is a competitor of Medirec. Kinetic Concepts designs, manufacturers and rents a full line of specialized beds that provide therapeutic benefits for acutely ill patients.

NEW ORLEANS (JUNE 19) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE:FRP), an affiliate of Freeport-McMoRan Inc. (NYSE:FTX), announced Tuesday that FRP and its Main Pass Block 299 joint venturers have acquired from Chevron U.S.A. Inc. oil and natural gas reserves currently estimated to range between 35 million and 50 million barrels of oil, as well as 8 billion cubic feet of natural gas, for $137 million cash plus approximately $13 million of development costs already incurred by Chevron.

The Main Pass Block 299 joint venture is owned 58.3 percent by FRP; 25 percent by IMC Fertilizer, Inc., a wholly owned subsidiary of IMC Fertilizer Group Inc.; and 16.7 percent by Felmont Oil Corp., a wholly owned subsidiary of Homestake Mining Co.

The oil and gas reserves that have been acquired are contained in the same caprock reservoir on Main Pass Block 299 as are the Main Pass joint venture's 67-million-long-ton sulphur reserve.

The oil and gas reserves were discovered by FRP and its joint venturers during the drilling of sulphur exploration wells. Main Pass Block 299 is located offshore Louisiana in the Gulf of Mexico approximately 90 miles southeast of New Orleans. FRP estimates expenditures to the joint venture of approximately $100 million for the development of these oil and gas reserves.

Chevron has retained the right, under certain circumstances, to participate in the proceeds of future oil production should the price or volumes realized exceed certain established levels.

FRP is the largest and one of the lowest-cost integrated U.S. phosphate fertilizer producers. In addition, FRP is currently the second-largest domestic Frasch sulphur producer and will become the largest U.S. Frasch sulphur producer when the Main Pass Block 299 sulphur deposit reaches full production in 1993. FRP is also the largest U.S. transporter of sulphur produced by others.

KINGSTON, NY (JUNE 19) BUSINESS WIRE - Leading energy project developer Besicorp Group Inc. (BESI) announced Tuesday the signing of a settlement agreement involving Catalyst Solar Limited Partnership I, which has resulted in the termination of obligations between the parties regarding the Overlook Hospital and Ellenville Hospital projects.

The signing of the settlement agreement will result in adjustments to Besicorp's financial statements.

Besicorp's total assets will be reduced by $1.6 million as a result of cancellation of notes receivable from the partnership. Total liabilities will be reduced by $1.1 million as a result of the elimation of notes payable and certain reserves.

In addition, Besicorp received $182,500 in cash as well as all right, title and interest in the cogeneration facility presently installed at Ellenville Hospital, Ellenville, N.Y., which system will be relocated.

According to Michael Zinn, chief executive officer of Besicorp, ''The elimination of these small projects is in harmony with Besicorp's long-term strategy of developing large-scale power generation projects. The product of these changes to our financial statements will allow investors in Besicorp to focus on our core business activities.''

Besicorp currently has equity interests in over 500 megawatts of gas-fired cogeneration projects with 35 megawatts in operation and 100 megawatts under construction.

NORWOOD, MA (JUNE 19) BUSINESS WIRE - Phoenix Technologies Tuesday announced it has begun shipping its new-generation PhoenixBIOS product line to customers worldwide.

The PhoenixBIOS incorporates a new architecture and a set of new development tools designed to help PC manufacturers manage the explosion in PC hardware design options, as well as to allow end users greater access to BIOS functionality.

More than 16 manufacturers are currently integrating the new code into their products. The PhoenixBIOS will support chip sets from all major silicon vendors, including Intel Corp., Texas Instruments Inc., Chips and Technologies, Headland Technology Inc., Opti Inc., VLSI Technology Inc., and Western Digital Corp. Phoenix expects a majority of its customer

base to working with the new BIOS technology within six months.

The PhoenixBIOS represents Phoenix's next-generation BIOS (Basic Input/Output System) architecture for PC-compatible computers. The BIOS system-level software manages the compatibility between applications, operating systems, and all hardware devices. The BIOS required a new, extensible architecture in order to facilitate the support of the expanding number of chip sets and peripheral I/O devices.

Included in the new product are manufacturer-specific features such as the Construct and Chip Set Configuration utilities, which allow for the rapid modification of the code.

The new PhoenixBIOS meets the growing demands of sophisticated end users to gain more control over their computers' functions, according to Hansche. For the end user, PhoenixBIOS features a new Setup Interface featuring pop-up menus, online context-sensitive help, and the new System Information Page, a diagnostic tool which provides a user with system identification and information useful for technical support.

Phoenix Technologies Ltd. designs, develops and markets systems software products for personal computers, laser printers, and workstations. Its products allow OEMs to offer their customers computers and printers that are compatible with industry standards. More than 300 of the major personal computer and peripherals manufacturers rely on Phoenix for its system-level software and hardware compatibility expertise.

ROCKVILLE, MD (JUNE 19) BUSINESS WIRE - GE Information Services (GEIS), a leading global provider of custom electronic systems and support services, announced Tuesday the international availability of a new central reservation system for the international hotel industry.

The MANOR system allows hotel chains to effectively manage their worldwide room inventory; to connect to airline Computer Reservation Systems (CRS), hotels and reservation offices; and to optimize bookings by travel agents worldwide.

''As the travel industry changes, increasingly travel agents are using an airline CRS to book hotel rooms around the world,'' said Wouter Burger,

hotel industry spokesperson for GEIS. ''Hotel chains must take full advantage of this new electronic distribution channel in order to compete effectively.''

With GE's MANOR (MANaging Online Reservations) system, a hotel chain can now present worldwide last-room availability to travel agents through their own airline CRS terminals, and provide price information and instant confirmation 24 hours a day, seven days a week, excluding scheduled maintenance times.

For further information in the U.S. on the MANOR system from GE Information Services, please call Mike McDowell in Rockville, Md., at 301/340-4781.

GE Information Services, a division of General Electric Company, U.S.A., is headquartered in Rockville, Md., U.S.A. GEIS offers integrated network and application services to a range of focused industry markets, including global banking, trade and transportation, retail and petrochemical.

#90170b0741 06/19/1990 ~Business Wire

WHITE PLAINS, NY (JUNE 19) BUSINESS WIRE - IBM Tuesday announced increased support for communications between computers from IBM and other manufacturers, introduced several new networking products and outlined broad directions that will help customers plan their future computer networks.

In making the announcement IBM said it has expanded support for three major networking standards:

- Open Systems Interconnection (OSI), the emerging international standard that specifies how computer systems from different manufacturers can communicate with each other;

- Transmission Control Protocol/Internet Protocol (TCP/IP), a de facto standard pioneered largely by U.S. academic and government organizations now widely used in businesses for communications between computer systems from different manufacturers, and;

- Fiber Distributed Data Interface (FDDI), the standard for transmitting 100 million bits of data per second on fiber optic cable in local area networks, which is about six times faster than data can be transmitted on LANs today.

IBM also announced several local area network products that extend IBM's solutions for work-group and departmental computing. These products will help customers use various types of LANs more flexibly and efficiently.

''With these announcements, IBM is addressing our customers' needs in an area most critical to their businesses' future success: the performance and function of their networks,'' said George H. Conrades, IBM senior vice president and general manager, U.S. Marketing & Services.

''Providing open systems solutions that are capable of managing multivendor environments and are based on international and industry standards not only protects the investments our customers have made in information systems, but also increases the value of our customers' networks and introduces new global communications opportunities for their businesses.''

IBM announced wide-ranging support of the Open Systems Interconnection standards, offering customers greater ability to improve productivity by consolidating their networks and opening up communication with other vendors' systems.

IBM said its systems and workstations will participate in OSI networks and that it will support additional OSI requirements, including: OSI application standards for electronic mail, transferring files, and directories; methods for connecting OSI to local and wide area networks; protocols for managing networks, and the varying worldwide government OSI profiles in use in North America, Europe and Asia. IBM also will help customers make the transition from TCP/IP to OSI.

In addition, IBM said its OSI/Communications Subsystem and OSI/File Services products, currently available on IBM mainframe operating systems, will be offered on IBM operating systems for the Personal System/2(a) and Application System/400(a) computers.

IBM announced several major enhancements to its TCP/IP product for VM operating systems, including the addition of network management capabilities. TCP/IP Version 2 for VM includes Simple Network Management Protocol, the TCP/IP network management protocol, which enables customers' IBM systems to participate in the management of TCP/IP networks.

Working in conjunction with NetView, IBM's network management product, VM customers now can centralize management of TCP/IP, OSI and Systems Network Architecture networks. IBM also announced its intention to provide equivalent support on its Multiple Virtual Storage (MVS) operating system. Other enhancements include increased user and data security, improved graphics and more options for writing applications.

PONCE, PUERTO RICO (JUNE 19) BUSINESS WIRE - Shareholders of Ponce Federal Bank F.S.B. (NASDAQ:PFBS), at the annual meeting held in Ponce Tuesday, elected Lucas Valdivieso, 58, Federico Montilla, 55, and Pedro Vincenty, 56, as directors to serve for a term of three years and Miguel Lausell, 45, to serve as a director for one year.

Shareholders also ratified the appointment of KPMG Peat Marwick as independent auditors to serve until the next annual meeting.

A letter from a shareholder, Manuel Matosantos, was presented as ''other business'' at the meeting. The letter had proposed the removal of the bank's chairman and president.

Under the by laws of the bank, the proposals were deemed not to be proper subjects for stockholder action. The power to elect the president is vested in the board of directors and the board is also empowered to elect its chairman.

At the meeting, Miguel Lausell, vice chairman of the board, an attorney and former president of Puerto Rico Telephone Company, stated, ''At the board of directors meeting following the annual meeting, the directors of the bank intend to reelect Ramiro L. Colon Jr. as its chairman as the most tangible expression of our absolute confidence in him.

''He has distinguished himself in over 32 years of service on behalf of the bank and the community it serves in which he has been a visible leader and tireless contributor.''

Matosantos did not attend the meeting.

Ponce Federal Bank F.S.B., the third largest thrift institution in the Commonwealth of Puerto Rico, is a federally chartered, full service financial institution headquartered in the southern coastal city of Ponce.

The bank maintains an Island-wide network of 25 branches and executive offices in Ponce as well as Hato Rey, the financial center of metropolitan San Juan.

DANVERS, MA (JUNE 19) BUSINESS WIRE - Selecterm Inc., (NASDAQ:SLTM) today announces the immediate availability of a developer's edition of MicroScript, a new PC-based software product designed to interface disparate computer applications and systems.

MicroScript avoids many problems and limitations associated with traditional integration methods, such a file transfer or in-depth reprogramming. According to Dan Poranski, marketing manager for Selecterm ''Since MicroScript reads data from the display buffer of the source system and writes that data to the target system through its keyboard buffer, the file structure or the application code is never touched. Users love the product because they can get the data they need, when they want it. MIS professionals like it because MicroScript allows system security and data edits to be maintained.''

MicroScript exploits personal computer technology by linking together the user interfaces of systems via their screen and keyboard memory buffers. Integration is achieved through the use of a macro-like, high level programming language that develops an Application System Interface (ASI) between each system. Data moves through the ASI, effectively integrating the applications. Sophisticated data management functions allow data to be received in the appropriate format by the target applications.

Examples of applications that can be interfaced with MicroScript include:
- IBM System 36 database application to an IBM PC database application.
- Budget reconciliation and reporting on an IBM mainframe to a PC

spreadsheet application, - A physician's office system (PC network) to a hospital's mainframe admissions application.

MicroScript requires an IBM PC, XT, AT or PS/2 or compatible operating under DOS 2.0 or higher. The product interfaces any application that either operates on a PC or that can be made accessible to a PV via terminal emulation. MicroScript will be marketed through resellers and distributor channels. The product is being introduced at $999 for PC Expo attendees, with a 30-day evaluation period. Starting July 1, 1990, Microscript will be sold for $1,995.

Headquartered in Danvers, Mass., Selecterm offers a wide range of name-brand PCs and workstations, printers, network products, modems and software. Selecterm Inc., common stock is traded in the Over-the-Counter Market and is identified under the NASDAQ symbol ''SLTM.''

MILWAUKEE (JUNE 19) BUSINESS WIRE - The depositors of Hopkins Savings and Loan Association overwhelmingly approved both the conversion from a mutual to a stockholder-owned institution and the merger with Federated Bank, S.S.B.

The meeting was held at 2 p.m. at the Mayfair South Tower on Monday, June 18.

All customers with $50 or more on deposit as of Apr. 25, 1990, were eligible to vote at the special meeting. There were 1,070,904 votes or 98.8 percent cast for the conversion and merger, with 13,207 votes or 1.2 percent against.

The subscription offering to depositors closed at 5 p.m. on Monday with $372,333 in stock orders received. ''The amount of stock sold met our expectations, with the majority of stock purchased by officers and directors,'' said John W. Andorfer, president of Hopkins.

The remaining unsold stock amounting to $900,000 plus an additional $500,000 is expected to be privately placed through Blunt, Ellis and Loewi. The price per share will be set at the conclusion of the private placement. Federated will have approximately 1.6 million shares outstanding after the merger.

At the close of the private placement, the stock transaction and merger with Federated will be complete. With the consolidation of operations, it is expected that the customers of both Hopkins and Federated will be able to use any of the 18 branch offices of the combined bank as of Aug. 20. Customers will be receiving more information about the merger and expanded financial services in July.

''This is a very exciting time for us,'' said Robert B. Pieters, president of Federated. ''Both management teams have been working very closely for months to complete the merger and to make the transition for customers and staff as convenient as possible. Our 250 employees are eager to step forward together as Federated Bank to provide our customers with the finest service possible.''

Hopkins Savings is a $175 million savings and loan association ith headquarters in Wauwatosa, Wis. Federated Bank, S.S.B., also based in Wauwatosa, is a stockholder-owned savings bank with $296 million in assets and is traded on the NASDAQ over the counter market under the symbol FEDF.

MARLBORO, MA (JUNE 19) BUSINESS WIRE - A.J. Berkeley has joined Sequoia Systems Inc. as vice president of marketing.

He will have responsibility for Sequoia's worldwide marketing function, including product management, industry marketing, customer education and strategic market planning.

Most recently, Berkeley was vice president of corporate sales at Pyramid Technology Corp., Mountain View, Calif., where he was responsible for sales development and strategic sales programs on a worldwide basis, and indirect sales for North and South America. Previously, Berkeley has extensive experience in sales, marketing and systems engineering with the Hewlett-Packard Corp., Burroughs Corp. and National Services Corp.

Berkeley reports directly to Michael Bruce, vice president and chief operating officer. Berkeley fills the vacancy left by Keith Johnson who has accepted the role of vice president, strategic accounts. In this newly created position, Johnson will be responsible for managing and developing strategic customer accounts that are vital to Sequoia's continued success.

In announcing Berkeley's appointment, Michael Bruce, Sequoia's vice president and chief operating officer said, ''Sequoia has had terrific growth during the past year and we look to people like A.J. to continue our penetration into new markets. I am pleased to have him join our organization.'' Berkeley and his family are relocating to the Marlboro area.

Sequoia Systems Inc. designs, manufactures and markets fault-tolerant systems to serve the on-line transaction processing (OLTP) needs of companies. Sequoia's systems have an open architecture adhering to industry standards and a UNIX-based operating system. The company also offers the Pick Open Architecture. Sequoia provides on-line service and maintenance support to its worldwide customer base.

Major customers include manufacturers, distributors, banks and financial institutions, insurance companies, telecommunications operations, and federal agencies. Sequoia (SEQS) is a publicly held company which is traded on NASDAQ.

ATLANTA (JUNE 19) BUSINESS WIRE - Fisher Business Systems Inc. (NASDAQ:FBUS), d/b/a Fisher Restaurant Systems, Tuesday announced that the

company received approximately $1.37 million in new capital from the exercise of warrants to purchase its common stock, which warrants expired on June 10.

For the first quarter ended April 30, the company reported revenues of $2.46 million, as compared to $1.02 million for the same quarter of the previous fiscal year. For the quarter, the company reported net income of $90,924, or 2 cents per share, as compared to a loss of $283,764, or 7 cents per share, in the same quarter of the prior year.

Fisher Restaurant Systems provides a complete point of sale and restaurant management system that is totally integrated to a complete financial and accounting package. The Fisher Restaurant Management System (R) operates from a single IBM Personal System/2 and uses IBM terminals as server work-stations.

Applications include server entry, remote order printing, guest check settlement, server checkout, food costing, inventory control and detailed sales reporting. The financial package is totally integrated and includes payroll, accounts receivable, accounts payable and general ledger.

On-line credit card authorization and interfaces for hotel and country club management are important features. The whole system is protected by a comprehensive security system.

For further information, contact Johnnie M. Engesser, Vice President of Finance and Administration, at 404/578-1771, or write Fisher Business Systems Inc., 3939 Roswell Rd., Suite 300, Marietta, GA 30062.

WASHINGTON (JUNE 19) BUSINESS WIRE - In ceremonies at Postal Service Headquarters Tuesday, Edd Helms, chairman and president of Hotelecopy Inc. (NASDAQ-NMS:FAXM) inaugurated National FaxMail Week designating June 25-July 1 as the period when the American public will be invited into participating Post Offices across the nation to use the company's FaxMail terminals at no cost.

A joint proclamation of support for the FaxMail program issued jointly by Postmaster General Anthony M. Frank and Hotelecopy Chief Executive Officer Helms highlighted the occasion and was faxed to recipients nationwide utilizing the same user-friendly, credit card-operated, self-service FaxMail terminal in use at most post offices participating in the program.

''Fewer than 30 percent of small U.S. businesses and less than one percent of American homes have fax capability,'' Edd Helms told the assemblage of Washington 'Who's Who,' '' postal service hierarchy and the media.

''Despite the 'information explosion' and the 'fax revolution,' most of us -- even traveling business people of major corporations that undoubtedly have fax capability -- are still wandering in a faxless no-man's-land, unable to send or receive urgent documents instantaneously,'' he said.

''The solution is FaxMail,'' said Helms, whose South Florida-based company has installed FaxMail service in more than 2,100 hotels, United States Post Offices, airports and other high-traffic locations throughout the nation. In an agreement with Hotelecopy, MCI Telecommunications Corp. provides the fax long-distance service and marketing program support.

''Representing a quantum leap for Hotelecopy, the company's joint-venture program with the U.S. Postal Service could eventually see FaxMail terminals operating in many of the nation's 40,000 post offices.

''In an era where, increasingly, things have to be done on the instant, Hotelecopy FaxMail allows the U.S. Postal Service to answer the communications needs of its customers in the nineties and beyond,'' said Helms. ''It will take the Postal Service into the 21st Century by providing state-of-the-art communications for consumers.''

Hotelecopy is the world's largest public access facsimile network and is endorsed by the American Hotel & Motel Association as the official FaxMail network of the lodging industry.

PARAMUS, NJ (JUNE 19) BUSINESS WIRE - TSS Ltd. has entered into a multi-year agreement with Florida Supermarkets, Inc., of Pompano Beach, Fla., for the installation and operation of its The Savings Spot electronic, in-store coupon dispensing terminals in 33 Pantry Pride supermarkets in the greater Miami area.

Florida Supermarkets Inc., is a Red Apple company.

The agreement brings to 370 the number of the Savings Spot terminals which have been installed or contracted for and extends TSS's presence in the state of Florida. Currently, the program is operating in supermarkets owned by Kroger, Big Star (Grand Union), Cub Foods and Bi-Lo in Georgia,

South Carolina and North Carolina.

Stephen D. Tannen, president and chief executive officer of TSS Ltd., said ''This agreement will give people in the Miami area an opportunity to save money every time they shop, without having to clip, store, carry and remember to redeem cents-off coupons. We look forward to a long-lasting relationship with Florida Supermarkets Inc. and the shoppers of Miami.''

Under The Savings Spot program, a shopper, upon entering a supermarket, keys in a simple access code on the terminal's keypad and touches the prominent full-color display of featured products for each desired coupon offer. The coupons are printed and dispensed within three seconds after selection, and can be redeemed on that shopping trip.

TSS's common shares, warrants and units are traded on NASDAQ under the symbols TSSL, TSSLW and TSSLU, respectively.

#90170b0791 06/19/1990 ~Business Wire

NEW YORK (JUNE 19) BUSINESS WIRE - S&P raises its ratings on Ingersoll-Rand Co.'s senior unsecured and preliminary shelf registration debt to single-'A' from single-'A'-minus, and its commercial paper rating to 'A-1' from 'A-2'.

About $575 million of debt is outstanding.

Ingersoll-Rand, a diversified supplier of non-electrical machinery and equipment, currently is enjoying improved profitability after subpar performance over the last economic cycle.

The firm maintains good competitive positions in principal end markets, which include transportation, construction, mining and general manufacturing.

However, demand is cyclical, and current strong returns reflect healthy activity in construction and forest products industries and overall improved operating efficiencies. Significant cost-cutting measures and major debt reduction puts the company in better condition to meet any general softening in demand.

Also, exposure to volatile energy and mining markets, a serious problem

during the last cycle, has been mitigated by shifting some operations into joint ventures with competitors.

Debt usage has been materially reduced over the last few years and debt to total capital is anticipated to remain conservative, in the 25 pc to 30 pc range.

Internal cash generation should cover substantial working capital needs, moderate capital spending and dividend outlays while supporting balance sheet strength.

There is an active acquisition program, but this is not expected to attenuate improved financial flexibility to an extent diminishing current credit quality. While demand could weaken sharply, improved financial controls and balance sheet support should enable the firm to weather any normal cyclical downturn, S&P said.

#90170b0806 06/19/1990 ~Business Wire

LITTLE ROCK, AK (JUNE 19) BUSINESS WIRE - TCBY Enterprises Inc. (NYSE:TBY) Tuesday announced that net income for its second quarter ended May 31, 1990, rose 8 percent to a record $9,617,000, or 36 cents a share, from $8,923,000, or 33 cents a share in the second quarter of 1989.

Sales and franchising revenues increased 15 percent to $49,942,000 from $43,377,000 in the second quarter of 1989. Total systemwide sales increased 19 percent to a record $95 million in the second quarter of fiscal 1990 from $80 million in the second quarter of fiscal 1989.

In the first six months of fiscal 1990, net income increased 9 percent to $12,855,000, or 48 cents per share, from $11,784,000, or 44 cents per share in the year ago period. Sales and franchising revenues in the first six months of fiscal 1990 totaled $80,593,000 up 19 percent from $67,848,000 in the first six months of fiscal 1989.

Frank D. Hickingbotham, chairman of the board and chief executive officer, said the record results ''are primarily attributed to the increases in sales resulting from the greater number of franchised and company-owned stores open in fiscal 1990.

''We are pleased with these results, especially understanding that during this quarter we experienced adverse and unseasonable weather conditions throughout the United States which affected our sales. We were disappointed that our spring advertising campaign during this quarter did

not achieve our expected sales results.''

TCBY added 130 stores during the second quarter bringing the total stores open at May 31, 1990 to 1,795. At May 31, 1990, 144 stores were company-owned and 1,651 were franchised stores. The company said its expects to open over 400 stores in fiscal 1990.

Same store sales decreased 10 percent in the second quarter of fiscal 1990 from the second quarter of fiscal 1989. The decline in sales from existing stores for the second quarter of 1990, the company believes, is primarily attributable to adverse weather conditions in April and May. Same store sales declined 9 percent in the first six months of fiscal 1990 from the comparable period in fiscal 1989.

TCBY is the largest franchisor and operator of retail stores specializing in soft-serve frozen yogurt products. Sales consist of sales by company-owned stores, sales of the company's frozen yogurt and sales of equipment and other products to franchised stores. Franchising revenues consist of franchise fees and royalty income.

TORONTO, ONTARIO (JUNE 19) BUSINESS WIRE - ''Contrary to the report carried in the Financial Post, Tuesday, June 19, 1990, the exchange or roll-over of Stikine shares for Corona Corp. shares and Corona Gold Corp. shares is a tax deferred transaction for the Stikine shareholder, according to the advice of independent tax authorities, Peat Marwick Thorne, Chartered Accountants.

While the decline in the price of gold has affected adversely the current price and therefore the short-term attractiveness of both the shares of Corona Corp. and Placer Dome, there can be little question that cash from the sale of Stikine shares is immediately taxable, whereas the exchange of shares defers tax until their ultimate disposition, when proceeds are realized.

The decline in the price of gold has affected also the currency of the original evaluations of the share exchange offers of both Corona and Placer Dome.

Notwithstanding the current downturn in the price of gold, a longer term outlook for gold price recovery to the $400 plus range coupled with the completion of the full set of transactions proposed by Corona to combine its gold assets with the Eskay Creek properties of Stikine and Prime,

point strongly to significantly higher upside potential for the shareholders of Corona.

#90170b0837 06/19/1990 ~Business Wire

LONDON (JUNE 19) BUSINESS WIRE - British Gas (NYSE:BRG) Tuesday said that tariff gas prices in Britain for domestic customers and smaller commercial or industrial loads are now among the lowest in Europe.

Only Dutch customers have prices that are comparable.

Quarterly European gas prices at April 1, 1990 show that for around 700 therms a year - enough gas to run a central heating system in a small house - British Gas users pay about 48 pence a therm including the standing charge.

The Dutch pay 49 pence, the West Germans 58 pence, the Belgians 61 pence, the French 64 pence and the Italians 80 pence.

At around 5,000 therms a year the British price is 43.5 pence a therm compared with 38.7 pence in Holland, 42.3 pence in France, 45.1 pence in Belgium, 49.8 pence in Italy and a range of between 38 pence and 68.5 pence in West Germany.

Tariff prices - the rate charged to domestic, industrial and commercial customers who use up to 25,000 therms a year - have fallen in real terms in Britain by around 10 percent since British Gas went public in 1986.

For customers who use more than 25,000 therms a year, gas prices in Britain are in the middle of the range of prices elsewhere in Europe.

Customers who use around 170,000 therms a year pay 31.1 pence a therm in Britain. The prices in mainland Europe vary from 28.8 pence to 31.4 pence in Italy up to a range of between 28.8 pence and 50.1 pence in West Germany.

For organizations with medium or large gas loads on an interruptible supply contract, the price in Britain is 20.6 pence a therm compared with 18.9 pence in Belgium, 21 pence in France, 22.3 pence in Italy and 23.7 pence in West Germany. Interruptible supplies are not available in Holland.

Gas prices on mainland Europe are more closely linked to oil prices than they are in Britain. Rises and falls in oil prices will, therefore, be

reflected more quickly in other European gas prices than in British gas prices.

British Gas, headquartered in London, is the largest integrated company in the Western World and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industiral and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten Ordinary Shares.

#90170b0863 06/19/1990 ~Business Wire

LOUISVILLE, KY (JUNE 19) BUSINESS WIRE - Class I milk prices to dairy processors and Southeast consumers will be noticeably higher in July -- the result of shrinking milk supplies, increased demand for the product and higher farm milk prices.

According to the U.S. Department of Agriculture, milk production in the Southeast is continuing its long-term downward trend. For the first quarter of 1990, milk production declined 3.49 percent in 13 Southeast states compared to the same period in 1989.

In turn, sales of fluid milk and other dairy products in the Southeast increased 2.87 percent in January and February 1990, and are continuing to grow, according to the Arlington, Va., based National Dairy Promotion and Research Board.

During the summer and fall of 1989, milk was so short in the Southeast that millions of pounds of supplemental milk were transported into the area from sources outside the region in order to meet customer demand. With less local milk production and increased sales, dairy industry analysts say the situation could be the same, if not worse, by the fall of 1990.

The decline in southeastern milk production is due to several factors including: (1) The hot, humid weather across the region which has curtailed milk supplies; (2) the increasing exodus of farmers from the dairy business due to the low prices they have received for their milk for several years; and (3) the high prices paid for cull dairy cows being sold for beef production.

An important factor impacting increased milk prices is the national supply-demand balance as reflected in the Minnesota-Wisconsin (M-W) Series price. The M-W Series price is the price paid for milk purchased in the Minnesota-Wisconsin area to produce dairy products such as cheese, butter and skim milk powder.

Last fall, the M-W Series price set record-high prices for three consecutive months, reaching its highest level of $14.93 per hundredweight of milk in December. January, February and March 1990 saw a decline in the M-W Series price. But during April and May 1990, the M-W Series price had jumped 76 cents per hundredweight to $12.78. The May price was $1.66 above that of a year ago and is expected to continue to climb through the remainder of 1990.

The July 1990 Class I prices under Federal Orders, which are based on the May M-W Series price, will be 76 cents higher than that in May. These increases will be reflected in higher prices to dairy processors and consumers.

Dairymen Inc. is one of several farmer-owned, milk-marketing cooperatives in the Southeast which supplies raw milk to customers in the region. The cooperative is owned by 5,000 member dairy farmers located in 17 Southeast Mid-Atlantic and Midwest states. The cooperative is headquartered in Louisville.

WYOMISSING, PA (JUNE 20) BUSINESS WIRE - At the board of directors meeting of Sovereign Bancorp Inc. (NASDAQ: SVRN), held Tuesday, June 19, the company voted to opt-out of the major anti-takover provisions of Act 36 which amended the Pennsylvania Business Corporation Law.

Under Act 36, all Pennsylvania corporations must act to accept or opt-out of the three major provisions of the new law affecting control share voting restrictions, disgorgement provisions and directors' responsibilities.

The control share voting restriction limits voting powers when a shareholder acquires voting powers which amount to at least 20 percent of the total shares entitled to be voted. By Sovereign optiing out of this provision, shareholders will continue to have voting rights as outlined in the company's by-laws.

The disgorgement provision of tbe Act is an effort to discourage ''greenmail'' and permits a Pennsylvania corporation to recover profits realized as a result of a sale where a person or group of people attempt to acquire at least 20 percent of the company's votable shares. Sovereign also opted-out of this provision.

Commenting on these two anti-takeover provisions, Sovereign President and Chief Executive Officer Jay S. Sidhu, said that Sovereign believes in the free enterprise system.

''The best takeover protection is good performance,'' said Sidhu. ''That's when shareholders will always be rewarded,'' he continued.

These portions of the Act have been attacked by several groups, including the Securities and Exchange Commission, the Federal Trade Commission, and the Dean of the Harvard Law School. Some analysts have even referred to it as the ''Incompetent Management Protection Law.''

The directors' responsibilities provision of Act 36 is the only section which the Sovereign board endorsed.

''We believe this provision simply clarifies the current law,'' said Fred Jaindl, chairman of Sovereign.

This new provision allows directors to make decisions pertaining to the company based on evaluations of the effects upon not only the shareholders but also employees, customers, suppliers, creditors and communities in which the company has offices.

''Enhancing shareholder value will always be the main objective of the Sovereign board, however, we felt that the board should also view the long-term effects of its decisions,'' said Jaindl. ''This provision gives the board a legal right to think long-term,'' Jaindl continued.

#90170b0879 06/19/1990 ~Business Wire

MOSCOW (JUNE 19) BUSINESS WIRE - Arthur Andersen & Co. announced Tuesday that the U.S.S.R. Ministry of Finance approved a joint venture agreement between Arthur Andersen & Co. and two leading Soviet companies, making Andersen the first professional services organization of its kind to be authorized to audit balance sheets of Soviet companies and to do audits of Western/Soviet joint ventures in the U.S.S.R., effectively breaking the audit monopoly previously held by the Soviet company A/O Inaudit.

The Arthur Andersen Worldwide Organization is the first Western professional services organization of its kind to have a controlling interest in a joint venture in the Soviet Union. The venture, named ''Arthur Andersen in the U.S.S.R.,'' combines Andersen, with a 70 percent majority share of the capital; Promstroybank of the U.S.S.R., the largest bank of the U.S.S.R., with a 25 percent share; and the engineering

industrial company NPO Dinamo Moscow, with a 5 percent share.

As a part of the Arthur Andersen audit, tax, financial and business consulting unit, this joint venture will provide assistance to Soviet state and other enterprises in adapting themselves to free market management techniques. It also will consult with Soviet Western joint ventures and is the first Western organization authorized to audit such ventures.

Primarily the company is to assist wordwide clients in their business activities in the U.S.S.R. This marks the first time that a global professional services organization with controlling interest has established an audit and financial consulting group in Moscow with permanent people -- Soviet nationals and expatriates, familiar with the accounting system in the Soviet Union. Twelve Soviet specialists are currently commencing business operations in Moscow.

Ivan Stepanovich Silayev, newly named prime minister of the Russian Republic, and former deputy prime minister and chairman of the Office for Mechanical Engineering of the Council of Ministers of the U.S.S.R., has been a patron of the joint venture from the start.

With 70,000 people in 2,000 offices, Promstroybank is the largest bank in the U.S.S.R., having effective financial control over several thousand enterprises. Seventy percent of all financial transactions in the U.S.S.R. pass through Promstroybank.

Dinamo Moscow is an engineering-industrial company, closely linked to the Bureau of Mechanical Engineering. This bureau, which belongs directly to the U.S.S.R. Council of Ministers, controls the management of about 2,000 industrial companies in the country.

Arthur Andersen's Dr. Andrea von Knoop was named general director of the new auditing and financial consulting venture in Moscow. Dr. von Knoop is a former employee of the Deutsche Bank and is experienced in Soviet business methods. In the West, Heinz-Jurgen Weiss, partner of Arthur Andersen in Frankfurt, West Germany, is reponsible for the joint venture.

This joint venture marks the re-emergence of the Arthur Andersen practice in the U.S.S.R. Following eight years of professional service in Moscow, Andersen suspended its operation in 1983.

For over a year, teams from Arthur Andersen have been working in the U.S.S.R. on various projects including the pilot study at a drilling machine factory in Sterlitamak, near the Urals. The objective was to develop and implement ''state-of-the-art'' Western management ideas, and to convert it into a Western style joint stock company.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 4

ANNOUNCEMENT:

On June 12, 1990, the board of Pettibone (TICKER: PETT) approved the merger of Pettibone Corp. with Heico Inc. and Heico Industrial Products.

Pursuant to the merger, all oustanding common stock and class A preferred stock of Pettibone, other than Heisley and his associates' shares, would be converted into the right to receive $4 in cash per share of common stock (or share equivalent).

The merger is subject to several conditions, including the negotiation and delivery of a definitive merger agreement, the obtaining of the required approval from the stockholders of the three corporations and the obtaining of financing sufficient to fund the cash consideration to be paid pursuant to the merger.

PURPOSE:

Merger approval.

#90170c0025 06/19/1990 ~Comtex
WASHINGTON (JUNE 19) COMTEX - The 8-K report filed at the SEC shows on June 1, 1990, the board of directors of TelVue Corp. received the resignation of the company's president and chief executive officer S. Penn Thomas. Mr. Thomas had served on an interim basis in both capacities since Nov. 2, 1989. His resignation was part of the terms and provisions of an agreement for the purchase of a majority of the authorized common shares of TelVue.

That agreement is detailed in the 8-K filing of TelVue dated Nov. 15, 1989. Pursuant to the agreement, Mr. Thomas was to serve as the interim president of the company until the company's "second closing," which occured on April 16, 1990. That closing followed shareholder approval of an increase

in the number of authorized common shares and the creation of a new class of restricted shares.

As per that agreement and related agreements, Joy C. Hartman had previously resigned her station as director-designee of Science Dynamics Corp., the former partner of TelVue.

At a directors meeting on June 1, 1990, an increase in the membership of the board from four to five was approved, in accordance with provisions of the share purchase agreement and related agreements. Further, three directors were elected, as planned, to fill vacancies created by the resignations and the board expansion. Frank J. Carcione, president of Garden State Cablevision L.P., of Cherry Hill, New Jersey; Carl J. Cangelosi, acting president of MicroNet Inc., of Jenkintown, Pennsylvania; and Robert Lawrence, general manager of Suburban Cable TV, of Pottstown, Pennsylvania, were all elected to the TelVue board.

Also at the meeting, the board elected H.F. Lenfest as president of TelVue, Frank J. Carcione as executive vice president, James T. Shelley as senior vice president, Joseph Murphy as vice president, and Frank J. Carcione as treasurer.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

GROUP LED BY WARBURG PINCUS CAPITAL PARTNERS LP OWNS 7,137,893 SHARES (31.20%) OF ICC TECHNOLOGIES INC (TICKER: CGNE) OF PHILADELPHIA, PA.

ANNOUNCEMENT:

Pursuant to a conversion and waiver agreement dated as of June 6, 1990, Warburg Pincus Capital acquired 7,137,893 shares and 3,375 shares of newly-designated series F preferred stock in exchange for the conversion of a $125,000 note of ICC Technologies to WPCC into 125 series F preferred stock and 192,916 common shares, a $50,000 unsecured demand note into 50 series F shares, the conversion of 35,000 shares of series A convertible preferred shares into 2,875 series F shares and 6,173,313 common shares, and 5,000 shares of series D convertible preferred into 325 series F shares and 694,498 common shares.

As part of the agreement, WPCC surrendered for cancellation warrants for 35,000 series C convertible preferred shares, warrants for 7,500 series E convertible preferred shares and warrants for 897,664 common shares.

ICC Technologies Inc. has announced that it plans to issue 2,050,000 shares shortly after the date of this amendment, which would decrease Warburg's stake to 28.7 percent.

On June 15, 1990, Irwin L. Gross agreed to purchase 1,035,155 common shares and 110 series F preferred stock from ICC Technologies.

Mr. Gross and Warburg then entered into a voting trust agreement, in which Gross will serve as the initial voting trustee.

Under the agreement, Warburg agreed to deliver their shares to the voting trustee in exchange for voting trust certificates and execute one, or if necessary, note than one irrevocable proxy coupled with an interest.

DOEHLER GROUP LTD OWNS 700,000 SHARES (19.90%) OF BRISTOL RESEARCH CORP (TICKER: BRCC).

ANNOUNCEMENT:

The Doehler Group Ltd., a Bristol Research solely-owned by Steven Doehler, purchased 200,000 shares for $50,000 and received a five-year warrant for 500,000 shares, exercisable at $.50 each.

In addition, Doehler Group was granted certain demand and "piggyback" registration rights with regard to the stock and warrant.

Doehler has agreed that it will not sell any of the stock for 13 months following the closing of a second offering which was filed with the SEC on June 6, without permission of the underwriter.

Doehler Group loaned Bristol Research Corp. $200,000 at 12 percent

interest.

The loan will be paid with the proceeds of the second offering.

Acquisition of the shares and the warrant and the granting of registration rights occurred in connection with Steven Doehler's becoming president, CEO, CFO, and chairman of Bristol Research in May.

GENERAL ELECTRIC PENSION TRUST OF STAMFORD, CT OWNS 11,525,525 SHARES (45.40%) OF ALC CORP (TICKER: ALCC) OF BIRMINGHAM, MI.

ANNOUNCEMENT:

General Electric Pension purchased a warrant for 11,525,525 shares on June

7 and a $3.5 million 15 percent senior note due June 4, 1992 from Allnet Communications Services Inc., a wholly owned ALC subsidiary.

The note and warrant, which were acquired to a June 4 agreement, were purchased to infuse new capital in Allnet and ALC in order to allow Allnet and ALC to restructure their outstanding debt obligations.

Also according to the agreement, General Electric Pension has the right to have a representative attend all board meetings, a right which GE Pension intends to exercise.

In addition, GE Pension may nominate an individual for election to the board, but does not plan to do so.

ALC has granted GE Pension registration rights with respect to the common stock underlying the warrant.

GE Pension signed a financing agreement on June 4 which will provide Allnet with up to $5 million in additional financing, if needed.

Also, GE Pension entered into intercreditor agreements with several of ALC shareholders.

ANNOUNCEMENT:

On March 31, 1990, Trilos' former manager, Chicago Holdings Inc., transferred its $1.9 million interest in certain notes of Trilos to Fifth Avenue Partners.

Fifth Avenue is comprised of Resource Holdings and James J. Pinto. On May 30, Trilos' board agreed to a proposed restructuring of all the indebtedness of the Trilos Corp held by The Finance Group and Fifth Avenue.

Trilos Corp had said that it would not be able to meet the obligations at their maturity on June 30, 1990. $900,000 in debt has been extended until Nov. 30, 1990 and another $1 million, until May 31, 1993. $300,000 held by Fifth Avenue has been extended until Dec. 31, 1990.

Trilos entered into a five-year consulting agreement with Fifth Avenue for future consulting services.

Chicago Holdings assigned its rights to elect two directors to Fifth Avenue who has no plans to elect the vacancies created by the resignation of Richard J. Uhl and Harold L. Lehman.

PURPOSE:

To acquire an equity interest in order to provide Trilos with an economic incentive to locate successful businesses for acquisition.

MANILA (JUNE 19) - The Philippines' trade deficit with Japan more than doubled in the first quarter of 1990 from the same period in 1989, the official National Statistics Office (NSO) said Tuesday.

The trade deficit with Japan hit 116.23 million dollars in the first three months of the year, compared with 50.52 million dollars a year ago, an NSO spokeswoman said.

Imports from Japan surged 10 percent as Philippine exports dropped five per cent, she said.

The Philippine trade deficit with Japan was 457.37 million dollars in all of 1989.

Japan has outpaced the United States as the Philippines' main trading partner.

JAKARTA (JUNE 19) - Indonesia will build low-cost apartments to improve the living conditions of over a quarter of the capital's eight million people who live in slum areas, the Antara news agency said Tuesday.

The government would spend 30 billion rupiah (16 million dollars) to build some 2,000 apartments in place of slums in three locations, Antara quoted Public Housing Minister Siswono Yudo Husodo as saying.

The government also planned 7,000 apartment units over a 30-hectare (75-acre) area in the former Kemayoran airport, he said.

The apartments were needed to improve the welfare of slum dwellers, he said, adding that about 2.37 million people now lived in slums in Jakarta.

A severe shortage of housing facilities in the bustling Indonesian capital has led to the creation of slums in many parts of the city including along railway tracks and the banks of the Ciliwung river.

Mr. Siswono said private investors had been invited to take part in the program to build low-cost appartments in place of Jakarta's 4,600 hectares (11,400 acres) of slums, most of which are on state lands.

Similar programs would be launched in other large cities including Surabaya which had 900,000 slum dwellers, Semarang with 438,000 and Bandung with 205,000, he added.

The apartments would either be leased out or sold under long-term housing loans, the minister said.

TOKYO (JUNE 19) - Japan's money supply increased at an annual rate of 13.2 percent in May, the same rate as in the previous month, the Bank of Japan said Tuesday.

A central bank official attributed the increase chiefly to the rise in deposits of small-lot money market certificates and conversions of stocks and other financial assets into cash.

-30- 509

#90170d1690 06/19/1990 ~French/German News Agency

TOKY, (JUNE 19) - Japan's gross national product (GNP) grew five percent in the year to March, down slightly from the previous year but surpassing official forecasts by a wide margin, the Economic Planning Agency said Tuesday.

The government agency said the country's total output of goods and services expanded 2.5 percent from the previous quarter in the three months to March, an annual growth rate of 10.4 percent.

That compares with 0.7 percent in the December quarter, when the annual growth rate slowed to three percent.

The government had previously forecast a sharper slowdown in economic activity, predicting a GNP growth rate of only four percent in the year to March, down from 5.1 percent in fiscal 1988.

TOKYO (JUNE 19) - A Japanese aerospace mission left for the United States and Europe Tuesday to assess the local aircraft industry's possible role in a project to develop an advanced supersonic passenger aircraft.

The seven-member mission is to examine the financial and technical merits of the 10 billion dollar Super Concorde project, originaly proposed by France's Aerospatiale and British Aerospace, industry sources said.

The mission will visit the French and British firms as well as Boeing and McDonnel-Douglas of the United States and West Germany's Deutsche Airbus.

The project envisages developing a jet which can travel at two and a half times the speed of sound for 10,000 kilometers (6,000 miles) without refueling.

Japanese aircraft manufacturers represented in the mission are Mitsubishi Heavy Industries Ltd., Kawasaki Haeavy Industries Ltd. and Fuji Heavy Industries Ltd.

KUALA LUMPUR (JUNE 19) - Malaysia is preparing to fight lobby groups in the United States demanding that it be denied multi-million dollar tariff cuts under the U.S. Generalised System of Preferences (GSP), officials said Tuesday.

The officials said they would send direct appeals to U.S. legislators and launch a campaign to convince Americans that Malaysia is not discriminating against U.S. products or abusing workers' rights.

American lobbyists have filed four petitions with the office of the U.S. Trade Representative (USTR) seeking the exclusion of more than one billion U.S. dollars worth of Malaysian exports from the GSP, Bernama news agency said.

The petitioners include the the powerful American Federation of Labor-Congress of Industrial Organisations (AFL-CIO) and the International Labor Rights Education and Research Fund.

The two labour groups want Malaysia's GSP status revoked because they say the government is denying workers their basic rights to organise, particularly in the electronics industry where only in-house unions are allowed.

The International Brotherhood of Electrical Workers claimed in its petition that Malaysian imports of electical and electronic products had resulted in unemployment in the U.S.

A joint petition filed by chemicals manufacturer Oil-dri Corp. and the Egg Export Council also accused Malaysia of placing inequitable and unreasonable barriers in the way of U.S. exports.

Prime Minister Mahathir Mohamad said recently that the petitions should not be taken lightly and warned that thousands of Malaysians could lose their

jobs if the U.S. lobbyists got their way.

Dr. Mahathir and other officials also triggered a major controversy by accusing Malaysian trade union leaders and opposition politicians of instigating the petitions.

BEIJING (JUNE 19) - Flag burning is to be a criminal offense under draft legislation to be discussed from Wednesday by the National People's Congress (NPC) standing committee, it was reported Tuesday.

NPC spokesman Zhang Husheng said the law would include a stipulation that persons who burn, stain or do other damage to China's scarlet flag would face prosecution. He did not say what the penalties might be.

The Chinese flag was often carried by students during last year's democracy movement in Beijing, but there were no known cases of flag-burning.

The NPC standing committee meets several times a year to draft and fine-tune legislation that is later promulgated at annual sessions of China's rubber-stamp parliament.

Mr. Zhang, quoted in the official China Daily, said the nine-day standing committee meeting would also discuss a bill to protect the rights of overseas Chinese, whom Beijing is aggressively courting for their investment dollars.

It is also to debate the official English translation of the Basic Law, or local constitution, for Hong Kong after it reverts to Chinese rule in July 1997. The Chinese version was adopted in April by the full NPC.

Stuttgart, West Germany (JUNE 19) - Turnover of the Mercedes-Benz Ag motor vehicles company rose by 10 percent to 24 billion marks (roughly 14 billion dollars) in the first five months of 1990 compared with the same period last year, Board of Directors Chairman Werner Niefer said here Tuesday.

''We are proud of this development and are confident that we will reach our target this year of 58 billion marks (34.2 billion dollars) turnover,'' Niefer told a press conference.

He said that turnover in 1989 had risen by 3 percent and totalled over 56 billion marks (33 billion dollars). The surplus for the year had reached

1.5 billion marks (880 million dollars).

Mercedes-Benz was hoping to produce 565,000 automobiles this year, up from 542,000 in 1989. In the commercial vehicles sector, production was to remain steady at about 260,000.

At the year's end the company had employed 223,000 people, Niefer stated.

#90170d2090 06/19/1990 ~French/German News Agency

LONDON (JUNE 19) - Taiwan has no plans to sell its massive gold reserves despite a slump in world prices because it does not consider those holdings a speculative instrument, Taiwan's Central Bank governor has said.

"The central bank operation in gold is not for profit," bank governor Samuel Shieh said in an interview with the Finanacial Times published here Tuesday.

Taiwan, which surpassed Japan earlier this year as the country with the largest official reserves after Tokyo sold billions of dollars to protect its currency on exchange markets, has gold reserves of some 13.6 million ounces worth 4.76 billion dollars at current prices.

Mr. Shieh told the influential daily that Taiwan had completed a far-reaching diversification of the foreign exchange component of its reserves, most of which were originally held in U.S. dollars.

According to Mr. Shieh, Taiwan's reserves were now around 60 percent in dollars, 20 percent in Deutsche marks, 10 percent in yen and the remainder in other currencies, including sterling and Swiss francs.

He said this balance approximated that in other industrialized countries and it would be Taiwan's policy "to keep it that way".

Mr. Shieh said Taiwan wanted to "learn more" about the operations of the newly-created European Bank for Reconstruction and Development, set up to help channel western investment into eastern Europe, before committing Taiwan to joining.

Taiwan's foreign exchange reserves were being held by key banks around the world but its gold stocks were all held in Taiwan, Mr. Shieh said.

#90170d2660 06/19/1990 ~French/German News Agency

CAIRO (JUNE 19) - The government has approved a 60 percent hike in sugar prices, Egyptian officials said Tuesday, in another move to meet demands

by the International Monetary Fund for the abolition of certain state subsidies.

Authorities are also expected to raise the price of commercial and domestic electricity by 25 to 30 percent on July 1, when a new budget designed to reduce the national budget deficit - put at 3.77 billion Egyptian pounds (1.4 billion dollars) - takes effect.

The government in May approved price hikes for basic commodities such as rice, cooking oil, flower and gasoline.

The IMF has blamed subsidies for the deficit, but the government has been reluctant to abolish them and has opted for a gradual reduction of the subsidies in order to preserve social peace.

Reports that subsidies were about to be eliminated sparked violent demonstrations in Cairo and Alexandria in January 1977 that left dozens dead or wounded.

An IMF delegation recently visited Cairo for talks with Egyptian officials on an accord that would enable Egypt to seek a rescheduling of a portion of its total foreign debt, estimated by Western experts at some 50 billion dollars.

Under the latest government ruling a kilogram of sugar will now cost 160 piasters (60 cents), up from 100 piasters (40 cents).

#90170d2870 06/19/1990 ~French/German News Agency

JOHANNESBURG (JUNE 19) - South African gold output was up 2.2 percent in May over the April level, the Chamber of Mines said Tuesday as a world gold glut kept prices at a low 348 dollars an ounce.

The Chamber, representing the major mining houses, said 45,909 kilograms (100,100 pounds) were produced in May, up from 44,894 kilos (98,766 pounds) in April, but 1.15 percent down on the 46,445 kilos (102,180 pounds) produced in May last year.

Cumulative output for the first five months, including small amounts of uranium and other metals produced by gold mines, was 245,872 kilos (540,918 pounds), 1.4 percent down on the 249,446 kilos (548,780 pounds) g produced in the same period last year.

At least half of South Africa's 31 mines are running at a loss on the current gold price.

Rand Mines, managers of East Rand Proprietary Mines (ERPM) east of here,

began evidence Monday on the first day of a judicial commission chaired by Mr. Justice David Melamet to look at the future of government subsidies to ERPM.

EPRM had proposed a 60 percent cut in its 10,000-strong workforce in a two-year rescue plan submitted to the government in May, the commission heard.

Mine managers also wanted to reduce tonnage milled but concentrate on the mine's higher grade ore with a yield of 5.6 grams of gold per tonne of rock.

The South African government has underwritten ERPM loans totalling 220 million rands (82.7 million dollars), and has guaranteed interest payments.

ACCRA, June 19 (AFP) - The level of processing of their own beans by cocoa producers has been declining, despite the enormous benefits the producers can derive from this, a senior official of the Ghana Cocoa Board (Cocobod) said here Monday.

James Amoah told the advisory group of the International Cocoa Organization (ICCO) meeting here that cocoa-producing countries could earn more foreign exchange by adding value to the commodity through processing, which would also lead to savings on shipping costs.

Cocoa processing also provides avenues for diversification of the traditional economic structure based on export of raw materials, promotes labour know-how and paves the way for development of managerial skills, Mr. Amoah said.

There is also easy access to the appropriate technology as that employed in the processing of intermediate cocoa products is neither complex nor tightly controlled.

Mr. Amoah said however that cocoa producing countries' grindings which rose from five per cent of world grindings between 1928 to 1942 to 35 per cent in 1986 had slipped to 29 per cent last year.

He said several factors, including lack of capital to process cocoa beans had worked against producers increasing their grindings.

"The result of this has been frequent recourse of producing countries to transnational corporations which are already in the cocoa processing industry as a means of obtaining finance."

Where finance is a major constraining factor, processors are forced to reduce their output resulting in under-utilization of the installed capacity,
 Mr. Amoah said.

PARIS, June 19 (AFP) - France will propose that rich countries should consider giving financial, commercial and technical aid to the Soviet Union, at an EEC summit meeting in Dublin next week, President Francois Mitterrand said here on Tuesday.

France also wanted to see democracy in Africa, but on the question of a possible change in France's African policy, he said that there was no question of abandoning "the people to their fate".

In an interview covering European defence and monetary union, and domestic immigration policy, with the daily newspaper Le Monde, Mr. Mitterrand said that he wanted the European Economic Community (EEC) and rich countries to reflect "on possible financial, commercial and technical aid to the Soviet Union".

He intended to raise this at the Dublin summit on Monday and Tuesday, and at the summit of seven leading Western powers in Houston, the United States, in July.

"If Mikhail Gorbachev succeeds, which would be in the interests of everyone, it would mean that he had improved the standard of living for the Soviet people and that he had eased, decentralised, adapted the constitutional and political systm in the Soviet Union," he said.

Mr. Mitterrand said he believed that Mr. Gorbachev was capable of doing

this "although the task is terribly difficult".

On Africa, he said that relations between the northern and southern hemispheres remained "colonial in essence".

Speaking shortly before the opening of the 16 Franco-African summit at La Baule in western France, he condemned" the indifference shown by most rich countries to poor countries" which explained "more than corruption and incompetence, the worsening of the African crisis".

He did not hide his expectations that "true democracies", with multi-party systems, free elections and respect for human rights be established in Africa.

Turning to European security, he said that the North Atlantic Treaty Organisation (NATO) "is necessary and must maintain its cohesion, including the unified Germany".

HAMBURG, West Germany (JUNE 19) - The West German mint is working overtime to turn out coins to ensure that East Germans will have enough small change as well as Deutsche mark notes when monetary union takes effect July 1.

West Germany will eventually have to turn out 10 billion coins in denominations ranging from the humble pfennig to five Deutsche marks (2.99 dollars) to cover an estimated need of 600 coins per person in East Germany,
mint officials here say.

But this will take several years, and only 1.5 to two billion coins will be produced by the country's four mints, only part of whose production will be for East Germany, by the end of this year.

At the Hamburg mint two new machines have been ordered and 15 new staff taken on, director Kurt Stratmann said. Hamburg's output is expected to be 750 million coins this year, up from 400 last year.

In Stuttgart, West Germany's largest mint is expecting to increase production by 30 percent and turn out 722 million coins by the end of April.

Karlsruhe in the south will produce 420 million in the same period, almost double last year's figure, and the Munich mint is expecting to produce 700 million coins this year, up from 500 million last year.

The banknote presses are also working at full capacity, a spokesman for the federal note producer said.

The West German central bank estimates that East Germany will need a total of 14 billion Deutsche marks (8.75 billion dollars) in notes and coins when the Deutsche mark replaces the Ost mark as its official currency, but is planning reserves of almost double that figure to be sure there are no problems.

ISLAMABAD (JUNE 19) - Iran, Pakistan and Turkey have decided to revitalise their tripartite Economic Cooperation Organisation (ECO) by upgrading the body to ministerial level, official sources here said Tuesday.

Foreign ministers Ali Akbar Velayati of Iran and Sahabzada Yaqub Khan of Pakistan, and Turkish Minister of State for Economic Affairs Isin Celebi, signed a protocol here Monday to strengthen ECO and give the organisation new directions, the sources said.

They agreed to expand cooperation in economic, technical, industrial, agricultural, educational, scientific, cultural, energy and other sectors.

The five-year old ECO replaced the Regional Cooperation for Development (RCD) agreement which became dormant because of lack of Iranian interest following the Islamic revolution of 1979.

A proposal to upgrade the ECO was first made in May to remove bureaucratic obstacles in implementing its decisions.

Official sources said a council of ministers would now be ECO's highest decision-making body, which would help speed up joint venture programmes.

The Iranian minister proposed that the three heads of state should devote their efforts to eliminating all impediments that prevented the ECO from properly playing its positive role in regional economic cooperation.

Iran, whose interest in regional cooperation rose after the Gulf war with Iraq ended in 1988, also proposed a tripartite summit and the members agreed to convene the meeting "at a suitable time."

Calling for efforts to create "new economic unions", Mr. Velayati termed "indispensable" expanded cooperation and exchange among regional countries that have aspects in common.

The ministers also agreed to set up an energy committee to deal with an

offer from Teheran to construct a gas pipeline linking the three member states.

Officials said the ministers, recognizing the need to further intensify and broaden their existing cooperation through sustained efforts on a regional basis, also decided to streamline ECO activities into a "new dynamic framework for regional cooperation."

#90170d4170 06/19/1990 ~French/German News Agency

Cologne (JUNE 19) - The West German chemicals giant Bayer said here Tuesday that unfavourable currency factors had hurt the company's turnover by about one billion marks (595 million dollars) in the first five months of 1990.

The deutsche mark's high value against the U.S. dollar, pound sterling and yen had caused turnover to drop 2.2 percent to 18.2 billion marks in the January-May period, Bayer chairman Hermann Josef Strenger told the company's annual shareholders meeting.

At the same time, the currency factors had diminished earnings by 60 to 70 million marks, he told some 15,000 shareholders.

In the first quarter, Bayer's pre-tax earnings amounted to 930 million marks, down 3.1 percent from the same period of 1989.

In 1989, Bayer turned over 43.3 billion marks' in sales, up seven percent from the year before, while net earnings reached 2.1 billion marks, up eleven percent. The company's executive board proposed a 13-mark per share dividend, up one mark from last year's payout.

#90170d4190 06/19/1990 ~French/German News Agency

MILAN, ITALY (JUNE 19) - Italian television magnate Silvio Berlusconi risks losing his post as president of Mondadori publishing group only months after being appointed in the latest round of a battle for control of the publishing group with Carlo de Benedetti.

Economic analysts here are predicting a tussle for the presidency after a stormy meeting of the board of the AMEF company which holds a 50.2 percent stake in Mondadori.

Six members of the AMEF board -- three representatives of the de Benedetti group and three court appointees handling the Formenton-Mondadori family's stake, placed under court sequestration at the request of the de Benedetti group -- voted for a complete revamp of the Mondadori board at an

extraordinary general meeting on June 29.

Five AMEF board members representing Mr. Berlusconi's group voted against such a move, which would mean the replacement of the television magnate as Mondadori president.

Sources close to Mr. Berlusconi said that the vote was not good enough to ensure that AMEF would vote at the Mondadori meeting for a complete board revamp, a decision which would require the support of seven out of 12 of the AMEF board.

But if AMEF cannot agree on what position to take, it would not be able to vote at the Mondadori meeting, which would leave the majority voice with the de Benedetti group which wants Mr. Berlusconi out.

Mr. de Benedetti controlled Mondadori through an alliance with the Formenton-Mondadori family within AMEF until the latter changed camps in December to join forces with Mr. Berlusconi.

Mr. Berlusconi then ousted Mr. de Benedetti and his allies from positions of power within Mondadori, but Mr. de Benedetti then struck back.

He went to court accusing the Formenton-Mondadori family of breaking a pledge to sell him their shares once their alliance agreement expired this year, which led to the sequestration of their holding.

KARACHI (JUNE 19)- State-owned Pakistan International Airlines has agreed to increase salaries of its more than 12,000 lower-cadre staff by between 70 and 80 percent, airline officials said here Tuesday.

The agreement, involving 325 million rupees (14.7 million dollars), was signed with five trade unions of the airline here Monday, they said.

The three-year agreement will be based on the gross salary drawn by the total number of staff from May 1, 1989, the officials said.

TOKYO (JUNE 19) - Only 55 of 110 modern and contemporary paintings up for auction here Tuesday found buyers, a sign that the frenetic international art market is slowing down.

The French auction, the ninth organized in Tokyo by French auctioneer Jacques Tajan, included works ranging from Matisse to Andy Warhol.

Tajan said Tuesday the sold works fetched 1.3 billion yen (8.4 million dollars), while the estimated value of the unsold paintings is 3.6 billion yen (25 million dollars).

The auction, which was seen as a test of the perception of a weakening world art market, had been expected to bring in 35 million dollars.

"It's a disappointment that only confirms what is happening in the international art market," Tajan said.

The auction's star attraction was a 1905 Vlaminck painting entitled "Voiles a Chatou" (Sails at Chatou), which was expected to fetch 5.2 million dollars. The bidding went as high as 730 million yen (4.9 million dollars), but the painting's owner, who had wanted 5.2 million dollars, decided to hold onto it.

Also, several paintings by Marc Chagall did not find buyers. The Japanese bidders seemed, though, to have a taste for Bernard Buffet and Andre Brasilier. One Brasilier canvas, "Promenade en foret" (Stroll in the Woods) went for 12 million yen (79,000 dollars), which was about four times its anticipated purchase price.

A Parisian art dealer, bidding from the French capital, acquired Marquet's "Une vue de Venise" (A View of Venice) for 130,000 yen (900 dollars), at least double the estimate.

The first signs of a weakening in the market appeared in New York in mid May when exceptional works such as Van Gogh's "Portrait du Docteur Gachet" (Portrait of Dr. Gachet) and Renoir's "Moulin de la Galette" (Mill at Galette) achieved record prices while works of lesser importance had difficulty finding buyers.

At recent auctions in Paris, London, and New York large numbers of paintings, sometimes more than 70 per cent of the total, have remained unsold.

#90170d4570 06/19/1990 ~French/German News Agency

GENEVA (JUNE 19) - General Agreement on Tariffs and Trade (GATT) members reached agreement here Tuesday aimed at more transparency over import taxes and charges in addition to customs tariffs declared to GATT.

The agreement is the first to be finalised in the Uruguay Round of multilateral trade negotiations since the mid-term Review in April last year, the GATT secretariat said.

Its application is linked to the overall outcome of the Uruguay Round, due to be completed in December.

The agreement was reached in the working group on GATT articles and covers Article 2 of the General Agreement. It is based on a proposal made last year by New Zealand.

It would mean that traders would know in advance all fiscal taxes, stamp duties, port, importation and landing charges and other charges which could be imposed on their goods, as these items would have to be made public in the same way as customs tariffs.

#90170d4630 06/19/1990 ~French/German News Agency

FRANKFURT, West Germany (JUNE 19) - The Frankfurt stock market soared more than two percent Tuesday, with foreign investors back in the market on a wave of new optimism after caution over German monetary union, dealers said.

The DAX index ended the day 2.18 percent higher, up 39.32 points over Monday's close at 1,836.74, while the Commerzbank index put on 17.9 points to 2,224.3.

The market was boosted by buy orders from the United States, Japan and Britain, dealers said.

In the auto sector, BMW was up 7.5 Deutsche marks at 569, Daimler-Benz rose 19 to 817 and Volkswagen put on 16 to 609.

Energy stocks also did well, with electricity company RWE up 15.2 Deutsche marks at 497, and VEBA gaining 12 to 427.

In major retailers, Karstadt shot up 20 Deutsche marks to 668, but gains were more limited in the chemicals sector, where the best performer was Bayer, up 4.8.

#90170d4680 06/19/1990 ~French/German News Agency

BEIJING (JUNE 19) - China signed an agreement Tuesday with Electricite de France (EDF), renewing an accord with the state-owned power company through 1995 in a meeting Chinese television described as "friendly."

The accord spells out specific areas of cooperation for another five-year term and contains a memorandum on financing, EDF president Pierre Delaporte told reporters here.

Mr. Delaporte, who arrived Saturday for a week-long visit, stressed the "esteem, warmth and friendliness" of his talks with Prime Minister Li Peng, Energy Minister Huang Yicheng and other officials.

The visit was a chance to discuss "a number of projects," particularly construction of the Daya Bay nuclear power plant in southern China, for which EDF is supplying technical aid and equipment, he said.

In its second item on the evening news, Chinese television broadcast the signing ceremony and called Mr. Delaporte's meeting with the prime minister "friendly."

The commentator quoted Mr. Li as saying he hoped China's cooperation with EDF would continue.

EDF, in China since 1985, is active in the thermal and hydro-electric sectors, as well as in distribution networks, maintenance and feasibility studies.

Mr. Delaporte and other EDF representatives are to visit Guangzhou and Shenzhen in southern China's freewheeling Guangdong province on Thursday and Friday, followed by a visit Friday to Daya Bay.

The first section of the Daya Bay station, two reactors capable of producing 900 megawatts, is to begin operation in 1992. Plans for two more reactors are under way.

In a statement issued in Paris, EDF said that the agreement covered jpint ventures in several regions including Shanghai, Guangdong, Szechuan and Beijing.

#90170d4770 06/19/1990 ~French/German News Agency

LAGOS (JUNE 19) - Nigeria's military leader General Ibrahim Babangida offered on Tuesday to play "a more active mediatory role" in the peace talks the Liberian Government has started with rebels.

He suggested using the Economic Community of West African States (ECOWAS) as a vehicle for getting the two sides to resume talks.

The parley in the Sierra Leone capital Freetown has been adjourned until June 25 without any ceasefire agreement.

Gen. Babangida made his offer in response to a message from Togo's President Gnassingbe Eyadema, who said the talks had been suspended "due to the absence of a strong mediator".

Gen. Babangida said the countries of the sub-region ought to work together to prevent the Liberian conflict from "degenerating".

#90170d4780 06/19/1990 ~French/German News Agency

ISLAMABAD (JUNE 19) - Iran has offered gas to energy-starved Pakistan and Turkey through a network of pipelines, Iranian Foreign Minister Ali Akbar Velayati said in a lecture here Tuesday.

Velayati said the suggestion was discussed at the extraordinary ministerial meeting of the Economic Cooperation Organisation (Eco) grouping the three countries held in Islamabad Monday.

One of the seven committees formed at the meeting deals with energy questions.

Iran has 15 per cent of the world's gas reserves and the 220 million people of the three Eco countries together constitute about 20 per cent of the world's total Moslem population, the Iranian minister noted.

Velayati said Eco's door could be opened to Afghanistan after a popular, representative government took control in Kabul.

''We will not talk with (the present regime of) Najibullah,'' he said, denying that Teheran had softened towards Kabul in the wake of its growing relations with the Soviet Union.

Afghan mujahedin were ''the real representatives of the Afghan people'' and could not be separated from the future of Afghanistan, he said.

Velayati repeated Iran's support to the anti-India Moslems in Kashmir but said a war between India and Pakistan over the disputed territory will be catastrophic.

''We have tried, and will continue our efforts, to prevent a conflict between the two important countries of the subcontinent,'' he said.

#90170d4940 06/19/1990 ~French/German News Agency

JOHANNESBURG (JUNE 19) - An end to anti-apartheid sanctions on South African coal could generate nearly 50,000 jobs, given positive economic growth, the outgoing president of the Chamber of Mines, Kennedy Maxwell, said here Tuesday.

Production should rise from its 1989 level of 176.4 million tons to 230 million tons a year by the year 2000, which would create some 29,000 jobs

in the mining industry and some 18,000 spin-off jobs, he said.

Exports currently account for some 26 percent of South African coal sales, hit by sanctions imposed by the Scandinavian countries, France and the United States.

-30- 800

#90170d5030 06/19/1990 ~French/German News Agency

BRUSSELS (JUNE 19) - NATO Secretary General Manfred Woerner said Tuesday that NATO allies were "deeply concerned" over the violence in Romania last week between pro- and anti-government forces.

"The member governments of the North Atlantic Alliance are deeply concerned about last week's outbreaks of violence in Romania which threaten to overwhelm progress toward democracy," said Mr. Woerner. "They deplore the officially-condoned and brutal attacks on innocent persons, the ransacking of political party offices and homes of political leaders, and the suppression of independent newspapers."

Mr. Woerner added that NATO countries "equally deplore the acts of violence by forces in opposition to the government."

The violence erupted when Romanian authorities sent in security forces and then coal miners to end a six-week anti-government protest in the centre of Bucharest. The protesters had been calling for the resignation of President Ion Iliescu because of his past links to executed dictator Nicolae Ceaucescu.

Six people were killed and more than 500 injured in the violence.

NATO nations "recognise the difficulties inherent in Romania's transition from communist dictatorship to the rule of law and political pluralism," said Mr. Woerner. But he said it was "the responsibility of the Romanian government to resolve the current crisis peacefully and to establish the fundamental elements of democracy, including human rights."

-30- 1647

#90170d5070 06/19/1990 ~French/German News Agency

BERLIN (JUNE 19) - The West German Federal Cartel Office here Tuesday issued its approval to plans by Bayerische Motoren-Werke and Rolls Royce to take over a jet engine technology company.

The office said that the Bmw-Rolls Royce venture to acquire the Khd luftfahrttechnik company would be expected to stimulate the market for civilian and military jet engines.

Under their plans, Bmw would acquire just over half of Khd and Rolls Royce would hold a minority share of just under half in a venture marking Bmw's return to aerospace technology after decades of concentrating on the automotive sector.

At present, three companies dominate the world market for civilian aircraft jet engines. General Electric holds about a 55 percent share, to 30 percent for Pratt + Whitney and ten to 15 percent for Rolls Royce.

Khd luftfahrttechnik, a division of the West German concern Kloeckner-Humboldt-Deutz, is earmarked to help in the development of two new Rolls Royce engines and to develop on its own a new jet engine for smaller airplanes.

PARIS (JUNE 19) - Two French financiers were charged with insider trading here Tuesday in connection with deals in major bank Societe Generale in 1988, bringing to four the number of people charged in the affair so far.

The charges relate to dealings in Societe Generale shares during an abortive bid to build up a major stake in the bank in 1988 by businessman Georges Pebereau, apparently with the support of the socialist government.

Mr. Pebereau's Marcel Investissements was trying to break a pro-conservative core shareholding in the bank established when it was privatised by the conservative government of Jacques Chirac in 19787.

Jean Foureau and his son Jean-Claude were charged Tuesday with insider trading in connection with the affair in which the alleged offenders are said to have reaped millions of dollars.

They have been given a month to produce bail equivalent to their alleged illegal gains totalling almost 1.17 million dollars, 6.4 million francs (1.12 million dollars) for the father and 268,000 francs (47,000 dollars) for the son.

A former senior aide to Finance Minister Pierre Beregovoy, Jean Charles Naouri, was earlier charged and asked to produce bail of 1.95 million francs (340,000 dollars), also equivalent to his alleged profit.

Seventy-six-year-old billionaire Jean-Pierre Peyraud, the fourth person charged to date, allegedly made 35 million francs (6.1 million dollars).

The Paris stock exchange authorities had opened an enquiry into the Societe Generale affair in February 1989, and in July handed its dossier over to the judicial authorities, saying that insider trading could have been

committed.

The public prosecutor's office last month recommended that five people be charged -- the four now facing charges and Genevieve Dalle, wife of the former president of cosmetics company l'Oreal.

#90170d5160 06/19/1990 ~French/German News Agency

BERLIN (JUNE 19) - East Germany has the highest per capita air pollution levels of any industrialized nation, according to a study at the Free University in West Berlin.

The report presented by university scientists Tuesday in East Berlin blames the power industry's use of inefficient soft coal and antiquated technologies used to process the coal for the country's poor air quality.

Some power plants are equipped with dust filters, yet these are not serviced properly and therefore cannot reduce the emission of solid particles from the exhaust stream. In contrast to power plants abroad, equipped with modern emission-control technology, not one of East Germany's plants is equipped to filter out sulphur-dioxide, one of the leading commercial pollutants.

In comparison to Japan, for instance, the carbon-dioxide levels in the Gdr are threefoldn sulfur-dioxide levels are 30 times higher, and dust emission is 100 times higher.

The power plant Jaenschwalde in the eastern disrict of Cottbus emits as much sulfur-dioxide as both the Netherlands and Norway do combined. Only 80 kilometres south of Cottbus, the power supplier Boxberg emits as much of the same pollutant as Sweden or Denmark do.

-30- 1413

#90170d5180 06/19/1990 ~French/German News Agency

TOKYO (JUNE 19) - Toilet bowls that spray their users with jets of hot water have proven a commercial smash in Japan, where people are obsessed by cleanliness.

The spraying bowls, said to be more hygienic than toilet paper, made a timid entry into the marketplace in the 1950s for use in hospitals, and during the 1970s began finding their way into homes.

But the seats really came into vogue in recent years, with the arrival of models for every sort of clientele, starting with the basic, self-installed toilet for 325 dollars up to sophisticated high-tech marvels that look like computers and can perform a urinalysis and record arterial tension.

The 30 or so Japanese companies offering the futuristic toilets -- at prices up to 1,160 dollars -- are optimistic: If current trends hold, they say, sales that already doubled over the last two years could reach a million units in 1991.

A representative of Toto, a major Japanese maker of sanitary supplies, said the current enthusiasm for the jet seat could be compared with the Japanese public's infatuation with color television in the 1960s.

"Soon every family will be equipped with this type of toilet," he said.

#90170d5220 06/19/1990 ~French/German News Agency

ANGERS, FRANCE (JUNE 19) - About 300 angry French sheep and cattle farmers seized a truckload of British meat overnight and then clashed with police here Tuesday outside local government offices, police said.

Police fired tear gas and used water cannon to break up the demonstration by beef and sheep who tried to force their way into the Angers prefecture. There were no injuries.

At the appeal of their unions, the farmers blocked roads in the area around this western France city overnight in an attempt to stop trucks transporting foreign beef which they believe to be of poor quality.

"We must put a brake on imports, because they compete unfairly with French production, which is of better quality," a meat producers' association said.

Only one truck was seized, a British vehicle taking 2.5 tonnes of veal to an Angers supermarket. The truck was driven to Tuesday's demonstration with about a dozen carcasses tied to its grillwork.

#90170d5250 06/19/1990 ~French/German News Agency

KHARTOUM (JUNE 19) - Sudan's military government Tuesday confiscated lands owned by the families of banned political party leaders it ousted from power a year ago.

The latest victim was the family of former head of state Ahmed Ali el Mirghani, whose family was in charge of the banned Democratic Unionist Party (Dup).

The military governor of the eastern region, Major General Yusif Bashir Siraj, confiscated some 74,0377 feddans belonging to the family in Kasala,

the capital of the region. Kasala was the stronghold of the Dup.

The governor said the land had been confiscated ''on public interest''. He did not elaborate.

The decree to confiscate the land comes only two days after the military governor of the central region, Brigadier Suliman Mohamed Suliman, ordered confiscation of land belonging to the family of ousted prime minister Sadiq al Mahdi in the Umma party's stronghold on Abba island, some 650 kilometres south of Khartoum.

The official el Angaz el Watani daily commented that ''the decision to confiscate al Mahdi's land was taken following a promise given by General (Omer) Beshir to a delegation from the island.'' It did not elaborate.

#90170d5330 06/19/1990 ~French/German News Agency

CALAIS, FRANCE (JUNE 19) - Striking Sealink ferry workers prevented all car-ferries from docking in this western France city on Tuesday and forced them to use other ports, company officials said.

Employees of a Sealink-owned jumbo-ferry, the Fiesta, who have been on strike for three weeks over changes in their work schedules, blocked gangways and forced ferries to dock in the nearby French port of Boulogne-sur-Mer and in Zeebrugge in Belgium.

The ferry workers are refusing to accept a schedule of two days on board followed by two days off, against 24 hours on board followed by two days off on other ferries.

Some ferries cancelled sailings from Dover because of the strike action. One P and O ferry, the Pride of Kent, which was not carrying any passengers, was forced to return to Dover after leaving the English port for Calais.

French trade unions decided at a meeting held on a ferry here immobilized

by a another strike, one by mechanics, to prevent car-ferries from docking here because of the technical laying-off of the Fiesta workers.

#90170d5420 06/19/1990 ~French/German News Agency

BRUSSELS (JUNE 19) - The Belgian airline Sabena had a 1989 net profit of 658 million Belgian francs (19 million dollars), double the previous year's earnings, despite an operating loss of 1.25 billion francs (36.1 million dollars), company president Carlos van Raefelghem said Tuesday.

Mr. Van Raefelghem said during a press conference that the profit figure was not from the airline's operations, the company's principal business, but rather from earnings by Sabena subsidiaries.

Subsidiaries registered a net profit of 722 million francs (20.8 million dollars) in 1989, whereas the Sabena airline suffered a two-per-cent drop in turnover to 41.89 billion francs (1.2 billion dollars).

Mr. Raefelghem attributed the losses in part to an air traffic controllers' strike and Belgium's debt-rescheduling crisis with its former colony Zaire. The airline was consequently forced to reduce its flights to Zaire by 17 per cent.

Mr. Raefelghem said Sabena World Airlines, co-owned since December, 1989 by Sabena, British Airways and the Dutch KLM carrier, will be the subject of an examination at the end of this year by the competition watchdog of the European Economic Community.

BRUSSELS (JUNE 19) - The European Commission has postponed until June 27 its decision, due Wednesday, on the takeover of the Rover automobile

manufacturer by British Aerospace, an EEC spokesman said Tuesday.

The spokesman said the postponement had nothing to do with divergences among the 17 members of the European Commission for Competition, but was due merely to an agenda problem.

Competitions Commissioner Sir Leon Brittan asked for the postponement, added the spokesman.

Sir Leon said last week that British Aerospace should pay 44 million pounds (73.3 million dollars) to the British Government for its purchase of the Rover car company.

He said he disagreed with an official British report released in November that London undervalued Rover before selling it to British Aerospace, but added BAE should reimburse "secret subsidies" such as a two-year delay on payment which saved BAE some 22 million pounds in interest.

It was believed that other commissioners would likely complain that Sir Leon was proving far less draconian over Rover than he was in the case of problems over the writing off of 12 billion francs (2.1 billion dollars) of debts of state-owned carmaker Renault by the French Government.

Sir Leon is arguing, however, that Rover, unlike Renault, had respected restructuring requirements set by the Commission when it agreed to allow the British Government to sell the company, for 150 million pounds, to BAE in July,

1988. The official British report said Rover was worth 56.5 million pounds more.

A decision on the Rover-BAE deal has been awaited since the beginning of the year.

PESHAWAR, PAKISTAN (JUNE 19) - The Afghan Army killed 39 guerrillas and destroyed an arms depot on Tuesday during an operation near Kabul in retaliation for rocket attacks on the capital, Radio Kabul said.

The troops raided the resistance hideouts to "punish the enemy" immediately after six rockets hit different areas of Kabul killing one man, the radio said in a Pushtu-language broadcast monitored here.

TEHERAN (JUNE 19) - A leading Iranian daily Tuesday slammed a central bank's decision to issue a new exchange rate for the dollar saying it would have a "negative impact" on consumer goods.

The criticism was the latest of its kind against the policies of President Ali Akbar Hashemi Rafsanjani, who has vowed to liberalise Iran's economy.

Iran's central bank on Saturday issued a "semi-official" rate of 1.270 riyals to the U.S. dollar for licensed importers, against the official rate of 70 riyals to the greenback -- which is the rate set aside for the general public.

"The new upward trend of the dollar on the market will have a negative impact on consumer goods," Abrar said.

"An economic policy based on several foreign currency rates has negative effects on the value of the riyal and will weaken it," it warned.

There are four distinct rates for the dollar in Iran, besides the official rate and Saturday's new "semi-official" one.

A "competitive" rate of 800 riyals to the dollar is set aside for entreprises which need to purchase abroad raw materials.

Students enrolled in universities overseas and people needing hospital treatment abroad take advantage of a "service" rate set at 840 ryals to the dollar.

Authorised dealers can trade the dollar at 1.385 to the greenback while on the blackmarket it can bring as much as 1.400.

#90170d5790 06/19/1990 ~French/German News Agency

LONDON (JUNE 19) - The Australian soprano Joan Sutherland has decided to retire in the autumn, sources at the Royal Opera House Covent Garden said on Tuesday.

Dame Joan, 63, was said to have told the management that she will not sing in the production of Strauss's comic opera "Die Fledermaus" next December.

A letter received from her agent said: "Dame Joan -- out of respect for Covent Garden and its public -- does not feel able to sing the part of Rosalinde as she feels that she wishes to be remembered by her past performances and would hate to disappoint the public by proceeding with 'Die Fledermaus'."

The opera star will appear for the last time in September and October in

Meyerbeer's "The Huguenots" in Sydney, her home town, a spokesman for Covent Garden said.

Joan Sutherland, who now lives in Switzerland, studied at the Royal College of Music in London before joining Covent Garden in 1952. She became internationally acclaimed for her interpretation of the role of Lucia in Donizetti's "Lucia de Lammermoor".

TEHERAN (JUNE 19) - Nine detainees were killed and several hurt last week in a riot in Mashhad prison in eastern Iran, the official IRNA news agency reported Tuesday.

A prison spokesman quoted by IRNA, said a group of detained drug traffickers started a riot "by setting fire to prison property" during an attempted break-out.

But rapid reaction by the prison authorities thrwarted the plan and the situation was back to normal in less than three hours, the spokesman said.

RIO DE JANEIRO (JUNE 19) - A strike by workers in Brazil's state-run oil industry spread to more than half the country's oil refineries Tuesday as unions protested government plans to fire more than 350,000 public employees.

A spokesman for the strikers said the work stoppage, which closed four refineries last week, had spread to three more of the nation's 11 state-operated oil plants.

The spokesman said the strikers would seek "to totally paralyze the production of petroleum products" until President Fernando Collor de Mello rescinds his plans to cut 16,000 employees from the 60,000-strong payroll of Petrobas, the state oil company.

The strike has slashed oil output, costing the company more than a million dollars a day, said a spokesman for Petrobras, which is worried that the stoppage could soon interrupt the nation's supply of fuels.

Officials said current gasoline (petrol) supplies would last 26 days, while stockes of bottled gas for cooking are expected to last only a week.

The nation's electrical supply also is threatened, as workers in electrical power plants have joined in the national strike to oppose the dismissal of

public employees.

Jair Meneguelli, head of the United Workers Central, Brazil's largest labor federation, estimated that some two million of the nation's 60-million-strong work force walked off the job at some time this week to protest lay-offs, privatization of state-run enterprises and the government's wage-price freeze.

The employee reduction program and privatizations are key points in Mr. Collor de Mello's austerity plan, which he implemented March 16 -- one day after he taking office.

Since Saturday, the government has announced that some 90,000 government employees were to be fired or laid off as a first step towards eliminating 360,000 of the country's 1.6 million state workers.

The remainder are to be removed from the government payroll gradually over the course of Mr. Collor's five-year term.

Mr. Collor initially had vowed to dismiss all 360,000 targeted employees by Monday.

SCHENGEN, LUXEMBOURG (JUNE 19) - Belgium, France, Luxembourg, the Netherlands and West Germany signed an agreement here Tuesday, the Schengen Convention, aimed at bringing about open borders by mid-1992.

The convention, the result of five years of tough negotiations, was signed by officials of the five European Economic Community (EEC) countries aboard a pleasure boat, the Princesse Marie-Astrid, in the Moselle River.

The signing of the convention named for this small Luxembourg town where the first talks took place in June 1985 was delayed for several months by the rush towards unification of East and West Germany.

The accord is accompanied by a "common declaration" that states that after the Germanies unite, expected later this year or early next, the convention will apply to territory currently East German.

This last-minute demand by West Germany had forced the cancellation of a signing ceremony planned for December.

The accord aims to eliminate police and customs controls at frontiers and outlines common policies on such matters as visas and the right of asylum. The convention also includes guidelines for police and legal cooperation.

No specific date has been set for its application, but officials expect it to take effect in mid-1992. The accord states that it will only go into force "when the preliminary conditions for its application have been met."

Hubert Blanc, the chief French negotiator, said it was "reasonable" to expect that all border checks among Schengen Convention nations would be eliminated by mid-1992.

The main points of the agreement include eliminating frontier inspections. They can be reimposed "for a limited period ... if public order or security demands it."

Police will also still be permitted to ask for identification from persons crossing a border.

YORK, ENGLAND (JUNE 19) - A high-speed British passenger train caught fire near the northern English city of Darlington Tuesday and one of the carriages was destroyed but no passengers were injured, British Rail said.

It was not immediately known how the fire started in the rear of the train and all the passengers were moved to the front of the train when the blaze broke out, a spokesman for British Rail said here.

The train was travelling from the southern city of Poole to the Scottish city of Edinburgh when the incident occurred, the spokesman said, adding that traffic on the line was disrupted.

A transport ministry spokeswoman said British Rail was dealing with the accident and a fire department source said the fire had been put out.

The train continued on its route after the last two cars were decoupled, a spokesman said.

LUXEMBOURG (JUNE 19) - The European Economic Community (EEC) is moving swiftly towards a gentleman's agreement with Japan that will eventually give its car exports unhindered access to the 1993 single market, diplomats said Tuesday.

The deal could be broadly concluded by the European Commission by August and take effect "later this year, early next year," a British source said after foreign ministers and trade ministers reviewed the controversial issue.

Due to sales restrictions in five EEC countries, Japan has less than 10 per cent of the EEC car market, the world's largest, where forecasters see sales of 12 million vehicles this year.

The Community has been bitterly divided between northern "liberal" countries, led by Britain, which want the market to be opened as quickly as possible, and three southern countries -- France, Italy and Spain -- which have insisted that liberalisation be slower and hedged with restrictions.

Behind-the-scenes contacts between the two camps has now yielded "a broad consensus" that the period of transition before complete liberalisation should be five years after January 1 1993, enabling EEC car makers adjust to the shock of greater competition, a Commission official said.

Under unilateral voluntary restraints -- any formal agreement could violate the General Agreement on Tariffs and Trade (GATT) -- Japanese car firms would progressively increase their sales to the Community, keeping them within certain ceilings, he said.

France, Britain, Portugal, Italy and Spain would start dismantling their import clamps from next year, although the Japanese would undertake to limit penetration of their markets during the transition, diplomats said.

#90170d6090 06/19/1990 ~French/German News Agency

ANKARA (JUNE 19) - Cinema owners in Turkey on Tuesday stopped screening the U.S. film "The Naked Gun" after receiving bomb threats from anonymous callers, who objected to a scene showing Iran's late spiritual guide Ayatollah Ruhollah Khomeini with a punk hairdo.

Teheran had already protested to Turkey over the film, which implies that the founder of the Islamic republic of Iran was involved in terrorism.

The film, a parody directed by David Zucker and starring Priscilla Presley and Lesley Nielson, opens with actors impersonating the Ayatollah, Soviet President Mikhail Gorbachev, PLO chief Yasser Arafat, Libyan leader Colonel Moamer Kadhafi and former Ugandan leader Idi Amin.

The five are sitting round a table having a discussion in a house in Beirut when an anti-terrorist U.S. policeman erupts onto the scene and tears off the Ayatollah's turban -- to reveal a punk haircut -- before slapping him round the face.

The callers found the eight-minute sequence "insulting".

#90170d6400 06/19/1990 ~French/German News Agency
ACCRA (JUNE 19) - The secretary-general of the United Nations Conference on Trade and Development (Unctad), Kenneth Dadzie, said Tuesday that the domestic efforts of developing countries would have to be supplemented with substantial infusion of external resources if they are to achieve economic growth and development in the 1990s.

Delivering a lecture on ''The Environment for Development: External Conditions and Domestic Policies'', he said such external resource inflows would be necessary to mitigate poverty and malnutrition, provide physical infrastructure and human resource development.

He said increased attention would need to be given to agriculture and other primary industries to accelerate import substitution, particularly food.

This, Dadzie said, would help reduce the import requirements of consumption, export and investment growth. However, this cannot be be expected to quickly provide substantial balance of payments relief.

He said evidence suggests that overall international economic environment of the 1990s will not be a significant improvement on that of the 1980s.

''Despite the growing integration of the world economy, the 1990s will continue to be saddled with the persistence on imbalances in the world economy with stagnation or recession in some third world countries.''

KARACHI (JUNE 19) - A curfew imposed here 24 days ago to quell ethnic clashes is to be lifted Wednesday, Sindh province authorities said Tuesday.

The curfew, which has remained in force with daily breaks in more than half of Pakistan's largest city since May 28, will be lifted at 6:00 a.m. (0100 GMT), an official announcement said.

It added that the situation had improved in the areas worst hit by clashes between ethnic Sindhis and Urdu-speaking settlers who came to Sindh after the 1947 partition of the subcontinent.

Hyderabad, the other major Sindh city, was relieved of curfew restrictions last week.

Troops deployed in the two cities to control ethnic violence are to continue their role in maintaining law and order, the announcement said.

More than 300 people died, according to an unofficial count, in the ethnic violence which erupted on May 14.

Nearly 6,000 have been detained in the southern province as part of a drive by security forces to restore order.

#90170d6500 06/19/1990 ~French/German News Agency
WASHINGTON (JUNE 19) - East German and Jewish representatives will meet in East Berlin next week to negotiate compensation for victims of war crimes under Nazi Germany, the World Jewish Congress (WJC) said Tuesday.

The negotiators will use as a model the Luxembourg Agreement under which West Germany agreed in 1952 to make payments that have totalled 40 billion dollars in reparations over the years to Israel and Jewish institutions.

The West German Government later passed a law providing for compensation of individuals but the talks next week in East Berlin will not deal with individual claims, said WJC Executive Director Elan Steinberg.

West Germany agreed to pay for two-thirds of the cost of compensation but for more than 40 years, but East Germany refused to recognize responsibility for the war crimes and would not pay its portion of the claims.

In refusing to pay, the communist East German Government cited systematic persecution of communists by the Nazis.

But the new democratic East German parliament elected last March after the

communist government collapsed conceded a portion of the blame for the Nazi regime that killed six million Jews.

"We recognize the very complex nature of these negotiations," Mr. Steinberg said. "But we hope they won't be too lengthy."

#90170d6570 06/19/1990 ~French/German News Agency

CARACAS (JUNE 19) - Economic experts representing 26 Latin American and Caribbean countries Tuesday drew up a financial blueprint which would slash the region's annual external debt payments by a quarter.

The Latin American Economic System (SELA) plan is subject to approval by the members' economy ministers and central bank directors, who will meet formally here next Thursday and Friday at the Regional Conference on External Debt.

SELA's debt-reduction proposal would allow member countries to devise their own alternative to the Brady Plan, sponsored by U.S. Treasury Secretary Nicholas Brady.

Each nation would be free to request that their external debts be "substantially reduced, on the basis of debt's real value on the secondary market, the debtor country's development targets and its ability to pay."

The combined foreign debt of Latin America and the Caribbean totals 416 billion dollars, and requires annual payments of almost 40 billion dollars to service it.

But on the secondary markets, the region's external debt is worth just 27.5 percent of its nominal value.

The proposal calls for the region's debt service to be slashed to 10 billion dollars a year.

In seven years, the region has paid out 200 billion dollars to service the foreign debts, which rose during that period from 330 billion dollars to their current level, according to SELA.

SELA maintains that just reducing the annual debt payments by a quarter would enable the region to grow at rates that prevailed before the "lost decade" of the '80s, increasing investment, consumption and per capita income.

As a guarantee, SELA would have the international and private lending institutions exchange the debt shares they hold for long-term bonds at "considerably lower" negotiable fixed interest rates "which would reflect

each country's ability to pay."

The proposal is not binding, however, and would allow each debtor nation to reach its own debt-reduction scheme, as long as it promotes "high economic growth rates and greater social welfare."

SELA's plan calls on creditor nations and international lending institutions to accommodate their banking rules to the new transactions, and on member countries to reduce the 16,000-dollar debt they have accrued among themselves.

#90170d6610 06/19/1990 ~French/German News Agency

BUCHAREST (JUNE 19) - Romanian student leader Marian Monteanu and two other leading opponents of the government have been charged with incitement to riot, a statement from the state prosecutor's office said here Tuesday.

Mr. Monteanu, Dimitru Dinca and Nica Leon were charged with "inciting and organizing several groups of people who attacked several public institutions: the ministry of the interior, the police headquarters, the Romanian information service (secret service) and the television" last Wednesday.

All three were accused of "directly participating in these actions", according to the statement read out on television.

The prosecutor's office added that anti-government demonstrators caused damage worth 150 million lei (seven million dollars) "through the use of blunt instruments prepared in advance, and of fire-bomb bottles".

The statement said that citizens, including members of the security forces, had been "molested", but it made no mention of the violent crackdown against protestors on Thursday and Friday in central Bucharest by miners who arrived on special trains.

Mr. Monteanu, 25, president of the League of Students, was picked up by police at a hospital here Monday after being seriously hurt by miners on Thursday.

His wife, Claudia, who has taken refuge in the embassy of the Netherlands, said Tuesday that he was being held at Psychiatric Hospital Number Nine, in the southern suburbs of the capital.

But a medical source said he was at the interior ministry's hospital. It was impossible to obtain confirmation of his whereabouts.

Mr. Dinca was a leader of a six-week sit-in at University Square broken up by police in action that led to Wednesday's riots and the subsequent crackdown. Mr. Leon heads the small opposition National Democratic Party.

The public prosecutor Tuesday accused all three "during the May-June period (of the sit-in protest) of pushing people by every available means not to respect the laws of the nation and normal standards of behaviour in society".

President Ion Iliescu's National Salvation Front on May 20 won elections, but has been strongly criticised internationally for last week's crackdown, which led the European Economic Community (EEC) to refuse to go ahead with a trade deal and the United States to cut off all non-humanitarian aid.

Anti-government protestors have pointed to close ties between many current officials and the regime of communist dictator Nicolae Ceausescu, ousted last December.

#90170d6690 06/19/1990 ~French/German News Agency

ACCRA (JUNE 19) - The West German Cocoa Trade Association (GCTA) on Tuesday identifed obstacles for cocoa-producing countries seeking to increase exports of processed cocoa to industrialized countries.

In a paper presented here to the International Cocoa Organization's (ICCO) advisory group on the cocoa economy, the GCTA singled out the availability of similar semi-finished products processed in industralized countries as the fundamental obstacle.

The 13-page paper was delivered by West German cocoa trader Erik-Christoph Kruger to the advisory group now in the second day of its three-day meeting.

The association said many manufacturers of chocolate and chocolate products no longer use cocoa beans, but rather buy semi-finished products "tailor-made" to customer recipes.

The report said manufacturers in cocoa-producing countries are often unable to meet the high bacterial-purity required by European customers, mainly because of climatic conditions and inadequate warehousing and transport facilities.

In Europe, cocoa paste and cocoa butter are usually supplied in liquid form directly from the manufacturer's tanks into tanker vehicles, and then to the customer's tanks, according to the report.

Processing in the consumer countries makes costomers' requested delivery

dates and times easier to satisfy, it said adding that it was a "mistake" to assume that the processing of cocoa beans in producer countries would automatically bring in more foreign currency.

The association said the barriers facing the export of cocoa paste and cocoa butter apply to an even greater extent to cocoa powder.

Various specialized manufacturers can each offer more than 100 different types of powder, with varieties in their chemical, physical and sensory properties such as taste, aroma and colour.

The tariff structure of the European Community provides yet another disadvantage for non-African, Caribbean and Pacific (ACP) countries such as Brazil, Malaysia and Equador.

#90170d6750 06/19/1990 ~French/German News Agency

WASHINGTON (JUNE 19) - A chain of candlelight vigils in 15 countries will focus attention on the plight of children in preparation for the World Summit on Children at the United Nations September 29-30, organizers said Tuesday.

Volunteer groups will sponsor the vigils, which will follow twilight around the globe, beginning in Australia at sunset September 23 and ending in Hawaii in the United States.

The summit agenda includes the problems of rising child and maternal mortality rates, low birth weight, malnutrition, poverty, homelessness, lack of education and protection.

The U.N. Children's Fund (UNICEF), which is helping organize the summit, estimates 15 million children under age five die annually.

Preventable diseases may kill 100 million children within the decade, experts say.

Sponsoring the Hawaii vigil is a U.S. coalition of groups including Africare, CARE USA, Save the Children, and the U.S. Committee for UNICEF.

"Over 40,000 children are dying daily of malnutrition and preventable disease," said New Jersey Senator Bill Bradley at a news conference to announce the coalition's vigil.

"The nations of the world must act together to declare that children are a priority, that they have a right to learn and grow in peace and freedom."

The U.S. coalition is urging international leaders to ratify the U.N.

Convention on the Rights of the Child, passed by the General Assembly last year.

The convention sets minimum standards for children's rights. If ratified by 20 nations, it would have the force of international law.

Six countries have ratified the treaty: Belize, Ecuador, Guatemala, Ghana, the Vatican and Vietnam. In 60 countries, the executive branch has signed the document and passed it to their legislatures for action.

Mr. Bradley and other U.S. coalition members called on Americans to urge President George Bush to sign the document and send it to the Senate for a vote.

UNICEF Executive Director James Grant compared defense costs against the vital needs of children.

"One day of the world's expenditures on arms is all it would take to save the lives of 20,000 children," Mr. Grant said.

PARIS (JUNE 19) - Chinese non-conformist painter Wang Du, arrested last September in the Chinese city of Guangzhou, is to be freed, French official Jean Lecanuet, head of the Senate foreign affairs commission, said Tuesday.

Mr. Wang's French wife, Agnes Gaudu, said several sources had told her by telephone that he was to be freed, but added that she had "not been informed officially or directly".

Mr. Wang, 33, was on April 21 charged with "the crime of incitation and counter-revolutionary propaganda," Ms. Gaudu said. He was detained on September 27, a few days after his wedding, when he was asking for papers to travel to France.

It was not immediately possible to obtain confirmation of his imminent release from the French Foreign Ministry or the Chinese Embassy in Paris.

Mr. Wang had been accused of speaking in public during the pro-democracy movement of the spring of 1989 and risked a jail term of up to 15 years, Ms. Gaudu said.

A journalist and author of a book on China, Ms. Gaudu had asked the French authorities to intervene on Mr. Wang's behalf. Mr. Lecanuet did so during a trip to China, as did officials of the French Socialist Party, currently in government.

ROME (JUNE 18) - Roberto Baggio, the world's most expensive player, and Salvatore Schillaci kept Italy at home for the World Cup second round with a decisive 2-0 win over Czechoslovakia here on Tuesday.

Baggio, bought by Juventus from Fiorentina for 13 million dollars last month, weaved his way through the Czech defence for a sensational 77th minute goal.

Schillaci, who will be playing alongside Baggio at Juventus next season, opened the score in the ninth minute.

Manager Azeglio Vicini only decided to give Baggio his debut after Italy's spluttering attack scored only twice against Austria and the United States.

Baggio drifted past Ivan Hasek and Miroslav Kadlec before slipping the ball past Czech goalkeeper Jan Stejskal. It was a gem and brought the crowd to its feet.

-30- 967
#90170d6970 06/19/1990 ~French/German News Agency
FLORENCE (JUNE 19) - Ten-man Austria took time out in their war with the United States to score two goals and finish their disappointing World Cup campaign on a 2-1 winning note here on Tuesday.

It was a piece of individual brilliance by Andreas Ongris in the 49th minute that started the scoring.

He collected the ball on the half-way line, outran the American defence and then shot past the despairing Tony Meola.

Fourteen minutes later Gerhard Rodax hammered home a centre from Michael Streiter on the right.

But for Austria it was all to little too late. Their supposedly dynamic strike force had failed to score in their opening two matches and they are almost certainly on their way home.

Six minutes from time American midfielder Tab Ramos pulled the ball back for striker Bruce Murray to slip it between the legs of Austrian goalkeeper Klaus Lindenberger. The furious Lindenberger bitterly complained for offside to referee Jamal Al Sharif of Syria and got booked for his troubles.

He was lucky not to be sent off for such an appaling piece of goalkeeping.

#90170d7260 06/19/1990 ~French/German News Agency

KARACHI, PAKISTAN (JUNE 19) - Police Tuesday seized 50 kilograms (110 pounds) of high-quality heroin brought to this port city from northwest Pakistan's tribal area to be smuggled abroad, officials said.

It was the biggest heroin seizure in Karachi so far this year, they said, adding that the excise police who discovered the drug in polythene bags during the search of a passenger van would be given cash rewards and promotions.

The van driver, Qabil Khan, 45, of Peshawar, the capital of North West Frontier province, was detained for questioning, the officials said.

The mountainous tribal belt, along the 1,500-kilometre (940-mile) Pakistan-Afganistan border, is known for poppy cultivation and cross-border drug trafficking, a problem that has defied government efforts to control it.

About 8,000 kilos (17,600 pounds) of hashish were seized Saturday and Monday from two trucks coming from the semi-autonomous tribal region at police checkpoints in the border province.

Pakistan's minister for narcotics control, Mian Muzaffar Shah, Tuesday said Prime Minister Benazir Bhutto's government had achieved "positive results" in curbing the drug menace.

The Associated Press of Pakistan (APP) quoted him as saying "drug barons and traffickers have become cautious because of the government's stringent measures."

Mr. Shah said anti-drug officials had made about 48,000 arrests in 1989 on

charges of heroin and hashish trafficking.

#90170d7300 06/19/1990 ~French/German News Agency

SACRAMENTO, CA (JUNE 19) - A 61-year-old landlady who allegedly poisoned elderly tenants to get their pensions and other benefits was ordered Tuesday to stand trial on nine counts of murder.

Dorothea Puente, who ran a boardinghouse in this northern California city, was ordered to be arraigned July 10 in Sacramento County Superior Court.

Ms. Puente, who has pleaded innocent, could face the death penalty if convicted. She showed little emotion during the five-week preliminary hearing that culminated in her being ordered to stand trial.

In November 1988, authorities dug up seven bodies from the grounds of her Victorian-style house in downtown Sacramento. That grisly discovery came after a social worker complained that one of her clients, a tenant at Ms. Puente's house, had disappeared.

Ms. Puente was later implicated in two other deaths -- that of a woman who died of a drug overdose at the boardinghouse, and a man whose body was found in a wooden box in a neighboring county.

The prescription tranquilizer Dalmane was found in all seven bodies found in shallow graves on the boardinghouse grounds. A total of nine other drugs were also found in those bodies, which were so decomposed authorities could not determine a cause of death.

The nine people ranged in age from 52 to 80, and were mostly poor.

Prosecutors allege that Ms. Puente killed her victims to cash their Social Security and other government benefit checks.

Defense attorneys say the alleged victims died of either suicide or natural causes.

BEIJING (JUNE 19) XINHUA -- THE CHINESE MINISTRY OF ENERGY RESOURCES AND ELECTRICITE DE FRANCE (EDF) SIGNED AN AGREEMENT OF CO-OPERATION IN THE POWER GENERATION INDUSTRY HERE TODAY.

THE AGREEMENT MEANS CONTINUATION OF THE CO-OPERATION BETWEEN CHINA AND THE EDF.

LEADING A HIGH-LEVEL DELEGATION, EDF CHAIRMAN PIERRE DELAPORTE ARRIVED IN BEIJING JUNE 16. DURING THE LAST TWO DAYS, HE HAS MET WITH PREMIER LI PENG MINISTER OF ENERGY RESOURCES HUANG YICHENG AND MANY OTHER CHINESE OFFICIALS.

THE EDF HAS BEEN ACTIVE IN CHINA SINCE 1984, PARTICIPATING IN PROJECTS COVERING THE ENTIRE SPECTRUM OF ELECTRICITY GENERATION, INCLUDING HYDROELECTRIC PLANTS, NUCLEAR PLANTS TRANSMISSION INSTALLATIONS, DISTRIBUTION NETWORKS, MAINTENANCE, OPERATION, REHABILITATION, TEST LABORATORIES, PLANNING, ECONOMIC AND TARIFF STUDIES, STAFF TRAINING AND MANAGEMENT.

IN GUANGDONG PROVINCE, THE EDF IS PROJECT CONSULTANT FOR THE DAYA BAY NUCLEAR POWER STATION AND IS ALSO RESPONSIBLE FOR SPECIFIC TASKS DURING DIFFERENT STAGES OF CONSTRUCTION IN THE DAYA BAY OF THE TWO 900 MW NUCLEAR UNITS COOLED BY SEA WATER.

THE EDF IS ALSO CHARGED WITH PLANNING STUDIES FOR ELECTRIC POWER GENERATION AND TRANSMISSION IN SICHUAN PROVINCE, THE LOAD FORECAST STUDY FOR EAST CHINA, AND TARIFF STUDIES FOR THE EAST CHINA NETWORK.

AFTER TODAY'S SIGNING CEREMONY, DELAPORTE TOLD THE CHINESE PRESS THAT BY THE YEAR 2000 CHINA WILL HAVE AN INSTALLED CAPACITY OF ABOUT 300,000 MW, AND ANNUAL GENERATION, CURRENTLY AT 500 BILLION KWH, WILL INCREASE THREEFOLD BY THE END OF THE CENTURY.

HE SAID THAT CHINA IS ALREADY THE THIRD-LARGEST PRODUCER OF ELECTRICITY IN THE WORLD, AND SEVERAL FACTORS HAVE WORKED IN HER FAVOR AS CHINA HAS PLENTIFUL COAL RESERVES AND ENORMOUS POTENTIAL FOR HYDROELECTRIC POWER.

DELAPORTE WAS CONFIDENT THAT THE EDF'S LONG-STANDING RELATIONSHIP WITH THE CHINESE POWER INDUSTRY WILL CONTINUE TO BEAR FRUIT.

"WE ARE COMMITTED TO ASSISTING CHINA IN MEETING ITS ENERGY REQUIREMENTS IN THE NEXT DECADE AND BEYOND," HE ADDED.

NEW DELHI (JUNE 19) XINHUA -- THERE WERE 193 INDIAN JOINT VENTURES ABROAD AS ON DECEMBER 31, 1989, OUT OF WHICH 152 WERE IN OPERATION WHILE 41 WERE AT DIFFERENT STAGES OF IMPLEMENTATION, ACCORDING TO THE LATEST ANNUAL REPORT OF THE INDIAN MINISTRY OF COMMERCE.

THE VENTURES ARE DISPERSED OVER 38 COUNTRIES THROUGHOUT THE WORLD BUT 96 PERCENT OF THESE ARE CONCENTRATED IN 11 COUNTRIES: 20 IN MALAYSIA, 17 IN SRI LANKA, 15 IN SINGAPORE, 15 IN NIGERIA, 13 IN THAILAND AND OTHERS MAINLY IN DEVELOPING COUNTRIES.

IN REGARD OF THE SIZE AND SCALE OF OPERATIONS OF THE JOINT VENTURES, THE REPORT SAID, THEY ARE GENERALLY SMALL. IN MOST OF THE OPERATING VENTURES, INDIA'S SHARE-HOLDING IS LESS THAN 50 PERCENT AND THE VALUE OF INVESTMENT BELOW FIVE MILLION RUPEES (0.29 MILLION U.S. DOLLARS). IN MANY OF THE VENTURES, THE INDIAN INVESTMENT IS AS LOW AS 500,000 RUPEES.

THE TOTAL INDIAN EQUITY IN THE 152 OPERATIONAL VENTURES IS OF THE ORDER OF 990 MILLION RUPEES (58 MILLION U.S. DOLLARS), THE REPORT SAID.

PERFORMANCE OF MOST OF THE VENTURES DOES NOT LOOK SO ENCOURAGING, A LEADING ECONOMIC NEWSPAPER TODAY SAID, ADDING THAT UP TO DECEMBER 31, 1984 THAT IS FIVE YEARS AGO, THERE WERE 497 VENTURES CLEARED BY THE GOVERNMENT COMPARED TO THE NUMBER OF 193 VENTURES NOW. "IT IS EVIDENT THAT THE MORTALITY RATE OF THESE VENTURES IS OVER 50 PERCENT," THE PAPER SAID.

WHAT IS MORE, THE PAPER SAID, THE HIGH MORTALITY RATE OF JOINT VENTURES IS MOSTLY AT THE IMPLEMENTATION STAGE. THIS CAN BE ATTRIBUTED TO LACK OF PROPER PLANNING AND EXECUTION OF THE PROJECTS, IT ADDED.

SINGAPORE (JUNE 19) XINHUA - SINGAPORE DOCTORS HAVE SUCCESSFULLY HELPED A WOMAN WHOSE OVARIES CAN NO LONGER FUNCTION GET PREGNANT WITH THE TECHNIQUE OF USING DONOR EGGS.

THIS IS THE FIRST MEDICAL ACHIEVEMENT IN THE REGION TO TREAT INFERTILITY WITH THIS TECHNIQUE.

THE ACHIEVEMENT WAS GAINED BY A TEAM OF DOCTORS FROM THE SINGAPORE GENERAL HOSPITAL AND THE NATIONAL UNIVERSITY HOSPITAL.

THE TECHNIQUE IS THAT THE WOMAN IS GIVEN HORMONES TO ENABLE HER WOMB TO FUNCTION NORMALLY. A DONOR EGG IS USED TOGETHER WITH HER HUSBAND'S SPERMS

TO BRING ABOUT A PREGNANCY.

THE FIRST WOMAN, 36, WHOSE OVARIES STOPPED WORKING WHEN SHE WAS 25, IS NOW SIX WEEKS PREGNANT AND DOCTORS SAID SHE IS DOING WELL.

PROFESSOR S.S. RATNAM, HEAD OF THE TEAM OF THE NATIONAL UNIVERSITY HOSPITAL, SAID THAT THE TEAM STARTED WORK ON THIS NEW PROCEDURE IN 1988 AND SO FAR ABOUT 30 WOMEN ARE ON THE WAITING LIST FOR EGG DONATION.

HE SAID THERE HAVE BEEN JUST OVER 100 PREGNANCIES IN 13 CENTERS IN THE WORLD BASED ON THIS METHOD.

MANILA (JUNE 19) XINHUA - THE DEATH TOLL WAS NOW AT 36 AND FIFTY OTHERS WERE CONFIRMED MISSING IN THE FLASH FLOOD WHICH SWEPT ZAMBOANGA DEL NORTE IN THE SOUTHERN PHILIPPINES ON JUNE 17, ACCORDING TO A REPORT OF THE SOCIAL WELFARE DEPARTMENT TODAY.

AT THE SAME TIME, 59 HOUSES WERE DESTROYED, AND 100 FAMILIES WITH 500 DEPENDENTS AFFECTED, THE REPORT SAID.

THE AREAS AFFECTED BY THE FLASH FLOOD WERE THE MUNICIPALITIES OF MANUKAN, BACUNGAN, JOSE DALAMAN, SIAYAN AND SINDANGAN IN THE SOUTHERN PHILIPPINE ISLAND OF MINDANAO.

PHILIPPINE DEFENSE SECRETARY FIDEL RAMOS HAS RECOMMENDED TO PRESIDENT AQUINO TO DECLARE THE FIVE AREAS AS CALAMITY AREAS AND THE RELEASE OF SOME ONE MILLION PESOS (SOME 43,478 U.S. DOLLARS) FOR ITS REHABILITATION.

RAMOS SAID THE CALAMITY FUND WILL BE USED FOR THE REPAIR AND REHABILITATION OF INFRASTRUCTURE PROJECTS AND FOR REHABILITATION ASSISTANCE IN THE AREAS.

TWO DISASTER COUNCILS HAVE ALREADY BEEN ESTABLISHED IN THE AREAS FOR MEDICAL, SURGICAL AND DENTAL AND HEALTH SERVICES OF VICTIMS HIT BY THE FLASH FLOOD.

BRUSSELS, JUNE 19 (XINHUA) -- THE EUROPEAN COMMUNITY (EC) WILL START

NEGOTIATIONS WITH THE EUROPEAN FREE TRADE ASSOCIATION (EFTA) WEDNESDAY TO SET UP A VAST COMMON ECONOMIC ZONE, ACCORDING TO REPORTS REACHING HERE TODAY.

AT A MEETING OF THE EC COUNCIL OF MINISTERS IN LUXEMBOURG MONDAY, EC FOREIGN MINISTERS APPROVED PLANS FOR THE EUROPEAN COMMISSION TO NEGOTIATE THE CREATION OF A EUROPEAN ECONOMIC SPACE WITH SIX EFTA STATES -- AUSTRIA, SWITZERLAND, ICELAND, FINLAND, NORWAY AND SWEDEN.

THE NEGOTIATIONS ARE AIMED AT EXTENDING AS FAR AS POSSIBLE TO EFTA TERRITORY THE FREE MOVEMENT OF GOODS, SERVICES, CAPITAL AND PEOPLE THAT THE 12-NATION COMMUNITY AIMS TO ACHIEVE BY THE END OF 1992.

HOWEVER, DIPLOMATS FORESEE SERIOUS DIFFICULTIES AND PROBLEMS IN THE NEGOTIATIONS.

ONE KEY ISSUE IS HOW DECISION-MAKING WOULD WORK. EFTA WANTS A SAY IN DECISIONS AFFECTING THE COMMON ECONOMIC ZONE BUT THE MANDATE FOR NEGOTIATIONS APPROVED BY THE EC MINISTERS SPELLS OUT THAT EC WOULD RETAIN COMPLETE AUTONOMY OVER THE COMPLEX DECISION-MAKING PROCESS.

ANOTHER MAJOR THORNY PROBLEM IS THE NUMBER OF EXEMPTIONS FROM EC RULES THAT EFTA STATES ARE SEEKING IN VARIOUS SENSITIVE AREAS.

LUSAKA (JUNE 19) XINHUA - APARTHEID STILL REMAINS THE ROOT CAUSE OF TENSION AND CONFLICT IN SOUTH AFRICA AND THE INTERNATIONAL COMMUNITY SHOULD CONTINUE TO PAY ATTENTION TO THE SUFFERINGS OF THE SOUTH AFRICAN PEOPLE, ZAMBIAN PRESIDENT KENNETH KAUNDA SAID TODAY.

KAUNDA MADE THE CALL IN A MESSAGE TO THE UNITED NATIONS SPECIAL COMMITTEE AGAINST APARTHEID TO MARK THE INTERNATIONAL DAY OF SOLIDARITY WITH THE STRUGGLING PEOPLE OF SOUTH AFRICA.

"ALTHOUGH NELSON MANDELA AND SOME OTHER OFFICIALS OF THE AFRICAN NATIONAL CONGRESS (ANC) HAVE BEEN RELEASED, THOUSANDS OF OTHER POLITICAL PRISONERS REMAIN IN SOUTH AFRICAN JAILS, APARTHEID LAWS REMAIN IN FORCE AND THE CONDITIONS SET FORTH IN THE U.N. DECLARATION ON APARTHEID AND ITS DESTRUCTIVE CONSE- QUENCES ADOPTED AT THE 16TH SPECIAL SESSION OF THE U.N. GENERAL ASSEMBLY LAST DECEMBER HAVE NOT BEEN FULLY MET," SAID THE ZAMBIAN LEADER.

HE STRESSED THE IMPERATIVE NEED TO MAINTAIN THE ECONOMIC AND FINANCIAL SANCTIONS AGAINST APARTHEID UNTIL APARTHEID IS ELIMINATED.

KAUNDA SAID THAT THE INTERNATIONAL COMMUNITY HAS A GRAVE RESPONSIBILITY TO

ENSURE THE TOTAL ABOLITION OF APARTHEID SO THAT THE PEOPLE OF SOUTH AFRICA WILL HAVE AN OPPORTUNITY TO FREELY DETERMINE THE DESTINY OF THEIR COUNTRY.

CAIRO (JUNE 19) XINHUA - PRESIDENT HOSNI MUBARAK HELD TALKS HERE TODAY WITH TUNISIAN PARLIAMENT SPEAKER SALAHEDDIN BALI WHO IS ON A FIVE-DAY VISIT TO EGYPT.

EARLIER TODAY, BALI ALSO MET WITH EGYPTIAN DEPUTY PREMIER AND FOREIGN MINISTER ESMAT ABDUL MEGUID AND EXCHANGED VIEWS ON WAYS OF ENHANCING COOPERATION BETWEEN THE ARAB COOPERATION COUNCIL (ACC) AND THE ARAB MAGHREB UNION (AMU).

IN A STATEMENT TO REPORTERS, MEGUID SAID THE TALKS ALSO DEALT WITH THE PROSPECTS OF A STRONGER ARAB POSITION AND COORDINATION AMONG ARAB GROUPINGS IN FACING A UNIFIED EUROPEAN MARKET AFTER 1992.

EGYPT IS GROUPED IN THE ACC ALONG WITH JORDAN, IRAQ AND YEMEN, WHILE TUNISIA IS ALLIED WITH MOROCCO, ALGERIA, LIBYA AND MAURITANIA IN ANOTHER REGIONAL GROUPING OF THE AMU.

BALI TOLD REPORTERS THAT THE TWO SIDES SHARED IDENTICAL VIEWS ON ARAB AND INTERNATIONAL ISSUES AS WELL AS BILATERAL RELATIONS.

ALSO ATTENDING THE MEGUID-BALI MEETING WAS MOHAMED ABDULLA, CHAIRMAN OF THE FOREIGN RELATIONS COMMITTEE OF THE EGYPTIAN PEOPLE'S ASSEMBLY, WHO SAID ARAB PARLIAMENTARY ACTION SHOULD GO HAND IN HAND WITH THE OFFICIAL ARAB ACTION.

ADDIS ABABA (JUNE 19) XINHUA - ETHIOPIA TODAY CALLED FOR "A RESCUE OPERATION" TO RESTITUTE THE ECOLOGICAL AND SOCIO- ECONOMIC DAMAGE IT HAS SUSTAINED IN HOSTING A LARGE NUMBER OF FOREIGN REFUGEES.

THE CALL WAS MADE BY THE ADMINISTRATION FOR REFUGEE AFFAIRS OF THE MINISTRY OF INTERNAL AFFAIRS IN A STATEMENT ISSUED TO MARK THE AFRICA REFUGEE DAY TOMORROW.

IT SAID THAT THE ETHIOPIAN GOVERNMENT HAS DONE ITS UTMOST TO PROVIDE PROTECTION AND ASSISTANCE TO FOREIGN REFUGEES "AT CONSIDERABLE HUMAN, MATERIAL, AND ENVIRONMENTAL COST".

AT PRESENT, ETHIOPIA IS SHELTERING ABOUT 750,000 SOMALI AND SUDANESE REFUGEES WHO HAVE FLED THE CIVIL STRIFE IN THEIR RESPECTIVE COUNTRIES.

THE STATEMENT SAID THAT THE REFUGEE CAMP AREAS LACK THE MOST BASIC INFRASTRUCTURAL AND NATURAL RESOURCES.

TO REHABILITATE THE ENORMOUS DAMAGE IN THE ECO-SYSTEM AROUND THE CAMPS WILL CALLS FOR CONSIDERABLE INVESTMENT AND HARD WORK, IT ADDED.

CALLING FOR "BURDEN SHARING", IT SAID THAT THE WELFARE OF THE VAST REFUGEE COMMUNITY IS NOT AND CANNOT BE THE SOLE RES- PONSIBILITY OF THE ETHIOPIAN GOVERNMENT.

CAIRO (JUNE 19) XINHUA - EGYPT TODAY DENIED REPORTS THAT ITS "AIR SINAI" IS TRANSPORTING SOVIET JEWS TO ISRAEL ACROSS THE EGYPTIAN AIR SPACE.

A SPOKESMAN OF THE EGYPTIAN FOREIGN MINISTRY SAID THE REPORTS, CARRIED BY CERTAIN EGYPTIAN OPPOSITION NEWSPAPERS, WERE "TOTALLY UNFOUNDED," ADDING THAT "EGYPT HAS NO INTEREST WHATSOEVER IN UNDERTAKING SUCH ACTION," THE OFFICIAL EGYPTIAN NEWS AGENCY REPORTED.

THE "AL SHAAB" NEWSPAPER, RUN BY EGYPT'S OPPOSITION "SOCIALIST LABOR PARTY", SAID TODAY THAT "AIR SINAI" "IS TRANSPORTING SOVIET JEWS FROM CAIRO INTERNATIONAL AIRPORT TO ISRAEL."

THE PAPER QUOTED A SENIOR AIRPORT POLICE OFFICER AS SAYING THAT THE TRANSPORT OF SOVIET JEWS TO ISRAEL ABOARD THE EGYPTIAN AIRLINES WAS IN LINE WITH "AN ORDER FROM OFFICIALS AT A HIGHER LEVEL."

THE GROWING SOVIET JEWISH IMMIGRATION TO ISRAEL HAS SPARKED AN OUTCRY IN THE ARAB COUNTIRES, INCLUDING EGYPT. EGYPTIAN OFFICIALS HAVE PUBLICLY CONDEMNED THIS JEWISH INFLUX.

REPORTS SAID MORE THAN 10,000 SOVIET JEWS ARRIVE IN ISRAEL MONTHLY AND ISRAEL EXPECTS 150,000 SOVIET JEWS TO COME THIS YEAR.

UNITED NATIONS (JUNE 19) XINHUA - A VETERAN BRAZILIAN DIPLOMAT WAS NAMED TODAY AS U.N. SECRETARY-GENERAL JAVIER PEREZ DE CUELLAR'S PERSONAL REPRESENTATIVE TO HAITI TO HELP THE COUNTRY ORGANIZE ITS COMING FREE ELECTIONS.

"AFTER CONSULTING WITH THE HAITIAN GOVERNMENT, THE SECRETARY- GENERAL HAS DECIDED TO APPOINT JOAO AUGUSTO DE MEDICIS, A NATIONAL OF BRAZIL, AS HIS PERSONAL REPRESENTATIVE FOR HAITI," THE U.N. CHIEF'S SPOKESWOMAN NADIA

YOUNES ANNOUNCED AT THE U.N. NOON PRESS BRIEFING.

YOUNES SAID DE MEDICIS, 54, WHO IS THE BRAZILIAN PERMANENT REPRESENTATIVE TO THE U.N. FOOD AND AGRICULTURAL ORGANIZATION, WILL "ADVISE HIM (THE SECRETARY-GENERAL) ON THE ASSISTANCE WHICH COULD BE PROVIDED TO THE HAITIAN AUTHORITIES DURING THE ELECTORAL PROCESS IN THEIR COUNTRY."

THE U.N. ASSISTANCE IN THE COUNTRY'S ELECTIONS HAS BEEN REQUESTED BY HAITI'S PROVISIONAL PRESIDENT ERTHA PASCAL TROUILLOT, WHO CAME TO POWER IN MARCH WHEN THE COUNTRY'S FORMER PRESIDENT PROSPER AVRIL, A MILITARY GENERAL, STEPPED DOWN.

THE PROVISIONAL GOVERNMENT OF TROUILLOT LATER ANNOUNCED THAT THE COUNTRY WILL HOLD FREE ELECTIONS AS SOON AS POSSIBLE.

#90170h0135 06/19/1990 ~Chinese News Agency

LAGOS (JUNE 19) XINHUA - ABOUT 10,000 NIGERIAN CHILDREN DIED OF DIARRHOEA YEARLY FOR LACK OF ADEQUATE HEALTH CARE, AN OFFICIAL OF THE UNITED NATIONS CHILDREN'S FUND (UNICEF) SAID MONDAY.

MR. N. TULUHUNGWA, UNICEF REPRESENTATIVE IN NIGERIA, SAID THAT THE DISMAL PICTURE OF CHILD HEALTH CARE IN NIGERIA IS DUE TO GROSS INADEQUACY OF AMENITIES LIKE SAFE-DRINKING WATER AND SANITARY FACILITIES AT HOUSEHOLD AND COMMUNITY LEVELS.

HE WAS SPEAKING AT THE NATIONAL CONFERENCE FOR VILLAGE HEALTH WORKERS AND TRADITIONAL BIRTH ATTENDANCE WHICH OPENED HERE MONDAY.

ACCORDING TO THE UNICEF REPRESENTATIVE, MATERNAL MORTALITY IN NIGERIA IS ONE OF THE WORLD'S HIGHEST WITH 15 DEATHS OF EVERY 1,000 LIVE BIRTHS.

THE INFANT MORTALITY RATE IN THE COUNTRY WAS PUT AT 110 PER 1,000 LIVE BIRTHS.

HE URGED THE NIGERIAN GOVERNMENT TO WORK OUT AN EFFECTIVE PRIMARY HEALTH CARE POLICY BY WHICH MEMBERS OF THE COMMUNITIES ESPECIALLY THE RURAL DWELLERS AND THOSE RESIDING IN DESERTS, MOUNTAINOUS AND RIVERINE AREAS COULD HAVE EASY ACCESS TO MEDICAL FACILITIES.

HE ALSO SAID THAT UNICEF WOULD ASSIST SELECT STATES IN NIGERIA TO ESTABLISH VILLAGES POSTS AND TRAIN VILLAGE HEALTH WORKERS IN THE NEXT FIVE YEARS.

#90170h0136 06/19/1990 ~Chinese News Agency

NEW YORK (JUNE 19) XINHUA - DEMAND FOR GOLD IN JEWELRY FABRICATION INCREASED SO MUCH THAT IT OUTSTRIPPED WESTERN MINE PRODUCTION IN 1989, THE WORLD GOLD COUNCIL ANNOUNCED HERE MONDAY.

THE SIGNIFICANCE OF THIS DEMAND IS THAT FABRICATED JEWELRY REPRESENTS PERMANENT CONSUMPTION, SINCE IT USUALLY DOES NOT RETURN TO THE GOLD MARKET SAID MICHAEL C. BARLERIN, CHIEF EXECUTIVE OFFICER OF THE AMERICAS, WORLD GOLD COUNCIL.

IRONICALLY, HE SAID, INVESTORS DO NOT FULLY REALIZE THE IMPORTANCE OF JEWELRY IN REMOVING GOLD FROM THE MARKETPLACE.

A DECADE-LONG UPWARD TREND FOR GOLD JEWELRY IS RESPONSIBLE FOR LAST YEAR'S CONSUMPTION MILESTONE.

A RECENT SURVEY SAID THAT 1989 WESTERN MINE PRODUCTION INCREASED TO 1,653 METRIC TONS, A 7 PERCENT RISE OVER 1988.

HOWEVER, JEWELRY FABRICATION ABSORBED 1,811 METRIC TONS OF GOLD IN 1989, EXCEEDING WESTERN GOLD PRODUCTION BY 158 TONS, OR 10 PERCENT.

THE CONSUMPTION REPRESENTED A 23 PERCENT INCREASE OVER 1988 JEWELRY FABRICATION FIGURES.

THE SIX KEY DEVELOPED MARKETS FOR GOLD JEWELRY ARE THE UNITED STATES, JAPAN, GERMANY, FRANCE, ITALY AND THE UNITED KINGDOM.

THE UNITED STATES IS THE LARGEST SINGLE DEVELOPED MARKET FOR GOLD JEWELRY, ABSORBING APPROXIMATELY 221 TONS IN 1989.

BARLERIN SAID THAT ONE OUT OF EVERY TWO AMERICAN WOMEN ACQUIRE AT LEAST ONE PIECE OF GOLD JEWELRY PER YEAR. IN FACT WOMEN BUY 60 PERCENT OF ALL GOLD JEWELRY UNITS, REPRESENTING 40 PERCENT OF GOLD JEWELRY DOLLARS.

GABORONE (JUNE 19) XINHUA - THE UNITED NATIONS TEAM CURRENTLY TOURING SOUTH AFRICA SEES A NEED FOR "CONFIDENCE-BUILDING MEASURES" TO CURB VIOLENCE IN THE COUNTRY, DELEGATION HEAD ABDULRAHIM FARAH SAID IN PRETORIA TODAY.

REPORTS REACHING HERE TODAY QUOTED MR. FARAH AS SAYING AFTER TALKS WITH SOUTH AFRICAN FOREIGN MINISTER PIK BOTHA THAT AL- THOUGH THE U.N. SUPPORTS THE VIEW THAT APARTHEID SHOULD BE DIS- MANTLED THROUGH NEGOTIATIONS, THE MECHANISM AND SUBSTANCE OF THE NEW CONSTITUTIONAL DISPENSATION SHOULD BE DECIDED BY THE PEOPLE OF SOUTH AFRICA.

FAR-REACHING CHANGES IN SOCIETY OFTEN CAUSE UNCERTAINTY AND FEAR, HE SAID, ADDING THAT HIS DELEGATION HAS FOUND THIS TO BE PARTICULARLY TRUE IN "THIS COUNTRY OF GREAT CONTRASTS".

HE NOTED THAT CHANGES HAVE ACTUALLY TAKEN PLACE IN SOUTH AFRICA, WHICH ARE "WARMLY WELCOMED BY ALL THE ORGANIZATIONS THE DELEGATION HAS MET.

THE U.N. GROUP HAS HELD TALKS WITH MORE 50 GROUPS DURING ITS 10-DAY VISIT TO SOUTH AFRICA. HOWEVER, CONCERN WAS EXPRESSED OVER THE LEVEL OF VIOLENCE IN SOME PARTS OF THE COUNTRY, PARTI- CULARLY IN NATAL PROVINCE.

THE UNITED NATIONS AND THE INTERNATIONAL COMMUNITY IN GENERAL CLOSELY FOLLOW WHAT HAPPENS IN SOUTH AFRICA AND THE TEAM LEAVES SOUTH AFRICA WITH A BETTER UNDERSTANDING OF THE CHALLENGES AND OPPORTUNITIES SOUTH AFRICANS FACE IN THE YEARS AHEAD, SAID MR. FARAH.

THE U.N. FACT-FINDING MISSION LEFT FOR NEW YORK THIS EVENING. A REPORT ON ITS SOUTH AFRICA VISIT IS EXPECTED TO BE PUBLISHED EARLY NEXT MONTH.

#90170h0138 06/19/1990 ~Chinese News Agency

LAGOS (JUNE 19) XINHUA - THE UNITED NATIONS INDUSTRIAL DE- VELOPMENT ORGANIZATION (UNIDO) HAS URGED AFRICAN GOVERNMENTS TO PROVIDE AFRICAN REFUGEES WITH MATERIAL AND OTHER FORMS OF ASSISTANCE IN EVERY WAY POSSIBLE.

IN A STATEMENT CIRCULATED HERE TODAY TO MARK THE AFRICAN REFUGEE DAY WHICH FALLS ON JUNE 20, THE WORLD BODY URGED AFRICAN COUNTRIES TO "CONTINUE ACCEPTING ASYLUM SEEKERS AND REFRAIN FROM REGARDING THE GRANTING OF ASYLUM TO FUGITIVES AS AN UNFRIENDLY ACT".

IT ALSO CALLED ON THE AFRICAN GOVERNMENTS TO INCREASE THEIR FINANCIAL CONTRIBUTIONS TO THE PROGRAMS OF THE U.N. HIGH COMMI- SSIONER FOR REFUGEES WHICH CATERS FOR THE WELL-BEING OF DISP- LACED PEOPLE WORLD-WIDE.

OF THE 12 MILLION REFUGEES IN THE WORLD NOW, NEARLY FIVE MIL- LION ARE AFRICANS.

#90170h0141 06/19/1990 ~Chinese News Agency

KUWAIT (JUNE 19) XINHUA - THE U.S. PERMANENT DELEGATE TO THE UNITED NATIONS THOMAS PICKERING TODAY REITERATED THE U.S. OPPOSITION TO THE SETTLEMENT OF SOVIET JEWS IN THE OCCUPIED ARAB TERRITORIES.

THE GULF NEWS AGENCY REPORTED THAT PICKERING MADE THIS STATEMENT AT SEPARATE MEETINGS HERE WITH THE EMIR OF BAHRAIN SHEIKH ISA BIN SALMAN AL-KHALIFA AND PRIME MINISTER SHEIKH KHALIFA BIN SULMAN AL-KHALIFA.

THE TALKS AT THE TWO MEETINGS ALSO COVERED BILATERAL RELATIONS BETWEEN BAHRAIN AND THE UNITED STATES, THE SITUATION IN THE GULF REGION, THE LATEST DEVELOPMENTS IN THE MIDDLE EAST PEACE PROCESS AND THE THREATS CONFRONTING SOME ARAB STATES.

THE U.S. DELEGAGE BRIEFED THE BAHRAINI LEADERS ON THE CURRENT U.S. EFFORTS TO CONVENE A PALESTINIAN-ISRAELI DIALOGUE. HE SAID HIS CURRENT TOUR OF A NUMBER OF GULF STATES WAS AIMED AT LISTENING TO THE VIEWS OF THE GULF LEADERS ON THE CURRENT SITUATION IN THE ARAB POLITICAL ARENA.

MEANWHILE, KUWAIT ANNOUNCED TODAY THAT THE U.S. DELEGATE WILL VISIT KUWAIT WEDNESDAY FOR TALKS WITH KUWAITI OFFICIALS ON INTERNATIONAL ISSUES OF MUTUAL CONCERN, PARTICULARLY THE MIDDLE EAST CONFLICT AND THE PALESTINE PROBLEM.

THE KUWAITI NEWS AGENCY QUOTED DEPUTY PREMIER AND FOREIGN MINISTER SHIEK SABAH AL-AHMED AL-JABAH AS SAYING THAT PICKERING HOLDS "CONCRETE POSITIVE POSITIONS" TOWARD ARAB ISSUES AND THAT HIS VISIT TO KUWAIT IS IN RESPONSE TO AN INVITATION BY THE KUWAITI FOREIGN MINISTRY.

PICKERING ARRIVED IN THE BAHRAINI CAPITAL OF MANAMA MONDAY ON A TWO-DAY VISIT TO BAHRAIN. HE IS ON A TOUR OF SEVERAL STATES OF THE REGION AND HAS ALREADY VISITED SAUDI ARABIA.

#90170h0150 06/19/1990 ~Chinese News Agency

NAIROBI (JUNE 19) XINHUA - KENYA AIRWAYS IS ONE OF THE TOP THREE INTERNATIONAL AIRLINES IN THE WORLD WITH THE HIGHEST ON-TIME-PERFORMANCE, THE KENYA NEWS AGENCY REPORTED TODAY.

THE AGENCY QUOTED MR. JAMES KABUI, KENYA AIRWAYS' COAST AREA MANAGER, AS SAYING THAT LAST MONTH THE AIRLINES TOPPED THE LIST OF INTERNATIONAL AIRLINES WITH 87.6 PERCENT ON-TIME- PERFORMANCE.

"OUR PLANES IN AND OUT OF NAIROBI AND MOMBASA ARE LEAVING AND ARRIVING ON TIME WHILE 19 OUT OF OUR 32 STATIONS REALIZED THE TARGET OF OVER 80 PERCENT ON-TIME-PERFORMANCE," SAID THE MANAGER.

THIS, HE NOTED, WAS ACHIEVED THROUGH IMPROVED CUSTOMER SERVICES AND A FLEET MODERNIZATION PROGRAM.

KENYA AIRWAYS NOW BOASTS A FLEET OF THREE A310-300 AIRBUSES, A BOEING 720, A DC9, A FOKKER FRIENDSHIP 27 AND TWO FOKKER 50. REGULAR FLIGHTS ARE OPERATED FROM THE CAPITAL CITY OF NAIROBI AND COASTAL CITY OF MOMBASA TO MAJOR CITIES IN SOME 30 AFRICAN, EUROPEAN AND ASIAN COUNTRIES.

#90170h0154 06/19/1990 ~Chinese News Agency
WASHINGTON (JUNE 19) XINHUA - THE EVASION OF FEDERAL INCOME TAXES IN THE UNITED STATES IS EXPECTED TO SWELL TO 100 BILLION DOLLARS THIS YEAR AND TO AS HIGH AS 127 BILLION TWO YEARS FROM NOW, A GOVERNMENT STUDY SAID.

THE ANALYSIS BY INTERNAL REVENUE SERVICE (IRS), THE FEDERAL TAX COLLECTOR, AND REPORTED TODAY BY THE CHRISTIAN SCIENCE MONITOR, SAID THE GAP BETWEEN INCOME TAXES OWED AND PAID VOLUNTARILY WILL BE MUCH WIDER IF BILLIONS MORE TAXES OWED ON INCOME FROM ILLEGAL SOURCES ARE INCLUDED.

THE BUSINESS ACCOUNT FOR MORE THAN 60 PERCENT OF THE EVASION, WITH THE WORST OFFENDERS BEING ONE-OWNER BUSINESSES AND "INFORMAL SUPPLIERS" -- SUCH AS CHILD-CARE PROVIDERS AND HOME REPAIRMEN -- WHO USUALLY DEAL IN CASH AND SELDOM MAINTAIN A REGULAR PLACE OF BUSINESS.

THE PROBLEM IS BLAMED ON THE LACK OF TAX RETURNS AUDITION, LITTLE PUNISHMENT FOR MOST TAX EVADERS AND IRS BUDGET CUTS.

THE PAPER SAID "THE CURRENT COMPLIANCE RATE OF ABOUT 83 PERCENT IS NOT GOOD ENOUGH FOR CONGRESS, WHICH IS INTERESTED IN ANY WAY TO REDUCE THE BUDGET DEFICIT, OR FOR THE IRS, WHICH IS CONCERNED THAT MORE AMERICANS WILL JOIN THE RANKS OF TAX CHEATS IF THEY SEE EVIDENCE THAT OTHERS ARE GETTING AWAY WITH IT."

#90170h0157 06/19/1990 ~Chinese News Agency
WASHINGTON (JUNE 19) XINHUA - SCIENTISTS FROM MEXICO AND THE UNITED STATES ARE LAUNCHING A STUDY OF MONSOON-LIKE WEATHER THAT BRINGS SUMMER RAINFALL TO THE SOUTHWEST.

THE U.S. GOVERNMENT ANNOUNCED TODAY THE MONTH-LONG ANALYSIS BEGINS JULY 8, SEEKING TO LEARN MORE ABOUT THE WET AND DRY SEASONS IN PORTIONS OF THE U.S. AND MEXICO.

ALTHOUGH MONSOONS ARE USUALLY ASSOCIATED WITH THE CLIMATE OF SOUTHEAST ASIA, THEY CAN ALSO OCCUR IN CLIMATES WITH SEA-TO-LAND BREEZES IN SUMMER AND LAND-TO-SEA WINDS IN WINTER.

THAT TYPE OF CIRCULATION OCCURS OVER THE SOUTHWESTERN UNITED STATES AND NORTHEASTERN MEXICO. SUMMER HEAT IN THE REGION CAUSES THE AIR TO RISE, DRAWING MOIST AIR FROM THE PACIFIC OCEAN AND GULF OF CALIFORNIA AND CONTRIBUTING TO THUNDERSOTRMS.

MEXICAN AND AMERICAN SCIENTISTS WILL LAUNCH BALLOONS TO CHECK UPPER-AIR CONDITIONS AT SEVERAL SITES IN THE REGION, AND STUDIES WILL BE CONDUCTED

FROM AIRCRAFT.

IN ADDITION, SCIENTISTS WILL ALSO SEEK TO DETERMINE IF ADDED HEAT GENERATED BY THE CITY OF PHOENIX AFFECTS WEATHER NEARBY, PARTICULARLY THE SUMMER STORMS IN NEARBY MOUNTAINS.

#90170h0161 06/19/1990 ~Chinese News Agency

WASHINGTON (JUNE 19) XINHUA - AMERICAN YOUNGSTERS ARE MORE APT TO HAVE FEWER SIBLINGS, COME FROM A BROKEN HOME, HAVE A WORKING MOTHER AND PASS TIME AS A "LATCHKEY KID," ACCORDING TO A REPORT AVAILABLE TODAY.

THE REPORT, ENTITLED "AMERICA'S CHILDREN: MIXED PROSPECTS" AND RELEASED BY THE POPULATION REFERENCE BUREAU (PRB), A WASHINGTON-BASED THINKTANK, ALSO NOTES THAT ALTHOUGH DECLINING FAMILY SIZE AND RECENT AMERICAN PROSPERITY HAVE CREATED MATERIAL WELL-BEING FOR MOST OF TODAY'S CHILDREN, THE NUMBER OF CHILDREN TRAPPED IN POVERTY HAS INCREASED SHARPLY IN THE PAST DECADE.

AMONG THE FINDINGS OF THE PRB STUDY ARE: -- THE NUMBER OF DIVORCES IN ANY GIVEN YEAR HAS ROUGHLY TRIPLED SINCE THE 1950S,

-- IN 1987, ONE IN FOUR BIRTHS IN THE UNITED STATES WAS TO AN UNMARRIED MOTHER, COMPARED TO ONLY ONE IN 20 BIRTHS IN 1960,

-- THE PERCENTAGE OF CHILDREN LIVING WITH ONE PARENT INCREASED FROM 9 PERCENT TO 24 PERCENT FROM 1960 TO 1988,

-- IN 1988, 12.6 MILLION CHILDREN LIVED BELOW THE POVERTY LEVEL, ONE-QUARTER MORE THAN THE NUMBER OF CHILDREN IN POVERTY DURING AN AVERAGE YEAR OF THE 1970S,

THE PRB STUDY ALSO FINDS MANY POSITIVE ASPECTS TO CHILDREN'S LIVES NOW. PARENTS ARE BETTER EDUCATED, KIDS ARE ON AVERAGE MUCH HEALTHIER AND MATERIALLY BETTER OFF, AND EDUCATIONAL ACHIEVEMENT OF POOR CHILDREN HAS SHOWN IMPROVEMENT, IT SAID.

LTV lost a Supreme Court case worth billions of dollars. The high court ruled the Federal Pension Insurance Fund has the power to force companies to resume funding pension plans; lawmakers are thinking about limiting the insurance industry's exposure to risky, high-yield investments; a former banking regulator says homeowners are being overcharged for adjustable rate mortgages; bad loans are sapping strength from the region's strongest banks. That is one reason the Bank of Boston opposes a law opening the market to out-of-state banks; Tokyo may be both a financial and a fashion capital, but when it comes to dress in the financial district, the two

don't mix; Dan Dorfman says that Donald Trump's financial woes could affect other casino operators as well; Madison Avenue sings the same old song with a different beat -- rap. (Show #120)

Back transcripts available on insurance, banking and Donald Trump.

Larry King Live (CNN) June 18, 1990

Alan Alda / Cloris Leachman: Alan Alda wrote, directed and acts in the new movie, "Betsy's Wedding." He talks about the making of this movie and how it ties in with his own life and daughters' marriages. Cloris Leachman's new project is a play called "Grandma Moses," about the famous artist, in which Leachman plays Moses from the age of 45 to 100. (Show #68)

TOKYO (JUNE 19) KYODO - THE GOVERNMENT WILL SET UP AN ADVISORY PANEL TO DISCUSS INCREASING PENALTIES ON CARTELS UNDER THE ANTIMONOPOLY LAW, THE FAIR TRADE COMMISSION ANNOUNCED TUESDAY.

JAPAN PLEDGED TO STIFFEN ANTIMONOPOLY PENALTIES IN THE APRIL INTERIM REPORT ON THE STRUCTURAL IMPEDIMENTS INITIATIVE (SII) TALKS WITH THE UNITED STATES DESIGNED TO REMOVE STRUCTURAL BARRIERS TO TRADE.

THE PANEL WILL ADVISE THE CHIEF CABINET SECRETARY, THE COMMISSION SAID.

IT WILL START MEETING IN MID-JULY AND WILL COME UP WITH A RECOMMENDATION BY THE END OF THE YEAR, COMMISSION OFFICIALS SAID.

THE 24-MEMBER PANEL, COMPRISING LEADERS FROM A WIDE RANGE OF FIELDS INCLUDING THE ACADEMIC, BUSINESS, AND MEDIA CIRCLES, WILL RECOMMEND HOW MUCH THE PENALTIES SHOULD BE RAISED, THEY SAID.

THE GOVERNMENT PROMISED IN THE INTERIM SII REPORT TO STRENGTHEN THE ANTIMONOPOLY LAW WITHIN FISCAL 1991, WHICH ENDS ON MARCH 31, 1992.

HIGHER PENALTIES AGAINST CARTELS ARE PART OF THE STEPS THAT JAPAN PLEDGED TO GIVE TEETH TO THE LAW.

THE U.S. HAD BEEN CALLING FOR A 10 PERCENT RISE IN THE PENALTIES, CLAIMING THAT JAPAN'S FIGURES, RANGING FROM 0.5 PERCENT TO 2 PERCENT OF THE TOTAL SALES OF THE COMPANIES INVOLVED IN CARTELS, ARE LOW COMPARED WITH THOSE IN EUROPE AND AMERICA.

THE U.S. HAS ASKED FOR SUCH ACTIONS BASED ON THE CLAIM THAT U.S. COMPANIES OPERATING IN JAPAN ARE FACING UNFAIR BUSINESS PRACTICES, SUCH AS BID-RIGGING AND EXCLUSIVE PROCUREMENT TIES AMONG AFFILIATED COMPANIES.

THE U.S. MAINTAINS THAT JAPAN IS NOT APPLYING THE LAW AGAINST MONOPOLIES AS STRICTLY AS SUCH LAWS ARE ENFORCED IN THE U.S. AND EUROPE.

WHEN WASHINGTON RAISED THE ISSUE WITH THE JAPANESE GOVERNMENT LAST SUMMER, U.S. OFFICIALS SAID JAPAN'S ANTIMONOPOLY ADMINISTRATION IS THE BIGGEST CAUSE OF EXCLUSIVE PRACTICES BY JAPANESE ENTERPRISES.

THE FAIR TRADE WATCHDOG HAS ALREADY IMPLEMENTED PART OF THE PROMISES IN THE SII REPORT BY BOOSTING ITS ANTIMONOPOLY ENFORCEMENT MANPOWER, COMMISSION OFFICIALS SAID.

#90170k0011 06/19/1990 ~Japanese News Agency

TOKYO, JUNE 19 KYODO - AGRICULTURE MINISTER TOMIO YAMAMOTO SAID TUESDAY HE WOULD REPLY THE SAME DAY TO A PROTEST LETTER FROM U.S. AGRICULTURE SECRETARY CLAYTON YEUTTER ABOUT JAPAN'S RICE IMPORT POLICY.

YAMAMOTO TOLD REPORTERS AFTER A REGULAR CABINET MEETING THAT HIS LETTER IS MAINLY AN EXPLANATION ABOUT THE ACTUAL CONDITIONS OF AGRICULTURE IN JAPAN.

HE SAID HE WRITES, FOR INSTANCE, THAT JAPANESE AGRICULTURE HAS BEEN DAMAGED BY PAST LIBERALIZATION MOVES AND POINTING OUT THAT THE OPENING OF THE BEEF MARKET IS PLANNED IN THE NEAR FUTURE.

THE LETTER SAID THE ADDED OPENING OF THE RICE MARKET COULD CAUSE SERIOUS PROBLEMS FOR JAPANESE AGRICULTURE.

AMONG OTHER POINTS IT MAKES WERE THAT A RECENT RESOLUTION BY THE DIET OPPOSING THE OPENING OF THE RICE MARKET SHOULD BE RESPECTED, AND THAT RICE HAS A SPECIAL POSITION IN JAPANESE CULTURE.

YAMAMOTO SAID HE STRESSED HIS UNDERSTANDING OF THE IMPORTANCE OF DISCUSSIONS ABOUT FARM PRODUCTS IN THE URUGUAY ROUND OF MULTILATERAL TRADE TALKS. BUT HE ALSO REITERATED THAT COMPLETE SELF-SUFFICIENCY IN RICE IS VITAL FOR JAPAN.

YAMAMOTO RECEIVED YEUTTER'S LETTER MAY 28 COMPLAINING OF HIS REMARKS THAT U.S. PRESSURE ON JAPAN TO CHANGE ITS RICE POLICY IS AN UNWARRANTED INTERFERENCE IN JAPAN'S INTERNAL AFFAIRS.

YEUTTER HAD EARLIER BEEN REPORTED AS CRITICIZING JAPAN FOR ITS RELUCTANCE TO CHANGE THE POLICY.

#90170k0033 06/19/1990 ~Japanese News Agency

TOKYO (JUNE 19) KYODO - RELAXED MONETARY POLICIES AND LOW INTEREST RATES HAVE ENCOURAGED SPECULATIVE REAL ESTATE INVESTMENT BY CORPORATIONS THAT HAVE CAUSED TOKYO AND OSAKA LAND PRICES TO SKYROCKET, THE NATIONAL LAND AGENCY SAID IN A WHITE PAPER RELEASED TUESDAY.

"THE LAND, INCREASING IN ITS VALUE AS AN ASSET, IS BOUGHT FOR SPECULATIVE PURPOSES AND ITS CREDIBILITY AS AN ASSET HAVE ATTRACTED NEW DEMANDS," ACCORDING TO THE WHITE PAPER, THE FIRST SUCH STUDY COMPLETED SINCE THE IMPLEMENTATION OF THE NEW BASIC LAND LAW LAST DECEMBER.

IT SAID HIGH LAND PRICES ARE MAKING IT HARD FOR ORDINARY CITIZENS TO BUY HOUSES AND ARE WIDENING THE GAP BETWEEN THOSE WHO HAVE ASSETS AND THOSE WHO DO NOT.

A SHARP RISE IN THE DEMAND FOR OFFICE BUILDINGS IN THE TOKYO AREA, A DEMAND FOR REPURCHASING HOUSES IN URBAN BUSINESS AREAS, AND SPECULATION ACCOMPANYING THESE DEMANDS HAVE CAUSED HIGH LAND PRICES IN RECENT YEARS, THE WHITE PAPER SAID.

THE EASING OF MONETARY POLICY ALSO HAS TRIGGERED THE ANTICIPATION OF FUTURE LAND PRICE HIKES, THE WHITEN PAPER SAID.

THE LAND PROBLEM, WHICH HAS BECOME ONE OF THE MOST SIGNIFICANT DOMESTIC ISSUES, SHOULD BE ADDRESSED IN AS MANY WAYS POSSIBLE, INCLUDING POSSIBLE CHANGES IN THE TAX SYSTEM AND IN THE MONETARY AND UTILITY POLICIES OF LAND.

IT SAID CORPORATE DEMAND FOR REAL ESTATE IS HIGH AND THAT LAND PURCHASES OFTEN ARE MADE ONLY FOR SPECULATIVE PURPOSES.

IN 1988, THE VALUE OF TOTAL LAND ASSETS IN JAPAN AMOUNTED TO 1,842 TRILLION YEN AND COMPRISED 30.7 PERCENT OF TOTAL PUBLICLY HELD ASSETS.

LAND ASSETS INCREASED BY 81.4 PERCENT BETWEEN 1985 AND 1988. REFLECTING THE SHARP LAND PRICE RISE IN THE TOKYO AREA, THE SELLING PRICE OF AN APARTMENT IN 1989 WAS 7.4 TIMES THE ANNUAL INCOME OF THE AVERAGE SALARIEDMAN. IN 1986, THE PRICE OF AN APARTMENT WAS FOUR TIMES THE AVERAGE ANNUAL INCOME.

IT HAS BECOME INCREASINGLY DIFFICULT FOR SALARIEDMEN TO PURCHASE LAND AND HOUSING WITH BANK LOANS AND SALARIES. LAND AND HOUSING PURCHASES INCREASINGLY ARE POSSIBLE ONLY IF BUYERS OWN LAND AND HOUSING THAT CAN BE SOLD FOR EXTRA MONEY.

TOKYO (JUNE 19) KYODO - THE BALANCE OF STOCKS BOUGHT ON MARGIN, OR CREDIT ON JAPAN'S THREE LARGEST STOCK EXCHANGES GAINED FOR THE SIXTH WEEK IN A RW LAST WEEK, THE TOKYO STOCK EXCHANGE SAID TUESDAY.

THE MARGIN TRADING BALANCE ON THE TOKYO, OSAKA, AND NAGOYA EXCHANGES ROSE 8.8 BILLION YEN TO 9,029.6 BILLION YEN.

MARKET WATCHERS ATTRIBUTED THE RISE TO HEAVY BUYING OF INCENTIVE-BACKED SHARES BY INDIVIDUAL INVESTORS.

MEANWHILE, THE BALANCE OF STOCKS SOLD SHORT FELL 38.5 BILLION YEN TO 622.7 BILLION YEN.

-30- 690

#90170k0071 06/19/1990 ~Japanese News Agency

TOKYO (JUNE 19) KYODO - JOHN BUSH, SON OF U.S. PRESIDENT GEORGE BUSH, ON TUESDAY CALLED FOR MORE JAPANESE INVESTMENT IN FLORIDA, SAYING IT HAS A GEOGRAPHICAL ADVANTAGE AND GOOD URBAN FACILITIES.

BUSH TOLD A PRESS CONFERENCE HERE THAT JAPANESE INVESTMENT IN FLORIDA IS LESS THAN THAT IN OTHER STATES. BUT FLORIDA IS LOCATED IN A PLACE BEST SUITED AS A TRANSIT BASE TO LATIN AMERICA, HE SAID.

BUSH, PRESIDENT OF A REAL ESTATE FIRM IN MIAMI, IS IN JAPAN AS HEAD OF A FLORIDA MISSION TO ENCOURAGE MORE JAPANESE INVESTMENT IN THE SOUTHERN STATE.

CONCERNING "JAPAN BASHING" FOR ALLEGEDLY EXCESSIVE JAPANESE INVESTMENT IN THE UNITED STATES, BUSH SAID THERE IS NO JAPAN BASHING IN FLORIDA BECAUSE PEOPLE THERE ARE INTERNATIONAL-MINDED. IN ANY CASE, AMERICAN PEOPLE'S FEELINGS TOWARD JAPAN IS NOT SO BAD AS JAPANESE PEOPLE IMAGINE, BUSH SAID.

#90170k0078 06/19/1990 ~Japanese News Agency

TOKYO (JUNE 19) KYODO - IRAN AND IRAQ ARE EXPECTED TO AGREE TO LOWER PRICES OF CRUDE OIL FOR DELIVERY IN THE JULY-SEPTEMBER PERIOD AT TALKS WITH JAPANESE OIL IMPORTERS LATER THIS WEEK, INDUSTRY SOURCES SAID TUESDAY.

THE LIKELY PRICE REDUCTION WILL FOLLOW A SIMILAR MOVE BY SAUDI ARABIA, A LEADING PRICE SETTER, WHICH CUT PRICES OF CRUDE FOR DELIVERY TO JAPAN IN JULY BY 0.25-0.70 DOLLARS PER BARREL EARLY THIS MONTH, THE SOURCES SAID.

THOUGH THE SCALE OF THE COMING PRICE CUT REMAINS TO BE SEEN, THE SOURCES EXPECT IT TO BE IN LINE WITH THAT BY SAUDI ARABIA.

THE SOURCES SAID THE CUTS REFLECT THE FIERCE COMPETITION AMONG OIL PRODUCERS TO HOLD OR EXPAND SHARES IN A GLUTTED WORLD MARKET.

IRAN AND IRAQ ARE BELIEVED TO BE LESS WELL PLACED IN THIS COMPETITION, AS JAPAN'S DEMAND FOR THE HEAVY OIL PRODUCED IN THESE NATIONS HAS BEEN ON THE DECLINE RECENTLY.

IRAN EXPORTS ABOUT 220,000 BARRELS A DAY TO 10 JAPANESE COMPANIES, INCLUDING MITSUI AND CO., SHOWA SHELL SEKIYU K.K., AND IDEMITSU KOSAN CO., WHILE IRAQ SELLS ABOUT 180,000 BARRELS A DAY TO SIX FIRMS, INCLUDING COSMO OIL CO. AND MITSUBISHI CORP.

TOKYO (JUNE 19) KYODO - NIPPON CREDIT BANK LTD. SAID TUESDAY IT HAS ESTABLISHED A PARTNERSHIP WITH A BIG BRITISH INVESTMENT MANAGEMENT CONCERN IN ADVANCE OF UPCOMING GERMAN MONETARY UNION AND EUROPEAN MARKET INTEGRATION IN 1992.

THE BANK AND GARTMORE INVESTMENT MANAGEMENT LTD. HAVE FORMED NIPPON CREDIT GARTMORE INVESTMENT MANAGEMENT LTD., WHICH IS TO BEGIN INTERNATIONAL INVESTMENT MANAGEMENT BUSINESS IN AUGUST.

WITH A 60 PERCENT STAKE IN THE 400,000 POUND JOINT VENTURE, THE JAPANESE BANK WILL TAKE THE LEAD IN MANAGEMENT, HAVING FOUR DIRECTORS ON THE SEVEN-MEMBER BOARD OF THE NEW COMPANY.

THE ALLIANCE IS A REALIZATION OF THE COMPANY'S BELIEF THAT JAPANESE MONEY WILL PLAY A GREATER ROLE IN A UNIFIED GERMANY AND THE ONGOING ECONOMIC REFORMS IN EAST EUROPE. IT ALSO REFLECT THE BANK'S PLAN TO ACQUIRE KNOW-HOW IN INTERNATIONAL INVESTMENT MANAGEMENT SERVICE.

-30- 1056

#90170k0086 06/19/1990 ~Japanese News Agency

TOKYO (JUNE 19) KYODO - MEXICAN PRESIDENT CARLOS SALINAS DE GORTARI SAID HERE TUESDAY HE IS EXPECTING MORE JAPANESE ENTERPRISES TO PARTICIPATE IN HIS COUNTRY'S MARKET, ESPECIALLY IN THE ELECTRONICS AND AUTOMOBILE INDUSTRIES.

HE SAID MORE THAN 30 CONTRACTS ON JAPANESE INVESTMENTS IN MEXICO HAVE ALREADY BEEN CONCLUDED DURING HIS VISIT TO JAPAN SINCE LAST SATURDAY, A FIGURE REPRESENTING MORE THAN DOUBLE IN VALUE THE WHOLE AMOUNT OF INVESTMENTS MADE IN THE PAST.

SALINAS MADE THE REMARKS AT A PRESS CONFERENCE AT THE JAPAN NATIONAL PRESS CLUB IN TOKYO AFTER A MEETING WITH LEADERS FROM FIVE MAJOR BUSINESS BODIES

INCLUDING THE FEDERATION OF ECONOMIC ORGANIZATIONS (KEIDANREN).

"WE RECOGNIZED THE NEED FOR CHANGE AND OPTED FOR MODERNIZATION AS A CLEAR AND CONSISTENT STRATEGY FOR CARRYING IT THROUGH," SALINAS TOLD REPORTERS.

THE MEXICAN PRESIDENT ALSO SAID THAT TO ACHIEVE ECONOMIC STABILITY, HIS GOVERNMENT HAS OBSERVED STRICT FISCAL DISCIPLINE, WHICH LAST YEAR MADE IT POSSIBLE FOR IT TO REDUCE ITS TWO-DIGIT DEFICIT TO AROUND 6 PERCENT OF GROSS DOMESTIC PRODUCT (GDP).

"JAPANESE BUSINESS LEADERS APPARENTLY HAD A GOOD IMPRESSION ABOUT OUR EFFORTS AND MOST OF THEM SHOWED POSITIVE INTEREST WITH A CALL FOR MORE JAPANESE INVESTMENT IN MEXICO," HE ADDED.

ASKED ABOUT ACCESS TO MEXICAN MARKETS BY JAPANESE ENTERPRISES, SALINAS SAID HE DOES NOT INTEND TO IMPOSE ANY RESTRICTION ON SUCH ACTIVITIES, CITING ELECTRONICS AND AUTOMOBILE MANUFACTURERS AS THE MOST FAVORABLE INDUSTRIES.

SALINAS ALSO PRAISED JAPAN FOR PROVIDING AID WORTH 1.2 BILLION YEN TO HELP PREVENT AIR POLLUTION IN MEXICO CITY, DESCRIBING THE AID AS UNPRECEDENT BETWEEN NATIONS.

SALINAS ARRIVED IN JAPAN ON SATURDAY FOR A FIVE-DAY OFFICIAL VISIT THROUGH WEDNESDAY.

-30- 1961

#90170k0087 06/19/1990 ~Japanese News Agency

TOKYO (JUNE 19) KYODO - JAPANESE GOVERNMENT OFFICIALS ON TUESDAY EXPRESSED LITTLE REACTION TO A U.S. DECISION TO EASE COCOM-RELATED EXPORT PROCEDURES.

THE UNITED STATES ON MONDAY PROPOSED A SIGNIFICANT ELIMINATION OF EXPORT LICENSING REQUIREMENTS FOR HIGH-TECH PRODUCTS TRADED WITH JAPAN AND U.S. ALLIES IN WESTERN EUROPE.

UNDER THE NEW PROPOSAL, EXPORTERS IN THE 17-MEMBER COUNTRIES OF THE COORDINATING COMMITTEE FOR MULTILATERAL EXPORT CONTROL (COCOM) WOULD NOT BE REQUIRED TO OBTAIN INDIVIDUAL LICENSES FOR EXPORTING HIGH-TECH PRODUCTS.

A HIGH-RANKING OFFICIAL OF THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SAID, HOWEVER, THAT ''THE COCOM MEMBER COUNTRIES HAVE ALREADY AGREED TO IMPLEMENT SUCH A STEP. JAPAN INTRODUCED A SIMILAR RELAXED EXPORT PROCEDURE IN APRIL.''

"THE U.S. WAS RATHER LATE IN TAKING THE STEP," HE SAID. SINCE EASTERN EUROPEAN COUNTRIES AND THE SOVIET UNION ARE TURNING TO DEMOCRACY, "IT IS A

NATURAL COURSE OF EVENTS THAT TRADE BETWEEN COCOM MEMBERS WILL FURTHER BECOME LIBERALIZED," THE OFFICIAL PREDICTED.

JAPANESE COMPANIES GENERALLY WELCOMED THE U.S. DECISION. AN OFFICIAL OF A MAJOR ELECTRIC MAKER SAID THE PROPOSAL WOULD "MAKE MUCH QUICKER IMPORT POSSIBLE."

"THE LIBERALIZATION IN PRINCIPLE FROM NEXT MAY WILL GIVE A FURTHER BOOST TO TRADE IN HIGH-TECH PRODUCTS," HE SAID.

THE PROPOSED NEW GENERAL LICENSE AUTHORIZATION WILL FURTHER STREAMLINE THE CONTROLS THAT COCOM ANNOUNCED FOR EAST-WEST TRADE AT A MEETING IN PARIS ON JUNE 6 AND 7.

BUT, AN OFFICIAL OF A TELECOMMUNICATIONS EQUIPMENT COMPANY SAID, "THE PICTURE IS UNLIKLEY TO CHANGE IN ANY DRAMATIC WAY SINCE ALL THE DECISION WILL ACHIEVE IS TO SPEED UP WHAT HAS BEEN ALREADY POSSIBLE WITH SOME TIME AND TROUBLE."

-30- 1936

#90170k0088 06/19/1990 ~Japanese News Agency

TOKYO (JUNE 19) KYODO - MAJOR JAPANESE FINANCIAL INSTITUTIONS ARE CONSIDERING USING SUBORDINATED LOANS AS A VEHICLE FOR FUND-RAISING IN A STEP TOWARD INCREASING THEIR CAPITAL-ASSET ADEQUACY RATIOS, INDUSTRY SOURCES SAID TUESDAY.

THE FINANCE MINISTRY PLANS TO GRANT FINANCIAL CONCERNS THE RIGHT TO USE SUCH LOANS AS EARLY AS THIS MONTH, HELPING BANKS IMPROVE DWINDLING CAPITAL-ASSET RATIOS IN THE WAKE OF WEAKNESS IN THE FINANCIAL AND CAPITAL MARKETS SINCE THE START OF THIS YEAR, THE SOURCES SAID.

EUROPEAN BANKS ARE ALREADY USING SUBORDINATED LOANS AS A TOOL TO ENHANCE THEIR NET WORTH RATIOS.

JAPANESE BANKS ARE LIKELY TO MAKE EFFECTIVE USE OF SUCH LOANS FOR SIMILAR PURPOSES AT A TIME WHEN THEY ARE FACED WITH DIFFICULTIES IN CAPITAL EXPANSION DUE TO THE RECENT VOLATILITY IN THE STOCK MARKET, WHICH HAS VIRTUALLY PUT AN END TO THE SO-CALLED EQUITY FINANCING THROUGH ISSUING CONVERTIBLE BONDS.

THE NET WORTH RATIOS OF FOUR OUT OF THE 15 MAJOR COMMERCIAL AND LONG-TERM CREDIT BANKS FELL BELOW THE MANDATORY STANDARDS SET BY THE BANK FOR INTERNATIONAL SETTLEMENTS (BIS) AS OF THE END OF MARCH, HURT BY THE SLUMP IN THE MARKETS.

ACCORDING TO BIS STANDARDS, SUBORDINATED LOANS WITH REMAINING PERIODS OF LESS THAN FIVE YEARS COULD BE INCORPORATED INTO THE CATEGORY OF "OWNED

CAPITAL" ON CONDITION THAT THEY ARE WRITTEN OFF AT AN ANNUAL RATE OF 20 PERCENT.

INTEREST RATES ON SUBORDINATED LOANS ARE USUALLY SET HIGHER THAN THOSE OF ORDINARY LOANS IN CONSIDERATION OF THE HIGHER RISKS RESULTING FROM UNCOLLECTABLE LOANS.

UNDER THE PLAN, WORKED OUT BY COMMERCIAL BANKS, LENDERS WILL BE ABLE TO SET INTEREST RATES ON SUBORDINATED LOANS FREELY, BASED ON NEGOTIATIONS BETWEEN LENDERS AND BORROWERS, THOUGH IN MOST CASES THE RATES WILL BE SET AT LEVELS HIGHER THAN THE LONG-TERM PRIME LENDING RATE CHARGED TO THE MOST CREDITWORTHY CUSTOMERS, THE SOURCES SAID.

THE SOURCES SAID THE LENDERS INVOLVED ARE LIFE AND NONLIFE INSURERS AND NONBANKING FINANCIAL INSTITUTIONS SUCH AS LEASING AND CONSUMER CREDIT COMPANIES, WHILE MAJOR BORROWERS INCLUDE COMMERCIAL, LONG-TERM CREDIT, AND TRUST BANKS, AS WELL AS THOSE REGIONAL AND "SECOND REGIONAL BANKS" OPERATING ABROAD.

#90170k0099 06/19/1990 ~Japanese News Agency

TOKYO (JUNE 19) KYODO - NORTH KOREAN OFFICIALS HAVE REFUSED TO MEET JAPANESE DIPLOMATS IN THE SOVIET UNION WHO ARE SEEKING CONTACT WITH THEM OVER THE ISSUE OF JAPANESE FISHERMEN ABOARD NORTH KOREAN-REGISTERED FISHING BOATS CAUGHT BY SOVIET AUTHORITIES LAST MONTH FOR POACHING SALMON, A FOREIGN MINISTRY SPOKESMAN SAID TUESDAY.

OFFICIALS OF THE JAPANESE EMBASSY IN MOSCOW AND THE JAPANESE CONSULATE GENERAL IN NAKHODKA HAVE FAILED TO MEET THEIR NORTH KOREAN COUNTERPARTS, SPOKESMAN TAIZO WATANABE SAID.

WATANABE SAID HE CANNOT FORESEE WHEN STAFF OF THE JAPANESE CONSULATE

GENERAL IN NAKHODKA COULD MEET THE JAPANESE FISHERMEN OR WHEN THE JAPANESE WOULD BE RELEASED.

THE FOREIGN MINISTRY DOES NOT THINK THE JAPANESE FISHERMEN WILL BE TAKEN SOMEWHERE THEY DO NOT WANT TO GO BECAUSE THE SOVIET UNION HAS ASSURED THAT THEY WILL BE ALLOWED TO MEET CONSULATE STAFF BEFORE THEY LEAVE NAKHODKA AND WILL BE ALLOWED TO RETURN HOME IF THEY SO WISH, HE SAID.

MEANWHILE, THE PRESIDENT OF A NORTH KOREAN FISHING FIRM HAS DEMANDED THE FISHERMEN AND VESSELS BE DELIVERED TO NORTH KOREA.

LI IL MAN, PRESIDENT OF THE FIRM, HAS SENT A TELEX TO TERUO WATANABE, PRESIDENT OF SHOHO FISHERIES CO. IN KUSHIRO, HOKKAIDO, WHICH DISPATCHED THE JAPANESE FISHING BOATS TO THE NORTH KOREAN FISHERIES COMPANY FOR A JOINT SALMON-FISHING VENTURE.

THE TELEX DATED JUNE 18 SAID THE JAPANESE FOREIGN MINISTRY'S DEMAND THAT THE JAPANESE FISHERMEN BE TAKEN TO JAPAN DIRECTLY IS AN OBSTACLE TO AN EARLY SOLUTION OF THE ISSUE.

LI URGED THE JAPANESE CONCERNED TO PRESSURE THE JAPANESE FOREIGN MINISTRY NOT TO MAKE SUCH A DEMAND TO THE SOVIET UNION.

TWELVE NORTH KOREAN-REGISTERED FISHING BOATS WITH SOME 170 JAPANESE FISHERMEN WERE SEIZED BY SOVIET AUTHORITIES LAST MONTH FOR ALLEGEDLY POACHING SALMON IN THE NORTHERN PACIFIC AND TAKEN TO THE FAR EAST SOVIET PORT OF NAKHODKA IN EARLY JUNE.

ISLAMABAD (JUNE 19) KYODO - IRAN IS CONSIDERING EXPORTING NATURAL GAS TO

PAKISTAN AND TURKEY, ITS PARTNERS IN A NEW THREE-NATION ECONOMIC ALLIANCE.

IRANIAN FOREIGN MINISTER ALI AKBAR VALAYATI SAID AFTER A MEETING OF THE GROUP IN ISLAMABAD ON TUESDAY THAT THE THREE ISLAMIC NATIONS HAVE DECIDED TO SET UP AN ENERGY COMMITTEE TO FOSTER "SPECIAL ENERGY RELATIONS" AMONG THE THREE MEMBERS.

VALAYATI FURTHER SAID THAT A FEASIBILITY STUDY COMMISSIONED BY THE SECRETARIAT OF THE GROUP WILL EXAMINE THE FINANCIAL AND TECHNICAL ASPECTS OF ESTABLISHING A NATURAL GAS PIPELINE TO DISTRIBUTE IRANIAN NATURAL GAS TO TURKEY AND PAKISTAN.

PAKISTAN ALREADY IS BUYING 20,000 BARRELS OF OIL PER DAY FROM IRAN. IRAN HAS THE WORLD'S SECOND-LARGEST PROVEN RESERVES OF NATURAL GAS, WHICH IT RECENTLY BEGAN TO EXPORT TO THE SOVIET UNION.

#90170m0001 06/19/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 19) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The COMMERCE DEPARTMENT reports that housing starts for May came in at a seasonally adjusted annual rate of 1.21 million, down 1.4% from April. This was close to the analysts prediction. The expectations were that the figures would come in at a seasonally adjusted annual rate of 1.22 million down 2% from April. The May decline marks the fourth consecutive month of falling housing starts.

In light volume, the Nikkei loses 336 points, about 1%. ... London stocks slightly lower. ... The CHICAGO BOARD OPTIONS EXCHANGE, the AMERICAN STOCK EXCHANGE and the CINCINNATI STOCK EXCHANGE are creating an all-night trading system. They hope to steal some of the trades currently executed abroad. ... In the midst of a patent dispute with HITACHI, MOTOROLA is being ordered to halt sales of its best-selling microchip. This action is expected to hurt other U.S. computer firms, such as APPLE. ... PRUDENTIAL-BACHE SECURITIES INC. will sell its Canadian retail brokerage business to BURNS FRY and move its Canadian operations to New York. ... BANKERS TRUST NEW YORK CORPORATION announces that it will cut 10% of its corporate finance staff. The move is the latest sign that commercial banks are joining Wall Street firms in cutting back the staffs they built up to handle the leveraged buyouts, mergers and acquisitions that swept the country in the 1980s.

WHAT'S AHEAD:

The HOUSE WAYS AND MEANS TRADE SUBCOMMITTEE will hold hearings on U.S.-China trade relations this morning at 9:30. ... The HOUSE BANKING COMMITTEE will hear testimony on the closing of SILVERADO. White House and Capitol Hill. ... CHARLES KEATING's lawsuit challenging the government takeover of LINCOLN SAVINGS will end today with closing arguments.

FROM THE BULLS:

The Dow could drop to the 2800 area," says DENNIS JARRETT, chief market strategist for KIDDER PEABODY & CO. "Nevertheless, I look for it to move up to 3350 in three or four months. I view the market's decline as an opportunity to buy on weakness." Jarrett disagrees with those that believe the market has entered a new down stage, saying, "What we're seeing is a consolidation." ("Investor's Daily", 6/19)

ALAN BOND, portfolio manager at W.R. LAZARD & CO., says the current market can be somewhat hard to read. "The way the market has been behaving, as much information as we can receive, the better. The market has not responded to negative news, especially negative fundamental news." However, he feels the overall trend is up, commenting, "We look to buy on weakness." (CNBC "Market Wrap-Up", 6/18)

FROM THE BEARS:

"Market perceptions have gotten themselves into a real predicament at this time," says JOSEPH FESHBACH of SHEARSON LEHMAN HUTTON. "The majority think the Fed will have to ease at some point. If the Fed does ease the stock market has already discounted it to a great degree. And if the Fed doesn't ease then you have about 200 points in error in the last couple of weeks. So I don't really see you win very much on the long-side from here on out. I think the internal dynamics of the market have started to turn lower and if you get any disappointment with interest rates - which I think you will get - the market will correct." Feshbach recommends a portfolio mix of 40% to 45% in equities, 30% to 35% in two-year notes and the remainder in cash. ("Nightly Business Report", 6/18)

"People simply have run out of reasons to buy," says ABBY JOSEPH COHEN of BARCLAYS de ZOETE WEDD RESEARCH. Described as "unabashedly bearish" by "The Wall Street Journal," Mrs. Cohen believes Monday's action is merely a foretaste of as much as a 25% drop in stock prices. (WSJ, 6/19)

STOCK MARKET:

Earnings results for the second quarter will start to come out in early July, and investors who believed this market would finish out the quarter with a strong kick may be surprised, says ROBERT STOVALL of STOVALL/TWENTY-FIRST ADVISERS. "A few more days like today, and it might

not look so bad to be under invested." (NYT, 6/19)

Monday's drop in the stock market may have been a correction after last week's 73.51 rise in the Dow. ED LAUX of KIDDER PEABODY & CO. says there was no fundamental reason for last week's rise. He says that rally was a technical aberration caused partly by a quarterly squaring of stock-index options and options on individual stocks. "I can't see [the Dow] racing to 3000 in front of earnings. People have already invested on expectations. Now they want proof." ("USA Today", 6/19)

"I think that we're either starting the first stage of a correction," that will take between one and three weeks, says TOM GALLAGHER of OPPENHEIMER, "or that we're going to move down - that the bull market is over and the bears are going to have their day. We'll know better when we see how interest rates hold up over the next couple of weeks." Gallagher sees support after a correction to around 2800, and believes there are a number of opportunities in secondary stocks. (CNBC "Market Wrap-Up", 6/18)

"In this 'Cat on a Hot Tin Roof' market, everyone is poised with their finger on the sell button," says KURT BROUWER of BROUWER & JANACHOWSKI, a San Francisco investment-management firm. He advises studying a company very carefully before investing. (WSJ, 6/19)

According to GENE JAY SEAGLE, analyst at GRUNTAL & CO., the Dow may not fall much from current levels. He says the Dow bounced off 2860 once this month, and could find its footing at that level again. ("USA Today", 6/19)

EDWARD NICOSKI of PIPER, JAFFRAY & HOPWOOD blames program selling for Monday's decline and offers two reasons why the sell-off occurred when it did. "It represents a reversal of the unwinding [of positions in futures and options] we saw last week. Usually after the expirations, the market tends to do the reverse of what it did during the expiration process. Second, the bond market was weak Friday and today after industrial production was reported much stronger than anticipated." (UPI, 6/18)

#90170m0002 06/19/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 19) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The dollar is likely nearing its lows, says JERRY ROTHMAN, a trader with MERRILL LYNCH FUTURES. He adds that there was no news affecting the dollar which drifted lower yesterday and that investors were testing the currency to see how far it would go. (NYT, 6/19)

"There wasn't a tremendous amount of interest in pushing the dollar lower " says ALEXIS EGAN of BANQUE INDOSUEZ. She points out that the market is technically ready to rebound, for "if everyone is short dollar, you can't go shorter." But worried about mixed fundamentals, she says the dollar could still fall lower. (WSJ, 6/19)

Most expect the Fed to ease, but DONALD COXE of GORDON CAPITAL CORPORATION takes a contrarian view. "If the bond market gets lower short rates, that will remove the last safety net for foreign investors who are propping up the bond market." The long end of the bond market would then get into trouble, says Coxe, with the yield curve returning to a "normal" slope. Coxe says the Fed is attempting to provide enough liquidity to keep the RTC afloat while keeping rates high enough to maintain flows of foreign capital into the U.S. (FNN "World Business Update", 6/19)

"Basically, this is a [bond] market that needed a rest," says MICHAEL HELD chief financial economist at SMITH BARNEY, HARRIS UPHAM & COMPANY. Despite the chill in recent days, "we remain as positive as we were before " adds Mr. Held. "We continue to believe that over the next couple of months bond yields could go to 8% from 8.25%." He believes that a "modest" easing move by the Fed is looking "increasingly possible" by the middle of next month. (NYT, 6/19)

JOEL GREENBLATT of NEW YORK SECURITIES AUCTION says the junk bond market has experienced a rebirth. "Institutions are coming around and the prices have come down far enough that it has attracted a lot of people who have traditionally been equity players." (CNBC "Business View", 6/18)

"We've got a lot of transitions going on right now," says ROBERT HARVEY of SCUDDERS, STEVENS & CLARK. According to Harvey, that uncertainty and the lack of liquidity in the bond market means that, "Things are going to be sluggish." (FNN "Marketwrap", 6/18)

THE ECONOMY:

Economists predict housing starts for May will be down, but believe this data won't prompt a Fed easing. "The Fed's had its chance" to change credit policy and hasn't moved, says STEVE SLIFER of SHEARSON LEHMAN HUTTON. "It will be inclined to wait for more economic news before it decides what to do," says CHEMICAL BANK's HENRY ENGLER. "I don't think a bob or a weave in tomorrow's release will carry undue significance for Fed policy, given [the data's] vulnerability to weather," says FREDERICK STRUM of FUJI SECURITIES. (Reuters, 6/18)

"I think we're still growing positively," says ALLEN SINAI of THE BOSTON COMPANY, who believes that the Fed will leave rates unchanged. "They want to hold interest rates at the current level," says Sinai, "until they see

inflation significantly below 4%. I don't think they're going to ease." (FNN "Marketwrap", 6/18)

IN WASHINGTON:

House Ways and Means Committee Chairman DAN ROSTENKOWSKI (D - Ill.) told the nation's mayors not to expect money for urban renewal from the "peace dividend." "There's no money for such programs until the budget blockade is broken," said Rostenkowski. "The peace dividend is already going to be swallowed. I'm going to tell you like it is. If you don't like it, too bad." ("Investor's Daily", 6/19)

Members of the Administration see the next two weeks as critical to completing the budget negotiation process. White House budget director RICHARD DARMAN expects the amount that must be made up to be around $80 billion, and says, "The sequester size this time around is so large that it cannot be managed by tinkering with economic assumptions or technical assumptions." Darman says progress must be made before Congress breaks for the Independence Day holiday. But those on the other side of the table do not feel quite as rushed. "I don't think if we fail to get an agreement before July 4 that this whole coach turns into a pumpkin," says SEN. JAMES SASSER (D - Tenn.). "We're still going to be around here. We've got sufficient time after that to work out an agreement." (WSJ, 6/19)

#90170p7427 06/19/1990 ~PR Newswire

GLENDALE, CALIF. (JUNE 19) PR NEWSWIRE - Baxter Healthcare Corporation, Hyland division, today announced an agreement with Kabi Vitrum AB to distribute ATnativ Antithrombin III (Human) Heat treated, in the United States. ATnativ is indicated for treatment of patients with hereditary antithrombin III deficiency in connection with surgical or obstetrical procedures, or when they suffer from thomboembolism.

ATnativ, licensed under orphan drug status, received approval for marketing by the U.S. Food and Drug Administration in December 1989. It has been available in several European countries for clinical trials since the mid-1970s.

ATnativ is processed through a combination of affinity chromatography and pasteurization which purifies antithrombin III (AT-III) from human plasma. It is administered as replacement therapy to help regulate clotting activity in patients with hereditary antithrombin III deficiency by achieving normal plasma levels of antithrombin III. Coagulation disorders associated with hereditary AT-III deficiency are usually precipitated by an event such as surgery or pregnancy.

Antithrombin III is a human plasma-based protein that is produced by the

body to bind and inactive specific clotting proteins that regulate blood clot formation including thrombin and the activated forms of clotting factors IX, X, XI and XII.

Baxter Healthcare Corporation, headquartered in Deerfield, Ill., is the leading international manufacturer and marketer of health care products, systems and services. It offers 120,000 products to health care providers in more than 100 countries. The company had 1989 revenues of $7.4 billion.

#90170p7438 06/19/1990 ~PR Newswire

CLEVELAND (JUNE 19) PR NEWSWIRE - The Cleveland Clinic Foundation today announced its participation in a joint research project aimed at developing a new generation of laser sources and delivery devices for the treatment of heart and blood vessel disease.

The project will include the Massachusetts Institute of Technology and GV Medical, Inc., of Minneapolis. The Cleveland Clinic will provide initial clinical evaluation under the direction of John Kramer, M.D., of the Department of Cardiology.

MIT's George R. Harrison Spectroscopy Laboratory, with more than eight years of research on lasers and their effects on atherosclerosis, will provide their technological experiences to the project. GV Medical, which currently produces a laser system that removes plaque from blocked vessels, will provide two years of funding for the project, produce the special catheters required by the project, and develop a commercial version of the project. GV Medical has the exclusive license to the technology developed in connection with the project.

"We are pleased to be able to combine our efforts with MIT's research experience and the Cleveland Clinic's clinical strength," says James R. Grabek, president of GV Medical.

The Clinic, MIT and Leonard Morse Hospital in Natick, Mass., have developed a clinical system for diagnosing and treating atherosclerosis using laser light delivered through optical fibers.

"The excellent technological resources of GV Medical will enable a new concept developed by the Cleveland Clinic and MIT over the past 18 months to be rapidly deployed clinically," says Kramer. "In the near future, we anticipate that this angiosurgery project will lead to clinical experience in diagnosing and treating atherosclerosis in diseased arteries. Our

joint objective is to hasten the evolution of laser angiosurgery by advancing the technology a step beyond anything now in use or in clincial evaluation." Clinical trials are scheduled to begin this year.

GV Medical's current laser system, called LASTAC, has been approved by the FDA for use in removing plaque from blocked peripheral vessels and is currently in clinical trials for use in coronary vessels.

#90170p7452 06/19/1990 ~PR Newswire

ANKENY, IA (JUNE 19) PR NEWSWIRE - Earnings of Casey's General Stores Inc. (NASDAQ-CASY) in the l990 fiscal year were 18.8 percent higher than the previous year. Sales for the convenience store chain exceeded the half-billion dollar mark for the first time ever.

At a meeting June l8, the Casey's board of directors declared a 2.5 cents per share dividend to shareholders of record Aug. l, payable Aug. 15. This is the first cash dividend ever declared by Casey's.

"While some companies in the c-store industry are experiencing difficulties, particularly those with stores concentrated in larger metropolitan markets, we've continued to grow and expand in our smaller markets," explained Donald F. Lamberti, chairman and chief executive officer.

"Declaration of this dividend reflects our confidence in the future of Casey's and in our ability to continue to provide adequate funding for internal needs and expansion. Our shareholders have watched our company grow and develop," explained Lamberti. "This dividend represents a further step in rewarding them."

For the l990 fiscal year ended April 30, earnings were $8.4 million, or 73 cents a share, compared to $7 million, or 61 cents a share last year. Sales advanced to $500.7 million, compared to $419.2 million in the l989 fiscal year, a 19.4 percent increase.

Earnings in the l990 fiscal fourth quarter were $593,000, or 5 cents a share, compared to the l989 final quarter when Casey's experienced a loss of $1.2 million, or l0 cents share. Sales in the quarter were $118.7 million, compared to $l05.8 million in the year-ago fourth quarter.

Earnings for the year benefited from improved gasoline margins and volume. Casey's sold 227.6 million gallons of gasoline in the l990 fiscal year, a 17.9 percent increase over the previous year.

"Our strategy to become the major gasoline marketer in the areas that we serve has resulted in significantly higher gasoline sales," noted Lamberti. "This in turn has brought more customers into our stores to purchase in-store products, such as pizza, soft drinks and other items."

Casey's added 37 stores in fiscal l990. The company ended the fiscal year with 769 stores in its eight-state market area, 566 company-owned units and 203 franchise outlets.

Capital spending in fiscal l99l for store construction is expected to remain at levels consistent with past years. Casey's plans to add 20 new stores in the 199l fiscal year and will extensively renovate as many as l00 existing stores over the next 12 to 24 months.

#90170p7453 06/19/1990 ~PR Newswire

MACON, GA (JUNE 19) PR NEWSWIRE - The Bibb Company announced today that it has extended its previously announced offer to exchange $992.50 principal amount of its 14 percent senior subordinated notes due 1999 for each $1,000 principal amount of its 13 7/8 percent senior subordinated notes due 1999 and its solicitation of consents of the holders of the 13 7/8 percent notes to certain proposed amendments to the indenture relating to the 13 7/8 percent notes. The exchange offer and solicitation which were previously scheduled to expire yesterday at 5 p.m., are now scheduled to expire at 5 p.m., New York City time, on June 25, 1990.

The company said that it was extending the exchange offer and solicitation to accommodate those holders of the 13 7/8 percent notes who had not had the opportunity to tender their notes and deliver their consents prior to the expiration time. The exchange offer and solicitation are conditioned upon, among other things, the receipt of tenders by and consents from holders of at least 66 2/3 percent of the aggregate outstanding principal amount of the 13 7/8 percent notes.

The company announced that, based upon a preliminary count, as of 5 p.m. yesterday, of the $40,000,000 aggregate principal amount required to complete the exchange offer, an aggregate principal amount of approximately $28,472,000 of 13 7/8 percent notes had been tendered and related consents delivered.

SAN JOSE, CA (JUNE 19) PR NEWSWIRE - Cadence Design Systems Inc. (NASDAQ: CDNC), a worldwide leader in electronic design automation (EDA) software, today announced that it is porting its entire suite of EDA tools onto IBM's RISC System/6000(TM) family of engineering workstations.

The Cadence products that will be ported include: the Opus(TM) IC Design automation tools -- which include Gate Ensemble(TM) (for gate array place and route) and the industry-standard DRACULA(R) layout verification products -- for digital integrated circuit design; Amadeus(TM) System Design Series, for advanced systems-level (applications-specific integrated circuit and printed circuit board) design; Analog Artist(TM), for integrated front-to-back analog IC design; Microwave Musician(TM), the first commercially-available complete microwave design solution; and Veritool(TM) Series behavioral simulation product line. These Cadence products are based on Design Framework II(TM), the company's next generation architecture for integrating and linking EDA tools in a common design environment.

Marilyn Miller, manager of electrical systems at IBM stated, "As workstation companies develop products which increasingly comply with industry standards, market success will be determined by the quality of tools ported to the workstation as much as by the quality of the actual product and service." Miller continued, "The porting agreement will give IBM customers the opportunity to use Cadence's IC and system level design tools on the IBM RISC System/6000 family of engineering workstations."

Cadence's integrated circuit and system-level design automation products will be available during the fourth quarter of 1990.

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence operates throughout the United States, Europe and Asia. The company is headquartered in San Jose and is traded on NASDAQ under the symbol "CDNC."

OYSTER BAY, NY (JUNE 19) PR NEWSWIRE - Gregory E. Fischbach, chairman and chief executive officer for Acclaim Entertainment Inc. (NASDAQ: AKLM), has won the distinct honor of "Emerging Entrepreneur of the Year" for the Long Island region. Fischbach received the prestigious award as a regional winner of the annual national Entrepreneur of the Year(R) competition sponsored by Ernst & Young, Inc. Magazine and Merrill Lynch.

Fischbach started his career as a trial attorney for the U.S. Department of Justice and subsequently served as an assistant U.S. attorney. Moving into entertainment law, Fischbach later founded a firm with his brother and served as an adviser to such major music personalities as Crosby, Stills and Nash, The Eagles and Boz Scaggs, and international record and video companies including the Virgin Record Group, Polygram and Activision Inc. During this time he managed the Steve Miller Band, establishing Miller as a major rock and roll act worldwide.

Building on his former entertainment experience, in 1986 Fischbach became president of RCA Records International, where he was responsible for the company's activities outside of the United States. After the company's takeover, Fischbach examined his options and, upon contemplating a more independent alternative, came up with the idea to start Acclaim Entertainment Inc.

Fischbach's experience told him the video game was on the verge of an economic resurgence, he was familiar with Nintendo Co. Ltd. and the strong franchise they developed in Japan, and knew he had the ability to source video game products throughout the world.

Joining with an Activision associate and risking everything, Fischbach started Acclaim in a one-room office in Oyster Bay, N.Y. Three years and nearly $200 million in sales later, publicly owned Acclaim Entertainment Inc. is one of the leading publishers, marketers and distributors of home entertainment products in the country, heightened by its recent acquisition of LJN Ltd.

The "Entrepreneur of the Year" competition honors entrepeneurs whose ingenuity, hard work and perseverance have created and sustained successful, growing business ventures. Regional winners go on to the national competition in November in Scottsdale, Ariz., during which one entrepreneur is chosen and featured as the 1991 Entrepreneur of the Year in Inc.'s January cover story. All regional winners will be inducted into the Institute of American Entrepreneurs(sm).

Acclaim Entertainment Inc. is a leading publisher, marketer and distributor of home entertainment products under the Acclaim and LJN labels. These include Nintendo Entertainment System(R) software, Nintendo(R) Game Boy(tm) compact video system software, wireless remote controllers and hand-held electronic video games.

NEW YORK (JUNE 19) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) announced at today's PC Expo that Multimate 4.0 for networks, a version of the company's DOS-based word processor, is in production now and is expected to ship next week. At the same time, the company announced a reduction in the suggested retail price from $565 to $495 for both the network and single-user versions of Multimate version 4.0

Used in a network environment, Multimate version 4.0 includes the software for the server and one user. Software for additional users can be purchased for $195 per workstation, with no limit on the number of users.

Multimate 4.0 for networks is in production now and is expected to ship the week of June 25, 1990. The software carries a suggested retail price of $495 and will be available through Ashton-Tate authorized resellers.

Each copy of MultiMate 4.0 supports a server and one workstation. Additional workstations are $195 each; a package for five users is available for $895.

Upgrades from all previous versions of MultiMate are $75 per server and $75 for each additional workstation. An upgrade from MultiMate 4.0 single-user version to one network workstation is free of charge to registered users. Customers may purchase these upgrades through Ashton-Tate authorized resellers, or directly from Ashton- Tate Customer Service at (800) 2-ASHTON.

All data files created in the current version of MultiMate, as well as MultiMate Advantage II and previous versions of the software, are upwardly compatible with MultiMate 4.0 for networks.

Support: MultiMate version 4.0 for networks includes unlimited, free technical support and toll-free access to the Ashton-Tate Bulletin Board System. Customers may also purchase priority support programs for individuals or corporations.

Headquartered in Torrance, Calif., Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. the company's major product categories include database management systems word processing, integrated decision support, spreadsheets, graphics and software utilities.

Ashton-Tate has international operations in most countries around the world, with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of training and support services for individuals, corporations, and government agencies.

#90170p7461 06/19/1990 ~PR Newswire

JACKSON, MICH. (JUNE 19) PR NEWSWIRE - For the fifth consecutive year, Consumers Power Company remains the most productive major utility in the U.S., according to a new company survey. Consumers Power has the highest ratio of customers served per employee among the 20 largest electric and combination utilities in the nation.

During 1989 Consumers Power employed an average of 9,765 workers full and part time, serving 2,763,688 customers (almost 6 million people), a ratio of 283 customers per employee. The mean for the nation's largest utilities was 175 customers per employee.

The comparison is of the 20 largest utilities based on 1989 total company revenues. The survey compares combination gas and electric utilities,

such as Consumers Power Company, and all-electric utilities.

"Consumers Power's national leadership in customers served per employee is a demonstration of our commitment to keeping costs as low as possible," said Frederick W. Buckman, the utility's president and chief operating officer. "Every employee has a hand in maintaining our competitive position as Michigan's lowest cost major gas and electric supplier," Buckman added.

The 1989 average ratio of 283 customers per employee is an improvement over 1988, when Consumers Power employed 9,843 workers serving 2,715,419 customers, for a ratio of 276 customers per employee. Consumers Power has been the leanest major utility in America since 1985, the year in which a new management team assumed operating responsibility for the company.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

LONDON (JUNE 19) PR NEWSWIRE - British Steel plc (ADS - NYSE: BST) today announced that agreement has been reached with Klockner Werke AG for the purchase of Klockner's Mannstaedt Division, the major part of which is located at Troisdorf near Cologne. Completion of the acquisition is subject to the necessary approvals and consents from the regulatory authorities.

The Mannstaedt Division at Troisdorf produces about 200 Kt p.a. of hot rolled special sections and about 120 Kt p.a. of hollow and cold formed sections from hot rolled coil. Additionally there are two small subsidiary companies located in the Ruhr which fabricate mining arches.

The purchase consideration is DM300 million, subject to adjustment for actual levels of working capital at completion, and will be satisfied in cash. The turnover of the division in its last full financial year, ending Sept. 30, 1989, was DM460 million. In addition to profits generated by the Mannstaedt Division, further benefits will follow from synergy with British Steel.

British Steel is a world class producer of rolled steel sections of all types and this acquisition will enable it to maintain and improve its position in these product lines. The acquisition will provide British Steel with a manufacturing facility in Germany in line with its plans to

increase value added sales to the expanding German automotive, construction and engineering industries.

ATHENS, GA. (JUNE 19) PR NEWSWIRE - BellSouth Mobility and Sears (NYSE: S), the nation's largest retailer, have joined forces to offer cellular telephones and service to customers who shop at Sears in Athens, Ga.

In addition to the traditional mobile telephone units installed in automobiles, trucks and boats, Sears and BellSouth Mobility are offering the latest in portable, transportable and cellular mobile telephones from Motorola and Mitsubishi.

"This agreement represents yet another milestone in the growth of cellular telephone sales and service, which has become an important part of everyday life for many people throughout the southeast and the nation," said Mark Meehan, BellSouth Mobility's general manager in Athens.

"We're very pleased to be able to join with BellSouth Mobility to bring cellular telephone service to customers of America's favorite store," said Marv Stern, vice president, home appliances and home electronics for Sears. "Over the past year, Sears has been working with cellular providers to allow customers to purchase sets at more than 400 stores nationwide."

Sears customers have their cellular phone activated through a special BellSouth Mobility procedure called 'Express Connection,' which gives Sears customers a working mobile telephone number in minutes.

Sears also sells BellSouth Mobility service in Alabama, Kentucky, Louisiana, South Carolina, Florida and Tennessee.

BellSouth Mobility Inc., a subsidiary of Atlanta-based BellSouth Corp. (NYSE: BLS), is the largest provider of cellular telephone service in the southeastern United States. BellSouth Mobility currently serves more than 245,000 cellular telephone customers. BellSouth Mobility guarantees customer satisfaction.

LUND, SWEDEN (JUNE 19) PR NEWSWIRE - Gambro AB (NASDAQ: GAMBY), the Swedish medical technology group, reports that Gambro, acting through its wholly owned subsidiary Polo Acquisition Corporation, successfully completed its tender offer for all outstanding shares of common stock of COBE Laboratories, Inc. (NASDAQ: COBE), at a price of $37 per share in cash.

As was announced yesterday, the waiting period required by the Hart-Scott-Rodino Act with respect to the tender offer expired at 11:59 p.m., New York City time, on Friday, June 15, 1990.

Gambro has been informed by the depositary, Citibank, N.A., that 6,549,292 shares, including 613,915 shares tendered by guaranteed delivery, representing approximately 99.9 percent of outstanding COBE shares, had been validly tendered and accepted for payment pursuant to the offer. The offer expired at 5 p.m., New York City time on June 18, 1990. Polo Acquisition has accepted for payment all such shares which have been properly tendered and will begin promptly to make payment.

Gambro intends to effect the merger of Polo Acquisition into COBE Laboratories as promptly as possible pursuant to the terms of the merger agreement. All COBE Laboratories shareholders who have not tendered will be entitled to receive in the merger the same $37 cash price per share.

Commenting on the acquisition, Berthold Lindqvist, Gambro's president, said: "I am pleased that we have now successfully completed our offer to COBE's shareholders following the expiration of the waiting period required by the Hart-Scott-Rodino Act. The merger creates favorable conditions for the further strengthening of Gambro as a leader in the field of medical technology.

"The newly formed company, with 1989 pro-forma revenues of over $759 million, will operate in the four major business areas of dialysis, cardiovascular surgery, intensive care and anesthesia and blood component technology."

CONTACT: Olof Stocksen, director-new business development of Gambro, in Sweden, 011-46-46-169168; or Jennifer R. Wall or Ken Donenfeld of D.F. King & Co., in New York, 212-269-5550, for Gambro.

SAN DIEGO (JUNE 19) PR NEWSWIRE - Supercomputing Solutions, Inc. (NASDAQ: SUPR) today formally introduced the Configurable Architecture Parallel Processing System ("CAPPS") 9064, a new generation parallel supercomputer. The CAPPS-9064 is capable of sustained performance equal to today's

conventional supercomputers, with a price/performance ratio dramatically lower than any available competitive system.

The CAPPS-9064 has been the focus of extensive research and development. These efforts to achieve affordable supercomputing have been driven by user application based requirements. Success has been proven by the high sustained performance realized on a focused class of production application codes.

The CAPPS-9064 has the absolute performance required to support production class high-fidelity simulations, and is affordably priced. Supercomputing Solutions, Inc. is the first company dedicated to providing Industrial Supercomputing -- the application of affordable supercomputing to industrial problems.

Supercomputing Solutions, Inc. combines advanced parallel supercomputing technology with a strong foundation in a focused but critical set of engineering disciplines such as Computational Fluid Dynamics; Structures and Hydrodynamics; Electro-magnetics; Computational Chemistry and Molecular Modelling; and Large Scale Simulation. The company is the first to provide a full solution to industrial, commercial, and research organizations through hardware, software, systems integration, and sustained applications software support.

The CAPPS-9064 price range is $400,000 to $1,800,000, depending on its configuration. This supercomputer scales from eight to 32 nodes, in steps of one node, each with both high scalar and high systolic performance. Because of its affordability, the 9064 is being marketed to provide industrial production applications to both large and mid-size companies, as well as to advanced research and academic organizations.

TRW Inc. has ordered the first CAPPS-9064 for space vehicle modelling, including dynamic simulation of alternative space vehicle designs. Supercomputing Solutions, Inc. has also received a contract from Textron Defense Systems, a division of Textron Inc., to develop a CAPPS-9064 DYNA-3D based Armor/Anti-Armor analysis system.

Supercomputing Solutions, Inc. is a developer, manufacturer and marketer of supercomputing systems. This includes hardware and software that operates based on parallel processing - whereby dozens of computers are linked together to tackle mammoth assignments. As a result, Supercomputing Solutions is able to offer superior price/performance supercomputing capabilities across a broad spectrum of scientific applications.

CONTACT: Allan Simon, chairman and CEO of Supercomputing Solutions, 619-458-0400; or Douglas Sherk, 415-243-8603 or Paul Steidler, 212-986-5900, both of Morgen-Walke Associates for Supercomputing Solutions.

NEW YORK (JUNE 19) PR NEWSWIRE - Michael Stipe, lead singer of the rock group R.E.M., said, "...I don't drink tap water; chlorine makes me retch. I line-dry my clothes. I don't use disposable razors. I avoid buying anything from heinous companies. I clean my house with biodegradable products."

Stipe, a longtime environmentalist, has written an article in the current (July) issue of Sassy that includes photographs of his garbage and a list of ecologically correct products that are under his kitchen sink. These include: Dr. Bronner's Pure Castile Soap ("I wash everything with it, even me."); Murphy's Oil Soap ("For cleaning wood."); reusable plastic bags, paper bags, refillable glass jars; cloth instead of paper towels; baking soda ("Invaluable. Read the box for uses."); Borax ("Not bleach, not ever."); vinegar ("For cleaning windows and almost any surface."); and orange oil ("It smells good, cleans floors and keeps bugs away.").

"My goal as a media figure and a citizen is to provoke positive action and to inspire thought, to make people realize that they have choices and there are alternatives," Stipe writes.

Stipe also had this reaction to the Exxon Valdez oil spill: "I'd walk four miles to the next exit before I'd buy gasoline at an Exxon station again, ever. It's going to take a lot of convincing for me to believe that they have reformed themselves as a corporation."

MOUNTAIN VIEW, CA (JUNE 19) PR NEWSWIRE - IDEC Pharmaceuticals Corporation, a privately held biotechnology company located in La Jolla and Mountain View, Calif., has promoted Clifford Orent to the newly created position of Senior Vice President and Chief Operating Officer. Formerly Vice President, Corporate Development and General Counsel, Orent will continue his previous duties while taking on greater responsibilities. He will be based in Mountain View.

"His role will be to guide IDEC's day-to-day activities as we move toward commercialization," noted Dr. William H. Rastetter, company President and Chief Executive Officer. "Our first product is in advanced human clinical studies against B-cell lymphoma, and Orent's primary focus will be on enhancing the progress of this promising anti-idiotype antibody therapy. Manufacturing sciences, quality assurance and quality control, clinical

research, and regulatory affairs now report to him, as will future marketing and sales organizations. In addition, law and patent functions as well as IDEC Seiyaku, a wholly-owned subsidiary in Japan, continue to report to Orent, as part of his ongoing corporate development and legal responsibilities."

Orent, age 39, joined IDEC in February 1989 from Genentech, Inc., where he had served in various management positions since 1983. He was most recently responsible for international operations and public affairs activities at Genentech, including the establishment of the Research Institute for Molecular Pathology in Vienna, Austria, and Genentech Canada, the company's first marketing organization outside of the United States.

Orent began his career by holding legal positions with major law firms in Japan and California, after which he served as in-house international counsel for G.D. Searle and later Schering-Plough. At Schering, Orent moved into marketing and general management positions based in Switzerland and the United Kingdom. His transition into smaller, emerging companies came with a management position at Collagen Corporation, where he directed medical and international marketing activities.

IDEC Pharmaceuticals is a leader in the development of immunotherapies for severe and life-threatening diseases. The company's anti-idiotype antibody product for the treatment of B-cell lymphoma is in Phase III human clinical studies at major oncology centers in the United States and Canada. A second product, for the treatment of malignant melanoma, is in Phase I human clinical studies at two U.S. oncology centers. IDEC has several products in preclinical studies for the treatment of other cancers as well as certain autoimmune diseases, AIDS and ARC.

FORT LAUDERDALE, FL (JUNE 19) PR NEWSWIRE - The Keith Group of Companies, Inc. (NASDAQ: HKME) today reported record revenue and earnings for the third quarter and first nine months. The results were substantially higher than for the comparable periods a year ago.

Revenue for the third quarter, which ended May 31, 1990, was $2.79 million a 68 percent increase over 1989 third-quarter revenue of $1.66 million.

Net earnings were $1.01 million or $.39 per share of common stock, which compared to $11,441 or $.01 per share for the comparable reporting period last year.

"This is the second consecutive quarter in which we have achieved substantial increases in earnings and revenue," said Hugh Keith, chairman and chief executive officer of the company, which is one of the nation's leading developers of manufactured home communities.

"We anticipate continuing price appreciation in our developments and equity increases in land values as a result of our ongoing efforts to adhere to certain key criteria in our real estate projects," Keith said.

"Among these criteria are desirable locations, easy accessibility via major roads and highways, proximity to water, and our maintenance of high quality in the selection of homes, materials, landscaping and amenities," he noted.

For the nine months ended May 31, 1990, revenue totaled $6.58 million, 37 percent greater than the $4.80 million recorded in the first nine months last year. Net earnings for the nine months were $1.45 million or $.56 per share of common stock, compared with a loss of $184,576 or $.07 per share for the first nine months last year.

Keith attributed the company's improved strength to its implementation of a carefully developed new corporate strategy. The new strategy has called for The Keith Group to focus its efforts on its core business operations, particularly the development of high-end communities of manufactured homes while divesting itself of unrelated pursuits.

"Our focus is on marketing manufactured homes and home sites, and generating rental income and real-estate management fees," Keith said.

Keith pointed out, "Under our new strategy we are emphasizing targeted marketing and aggressive selling, and at the same time we're doing a better job of controlling expenditures to improve cost effectiveness without sacrificing the quality of our products and services."

He said that he expects the company to continue to perform well during the balance of this fiscal year and into next year even though other segments of the residential real estate industry have been experiencing difficulties. Keith added that the company has enhanced its marketing posture in Canada through an agreement which authorizes the sale of Keith Group homes to prospective homeowners in the province of Ontario.

Steven Z. Newman, Keith's vice president-corporate development and marketing, said, "We have been successful in differentiating our company from other real estate developers by tailoring our product precisely to the needs of our target markets."

Newman said that these efforts have begun to produce substantial results for the company. He explained that the corporation has begun to see

significant increases in sales activities at its Victoria Estates development in Port Charlotte, Fla. and its Bear Creek development in Ormond Beach, Fla.

"The Keith Group's communities offer the buyers we serve a premium residential product at very affordable prices," Newman pointed out. "We have a reputation for offering high-quality, spacious homes in carefully planned Florida communities that offer residents a resort style of life that includes tennis, golf, an on-site dining facility, swimming, club houses and other amenities."

Keith said that his company enjoys a very positive reputation among retirees from Canada, Northern U.S. cities and current residents of retirement communities in Florida.

The Keith Group of Companies, Inc., which trades on NASDAQ under the symbol HKME, develops and markets manufactured home communities and related properties in Florida to customers in the United States and Canada.

NEW YORK (JUNE 19) PR NEWSWIRE - The Topps Company, Inc. (NASDAQ: TOPPC), today reported record sales and earnings for its first quarter ended June 2, 1990. Net sales for the quarter increased to $86,242,000 as compared with $62,787,000, for the same period last year. Net income increased to

$13,940,000, or $.44 per share, as compared with $8,533,000, or $.27 per share, for the same period last year.

Arthur T. Shorin, chairman, stated that these results reflect a significant increase in sales of entertainment picture products featuring "New Kids on the Block" and "Teenage Mutant Ninja Turtles." He added that strong growth in each of the company's other product lines -- sports collectibles, gum and candy -- also contributed to the sales increase and favorable outlook.

During the first quarter, the company repaid $25,000,000 of its long-term debt, further reducing its indebtedness to $60,000,000, as of June 2, 1990.

Topps is well known for its collectible picture products, which feature sports and other entertainment themes, and its internationally registered trademark, Bazooka.

THE TOPPS COMPANY, INC.

ENGLEWOOD, CO (JUNE 19) PR NEWSWIRE - Williams Controls Inc. (NASDAQ: WMCO) said today that it had met with Chicago Capital Partners (CCP) regarding its unsolicited buyout proposal previously announced on April 20 1990.

In addition to the public disclosures available, CCP has requested from Williams additional financial information. The company says that it is now completing these requests and will continue its consideration of the CCP offer.

Williams Controls' president, Joseph W. Hovorka, stated that successful operations reflected in the second fiscal quarter of 1990 continue unabated and that both sales and earnings for the third quarter are proceeding on plan. "The order backlog is strong," continued Hovorka, "operating efficiencies continue to improve and the company's financial

condition remains strong."

Williams Controls Inc. manufactures and sells a wide range of pneumatic, electronic and hydraulic controls for the truck, bus, mining, construction refuse collection and heavy equipment markets. The product lines include approximately 250 different pneumatic products as well as specialized electronic and hydraulic products which are sold nationwide and in foreign countries.

#90170p7484 06/19/1990 ~PR Newswire

COSTA MESA, CALIF. (JUNE 19) PR NEWSWIRE - ICN Biomedicals Inc. (AMEX: BIM) today announced record results for the second quarter and six months ended May 31, 1990.

Net sales for the second quarter increased 149 percent to a record $35.3 million compared to $14.2 million in the comparable quarter last year. Net income for the quarter rose to a record $2.8 million, up 79 percent from $1.5 million a year ago. Earnings per share improved by 67 percent to $.25 versus $.15 last year.

Fiscal first half results reflected record net sales up 152 percent to $68.3 million compared with $27.1 million in the comparable year ago period. First half net income reached $4.7 million, an increase of 88 percent over $2.5 million reported for last year. Earnings per share equalled $.42 per share versus $.23 in fiscal 1989.

The company stated that its accelerated growth in the fiscal second quarter was attributed to continued strength of its base business coupled with internal efficiencies associated with the integration of Flow Laboratories into the company's operations. Flow Laboratories was acquired in November 1989 and has had a significant beneficial impact on the company's worldwide geographic expansion. International sales increased from $1.7 million in the previous year to $20.8 million during the fiscal second quarter. In addition, domestic sales achieved record levels.

In the six months ended May 31, 1990, the company paid a regular quarterly dividend of 3 1/2 cents per common share on Feb. 29, and May 1, 1990.

Commenting on the results, Fred Andrea, president and chief operating officer of ICN Biomedicals Inc., stated, "The reported results are further tangible evidence of the deeper market penetration the company is making in the worldwide biotechnology research and diagnostic market places."

FORT LAUDERDALE, FL (JUNE 19) PR NEWSWIRE - CarePlus, Inc. (NASDAQ-NMS: CPLS) has established its twentieth branch office in Columbus, Ohio, according to Bob L. Wood, chairman and CEO.

The expansion marks CarePlus' second Ohio-based office; the company's Cleveland branch was established in 1984.

"The Central Ohio area, with numerous teaching hospitals and a large population base, represents a major target market for CarePlus," said Wood. "This expansion is in keeping with our growth plans for 1990 and beyond."

The branch will be managed by James Schwamburger, formerly director of Sales and Marketing for Ultimate Care. Schwamburger is a graduate of Ohio State University with a master's degree in business administration and a bachelor of science in pharmacy and biological sciences. His prior experience includes serving as Hospital/Oncology sales representative for Schering Corporation.

CarePlus is a high-tech home infusion therapy provider treating patients who require chemotherapy, nutritional feeding through either a vein or a tube, intravenous (I.V.) antibiotic therapy, pain treatment, fluid administration and other high-tech home infusion therapies.

Currently, CarePlus has offices serving patients in the metropolitan areas of Miami/Fort Laurderdale, Tampa, Orlando, Jacksonville, Atlanta, Richmond/Virginia Beach, Baltimore/Washington, Philadelphia, Pittsburgh, Raleigh, New York Metro Area, Providence/Boston, Cleveland, Chicago, Houston, Seattle, Anaheim, Oakland/San Francisco and Kansas City.

CarePlus, Inc. securities are traded on the National Market System under the symbols: Common Stock/CPLS, and Class "A" Redeemable Warrants/CPLSZ.

LAGUNA HILLS, CA (JUNE 19) PR NEWSWIRE - Advantage Life Products, Inc. (NASDAQ: ADVT) and More Direct Health Products, Inc., Carlsbad, Calif., have signed a letter of intent to settle all outstanding litigation between the two companies, as well as extend in perpetuity the CigArrest Stop Smoking System retail distribution agreement between the two

companies originally scheduled to expire on Jan. 9, 1995. Announcement of the letter of intent was jointly made here today by Charles Sleichter, president and CEO of Advantage Life and John Bancroft, president and CEO of More Direct.

The tentative agreement settles a lawsuit brought by More Direct in November, 1989 charging that Advantage breached the distribution agreement between the two companies. Advantage counter-sued for $50 million in damages in December, 1989.

As part of the proposed agreement granting Advantage an extension in perpetuity for the CigArrest product line retail distribution, Advantage will issue More Direct 400,000 warrants exercisable at the price of Advantage's common stock at the close of trading on June 12, 1990. The proposed agreement requires Advantage to increase annual purchase minimums after 1995. Unit purchases will increase by 15 percent annually thereafter for as long as the agreement remains in effect.

As part of the proposed settlement, John Bancroft will be nominated for election to Advantage Life's board of directors at the annual shareholders meeting in September, 1990. Advantage and More Direct have further agreed to actively pursue strengthening their relationship to maintain CigArrest's dominance in the retail smoking cessation market place. The final agreement between the two companies is expected to be signed within 30 days.

More Direct Health Products, Inc. is one of the leading self-care health product direct marketing companies in the United States and is the originator of the CigArrest Stop Smoking System. Advantage Life Products, Inc. is the exclusive retail distributor of the CigArrest product line and is the creator of Smoker's Choice, a proprietary smoking alternative product.

ATLANTA (JUNE 19) PR NEWSWIRE - BellSouth Mobility and Sears (NYSE: S), the nation's largest retailer, have joined forces to offer cellular telephones and service to customers who shop at Sears stores in Atlanta, Athens and Macon.

In addition to the traditional mobile telephone units installed in automobiles, trucks and boats, Sears and BellSouth Mobility are offering the latest in portable, transportable and cellular mobile telephones from Motorola, Mitsubishi and NovAtel.

Sears customers have their cellular phones activated through a special BellSouth Mobility procedure called 'Express Connection,' which gives Sears customers a working mobile telephone number in minutes.

Sears also sells BellSouth Mobility service in Alabama, Kentucky, Louisiana, South Carolina, Florida and Tennessee.

BellSouth Mobility Inc., a subsidiary of Atlanta-based BellSouth Corp. (NYSE: BLS), is the largest provider of cellular telephone service in the southeastern United States. BellSouth Mobility currently serves more than 245,000 cellular telephone customers. BellSouth Mobility guarantees customer satisfaction.

NEW YORK (JUNE 19) PR NEWSWIRE - The Keebee Corporation (3KEBE) today announced the signing of an agreement pursuant to which Keebee has agreed to acquire, for common stock of Keebee, two redeemable subordinated debentures of two Panamanian corporations, Guardian Savings & Guaranty, Inc. (Guardian) and Bristol Merchant Savings, Inc. (Bristol), each in the face amount of $50 million. Each debenture is due May 1, 1999 and bears interest of 12 percent until May 1, 1991 and 11.5 percent thereafter until maturity. Interest is payable quarterly, with the next interest payment due on July 15, 1990.

In exchange for the two debentures, Keebee has agreed to (a) effect a one-for-twenty reverse split of the 75,000,000 shares of Keebee common stock now outstanding; and (b) issue 33,750,000 shares of Keebee common stock (90 percent) after giving effect to the one-for-twenty reverse split.

Bristol and Guardian have each represented to Keebee that their June 30, 1990 audited financial statements will show that each has assets of $1 billion and $100 million in net worth. Ivan M. Kerzner is proposed to be the chairman of Keebee upon completion of the acquisition. Non-rescindable completion of the transaction is subject to, among other things, Keebee being satisfied, after its due diligence, that all of Bristol's and Guardian's warranties and representations in the agreement are true and correct, for which purpose Kerzner will be meeting in Panama with representatives of both corporations within a month.

CONTACT: Ivan M. Kerzner of Keebee, 201-586-1677.

#90170p7505 06/19/1990 ~PR Newswire

PITTSBURGH (JUNE 19) PR NEWSWIRE - Four new members of the board of directors of the Air & Waste Management Association will take office during the association's 83rd Annual Meeting & Exhibition, June 24-29, at the David L. Lawrence Convention Center in Pittsburgh, it was announced today.

They were elected by ballot vote conducted among the association's international membership.

The new directors, who will each serve a three-year term, are: -- Kenneth N. Weiss, foil & materials technology manager, Reynolds Metals Co. (NYSE: RLM), Richmond, Va.;

-- Ronald G. Ostendorf, section head, environmental control department, The Proctor & Gamble Co. (NYSE: PG), Cincinnati;

-- John F. McDonald, assistant director, Great Lakes Regional Office, International Joint Commission, Windsor, Ontario; and

-- John S. Kinsey, principal environmental scientist, Midwest Research Institute, Kansas City, Kan.

A member of the association since 1978, Weiss currently serves as membership chair of the association's South Atlantic Section. He is a fellow member of the association and was instrumental in founding the Old Dominion Chapter. He has been honored with the South Atlantic Section's Distinguished Service Award and the Old Dominion Chapter's Edgar B. Boynton Award.

A member of the association since 1978, Ostendorf is currently vice chairman of the association's Communications & Marketing Council and a member of the International Affairs Committee. Ostendorf studied mechanical engineering at the University of Cincinnati.

McDonald reviews and provides operational guidance in administrative matters at the Great Lakes Regional Office, International Joint Commission. He supervises the Data Management and Analysis Section and provides engineering expertise on air and water pollution issues. The commission, a bilateral creation of the U.S. and Canadian governments, has charged its Great Lakes Office with the ongoing assessment of the quality of the Great Lakes environment.

Kinsey has almost 19 years of experience in the field of air pollution control and air quality management. This includes approximately eight years in government, two years in consulting and the last nine years in research. Since joining the Midwest Research Institute in 1980, his work has involved controlling air pollution.

The Air & Waste Management Association provides a neutral forum where technical and managerial information about air pollution control and waste management is shared among professionals, managers and decisionmakers. The worldwide network of nearly 11,000 members represents all disciplines and provides all viewpoints of environmental issues.

BENTON HARBOR, MI (JUNE 19) PR NEWSWIRE - The board of directors of Whirlpool Corporation (NYSE: WHR) at its meeting today increased the number of directors on the Whirlpool board to 13 and appointed Allan D. Gilmour, executive vice president of Ford Motor Company and president of the Ford Automotive Group, to fill the new board position.

Gilmour holds a bachelor of arts degree in economics from Harvard University and a master of business administration degree from the University of Michigan. He joined Ford Motor Company in 1960. Following a series of executive positions in finance including five years at Ford Motor Credit Company, Gilmour was elected vice president and controller in 1979. He became vice president, external and personnel affairs, in 1984 and executive vice president and chief financial officer in 1986. He moved to executive vice president, international automotive operations, in 1987 and to his current position March 1 of this year.

Gilmour serves on the boards of trustees of the University of Detroit,

Henry Ford Health System and the Visiting Committee of the University of Michigan Business School.

Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, the company manufactures in ten countries and markets products under nine major brand names in more than 45 countries.

#90170p7507 06/19/1990 ~PR Newswire

ROCKVILLE, MD (JUNE 19) PR NEWSWIRE - GE Information Services (GEIS), a leading provider of global electronic message processing services, has announced the development of a LAN (local area network) Connector for the Message Handling System (MHS), the evolving de facto standard for LAN E-Mail systems.

GEIS' MHS LAN Connector allows companies that have MHS compatible LAN Mail systems to have immediate access to GEIS' full line of QUIK- COMM System services. QUIK-COMM service is a global electronic message processing and information service.

The MHS LAN Connector is now available for use with CompletE-Mail from Transend and eMAIL from Da Vinci Systems. It will provide access to other MHS LAN E-Mail systems in the near future.

The support of the MHS de facto standard, which is strongly endorsed by Novell and other LAN developers, is a key component of GEIS' LAN Connector strategy.

Transend's CompletE-Mail was selected for early interconnection with GEIS' QUIK-COMM System because of its similarity to PC Mailbox. PC Mailbox, first offered by GEIS in 1984, is a very successful PC front-end software package for the QUIK-COMM System, with over 40,000 individual copies sold. As PC Mailbox clients move to LANs, the CompletE-Mail/MHS LAN Connector option affords them the benefit of both local LAN Mail when required, and connection to wide-area QUIK-COMM System services when required.

Da Vinci System's eMail was selected for early MHS LAN Connector access because of its broad marketplace presence and widespread demand by GEIS clients.

GEIS' MHS LAN Connector was developed to the Action Technology MHS specifications. Almost any MHS compatible E-Mail system should be compatible with it. Some current MHS-compatible LAN E-Mail systems include: cc:Mail, Higgins, The Coordinator, Word Perfect and Galaxy.

GEIS' LAN Connector program is one of the product offerings supported under GEIS' recently announced BusinessConnect umbrella of electronic messaging system connectivity services. GEIS offers a range of interconnections to various private mail systems, including: IBM PROFS, IBM DISOSS, DEC ALL-In-1, VMSMail, Wang OFFICE, IBM AS/400, System/3X, 3COM 3+Mail LAN Mail, and cc:Mail Lan Mail. GEIS also provides X.400 interconnections between its QUIK-COMM System and Western Union EasyLink, AT&T Mail, and MCI Mail.

CHARLOTTE, NC (JUNE 19) PR NEWSWIRE - Piedmont Mining Company, Inc. (NASDAQ: PIED) today announced a large increase in the mineral inventory at its producing Haile Gold Mine near Kershaw, South Carolina. This increase is based on recent driling results, more detailed cross-sections and a new compilation of the mineral inventory by independent consulting mining geologist, David C. Jonson of Golden, Colorado, in conjunction with engineers at American Mine Services, Inc. of Denver, Colorado.

"The deeper drilling we have been doing since last winter is expensive, but it sure pays off," said Robert M. Shields, Jr., Chairman and Chief Executive Officer of Piedmont. "It has added a whole new dimension to our Haile property. This new compilation of our mineral inventory is finally confirming our confidence in the potential of the Haile property."

Analysis of the drilling data, the continuity of mineralization and new cross-sections have resulted in a new proven and probable mineral inventory at the Haile Mine of 11,833,321 tons with an average grade of 0.053 ounces of gold per ton containing a total of 623,567 ounces of gold with a cutoff grade of 0.01 ounces per ton. On December 31, 1989 the reported mineral inventory was 2,611,038 tons averaging 0.046 ounces per ton containing 117,064 ounces. The new mineral inventory, which includes conservatively estimated proven, probable and possible categories, at the Haile Mine now totals 19,265,000 tons with an average grade of 0.048 ounces of gold per ton containing a total of 925,000 ounces of gold.

Especially promising are the encouraging metallurgical test results and the fact that four of the major zones of mineralization are still open in multiple directions. Additional drilling, metallurgical testing and engineering studies are planned to further delineate this mineralization and to determine the mineable tonnage and the most economic method of mining and processing it. Discussions are underway for additional financial support to accelerate the drilling and feasibility studies that are necessary to determine the economics of a larger scale operation on

the property.

Piedmont is engaged in exploration, mining and production of gold in the southeastern United States. Piedmont pioneered the resumption of gold mining in the Southeast in early 1985 at its Haile Gold Mine employing for the first time the heap leaching process in the humid southeastern climate. Through its wholly-owned subsidiary, Mineral Mining Company, Inc., Piedmont is also engaged in mining and processing white, fine-grained Mineralite(R) mica at its facility near the Haile Mine. Last month Piedmont also announced a proposed joint venture with Corona Corporation, one of the largest gold mining companies in North America, to explore for and develop titanium-bearing heavy mineral sands in the Carolinas.

CHARLOTTE, NC (JUNE 19) PR NEWSWIRE - Piedmont Mining Company, Inc. (NASDAQ: PIED) today announced a large increase in the mineral inventory at its producing Haile Gold Mine near Kershaw, South Carolina. This increase is based on recent driling results, more detailed cross-sections and a new compilation of the mineral inventory by independent consulting mining geologist, David C. Jonson of Golden, Colorado, in conjunction with engineers at American Mine Services, Inc. of Denver, Colorado.

"The deeper drilling we have been doing since last winter is expensive, but it sure pays off," said Robert M. Shields, Jr., Chairman and Chief Executive Officer of Piedmont. "It has added a whole new dimension to our Haile property. This new compilation of our mineral inventory is finally confirming our confidence in the potential of the Haile property."

Analysis of the drilling data, the continuity of mineralization and new cross-sections have resulted in a new proven and probable mineral inventory at the Haile Mine of 11,833,321 tons with an average grade of 0.053 ounces of gold per ton containing a total of 623,567 ounces of gold with a cutoff grade of 0.01 ounces per ton. On December 31, 1989 the reported mineral inventory was 2,611,038 tons averaging 0.046 ounces per ton containing 117,064 ounces. The new mineral inventory, which includes conservatively estimated proven, probable and possible categories, at the Haile Mine now totals 19,265,000 tons with an average grade of 0.048 ounces of gold per ton containing a total of 925,000 ounces of gold.

NEW YORK (JUNE 19) PR NEWSWIRE - General Instrument Corporation (NYSE: GRL) announced today the appointment of Ronald A. Ostertag as president of its power semiconductor division located in Hicksville, N.Y., effective Sept. 1, 1990.

Ostertag succeeds Christopher F. Sutphin who has elected to take early retirement next year.

Ostertag is presently senior vice president of operations for General Instrument's VideoCipher division. He joined General Instrument in 1978 as vice president and general manager of Far East operations for the power semiconductor division and was later named vice-president and general manager of the company's transportation electronics division. He has been with the VideoCipher division since 1988. Prior to joining General Instrument, Ostertag spent nine years in various domestic and international positions with National Semiconductor Corporation.

The power semiconductor division is a leading supplier of low-to medium-power rectifiers and rectifier products for a variety of consumer and industrial applications.

In making the announcement, George E. Safiol, General Instrument president and chief operating officer, said that Sutphin will remain with General Instrument and work with Ostertag during a three-month transitional period. After that Sutphin will be on special assignment until his retirement on July 1, 1991.

"Chris Sutphin is a highly-valued employee, manager and officer. During his 26 years with General Instrument he has done an excellent job in many positions including president of the power semiconductor division. His experience, talent and dedication will be missed when he retires," said Safiol.

"We are pleased, however, that we have Ron Ostertag to succeed him in this important position. Ron has done outstanding work in the VideoCipher, transportation electronics and power semiconductor divisions. We believe he will continue to provide the leadership needed for General Instrument to remain one of the world's leading rectifier manufacturers," Safiol concluded.

Ostertag has a degree in industrial engineering from Georgia Institute of Technology. He and his wife, Susan, have three children and reside in San Diego, Calif. They will relocate to the New York metropolitan area.

General Instrument is the industry leader in cable TV electronics, coaxial cable and satellite encryption systems. The company's primary strategies are directed toward communications systems. The common stock of the company is listed on the New York, Midwest, Pacific and London stock exchanges.

ORLANDO, FL (JUNE 19) PR NEWSWIRE - A revolutionary technology that will lead to widespread availability of cordless, pocket-size telephones was demonstrated publicly today by GPT Ltd., the leading U.K. telecommunications equipment company.

GPT's demonstration of the second generation of cordless telecommunications technology (CT2), which took place at the PACE trade show here, marked the first time CT2 has been in operation publicly in the United States.

"We view this as a breakthrough technology, one that will provide low cost portable and high-quality communications for users no matter where they are, at home, work or on the street," said Herb Holley, manager of business development for GPT Mobile Systems USA.

"We're seeing an incredible demand for CT2 service in the U.K. even though it is just moving out of the trial stage into commercial service," Holley added. "We are seeing similar reactions in the United States."

The company anticipates that several major U.S. telephone companies will begin trials using GPT equipment beginning this summer and that service could be available in the United States within months.

CT2 telephones, which can be used to make calls, work off of a base station, which sets up calls through public telephone networks. These

base stations, which also can be plugged into existing telephone sockets, can be placed most anywhere, both indoors and outdoors.

GPT's CT2 product line provides base stations and pocket telephones for individual use in the home and office. The technology is also capable of forming public networks that provide CT2 service over extensive areas.

Holley explained that, in their broadest use, CT2 base stations can be strategically located to form a public network that would permit users to make calls from their pocket telephones wherever they are. In the United Kingdom this service is referred to as Telepoint, and operators are creating networks by locating base stations in places such as airports, railway stations, shopping malls and even on streets.

"The same technology is being used to develop cordless business telephone systems," said Holley. GPT, for example, will soon introduce a digital, cordless PABX (Private Automatic Branch Exchange), the sophisticated equipment that serves as office switchboards.

"You could, conceivably, use CT2, instead of wires and cables, to outfit new apartment buildings with telephone service," he added.

GPT's CT2 technology is being used for trials in Germany, France, Finland and New Zealand, and the company is involved in negotiations with telephone administrations and companies elsewhere in Europe, the Far East, Australia and Canada, as well as in the United States.

GPT is a global telecommunications company operating in major world markets. It is the leading supplier of equipment in Europe and North America and has a major presence in both public and private sector products for all types of information handling systems. In North America, GPT is represented by Stromberg-Carlson Corporation, the third largest supplier of telecommunications equipment in the United States.

MAULDIN, SC (JUNE 19) PR NEWSWIRE - Hoechst Celanese in a ceremony here today named the Mauldin (S.C.) Plant of Henkel Corp. a certified supplier of finishes for its cellulosics fibers plants at Narrows, Va., and Rock Hill, S.C.

The finishes provide lubrication and static protection to acetate fibers produced at the two Hoechst Celanese plants.

Certification means that the Hoechst Celanese plants routinely accept shipments of finishes from Henkel's Mauldin Plant based upon assurances that the product meets agreed-upon standards.

"Henkel and Hoechst Celanese have developed a partnership that extends much deeper than a supplier-customer relationship," says Hoechst Celanese Textile Fibers' R.R. Fisher, vice president, manufacturing. "Hoechst Celanese personnel work closely with Henkel personnel throughout the management chain. When someone has a question, he or she knows the person to call and the result is outstanding performance in delivery and quality."

The certification-maintenance agreement between Henkel and Hoechst Celanese is designed to assure product quality, enhance productivity, reduce costs and enhance the manufacturer's competitive position in the marketplace.

Adds Jeff Porterfield, vice president of Henkel Corp.'s Textile Chemicals Division, "We've worked hard to get to this point and we are honored to receive this certification. But we recognize that our quality partnership with Hoechst Celanese does not stop here. It is a continuing improvement process."

Hoechst Celanese, a subsidiary of Hoechst Ag of West Germany, is a Fortune 100 corporation with leading positions globally in chemicals, fibers and film, advanced materials and the life sciences.

Henkel Corp., based in Gulph Mills, Pa., is the U.S. operating company of the Henkel Group, headquartered in Duesseldorf, West Germany. Henkel Corp. provides chemicals and services to manufacturers in almost every industrial sector.

CONTACT: James P. Allen, 704-554-2224, or Chester L. Caulder, 704-554-2025, both of Hoechst Celanese Corporation, or Lee Linka of Henkel Emory Group, 513-530-7333.

BOULDER, CO (JUNE 19) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ: CELL), the Colorado-based biopharmaceutical firm specializing in the development of biologic response modifier (BRM) technology, today announced the election of Lowell D. Miller, Ph.D., formerly senior vice president-research and development of Marion Laboratories, Inc., to the company's board of directors. Miller's appointment is effective immediately.

From 1977 through 1989, Miller headed Marion's worldwide corporate research and development efforts. Until his retirement in 1989, following Marion's merger with the Dow Chemical Company and its Merrell Dow Division Miller oversaw the growth of Marion's research and development efforts. At Marion, Miller was responsible for all research, development and process development functions, management of clinical trials and regulatory affairs, and served as Marion's chief scientist. In addition, Miller headed Marion's scientific and regulatory evaluation efforts concerning new product opportunities for Marion and all of its subsidiaries. He also served as a member and as an advisor to Marion's board of directors.

Miller also is the holder of several patents dealing with pharmaceutical products and pharmaceutical manufacturing processes and is the author of numerous scientific publications in the life science and pharmaceutical fields. Currently, Miller is involved with various scientific endeavors in Missouri where he maintains a pharmaceutical consultancy.

Commenting upon Miller's election as the newest director of Cell Technology, W. Terrance Schreier, chairman, president and chief executive officer of the company, noted, "Dr. Miller brings a vast repository of scientific and technological knowledge to our board. In addition, Dr. Miller has significant industrial and technological experience that will guide Cell Technology in the development of its BRM technology and, equally important, with the integration of various pharmaceutical company or product line acquisitions which the company anticipates announcing later this year."

Cell Technology, Inc. is a biotechnology company specializing in the field of immunotherapy. The company's innovative BRM products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

ST. PAUL, MN (JUNE 19) PR NEWSWIRE - Northwest Airlines today named Frederick B. Rentschler president and chief executive officer, and a director. Frederic V. Malek, formerly Northwest president, becomes vice chairman.

Rentschler, president and chief executive officer at Beatrice Company, will manage the operations of Northwest, America's fourth largest airline. He has been in chief executive positions for 16 years, including the top post at Beatrice for the past three years. Earlier, he was president and chief executive of Beatrice's U.S. food group and an executive vice president of the parent company. Beatrice encompasses many well-known food products, including Hunt tomato products, Wesson oils, Swift and Eckrich meats, LaChoy and Orville Redenbacher popcorn.

"Fred Rentschler is a welcome addition to our executive team," Alfred A. Checchi, Northwest chairman, said. "He brings impeccable leadership credentials, strong consumer marketing experience and shares our commitment to making Northwest America's number one airline. Fred is a proven operating executive who shares our commitment to quality in every aspect of the business."

Malek said his many outside commitments made it increasingly difficult to devote the full time necessary to lead Northwest. Malek will maintain his involvement with the airline's strategic planning and decision making. He also will continue his role with the customer preference and employee relations task forces and other airline activities.

"I have always felt it critical to have a top executive full time at the helm," Malek said. "We have that now in Fred Rentschler, a man who brings added skills and experience to strengthen our collective leadership."

In addition to his experience at Beatrice, Rentschler, 50, was president and chief executive officer of Hunt-Wesson from 1980 to 1984 and, earlier, was president and chief executive of Armour-Dial Inc.

A native of Cincinnati, he earned a bachelor's degree in history and economics from Vanderbilt University and a master's in business administration from Harvard Business School. Rentschler also served as a captain in the United States Marine Corps from 1960 to 1965.

SAN DIEGO (JUNE 19) PR NEWSWIRE - The Bank of Southern California has been granted permission to convert to a state charter by the California State Banking Department. The process is expected to take approximately 45 days.

"Converting from a federally chartered bank to a state bank will significantly improve the bank's flexibility towards customer service and will increase the competitive edge enjoyed by the bank in recent years," according to Ronald P. Bird, president and chief executive officer of the bank.

"This important development will help us continue our progress forward in this changing industry," said Bird. "Attaining the Super Premier Performing Bank Status by Gerry Findley and Associates for our Bank's efforts during 1989 reinforces our direction and mission of safety and soundness for our shareholders and depositors; to further improve our personalized customer service and product availability; and to continue safely laying the foundation of the Bank's prosperity in the years to come " continued Bird.

Under a state banking charter, Bank of Southern California will now have expanded loan limits governing the maximum loan that can be made to any one borrower. State chartered banks can also develop separate subsidiaries and joint venture arrangements to allow for more flexibility in investment opportunities and increased competitiveness in the banking industry.

Of utmost importance, Bank of Southern California's accounts will continue FDIC Insurance. Bank of Southern California meets or exceeds all capitalization requirements of both FDIC and the California State Banking Department.

"We now have the opportunity to move into new realms," said Bird. "But our commitment to the customer and meeting their needs to the fullest extent possible will never change."

Founded in 1979, Bank of Southern California has three San Diego offices. All offices offer complete Escrow Services in addition to a complete line of other banking services. The offices are located at 1620 Fifth Ave., at 1004 Rosecrans St. on Point Loma, and in the Midway, Rosecrans area at 3026 Midway Drive. "Your Community Partner," Bank of Southern California is committed to providing the highest quality and most innovative products and services to San Diego County.

PIRAEUS, Greece (JUNE 19) PR NEWSWIRE - Anangel-American Shipholdings Limited (NASDAQ: ASIPY) today announced that it has concluded a Memorandum of Agreement for the sale of the group's 65,200 DWT, 1982 built, Panamax bulk carrier, the MV "Alpha Flame." Buyers have established a deposit equivalent to 10 percent of the contract price and the vessel will be delivered in October/November 1990 after the conclusion of its present charter commitments.

Assuming satisfactory completion of the transaction, management estimates that profit upon disposal will be approximately US$7 million, which will be accounted for in the company's 1991 fiscal year (July 1, 1990 to June 30, 1991). In addition to the company's regular operating income, the group recorded a profit in November 1989 (fiscal 1990) of US$6 million from the sale of an associated company's vessel, the MT "Marianna II," while in the 1989 fiscal year realization of shipping investments generated US$7,380,000.

After the conclusion of the sale of the company's fleet will total seventeen vessels: four Panamax bulk carriers; eight handysize bulk carriers; four multipurpose dry cargo vessels and one product tanker.

GLEN BURNIE, MD. (JUNE 19) PR NEWSWIRE - Construction of Leedmark, the first "one-stop shopping hybrid-market" to be built in the United States, began Tuesday in Glen Burnie.

Company officials said that when the $10 million store opens next spring it will represent a totally new retailing concept.

Didier Leconte, chairman and chief executive officer of New Eldis Corporation, said Leedmark stores will provide consumers with retail facilities that place special emphasis on being responsive to consumer needs. He said the stores will improve the way most people shop by offering "one-stop shopping" where consumers can buy all of their basic food, non-food and apparel items in one place.

Anne Arundel County Executive James Lighthizer said: "On behalf of our family of corporate citizens, I am happy to welcome Leedmark to Anne Arundel County. We are pleased to have been selected as the site of this unique retail complex, which will create 350 jobs, and generate more than $3 million in state and county tax revenues annually. We wish Leedmark every success."

Leedmark, situated on 25 acres of land and featuring more than 1,500 parking spaces, will be located near the intersection of Maryland Routes 10 and 710. The store itself will feature 130,000 square feet of selling space, plus warehouses, a playroom for the children of customers visiting the store, and concession outlets such as fast food restaurants, banks, video rental stores and other service-oriented facilities.

While the store is being built, Glenmark's temporary hiring and buying offices for Leedmark will be located at 6740 Baymeadow Drive in Glen Burnie. Correspondence should be sent to P.O. Box 550 at the same address. The phone number is 301-787-0226.

ROCKY MOUNT, NC (JUNE 19) PR NEWSWIRE - Centura Banks Inc. has chosen West, Pausback & Vaughan Inc. of Durham as its advertising agency of record.

The agency was chosen after a formal review of the agencies for Peoples Bank and Planters Bank, which plan to merge to form Centura this fall pending regulatory approval. West, Pausback & Vaughan is Planters' agency and Lewis Advertising Inc. of Rocky Mount is Peoples' agency. "This was a difficult choice between two very good advertising agencies," said Planters Marketing Director Thomas H. Ficquette, who will hold the same position for Centura. "We are confident that West, Pausback & Vaughan will do an exceptional job producing highly creative, effective

advertising for Centura Banks."

The agency's first task will be to plan and produce an image advertising campaign to introduce the Centura name and identity. An advertising budget has not been set.

Centura Banks Inc. will be the eighth largest bank holding company in North Carolina with assets of $2.5 billion.

KENT, CT (JUNE 19) PR NEWSWIRE - James Fallacaro, president and CEO of Avtr Systems, Inc., (Avtr) announced today that Avtr and North Star Distributors, Inc. d/b/a "Metro" of North Providence, R.I., have reached an agreement for the acquisition of Metro by Avtr.

Metro is a wholesale distribution company that currently has exclusive distribution rights to a number of films and magazines along with an exclusive purchase agreement with 20 retail outlets located in the northeast. Metro specializes in the international distribution of video tapes, magazines etc., to retail stores, other wholesale distribution companies and mail order houses as well.

Metro boasts assets of no less than 4.5 million dollars, while gross revenues have exceeded $500,000 per month during the second quarter of 1990.

Fallacaro advises that the Metro acquisition should provide a "Ready Market" for Avtr's unique patented systems, (U.S. patent no. 4,771,344), utilizing Metro's international distribution network and its exclusive retail outlets.

The terms of the acquisition for 100 percent of the stock of Metro are: the payment of 3,500,000 shares of the common stock of Avtr (subject to rule 144).

Metro's chief financial officer will remain employed by Metro for a 24

month period.

Metro's chief financial officer will enter into a non-compete agreement for a period of five years, for which Avtr has agreed to make a one time payment of $250,000.

Finally, this acquisition, with its assets and revenues, will position Avtr to be listed on NASDAQ or a National Exchange.

This agreement is subject to the usual and customary warranties, a final and complete due diligence, and stockholder and board of directors approval.

It is anticipated that the closing of this acquisition will take place within sixty days.

CONTACT: James Fallacaro, president of Avtr Systems, Inc., 203-927-4665.

#90170p7555 06/19/1990 ~PR Newswire

DENVER (JUNE 19) PR NEWSWIRE - Gold King Consolidated Inc. (GKC) announced that on June 18, 1990, the first gold and silver dore was poured at its Adelaide Crown open pit gold mine in Humboldt County, Nev. GKC leased the Adelaide Crown property from Icarus Exploration Co. (Icarus) of Portland, Ore., a wholly owned subsidiary of Grand Teton Industries Inc. (VSE: GTT) of Vancouver, B.C., in December 1989. The project had a significant amount of pre-production work completed prior to the agreement with GKC. As a result, in six months GKC was able to put the property into production. GKC,through its wholly owned subsidiary, Gold King Nevada Inc., is the operator of the property.

GKC anticipates that mining will increase to 60,000 tons per month and gold production is projected at 20,000 equivalent ounces per year.

A due diligence review commissioned by GKC confirmed that the property has proven reserves of 585,000 tons at a grade of .043 oz/ton gold and 1.313 oz/ton silver in the partially developed "South" pit. In addition, GKC estimates this pit has proven reserves of 165,000 tons at .015 oz/ton gold and 1.100 oz/ton silver which can be processed as run of mine ore. The due diligence review also identified numerous exploration targets on the property which offer the potential for significant additions to total reserves. GKC intends to begin drilling these exploration targets in the near future. The company expects this exploration to significantly expand the reserves of the project.

The Adelaide Crown property covers approximately 2,100 acres on the "Getchell Structure," which hosts the Pinson, Prebble, Getchell, and

Rabbit Creek mines. The Getchell Structure, which is in Humboldt County between Winnemucca and Battle Mountain, appears to be one of several geological features that shape a new gold district which, in time may rival, if not surpass the prolific Carlin Trend. Already most major North American gold producers are active in the district. Gold King is currently evaluating additional prospects in the district.

From the open pit production of the South parcel, GKC will receive 100 percent of the net profits until it has recouped its investment, less the cost of tangible personal and improved real property. Thereafter, GKC will receive 65 percent of the net profits from the property and Icarus will receive 35 percent until Icarus has received approximately an additional $850,000 at which time the net profits sharing ratio becomes 95 percent GKC and 5 percent Icarus. In addition, Icarus would receive 25 percent of net profits from the North parcel.

With the commemcement of production from the Adelaide Crown mine, GKC now has two producing gold properties. In 1989, production began on the company's Gold King Extension claims, which is an underground gold mining property located near Silverton in southwest Colorado.

CUMBERLAND, R.I. (JUNE 19) PR NEWSWIRE - Valley Resources, Inc. (AMEX: VR) today announced that net income for the third quarter of fiscal 1990, the period ended May 31, 1990, amounted to $1,335,200 as compared with $1,326,700 for the same quarter last year. Earnings per share amounted to 32 cents on 4,213,043 shares outstanding as compared to 35 cents on 3,828,828 shares outstanding in the same quarter last year.

The increase in quarterly earnings is the result of improved profit margins and cost control in merchandising operations. The increases were slightly offset by decreased earnings in the utility operations due to weather which was 8 percent warmer than the prior year.

Net income for the nine months ended May 31, 1990 was $4,203,400, or $1.05 per share as compared with $3,902,800 or $1.02 per share. A 2.3 percent increase in Mcf sales is responsible for the increase in the earnings of the utility operations. Firm Mcf sales increased due to customer growth despite weather which was 5 percent warmer than the prior year. Nonutility operations also contributed to the earnings increase. Improved profit margins and the successful marketing of service contracts increased the earnings of the merchandising operations. In addition, propane sales increased 4 percent over the prior year, due to customer growth.

Net income for the 12 months ended May 31, 1990 was $3,282,800 or 83 per share, as compared with $3,246,700 or 85 per share, for the period ended May 31, 1989. Improved performance of the nonutility operations is responsible for the earnings increase.

Valley Resources, Inc. is a Rhode Island holding company with five wholly owned subsidiaries: Valley Gas Company, a regulated natural gas distribution company; Valley Appliance and Merchandising (VAMCO), a merchandising, appliance, rental, sales and service company: Valley Propane, Inc., a retail propane gas sales and service company: Rhode Island Development and Exploration Company (RIDEC), an inactive company; and Morris Merchants, Inc., d/b/a The Walter F. Morris Company, a wholesale distributor of franchised lines.

NEW YORK (JUNE 19) PR NEWSWIRE - NYNEX Information Resources Company, Inc. (NIRC) and Apple Computer, Inc. (NASDAQ: AAPL), leaders in their respective fields of communications and complex technologies, are breaking new ground in the area of interactive media. At PC EXPO (June 19 to 21), the two companies unveiled one of the first commercial installations of both electronic and print advertising media produced on Macintosh(R) personal computers, using one production staff.

As the exclusive media agent for the Jacob K. Javits Convention Center, NIRC is utilizing versatile Apple Computer technology to develop six distinct media products. These media are available now throughout the Javits Center and are collectively known as FACETS of New York. This venture allows marketers to fluidly run multimedia advertising campaigns on all available media. The electronic and print media package is designed to provide maximum impact and diversity. Available for targeted marketing and advertising support, the following media at the Javits Center are managed by NIRC:

FACETS of New York

Product Locator: a printed, insiders guide to an electronic, interactive show-specific kiosk directory

VideoGuide: an electronic, interactive informational kiosk directory

JumboTron(R): a 252 square foot video monitor

VideoWall: a transportable 25 square foot multiple monitor video system

Backlit Signage: available throughout the Javits Center and on

VideoGuide and Product Locator kiosks

FACETS of New York, the multimedia package now at the Javits Center, demonstrates how creative and thoughtful applications of advanced technology can serve the needs of advertisers and users efficiently, effectively and profitably.

EL SEGUNDO, CA (JUNE 19) PR NEWSWIRE - Andersen Consulting and INFONET Services Corporation today announced that they have entered into a strategic alliance to jointly offer outsourcing services.

The non-exclusive alliance enhances both firms' capabilities to offer communications, computing services, application support, and business operations expertise to meet specific customer needs. The terms of the agreement enable Andersen Consulting and INFONET to offer their respective services to clients on a preferred basis.

According to Peter Cunningham, president of the Mountain View, California-based market research firm, INPUT, "This is a powerful association between organizations with a clear mandate to operate multinationally. The combination of Andersen Consulting's integration and implementation capability with INFONET's network operations expertise and PTT partners, could make this alliance a force to be reckoned with in the fast-growing outsourcing market."

"The alliance enables Andersen Consulting to offer INFONET's global communications network on a preferred basis. This will augment our client solutions capability in select situations," David H. Armour, managing partner of Andersen Consulting's Systems Management Practice, said. "Outsourcing has become a mission critical solution for many companies. At Andersen Consulting, we have created a North American Systems Management headquarters in Dallas, and intend to have 250 professionals by the end of the year to serve this fast-growing market."

William E. Perren, INFONET's president of Development and Operations, said "Andersen Consulting and INFONET now can deliver a comprehensive and complementary set of services. Andersen Consulting provides in-depth

vertical industry and business operations expertise in areas such as systems integration, strategic services, change management, information planning, and systems management. INFONET combines a 20-year history in global computing and communications with a proven track record in the public and private business sectors."

Commenting on this agreement Howard Anderson, president and managing director of the Boston-based market research firm The Yankee Group, said "We believe that this is a watershed event. With Andersen Consulting's worldwide capabilities and INFONET's global application services network, together they offer sophisticated users an enhanced solution-set that they could not otherwise implement themselves."

CONTACT: David Armour, 214-402-7800, or Dan Collins, 312-507-6755, both of Andersen Consulting; or Mike Radice of INFONET, 213-335-2875; or Joan Naidish of Regis McKenna Inc., 818-710-7782, for INFONET and Andersen Consulting.

MONTVALE, N.J. (JUNE 19) PR NEWSWIRE - Continuing its expansion in North America, Inter-Continental Hotels Corp. today announced a new project in Los Angeles: the Inter-Continental Hotel at California Plaza, scheduled for opening in 1992.

The 469-room, five-star property is the first hotel in the city to be built as part of a major mixed-use project. The hotel is adjacent to California Plaza's Museum of Contemporary Art (MOCA), office towers, and Watercourt, a unique 1.5 acre urban garden/performance plaza.

The property is expected to have a significant economic, commercial and aesthetic impact on both the California Plaza project and the surrounding community, according to hotel officials. Approximately 360 jobs will be created with an estimated annual payroll of $5.6 million. Projections indicate that in 1993, the hotel's first full year of operation, an additional $2 million will be generated for the city's general fund through hotel room occupancy tax.

The hotel will cater to international business travelers and convention attendees. A two-story lobby will connect a 9,200 square foot ballroom and eight meeting rooms to the MOCA Plaza on Grand Avenue and an Olive Street motorcourt entrance. Facilities will include a private outdoor swimming pool and recreation plaza.

Earlier this year, Inter-Continental added two other North American properties: the Forum Hotel Chicago and the Hotel Inter-Continental Toronto. Next year, the hotel group will add the Hotel Inter-

Continental Montreal at the World Trade Centre Montreal to its portfolio. The company also has announced new developments in the Pacific Rim, South America and Europe. Inter-Continental already owns and operates one hotel in California -- the Mark Hopkins Inter- Continental in San Francisco.

Inter-Continental is owned by Saison Overseas (Holdings) B.V., which is comprised of the Saison Group of Japan as the majority shareholder, and Scandinavian Airlines System (SAS). The hotel group operates a growing network of more than 100 hotels on six continents.

JACKSONVILLE, FL (JUNE 19) PR NEWSWIRE - Harrell International, Inc. ("HI") (NASDAQ: HLTL) has entered into a Stock Purchase Agreement (the "agreement") dated June 12, 1990, with Clover, Inc., a newly formed Delaware corporation owned by Victoria Berensen ("Clover"), upon consummation of which, Clover will own 33-1/3 percent of the issued and outstanding Class A common stock of HI and 100 percent of the issued and outstanding Class B common stock of HI (representing a 50 percent economic interest and 66-2/3 percent voting interest in HI) and warrants to purchase additional shares of Class A common stock of HI at prices ranging from $1.50 to $2.00 per share (which if exercised in full immediately following consummation of the agreement will give Clover an aggregate 75 percent economic interest and 85.7 percent voting interest in HI). Consummation of the agreement is conditioned upon:

1. A recapitalization of HI;
2. approval of the agreement by HI shareholders at their annual meeting to be held Aug. 17, 1990; and
3. the delivery to Clover at the closing of the transaction of certain ancillary agreements including a management agreement pursuant to which Clover will manage the ongoing operations of HI.

The agreement and transaction contemplated therein will be fully described in the proxy statement to be mailed to HI's shareholders on or about July 20, 1990, in connection with the annual meeting to be held Aug. 17, 1990.

Wilson L. Harrell, David A. Woodcock Jr., John S. Connolly Jr., and Arthur G. Linkletter, directors of HI, and Charlene E. Harrell, owners in the aggregate of 50.76 percent of the shares of HI's stock, have agreed in their individual capacities as shareholders of HI to vote for approval of the agreement and have given or agreed to give Clover irrevocable proxies to that effect.

At a meeting held June 11, 1990, HI's board of directors approved the agreement and declared a special dividend to be paid on Aug. 21, 1990, to HI's shareholders of record on June 29, 1990 (the "Special Dividend"). The Special Dividend, which is contigent upon approval of the agreement by HI's shareholders, will be in an amount equal to all HI's cash and other assets immediately prior to the consummation of the agreement in excess of its capital following the recapitalization less a reserve for all the company's liabilities. Based upon current operating expenditures and estimated liablities, HI management believes that the per share dividend will be between $1.07 and $1.10.

#90170p7566 06/19/1990 ~PR Newswire

NEWPORT BEACH, CA (JUNE 18) PR NEWSWIRE - J.M. Peters Company Inc. (AMEX: JMP) today reported first quarter financial results for the period ended May 31, 1990.

For the first quarter of fiscal 1991, revenue from housing sales was $67.1 million, compared to the $55.5 million reported for the corresponding period of fiscal 1990.

Net income for the first quarter of $1.6 million, or $.11 per share on 13,980,000 shares outstanding, compared to $5.0 million, or $.36 per share on 13,980,000 shares outstanding, for the comparable period of fiscal 1990.

At May 31, 1990, J.M. Peters Company Inc., recorded 244 units in backlog versus 385 units recorded at May 31, 1989. The company reported a backlog of 261 units of fiscal 1990's year end.

Gross profit percentages on housing sales for the first quarter were 13.4 percent, versus 22.8 percent for the same period of fiscal 1990.

For the first quarter, the company had 146 net orders (homes contracted

for sale less cancellations), which was below the comparable quarter of fiscal 1990 by 104 homes.

Closings for the first quarter of fiscal 1991 were 163 homes, up from 142 homes reported for the first quarter of fiscal 1990.

J.M. Peters Company Inc., with total assets in excess of $575 million, is one of Southern California's premier builders of homes for the "move-up" market -- upper income buyers who have previously owned a principal residence. The company, which operates in Orange County, Calif., and adjacent counties, closed 775 homes in fiscal 1990.

#90170p7569 06/19/1990 ~PR Newswire

SEATTLE (JUNE 19) PR NEWSWIRE - Boeing Defense & Space Group has successfully completed two more series of tests for the U.S.Navy's Sea Lance anti-submarine missile system: two pyrotechnic shock tests and a

panel separation sled test, the company said today.

Pyrotechnics (explosives) are used to separate the Mark 50 torpedo payload from its protective shell and from its booster rocket. Shock from these operations cannot be permitted to damage the torpedo, nor prevent its proper functioning after water re-entry.

The pyrotechnic tests check the ability of the Mark 50 to withstand the shock of separation from its protective shell and from the booster that delivers the payload to the threat area.

"The pyrotechnic separation design must accommodate safe separation of the torpedo over the target area after being subjected to the flight environment," according to Jerry Zyskowski, Sea Lance design manager, at the Aerospace & Electronics division of the Defense & Space Group.

"No matter how accurately we deliver the payload, it must be operable when it hits the water. These test results justify a lot of hard work that's been done in this area."

During the test, an exercise torpedo was shown to be fully operable prior to and after going through pyrotechnic separation.

The panel separation test, carried out on a "sled," or rocket-propelled, track-mounted platform, proved that the protective shell or panel properly separates and clears the Mark 50 payload.

The program has been cancelled by the Department of the Navy and is scheduled to be fully terminated by Sept. 15. However, a series of tests were directed to be carried out prior to that date. Future tests will include air drops to test payload separation, in which an exercise torpedo is dropped into the water to demonstrate its ability to run after undergoing the separation sequence.

Earlier this year, two flight tests were conducted successfully from a ground launch system at White Sands Missile Range, N.M.

#90170p7571 06/19/1990 ~PR Newswire

PITTSBURGH (JUNE 19) PR NEWSWIRE - H.J. Heinz Co. (NYSE: HNZ) announced today that it completed its 26th consecutive year of growth with sales, net income and earnings per share all reaching record levels for the year ended May 2, 1990.

Sales for the year totaled $6,085,687,000, up $284,810,000 or 4.9 percent

from $5,800,877,000 in fiscal 1989. The sales increase was driven by both price and volume gains, particularly in the company's big brands, offset partially by the effect of a stronger U.S. dollar in translation of certain foreign currencies. Volume improvements were strong in Heinz ketchup, StarKist tuna, Weight Watchers brand food products, Ore-Ida frozen potatoes and Heinz beans in the U.K. and Canada.

Net income for fiscal 1990 was $504,451,000, a 14.6 percent increase from the prior year amount of $440,230,000. Net income per share rose 13.8 percent or $.23, from $1.67 last year to $1.90 for the year ended May 2, 1990. The earnings per share numbers reflect the two-for-one stock split in the form of a distribution of common shares effective Sept. 27, 1989.

Sales for the fourth quarter increased 3.9 percent to $1,694,227,000, up from last year's $1,630,235,000. Net income for the quarter was up 15.5 percent to $135,314,000 or $.51 per share, compared with $117,201,000 or $.44 per share last year. Price increases were primarily responsible for the sales gain. Ketchup and tuna showed strong volume growth in the fourth quarter but were offset by volume declines in other products.

Anthony J. F. O'Reilly, Heinz chairman, president and chief executive officer, stated that the company's operating profit increase for the year reflects the continued strength of the company and its commitment to quality and cost control.

O'Reilly said, "Once again, we are pleased to announce record earnings. Our big brands -- ketchup, tuna, frozen potatoes, baby food, and Weight Watchers brand food products -- continue to prove their market strength and brand leadership, providing a solid foundation for the future."

#90170p7572 06/19/1990 ~PR Newswire

DETROIT (JUNE 19) PR NEWSWIRE - The Metro Detroit AFL-CIO and the Amalgamated Clothing and Textile Workers Union (ACTWU) today announced a rally protesting Comerica Bank's plan to participate in the liquidation of Health-Tex, a major domestic manufacturer of children's clothing. The rally is part of a national effort led by ACTWU and the United Steelworkers of America against Comerica and the nine other banks which financed a leveraged buyout (LBO) at Health-Tex in 1985.

In a statement last week, ACTWU's President Jack Sheinkman said the banks financed an LBO at Health-Tex, a then-healthy company, in 1985, touching off financial distress, plant closings, and layoffs of more than half the

workforce. The remaining 4,000 employees took on the job of rebuilding the company, he said, and just as they have accomplished a turnaround, Comerica and the other banks have decided to liquidate Health-Tex.

On Wednesday, June 20, workers from Health-Tex plants across the United States will travel to Detroit for a rally demanding that the banks give them time to complete the turnaround. Workers will gather at 11:30 a.m. at Fort and Shelby streets before proceeding to Comerica's corporate headquarters. This action follows up protests by hundreds of Health-Tex workers last week at banks around the country involved in the buyout.

The nine other banks are: NCNB-Texas, Dallas Norwest Corp., Minneapolis Security Pacific Corporation, Los Angeles Ameritrust Corporation, Cleveland PNC Financial Corporation, Pittsburgh National Bank of Canada, Montreal Citizens Financial Group, Inc., Providence, R.I.

Harris Bankcorp, Chicago Bank of New York, Inc., New York Last week, ACTWU filed comprehensive unfair labor practice charges with the National Labor Relations Board (NLRB) against the company, Comerica, and the rest of the 10-bank consortium that controls it. In the charges, the union outlines how Comerica and the other banks seized control of Health-Tex and stifled the give-and-take process of collective bargaining under the National Labor Relations Act.

Sheinkman said Health-Tex and the banks have refused to bargain in good faith with the union and have closed a number of plants without prior bargaining. Most recently, Health-Tex has moved to close the Gadsden, Ala., plant without prior negotiation with the union. In the charges, ACTWU asked the general counsel of the NLRB to seek speedy relief preventing the banks from liquidating Health-Tex.

Health-Tex currently operates plants in: Warrenton, Ga. Danville, Va. Centreville, Ala. La Follette, Tenn. Cumberland, R.I. (distribution center) Gadsden (just received 60-day closing notification)

CLEVELAND (JUNE 19) PR NEWSWIRE - The Board of Directors of LESCO, Inc. (NASDAQ: LSCO) has declared an increased annual dividend of seven cents a share payable July 10, 1990, to shareholders of record June 29, 1990. The previous annual dividend was five cents a share.

The increased dividend was made in recognition of the Company's strong performance in the second quarter ended May 31, 1990, and the positive outlook for the remainder of the year, according to James I. FitzGibbon, chairman and chief executive officer.

The Company earlier reported second quarter earnings of $1,888,600, or 46 cents a share, more than double the year-ago second quarter earnings, with sales of $34,853,400, an increase of 15 percent over the prior year.

LESCO, headquartered in Cleveland, operates a fleet of tractor- trailer sales trucks which services golf courses nationwide, and regional service centers which supply the professional lawn care operator and landscaper. The Company produces the vast majority of the fertilizers, turf control products and turf care equipment sold through the trucks, service centers, conventional sales representatives and telemarketing.

#90170p7582 06/19/1990 ~PR Newswire

NEW YORK (JUNE 19) PR NEWSWIRE - Two major changes in Smith Barney's senior management structure were announced today by Frank G. Zarb, chairman and chief executive officer of the investment banking and brokerage firm.

-- J. Perry Ruddick, vice chairman and currently Smith Barney's chief administrative officer, will take over senior management responsibilities for the firm's asset management services, a key element in the firm's overall growth strategy.

-- James Dimon, executive vice president and chief financial officer of Primerica Corporation, Smith Barney's parent company, will join Smith Barney as chief administrative officer and a senior executive vice president. Dimon will retain his titles and responsibilities at Primerica while maintaining offices at Smith Barney and devoting a significant portion of his time to Smith Barney's business.

Both appointments are effective July 5. Dimon will also join the firm's executive committee and its board of directors. Ruddick will continue to serve on both.

Ruddick will assume responsibilities for Smith Barney's capital management division, headed by Bruce D. Sargent, executive vice president, who will report to him; Ruddick will continue to head the firm's venture capital unit. He joined Smith Barney's corporate finance group in 1961, became manager of corporate finance in 1969, director of trading and syndicate in 1973, executive vice president in charge of corporate and public finance in 1979, and chief administrative officer in 1983.

Dimon takes on responsibilities for a number of major support groups in the firm, including the financial, personnel, law, data processing and operations divisions. He joined Commercial Credit Group, Inc. in 1986, prior to its acquisition of Primerica in 1988. Previously, he was assistant to Sanford I. Weill, then president of American Express Company, from 1982 to 1986.

Primerica Corporation (NYSE: PA) is a diversified financial services company principally engaged in insurance, investment banking and securities brokerage, mortgage banking, mutual funds, asset management, consumer lending, credit cards and direct marketing. As of Mar. 31, 1990, Primerica has assets of approximately $20 billion.

NORTHBROOK, IL (JUNE 19) PR NEWSWIRE - IMCERA Group, Inc. (NYSE: IMA) said today its Mallinckrodt Medical unit of St. Louis will begin marketing a new diagnostic agent, TechneScan MAG3(TM) (a kit for preparation of technetium Tc 99m mertiatide), that allows improved imaging of the kidneys and renal system.

The new radiopharmaceutical agent was introduced today at the Society of Nuclear Medicine annual meeting in Washington.

MAG3, which uses the isotope technetium-99m, will be marketed in a non-radioactive kit enabling nuclear medicine technologists to prepare individual dosages as needed. C.R. Holman, president of Mallinckrodt Medical, said this represents a significant advantage, in terms of convenience, over "pre-labeled" agents -- those which are packaged as finished products already containing a radioactive isotope, and which must therefore be specially ordered one or more days in advance of a procedure.

Holman said MAG3 is the only technetium-based renal imaging agent which can be used to perform both renal angiography (imaging of the renal blood vessels) and to assess renal tubular function. Currently, two different agents must be used for these studies, requiring longer procedure time and two separate injections for patients.

"MAG3 can make renal imaging procedures more convenient for nuclear medicine physicians because they get quality imaging with one agent without changing camera settings," Holman said. "The patient also benefits because more information is obtained with administration of only one agent."

Studies from Emory University Medical Center in Atlanta, indicated that MAG3 is very efficiently extracted by the kidneys with minimal excretion by surrounding organs.

"Findings from investigational use of MAG3 suggest it has the potential to be a superior diagnostic agent for renal transplant and kidney obstruction since it provides exceptional images even in patients with impaired renal function," said Andrew Taylor, M.D., professor of radiology at Emory.

Nuclear medicine physicians perform about 308,000 renal procedures annually in the United States. Both conventional X-rays and nuclear medicine studies are used to visualize kidney diseases, such as tumors and obstructions of the renal blood vessels. But, unlike X-rays, a nuclear medicine scan also can tell physicians if the kidneys are functioning properly.

MAG3 is already being marketed in Europe, and Mallinckrodt Medical has filed an application to introduce the new agent into Canada.

Mallinckrodt Medical is one of the world's largest producers of radiopharmaceuticals in addition to operating a network of nuclear medicine pharmacies in 20 markets across the United States.

Mallinckrodt Medical, with estimated 1990 net sales of $390 million, is a major supplier of products for radiology, cardiology, anesthesiology, nuclear medicine and critical care.

IMCERA's other companies are Mallinckrodt Specialty Chemicals and Pitman-Moore. IMCERA also owns approximately 38 percent of the common stock of IMC Fertilizer Group, Inc.

NEW YORK (JUNE 18) PR NEWSWIRE - Isramco, Inc. (NASDAQ: ISRL) announced today, on behalf of the partners in the Negev Venture 2 that the production tests in the 17,400 foot formation in the Yam 2 well were

stopped on June 17, owing to mechanical difficulties. The mechanical problems were caused by high temperatures (358 degrees Fahrenheit) and very high pressure (approximately 13,000 API) which prevail in this formation.

At the operator's meeting, which took place on June 17, the following report on the results of the test of the 17,400 foot level was issued: "During the test there was a flow of oil and high quality (47 degrees API) without sulfur at an initial rate of 800 barrels of oil a day through a 20/64ths-inch choke and under 967 psi (pounds per square inch) surface flowing tubing pressure at the well head. This flow rate occurred without any stimulation through acidizing which is usual in limestone reservoirs, and should have taken place during the test, but did not because the test was stopped. The technical experts estimated that the stimulating action could have improved the oil's flow rate.

"The partners are encouraged by the information gained from having discovered high quality oil and consider it early at this stage to estimate or evaluate production capability from the reservoir at the 17,400-foot depth. It would appear that further confirmation wells will be required to complete the test at this depth."

In the meantime procedures for conducting production tests at 12,900 feet where gas was encountered during drilling have been started. At the conclusion of the test a release will be made.

BROADVIEW, IL (JUNE 19) PR NEWSWIRE - Robert Bosch GmbH, the world's leading manufacturer of anti-lock braking systems (ABS), recently delivered its 5 millionth ABS system for passenger cars. ABS prevents the wheels from locking when braking, and at the same time helps maintain stability and steerability during sudden stops even in unfavorable road conditions. In addition to contributing to traffic safety, ABS also helps

prevent tires from being damaged in panic stops.

Bosch developed its electronically controlled and technologically highly advanced system in close cooperation with the automobile industry. The system has proven its great reliability since 1978 when Bosch was the first manufacturer in the world to launch an effective ABS for passenger cars. In the meantime, 22 car manufacturers in western Europe, the United States, Japan and South Korea have added Bosch ABS as standard feature or optional equipment on 66 different vehicle models. Bosch also introduced ABS for heavy trucks and buses in 1981, and today, 12 manufacturers in Europe, the U.S., Japan, and South Korea offer Bosch ABS on their vehicles. Most tour buses in Europe are equipped with Bosch ABS. In the U.S., Peterbilt, Kenworth and Western Star trucks offer Bosch ABS as an option.

In 1989, Bosch started production of anti-lock braking systems in South Carolina at its Charleston and Anderson plants to meet rising demands for ABS and to supply the American market from domestic production. Bosch currently supplies ABS as standard equipment for the Chevrolet Caprice and Corvette, and the Cadillac Allante and Brougham. The 1991 Cadillac Seville and El Dorado, the Buick Riviera and Reatta, and the Oldsmobile Toronado and Trofeo models will be equipped with Bosch ABS as standard.

The two Bosch U.S. plants have a capacity of 500,000 units per year. This year, Bosch expects to supply more than 1.7 million ABS systems from German and U.S. production to the worldwide automotive industry. Compared to 1989, this represents an increase of more than 30 percent attributable primarily to the growing use of Bosch ABS as standard equipment.

Robert Bosch Corporation, the U.S. subsidiary of Robert Bosch GmbH, employs more than 5,000 people at subsidiaries and affiliates in 18 cities and 11 states. In 1989, Bosch sales in the United States exceeded $1 billion. Based in Broadview, Bosch operates an Automotive Technical Center in Farmington Hills, Mich.

CHICAGO (JUNE 19) PR NEWSWIRE - Helene Curtis Industries, Inc. (NYSE: HC) today announced record first-quarter sales of $195.1 million for the period ended May 31, a 22 percent increase over the $160.2 million reported the prior year. The company reported a net loss of $1.8 million, or 20 cents per share, compared with net earnings of $2.2 million, or 24 cents per share, for last's year's first quarter.

Prior year earnings-per-share figures have been adjusted for a two-for-one stock split on Aug. 1, 1989.

Speaking at the company's annual meeting of stockholders, Ronald J. Gidwitz, president and chief executive officer, said, "In terms of sales, this was a record first quarter and our third best quarter in the company's history. Sales growth of 22 percent is ahead of our stated estimate of 15-20 percent for the year.

Sales gains made by the company's international division were primarily driven by increases in Japan and Canada. In Japan, Salon Selectives had strong early sales since its January introduction, and sales of Finesse brand products, particularly flanker products, were up over the prior year's first quarter. Consumer acceptance of Salon Selective products remains strong in Canada. Salon Selectives conditioners, introduced only 20 months ago, already rank second in this market behind the company's Finesse brand.

Commenting on the results of the company's professional division, Gidwitz said, "Programs initiated over the past year to control costs and improve margins are beginning to have a positive effect on the bottom line. We expect this trend will continue."

Turning to the outlook for the company, Gidwitz said, "The keys to our long-term success continue to be developing new products, supporting existing brands, taking successful U.S. products to foreign markets we currently serve, and entering new markets.

Helene Curtis Industries, Inc. is one of the nation's major producers of brand-name personal care products. The company markets its products to consumers through supermarkets, mass merchandisers and drug stores and to

beauty salons through distributors across the United States. Helene Curtis products are sold in more than 100 countries.

OSLO, NORWAY (JUNE 19) PR NEWSWIRE - "Den Norske Bank will show a net profit for the full 1990 financial year, despite a first-period net loss of NOK 491 million," said Group Managing Director Egil Gade Greve in a presentation of the bank's results for the first four months of the year.

He stated that write-offs and provisions for losses on loans and guarantees for the full year 1990 will be lower than last year's figure of NOK 3.2 billion. Nearly half of identified and estimated loan losses for the full year have been charged to the interim accounts for the first four months of 1990, as a result of changes in the principles for recording provisions for loan losses in the accounts.

Den Norske Bank is Norway's largest bank, established through the merger between Bergen Bank and Den Norske Creditbank on April 17, 1990.

#90170p7609 06/19/1990 ~PR Newswire

HOUSTON, (JUNE 19) PR NEWSWIRE - GTE Mobile Communications will install, throughout New York City, a virtually fail-safe emergency- communications system that will summon help by the push of one button. Between now and the end of the year, GTE will install about 860 solar- powered emergency call boxes along roads in the city's five boroughs. Motorists and pedestrians will be able to use the calling system to summon emergency help.

GTE won the $2.9 million purchase, installation and maintenance contract from the New York City Police Department in a competitive bidding process.

"We will install the cellular call boxes in the boroughs of Manhattan, Brooklyn, Bronx, Queens and Staten Island," said Ed Hardenburgh, general manager of Call Box unit of GTE Mobile Communications.

"To make a call, a motorist or pedestrian simply presses a red button that automatically places a call to the dispatch station monitored by the New York City Police Department. A computer screen indicates the location of the call box and, depending on the nature of the call, a police officer

can use a direct line to connect the call to the required emergency service or dispatch roadside assistance," Hardenburgh added.

System Uses Solar Power The system uses the same kind of solar-powered cellular call boxes successfully tested for two years along the Bronx River Parkway and currently used in Central Park for pedestrian emergency calls.

Cellular call boxes communicate over a cellular network, instead of telephone lines, for connection to a police command post at the city's 911 emergency-dispatch center.

The cellular units, each costing about $3,500, send self-diagnostic messages to the police department to facilitate prompt repair and maintenance. If a unit malfunctions or is tampered with, it sends a message to the command center to alert police to the need for repair.

GTE Mobile Communications already provides more than 2,500 cellular call boxes along highways in San Diego County and Orange Counties in California. Additional contracts have been awarded for another 2,000 in Riverside and San Bernardino Counties. The company also provides numerous emergency phones on college campuses, in airport parking garages, in parks and at other public areas throughout the country.

GTE Mobile Communications, with headquarters here, includes GTE Mobilnet, GTE Airfone and GTE's paging operations. GTE Mobilnet, the fourth-largest U.S. cellular carrier, operates cellular systems in nine states serving 34 metropolitan areas and three rural-service areas. The national market group provides service and products to customers outside of the core areas. GTE Airfone provides telephone communications for travelers on airplanes and trains, serving more than 1,200 domestic aircraft and two major AMTRAK routes.

GTE subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989. GTE is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing products and services worldwide.

#90170p7616 06/19/1990 ~PR Newswire

HOUSTON (JUNE 19) PR NEWSWIRE - Kettle Restaurants Inc. today announced that the net profit for the quarter ended May 3, 1990, was $253,000 or 22 cents per share compared with net profit for the quarter ended April 27,

1989, of $159,000 or 7 cents per share.

The net profit for the two quarters ended May 3, 1990, was $318,000 or 28 cents per share compared with a net profit for the two quarters ended April 27, 1989 of $382,000 or 18 cents per share.

Total revenues increased 16.5 percent to $11,799,000 for the quarter and increased 6.8 percent to $22,399,000 for the two quarters ended May 3, 1990, compared to the like periods the prior year. These increases were primarily due to an increase in company operated restaurant revenues of 14.1 percent to $7,632,000 and 9.6 percent to $14,670,000, respectively, for the quarter and two quarters ended May 3, 1990, compared to the like periods the prior year. Weighted average sales per restaurant increased 2.1 percent and 10.5 percent, respectively, for the quarter and two quarters ended May 3, 1990, compared to the like periods the prior year.

The company implemented a new menu in its company operated stores during May 1990. Franchise stores are to have the new menu implemented by July 15, 1990. The new menu is expanded to eight pages and has a significant focus on the many choices available for lunch and dinner.

Kettle now proudly serves seven appetizers, 16 burgers and super sandwiches, four light salad combinations, a new soup and sandwich "Express Lunch" guaranteed to be served in 10 minutes, 16 dinner entrees, 17 senior citizen selections and 10 signature desserts.

While a Kettle restaurant has always been well known for its breakfast selections and "all you care to eat" breakfast and fruit bars available at most locations, the new menu contains approximately 80 colorful plate photographs which demonstrate the variety of selections available for lunch and dinner.

Specifically, an appetizer section and a new soup and sandwich "Express Lunch" which is guaranteed to be served in 10 minutes have been added. Also, the senior citizen and dessert sections have been enhanced in concept and price.

The company believes the expanded menu reflects the changing demands of today's family restaurant customer based upon a review of customer comments and competitive direction in its market. The menu is expected to appeal to a broader base of customers, particularly senior citizens and teenagers. The company is encouraged by the initial customer comments and favorable level of acceptance already experienced where the menu has been implemented.

The company presently has no current expansion plans and anticipates not adding any units to the system during the current fiscal year.

Kettle Restaurants Inc. is principally engaged in the operation and franchising of 24-hour full-service, family-oriented restaurants. The restaurants offer a wide selection of moderately priced menu items for all meal periods. Kettle and its franchisees operate 189 restaurants in 17 states, primarily in the Sunbelt region.

#90170p7618 06/19/1990 ~PR Newswire

SAN DIEGO (JUNE 19) PR NEWSWIRE -- The role of advanced workstations and cooperative processing between advanced workstations and mainframe supercomputers is a major them of IBM's exhibit at the Supercomputing World Exhibit, here.

Visualizations of supercomputing results -- the transformation of calculations into dramatic shapes and moving pictures -- dominate the IBM exhibits -- including one that presents output as 3-D pictures called

forth by special electronic goggles.

RISC System/6000 workstations -- IBM's new scientific workstations and the industry's most powerful competitor -- are demonstrating their ability to "put a face" on supercomputing by adding their own powerful visualization and computational abilities to the kind of applications that run on IBM 3090 supercomputers as well as on applications that run in stand-alone mode.

Increasingly, computational workstation users will use machines such as the RISC System/6000 to formulate and set up their supercomputing problems then employ the vector and parallel processing capability of 3090-level mainframes to generate a solution -- while observing its progress in a "window" opened into the calculation by the workstation.

The IBM exhibit will also feature a "race" between an IBM RISC System/6000 and a leading competitor's workstation, running the LINPACK benchmark.

The IBM exhibit features: -- Scientific visualization, presented by the Cornell National Supercomputer facility. Sophisticated tools demonstrated include the Cornell Volume Renderer, NCSA Surf, XImage, Galaxy from IBM Research and the Visualizer from Wavefront Technologies. 3-D views will be provided by electronic goggles.

-- Chemical process simulation, presented by Simulation Sciences, Inc., an IBM business partner. Software demonstrated is called ASPEN/SP, designed to help scientists and engineers model processes -- such as distillation and reactor models for application to vapor-liquid systems, solids, electrolytes and complex materials.

-- Computational fluid dynamics, demonstrated by the IBM High Performance Computing Center at Kingston, N.Y.

-- Molecular modeling, seismic simulation and computational fluid dynamics work done at the Utah Supercomputer Institute.

-- IBM supercomputing competition, scientific and technical programs. Abstracts of 1989 winners and information about the 1990 competition and an IBM electronic scientific and technical applications catalog.

-- ESSL: IBM's Engineering and Scientific Subroutine Library, a set of advance routines that improve applications' performance on IBM 3090 supercomputers.

In addition to the superworkstations session, IBM will also chair a conference session on operations research, which will examine how supercomputing is being applied in business applications as well as in scientific and technical areas.

CHICAGO, (JUNE 19) PR NEWSWIRE - Helene Curtis Industries Inc. (NYSE:HC) announced that Abbie J. Smith, Ph.D., was elected to a three-year term on its board of directors at the company's annual meeting today. Stockholders also approved an increase in the maximum number of directors from nine to 10. Re-elected to three-year terms were: Gerald S. Gidwitz, chairman of the board of the company; Charles G. Cooper, exec. VP & chief operating officer of the company; and John C. Stetson, president of J.C. Stetson Inc., a private venture capital firm.

Smith, 37, is a professor of accounting at the Graduate School of Business of the University of Chicago, a position she has held since 1989. She joined the University of Chicago in 1980 as an assistant professor of accounting.

A graduate of Cornell University and a native of Oneida, N.Y., Smith has published numerous articles on corporate finance and accounting in major business journals. Her list of academic honors culminated in 1990 with the McKinsey Award for Excellence in Teaching, a distinction given every two years to the outstanding teacher at the University of Chicago's Graduate School of Business.

Helene Curtis Industries is one of the nation's major producers of brand-name personal care products. The company markets its products to consumers through drug stores, supermarkets and mass merchandisers and to beauty salons through distributors across the U.S. Helene Curtis products are sold in 100 countries.

SAN JOSE, CA (JUNE 19) PR NEWSWIRE - Cadence Design Systems Inc. (NASDAQ: CDNC), a worldwide leader in electronic design automation (EDA) software, today announced the formation of a joint development team with Digital Equipment Corp. (NYSE: DEC) (Maynard, Mass.) to develop next-generation design framework technology. Under terms of the three-year agreement, Cadence and Digital, both industry leaders in framework technologies, will jointly develop and extend Digital's PowerFrame(TM) product into a framework technology for the 1990s that automates the total product development process.

Provisions of the agreement give Cadence and Digital the rights to market the jointly developed framework technology and products. The agreement also calls for the two companies to share the knowledge they each gain from the joint research with the CAD Framework Initiative (CFI), an industry-wide framework standardization committee, to further CFI's framework standardization efforts.

The joint development effort will leverage the experience and expertise of both companies' frameworks, the experience of their respective customers' use of these frameworks, industrywide standards -- CFI's framework specifications, the Open Software Foundation's Motif, the X Window System(TM), etc. -- and unique new features into the most open and advanced framework product to emerge from industry. The result of this joint development effort as part of the Synergy program will be technology and products that automate the overall product development process. Cadence, which under the agreement has rights to sell the existing PowerFrame product to its customers immediately, also has rights to market the jointly developed framework technology.

The Cadence Design Framework(TM) technology -- derived from advances in database and tool integration capabilities and distributed network computing technology -- provides the enabling technology and foundation for Cadence EDA design solutions. Digital's PowerFrame is a design management system that efficiently controls and manages design data and tools and automates the product development process. PowerFrame allows design methodologies to be defined and facilitates true team design capability.

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence operates throughout the United States, Europe and Asia. The company is headquartered in San Jose and is traded on NASDAQ under symbol "CDNC."

PowerFrame is a trademark of Digital Equipment Corp. X Window System is a trademark of the Massachusetts Institute of Technology. Design Framework is a trademark of Cadence Design Systems Inc.

HOUSTON (JUNE 19) PR NEWSWIRE - On June 18, 1990, Stewart Information Services Corp.'s (NASDAQ: SISC) board of directors declared a quarterly cash dividend of 10 cents per share, payable July 31, 1990, to common

stockholders of record June 29, 1990. This represents the same amount declared in the first quarter of 1990.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in 50 states, the District of Columbia and Canada through over 2,600 issuing locations. In issuing a policy, the title is first searched, examined and then closed. Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry. Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

#90170p7627 06/19/1990 ~PR Newswire

AUSTIN, TX (JUNE 19) PR NEWSWIRE - Motorola's (NYSE: MOT) Microprocessor Products Group today announced that the 88000 RISC architecture will be used to conduct ongoing research in multiprocessing concepts at Carnegie Mellon University (Pittsburgh).

Carnegie Mellon researchers will be using the Omron LUNA/88K, an 88000-based multiprocessor desktop workstation which performs up to 100 MIPS (millions of instructions per second). The LUNA/88K runs the MACH operating system developed at Carnegie Mellon for controlling the operations of multiprocessor computers.

Each LUNA/88K workstation uses four 88100 RISC central processing units and eight 88200 cache memory management units to achieve between 60 to 100 MIPS (millions of instructions per second) of performance. The LUNA/88K is expected to be the first desktop multi-processor UNIX workstation delivering 100 MIPS. Omron Corp. also announced today that it is donating 40 88000-based LUNA/88K multiprocessing workstations to Carnegie Mellon University. Motorola is donating the 480 chips that power those 40 workstations.

"Carnegie Mellon University is pleased to accept the donation of such technologically advanced workstations," said Howard Wactlar, vice provost for research computing at Carnegie Mellon. "The power and multiprocessing features of these computers will give a significant boost to research and teaching facilities."

The 88000 is the most integrated RISC solution available in volume production. In addition to the 88100 RISC microprocessor, Motorola offers the 88200 CMMU (Cache and Memory Management Unit). The 88200 incorporates

16K bytes of high speed cache memory, a cache controller and memory management controller on a single piece of silicon. The 88000 architecture contains the integer execution unit, floating point unit, memory management unit, cache controller and 32K bytes of cache memory. This high level of integration allows all these key system features to automatically scale to higher performances as increased clock speeds of the 88000 are introduced. Competitive RISC offerings can require 15 to 50 additional chips for similar designs.

CONTACT: Kristin Graves of Cunningham Communication, 408-982-0400, for Motorola; or Cheryl Collins of Carnegie-Mellon University, 412-268-2900.

#90170p7630 06/19/1990 ~PR Newswire

BEDFORD, MA (JUNE 19) PR NEWSWIRE - Computervision, a business unit of Prime Computer, today announced 42F/CADDSdraft, the first in its BabyCADDS family of low-cost prepackaged hardware/software systems for computer-aided design, engineering and manufacturing. Based on the new SPARCstation 1 plus from Sun Microsystems, 42F/CADDSdraft combines Computervision's powerful CADDS 4X software for three-dimensional modeling drafting and detailing with a 15.8 MIPS desktop workstation.

At a U.S. list price of $28,900, 42F/CADDSdraft allows CADDS customers to automate their product design processes even further by giving more users access to CADDS capabilities. The 42F/CADDSdraft system's low price will allow customers to cost-effectively distribute sophisticated design, detailing and drafting capabilities to their drafting and documentation departments, while ensuring integration with their other engineering, design and manufacturing systems.

Full integration with customers' CADDS 4X database gives 42F/CADDSdraft users the ability to view, manipulate, and detail product models and drawings created with any CADDS 4X system without the database conversions and translations necessary with other low-cost CAD products.

"Computervision's leading-edge CAD/CAM solutions deliver Sun technology directly to the engineer's desktop," said Jim Blaschke, director of technical markets at Sun Microsystems. "Sun and Computervision have always been leaders in the area of standards, and in responding quickly to the market's demand for powerful desktop workstations."

"The 42F/CADDSdraft is an ideal downstream drafting and detailing solution for our large base of installed customers and their suppliers," said Vincent Chaillou, director of CADDS 4X product marketing for Computervision. "The portability and scalability of the CADDS software allows us to respond with new platforms quickly and spread the value of CADDS more fully throughout an organization. Our customers also benefit

from the timely availability of our technology -- it helps them deliver their own products to market more quickly."

Computervision's CADDS Design and Drafting software module is the foundation of 42F/CADDSdraft. Developed beginning in 1969, CADDS (Computer Automated Design and Drafting System) is a comprehensive, integrated CAE/CAD/CAM system that today comprises more than 350 applications modules. Used by major manufacturers throughout the world, it enhances the entire product development process, from conceptual design to product delivery. In combination with Design and Drafting software, features of the 42F/CADDSdraft system include an advanced icon-driven user interface, powerful graphics, three-dimensional wireframe modeling, and non-graphic properties. Extensive support for drafting standards such as ANSI, ISO, JIS, DIN, MIL/STD, and DOD allows users to meet worldwide specification standards.

42F/CADDSdraft features a 16-inch color monitor, 12MB RAM, and 200 plusMB hard disk space. System power is derived from 15.8 MIPS and 1.7 MFLOPS.

The system supports UNIX 4.0.3C, Mini CAD/CAM OS, Ethernet TCP/IP, and NFS for extensive networking capabilities. In addition, optional Computervision EDMClient software provides access to simultaneous engieering tools: a secure vault, release/revision control, and project management, as well as archiving, back-up and recovery features.

42F/CADDSdraft is available for order immediatley, with first customer shipments scheduled for the third quarter.

Computervision is the leading suppiler of integrated CAE/CAD/CAM solutions with an installed base of more than 150,000 seats worldwide. Based in Bedford, Mass., Computervision develops, markets, and supports mechanical, electronic, architecture engineering and construction, and geographic information systems applications.

PITTSBURGH (JUNE 19) PR NEWSWIRE - Alumnus and trustee George A. Roberts, vice chairman and chief executive officer of Los Angeles-based Teledyne Inc. (NYSE: TDY), has given Carnegie Mellon University $6 million toward construction of an Electronic Materials Technology Building, which will house research on electronic, magnetic and other advanced materials, it was announced today.

This gift brings the total raised in the $200 million Campaign for Carnegie Mellon to $196.2 million.

An internationally known expert in physical metallurgy, Roberts gave $5 million in addition to an earlier gift of $1 million for the technologically advanced building, which will be named for him and will house nearly 75,000 square feet of classrooms, laboratories and equipment. Research in the building will focus on future technological needs, including the growth and processing of high performance semiconductors, the tailoring of magnetic properties for very high energy product applications, and investigation of the structure and properties of semiconductors and of magnetic and superconducting materials. The research could lead to breakthroughs in the development of solid state electronic equipment and computer aided-design processes and data storage systems.

In 1966, VASCO merged with Teledyne, then a six-year-old aerospace electronics firm. Roberts was named president of Teledyne that year and over the past 25 years he has worked with founder and chairman Henry Singleton to build the Fortune 500 company into one of America's most diversified corporations.

Teledyne's companies span aviation and electronics, machinery and metals, energy and power and a variety of consumer products such as swimming pool equipment and oral hygiene appliances. Well known Teledyne names include Water Pik, Landis Machine, Ryan Aeronautical and Continental Motors.

NEW YORK (JUNE 19) PR NEWSWIRE - The African Development Bank today offered $300 million of 9.30 percent subordinated notes of 1990, due July 1, 2000. The issue was priced at 99.55 percent to yield 9.37 percent and will be rated "Aa1" by Moody's, "AA+" by Fitch and "AA-" by Standard & Poor's. Kidder, Peabody & Co. Incorporated acted as lead manager in the transaction and the co-managers were Pryor, McClendon, Counts & Co., Inc., Goldman, Sachs & Co. and Salomon Brothers Inc.

Proceeds of the offering will be used to further the economic development of the bank's 50 African members. The Republic of South Africa is not a member of the African Development Bank.

The African Development Bank, established in 1963, is a multilateral development bank similar in structure to the World Bank, the Inter-American Development Bank and the Asian Development Bank. The bank's membership consists of 50 independent African states and 25 non-African nations, including the United States. The African Development Bank is headquartered in Abidjan, Ivory Coast.

The purpose of the bank is to further the economic development and social progress of its regional members. To this end, the bank promotes the investment of public and private capital for development purposes and the orderly growth of foreign trade, primarily by providing technical assistance and loans for specific projects that contribute to economic growth in the region.

The African Development Bank, with callable capital of $16.5 billion and authorized capital of $21.3 billion, is the only multilateral development bank to issue both senior and subordinated debt. The bank's first offering of subordinated paper in the U.S. market was completed in December 1984 and subsequent public offerings have been placed in Frankfurt, Zurich, London, Tokyo and Madrid. The bank's senior debt is rated "Aaa" by Moody's, "AAA" by Fitch and "AA+" by Standard & Poor's and has been issued in all the major international capital markets.

Kidder, Peabody & Co. Incorporated, a subsidiary of General Electric Financial Services, is a leading global investment banking and brokerage concern.

ENGLEWOOD, CO (JUNE 19) PR NEWSWIRE - The Cable Corp. Ltd. and Cable London plc, two United Kingdom corporations in which U S West is a shareholder, have been awarded three cable and telephone service franchises in London.

The boroughs of Hillingdon and Hounslow have been awarded to The Cable Corp. Ltd. The borough of Enfield has been awarded to Cable London plc.

Gary Bryson, president of U S West Cable Communications, said that the awards give U S West cable TV and telephone service rights for 1.1 million of the 2.9 million London area residences.

"We are particularly pleased because these new franchise territories directly border other London area franchises we already own," said Bryson. "This enhances our ability to serve our customers in these areas."

The franchises serving Hillingdon and Hounslow will serve 160,000 homes and 50,000 businesses. Project construction should begin in the first half of 1991, with service available shortly thereafter.

"We believe that we have been awarded the new territory in recognition of the progress that has been made to date by our wholly-owned subsidiary,

Windsor Cable Television, which is a market leader in both cable television and telephony," said Ray Whitney M.P., chairman of The Cable Corp.

The Cable Corp.'s wholly-owned subsidiary, Windsor Cable Television Ltd. owns and operates the cable TV franchise in Windsor, west of London. It is one of the most successful cable TV franchises in the United Kingdom. Among other partners in The Cable Corp. is Compagnie Generale Des Eaux of France.

The project in Enfield will also begin construction and have start-up service available in the first half of 1991. This franchise wil serve 101,800 homes and 25,000 businesses.

Jerrold Nathan, executive director of Cable London, said, "We look forward to bringing our services to all the people of North London and are delighted that the Cable Authority has accepted our strategy for this important and clearly defined community."

Cable London was formed by a group of London shareholders and has the backing of U S West and Comcast Corp. of Philadelphia.

Bryson said that U S West is now a partner in 14 cable franchises in the United Kingdom. The other franchises are Avon, Birmingham, Croydon, Edinburgh, Islignton/Hackney, Haringey, Kingston/Richmond, Merton/Sutton, Newcastle and Windsor.

U S West Cable Communications is a division of U S West Inc. (NYSE: USW), a $25 billion diversified telecommunications company headquartered in Englewood. Its major subsidiary, U S West Communications, serves the communications needs of 12 million customers in 14 states of the western United States.

U S West also owns companies involved in regional, national and international markets. Its businesses include radio communications, consisting of cellular, paging and Personal Communications Networks; directory publishing and marketing services; business communications systems sales and services; communications software; and financial services.

GRAND RAPIDS, MI (JUNE 19) PR NEWSWIRE - Knape & Vogt Manufacturing Co. (NASDAQ-NMS: KNAP) expects to report stronger fourth- quarter sales and

earnings, Chairman, President and Chief Executive Officer Raymond E. Knape said today. In addition, Mr. Knape said the closing of the sale of its La Mirada, Calif., facility will account for a one-time gain of approximately $1 a share.

"Based on the results of the first two months of the fourth quarter ending June 30, 1990, and the budget for the last month, we anticipated that earnings for the quarter will approximate 40 cents to 45 cents a share," Mr. Knape said. "This would bring full year earnings from operations to a range of $1.35 to $1.40 a share before the non-recurring gain from the sale of our La Mirada plant. It will also increase the book value of our stock to approximately $13.90 per share at June 30, 1990."

In the 1989 fourth quarter, Knape & Vogt reported earnings of $1,440,356 or 37 cents per share on sales of $26.2 million. Earnings for the full year were $5,324,159 or $1.31 per share on sales of $114.9 million. Sales for the current fiscal year are expected to be up about 8 percent and to exceed $124 million.

"While this is slightly below the sales and earnings forecast we made a year ago, we are still quite pleased with the results in view of the slowdown in the markets we serve," Mr. Knape stated.

"Our May sales were up 9 percent from a year ago and we expect June to be another strong month in both revenues and profits. Adding to the quarter's results is an increase in interest income of approximately $232,000 on the La Mirada sale," Mr. Knape said.

"We completed the transaction and our board of directors has approved it. The total sales price of $10 million cash has been received, and after costs, relocation expenses and taxes, we expect to report a net gain on the transaction of approximately $4 million, or $1 a share," Mr. Knape said.

"We have used the proceeds from the sale to reduce our long-term debt, and it currently stands at $11 million. The long-term benefits from this sale, besides debt reduction, are lower manufacturing costs and overhead with the relocation of the production operations to Grand Rapids and the establishment of a modern distribution facility in Sparks, Nev., to continue serving our customer base in the western United States."

#90170p7640 06/19/1990 ~PR Newswire

SAN ANTONIO, TX (JUNE 19) PR NEWSWIRE - Arctic Red Resources Corp. (Vancouver: ARP) said today that its wholly owned subsidiary, Chuska Energy Company, has made its sixth oil discovery on the Navajo Indian reservation in Utah's Paradox Basin.

The 6,204-foot wildcat well, Runway 10-G-1, is a dual-zone discovery that flowed oil at the rate of 817 barrels per day through a 24/64-inch choke on a 12-hour test of an 18-foot section of the Desert Creek formation, accompanied by a gas flow of 991,000 cubic feet.

A higher, 26-foot interval of the same formation was tested for 16 hours and logged daily flow rates of 826 barrels of oil and 1 million cubic feet of gas through a 24/64-inch choke, the company said.

Harvey V. Risien Jr., president of Arctic Red, said that a third potentially productive interval will be tested later this week. He also said that the size of the Runway structure is such that three or four development wells will be required to produce the field, as is the case at the nearby Monument discovery.

Risien further noted that Runway is Chuska's sixth algal reef mound discovery, with seven such structures having been drilled to date. Current oil production is averaging 1,100 barrels per day from the first two discoveries, with four other wells awaiting pipeline hookup, he said.

Chuska has a 40 percent working interest in, and is operator for, a venture that is exploring 254,000 acres of reservation lands in Utah, Arizona and New Mexico. In addition to its oil output, the group has been producing about 8 million cubic feet of gas per day over the past several months, and a 1,200-mile seismic survey of the group's acreage, now nearly completed, has identified a multitude of additional reef mound targets and other prospects.

#90170p7641 06/19/1990 ~PR Newswire

ATLANTA, (JUNE 19) PR NEWSWIRE - "Our earnings for the first five months of this year dropped below our results for the first five months of 1989, largely because of higher costs for producing and delivering electricity and a less than satisfactory rate decision in Georgia," Southern Company President Edward L. Addison said today.

The Southern Company (NYSE: SO) is the parent firm of five electric utillities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power,

and Savannah Electric. The Southern Company's common stock is one of the 20 most widely held corporate stocks in America.

Addison announced that net income for the first five months of this year totaled $194 million or 61 cents per share -- down $91 million or 29 cents per share from the corresponding period in 1989.

For the 12 months ending May 31, earnings were $755 million or $2.39 per share -- a decrease of $158 million or 52 cents per share from the comparable 12 months a year ago.

Southern Company earnings were $2.40 a share for the 12 months ending April 1990.

Addison said the Georgia Public Service Commission issued a key decision last fall related to Georgia Power's investment in unit 2 of Plant Vogtle. Georgia Power had asked for a rate increase of $413 million. The commission recognized a need for $218 million of additional revenues to be recovered over a phase-in period. The order calls for a first-year increase in base rates of $75 million. But the impact of this increase on customer bills is being offset by $68 million of fuel cost reductions and other one-time credits. The remainder of the increase -- some $143 million -- is to be recovered within 10 years as other costs associated with Plant Vogtle decline.

Georgia Power has appealed an earlier commission decision disallowing a portion of the contruction costs for Vogtle unit 1. If that decision is not overturned by the courts, The Southern Company will have to take an additional charge against earnings -- now estimated at some $200 million after taxes for both Vogtle units. A ruling by the Georgia Court of Appeals is expected soon.

In other rate matters, Addison said the Mississippi Supreme Court ruled in April that the state's Performance Evaluation Plan was invalid. The plan -- in place since 1986 -- allowed quarterly adjustments in rates based on Mississippi Power's financial condition and the company's performance in key areas. Addison noted that Mississippi Power's residential rates have been very stable under the plan, and lengthy, costly rate hearings have been avoided.

The court stated that the plan would no longer be in effect after April 30 and the court further ordered the Mississippi Public Service Commission to determine if revenues collected under the plan were contrary to law -- and to order refunds or credits as necessary. Mississippi Power has asked the Supreme Court to reconsider its decision. If refunds are necessary, the amount could total some $78 million through May of this year.

Mississippi Power has filed two rate schedules designed to restore rates

and revenues to the levels that had been set under the plan. Last month, the commission suspended the new rates for up to 90 days. The commission is expected to issue a decision on the matter soon.

Concluding his discussion of rate developments, Addison noted that the Florida Public Service Commission is expected to issue a ruling in August on Gulf Power's request to increase retail rates by $26.3 million annually. An interim increase of $5.8 million -- subject to refund with interest -- was approved by the commission in February. Reviewing system operations, Addison said that electricity use by retail customers in the four-state area rose 1.7 percent during the first five months of 1990. Electricity sales to commercial customers -- offices, stores, and other nonmanufacturing firms -- gained 2.9 percent to 11.1 billion kilowatthours. Industrial energy use rose 1.3 percent to 18.6 billion kilowatthours. In-home electricity needs were up one percent to 11.3 billion kilowatthours.

Energy sales under long-term contracts with neighboring utilities totaled 8.7 billion kilowatthours during the first five months of this year -- an increase of 7.8 percent over the corresponding period a year ago.

The energy needs of wholesale customers -- municipalities and cooperatives in the service area -- were down by 20.4 percent. These sales are expected to remain below prior levels because many wholesale customers in Georgia are meeting an increasing portion of their energy needs through joint ownership of facilities with Georgia Power.

Overall, sales of electricty to customers of The Southern company were up nine-tenths of one percent in the first five months of 1990 as compared with the same period in 1989.

ELK GROVE VILLAGE, IL (JUNE 19) PR NEWSWIRE - AAR Corp. (NYSE: AIR) today announced preliminary results for the company's fiscal year that ended May 31. These results are subject to final audit.

Net sales for the year are expected to be $444,000,000, up from the prior year's $404,360,000. Net income is expected to be $25,600,000, or $1.60 per share, versus $24,814,000, or $1.56 per share for the 1989 fiscal year.

Net sales for the quarter are anticipated to be $119,000,000 over $113,390,000 for the same period last year. Net income is expected to be $6,200,000 or 39 cents per share, compared to $7,365,000, or 46 cents per share, for the fourth quarter of fiscal 1989.

Ira A. Eichner, chairman of the board and chief executive officer of AAR, commenting on the results, said, "These results meet the modest year-over-year gain we anticipated in our news release of April 20. For the year ended May 31, both sales and earnings were the highest in the company's history."

The company expects completion of its audit and release of final financial results on July 17, 1990.

AAR Corp. is a leading supplier of aerospace/aviation products and services. The company primarily distributes parts and equipment, performs technical services, and manufactures proprietary products for the aviation industry in the United States and abroad.

VENICE, CALIF. (JUNE 19) PR NEWSWIRE - Hispanics across the United States will be viewing a new Spanish-language television network come spring 1991. Named Cable Television Nacional (CTN), the new network will be exclusive to cable, with a 90s programming format tailored to today's Hispanic.

"The emergence of the Hispanic as an affluent subgroup creates a need for at-home entertainment," said John Figueroa, president of CTN, "CTN, with its varied programming mix, will be the channel of choice for these new viewers."

Black Entertainment Television Network (BET) has provided exploratory capital to CTN and expressed an interest in furthering their participation. "CTN is in a comparable position to BET 10 years ago," said Bob Johnson, president of BET. "We are extremely excited about this new network that is filling an existing void in the cable industry -- an exclusive basic service targeting the up- and-coming Spanish-language consumer."

The charter affiliation agreements currently being offered to cable systems include the following:

-- a three-to-five-year contract -- launch dollar support -- mass media marketing campaign -- system specific marketing campaign -- four-minutes per hour of ad avails -- subscriber data -- affiliate fees ranging from four to seven cents per subscriber CTN's programming menu will be divided into three integral parts: 1. Classics and contemporary films from all the Spanish-speaking world. 2. Music videos chosen from today's

burgeoning Hispanic talent pool. 3. Varied Programming to appeal to the whole family: ever- popular sports events such as boxing, soccer and baseball; women's talk shows dealing with today's important topics: child care, finance, family, health; children's programming that will include bilingual educational shows in addition to fun-filled cartoon.

Founded by 17-year media veteran John Figueroa, CTN will begin service by transmitting 24 hours a day of original programming via satellite. The minority-owned network plans to have 2.2 million subscribers in its first year, 800,000 of which will be Hispanic. Forty-nine percent of the network's equity is available to cable and non-minority participation.

PHILADELPHIA (JUNE 19) PR NEWSWIRE - In connection with the Telecommunications Industry Association's (TIA) recent publication of the compatibility standard for digital cellular mobile telecommunication systems, International Mobile Machines Corp. (NASDAQ: IMMC) announced that it is willing to license its patents for reasonable royalty rates to the extent necessary to manufacture and operate digital cellular telephone equipment or systems in North America in compliance with the standard.

The company said it believes that it is likely that one or more of its issued patents would cover any system designed for compliance with the standard.

The TIA document known as IS-54, "Cellular System Dual-Mode Mobile Station-Base Station Compatibility Standard," was issued to "serve the

public interest" by providing a national guideline for purchasing digital cellular telecommunications equipment.

IMM has taken a pioneering role in developing systems and cellular system components for the emerging digital cellular market. As a result of extensive R&D efforts, IMM has a growing patent portfolio which broadly covers important aspects of spectrally efficient digital cellular telephone communications, and establishes a basic proprietary position for IMM in this field.

Industry projections indicate there could be up to 30 million users of digital cellular service in North America by the end of this decade.

IMM is a world leader in wireless digital access technologies.

CALGARY, Alberta (JUNE 19) PR NEWSWIRE - Golden Pacific Resources Inc. is pleased to announce the successful completion of an intensive exploration program on the Penon Blanco property, near Coulterville, California. The Property consists of a large, contiguous holding of patented ground and located claims and is operated by CGPR Inc., a wholly owned subsidiary of Golden Pacific. The Company reports that the property is strategically located on the ''Mother Lode Trend'' in Mariposa County; and, is some 25 miles south of the Harvard open pit gold mine operated by Sonora Gold Corp. and some 12 miles north of the Goldenbell open pit deposit under development by Northgate Exploration Limited.

The six month exploration program consisted of an integrated program of

geophysical surveys, surface and underground geological mapping and sampling and geochemical work and sampling. All work was conducted on a newly cut grid, and also included underground rehabilitation work, primarily on the ''Stevens Adit'' where previous mining and development work was carried out in the early part of the century.

Surface and underground mapping and sampling has confirmed the presence of significant precious metals enrichment associated with a strong hydrothermal alteration zone up to 200 feet in width and traced over a distance of approximately 1000 feet. Additional subparallel veins and silicified shears enriched in gold and silver have also been documented. The general area includes the formerly operating Oro Rico mine where some 120,000 tons of precious metal-containing material grading 0.202 ounces per ton gold and 4 ounces per ton silver has been previously identified.

Geochemistry has largely confirmed geological work through interpretation and location of major NNW trending soil anomaly highly enriched in gold, silver and arsenic that closely parallels outcrops and inferred subcrops of Mother Lode-type mineralization. At present, the soil anomaly is about 5000 feet in length and is open-ended to both the south and north.

Magnetic and electromagnetic surveys have identified a series of promising responses corresponding to, consistent with and paralleling the trend of geological and geochemical anoamlies. Magnetics has successfully confirmed the location of the hanging wall of the alteration zone while VLF electromagnetics have identified numerous conductive zones within and flanking the alteration zone.

BEAVER, PA. (JUNE 19) PR NEWSWIRE - Michael Baker Corp. (AMEX: BKR) announced today that its Employee Stock Ownership Plan (ESOP) intends to continue with the purchase of Michael Baker Corp. common stock, and expects to invest approximately $1.3 million toward such purchases between now and year-end 1990.

Andrew P. Pajak, chairman of the Baker ESOP committee, reported that the ESOP has purchased $200,000 worth of Baker common stock so far this year as a result of the $1 million purchase plan earlier announced in February 1990. "The original plan has been increased by an additional $500,000," said Pajak, "and if made in full would bring our total investment for the year to $1.5 million."

According to Pajak, the purchases will be funded by cash accumulated from contributions made by Baker employees to its 401(k) savings plan, and will

be implemented by the independent trustee over a period of time as prudent opportunities arise. Pajak said the Baker ESOP currently holds approximately 33 percent of the outstanding shares of Michael Baker Corp. common stock.

During 1989, the Baker ESOP purchased approximately $1.3 million worth of Baker stock, and in 1988, made open market purchases of $500,000, also using cash surplus from the 401(k) employee savings plan.

COSTA MESA, CA. (JUNE 19) PR NEWSWIRE - After three years of losses connected with the development of their CarbonClean products, Parker Automotive Corporation (OTC) announced net income for the first fiscal quarter ended May 31, 1990, of $1,345,000 ($.19 per share). These results compare with a loss of $785,300 ($.14 per share) for the corresponding period in 1989, and a loss for the year ended Feb. 28, 1990, of $2,899,000 ($.49 per share). Based on existing contracts, the company expects net income for the remaining three quarters of the 1991 fiscal year to be consistent.

"We have turned the corner," said Michael E. Parker, chairman and chief executive officer of Parker Automotive Corporation (PAC). "In spite of significant and continuing expenses relating to the establishment of CarbonClean internationally, we have managed a solid profit and this is by no means an aberration," continued Parker.

CarbonClean is a patented system that cleans harmful pollutants from the fuel systems of internal combustion engines. In tests of an independent nature, CarbonClean has proven to reduce engine exhaust emissions by more than 50 percent, and in some cases up to 95 percent, depending on vehicle condition and fuel quality. In addition, the cleaning process restores fuel economy (gasoline or diesel) and engine performance, and greatly improves overall operating efficiency.

"We see CarbonClean as a product that will have tremendous impact worldwide," stated Parker. "In 1991, stringent new requirements regarding vehicle emissions go into effect in the United States and Europe. International on-site testing continues to validate CarbonClean as an effective and economical way to reduce carbon monoxide emissions, nitrous oxide emissions and diesel particulates," add Parker.

CarbonClean is currently being sold through an extensive distributor network in over 50 countries. PAC expects significant and continual growth throughout this network, and possible inclusion of CarbonClean as a

maintenance tool in the air quality management programs of several major industrial nations by the end of their next fiscal year.

Domestically, CarbonClean is approved, and in some cases marketed by Exxon Chevron, Arco, Gulf, Sunoco, Snap-on Tools, Nissan, Toyota, Hyundai and numerous other prominent firms.

Parker Automotive Corporation is a public company (OTC) headquartered in Costa Mesa. Manufacturing facilities are in Founatin Valley, Calif., and regional sales offices are maintained throughout the world.

NEW YORK (JUNE 19) PR NEWSWIRE - SBIC Funding Corporation announced today an offering by the U.S. Small Business Administration of guaranteed 9.30 percent participation certificates, Series SBIC 1990- 10B. The certificates will have a principal amount of $12,390,000, and the final distribution in retirement of the certificates will be made on June 10, 2000.

Goldman, Sachs & Co. is the lead manager for the offering; Citicorp Securities Markets, Inc. and The First Boston Corporation are co-managers. The certificates will represent fractional undivided interests in a pool of 16 SBA-guaranteed 9.30 percent debentures issued by Small Business Investment Companies (SBICs) licensed by the U.S. Small Business Administration, an independent agency of the United States. This includes four debentures issued by Specialized SBICs licensed under Section 301 (d) of the Small Business Investment Act. This is the 14th offering of 10-year SBA-guaranteed SBIC participation certificates.

The new offering will settle on Wednesday, June 27, 1990.

NEW YORK (JUNE 19) PR NEWSWIRE - General Instrument Corporation (NYSE: GRL) announced today that income from continuing operations for the first fiscal quarter ended May 27, 1990 was $23.2 million, or 84 cents per share compared to $22.2 million or 66 cents per share, for the first quarter of the prior fiscal year.

Revenue for the quarter was $379.5 million, compared to $345.6 million for

the prior year period. Net income for the prior year quarter was $32.5 million or 96 cents per share, which included a gain of $10.3 million, or 30 cents per share, from the disposition of discontinued operations. In the quarter, there was an average of 27.5 million shares outstanding, compared to 33.8 million in the prior year period.

Backlog at May 27, 1990 was $924.8 million, as compared to $926.7 million at May 28, 1989.

In making the announcement, Frank G. Hickey, chairman and chief executive officer, said, "Our results for the first quarter were ahead of plan. Revenue and earnings for both the Broadband and Components segments were up over the prior year, although results in the data systems segment were down.

General Instrument is the industry leader in cable television electronics, coaxial cable and satellite encryption systems. The company's primary strategies are directed toward communications systems. The common stock of the company is listed on the New York, Midwest, Pacific and London stock exchanges.

HORSHAM, PA (JUNE 19) PR NEWSWIRE - The Frankford Corp. (NASDAQ: FKFD), parent of Frankford Trust Co., announced today that it will add approximately $2.8 million to its reserve for loan losses during the second quarter of 1990 principally to reflect additional concerns that have arisen during the current quarter regarding several previously identified problem loans.

As a result of this action, the corporation said it anticipates that it will experience a net loss of approximately $300,000 for the second quarter of 1990. The anticipated loss will not affect the payment of the corporation's previously announced dividend of 33 cents per share payable July 2, 1990, to shareholders of record on June 6.

LOS ANGELES (JUNE 19) PR NEWSWIRE - Occidental Petroleum Corporation (NYSE: OXY) reaffirmed today that Oxy intends to maintain its $2.50 per share annual dividend.

Dr. Armand Hammer, chairman and chief executive officer, and Dr. Ray R. Irani, president and chief operating officer, stated, "There has been no adverse change in Oxy's financial picture. While the downgrade by Standard & Poor's was a disappointment, our financial position is strong and our cash flow will continue to support our longstanding dividend policy. The lower debt rating will have very little impact on Oxy as our debt maturity schedule has no more debt coming due this year, and only $52 million coming due next year."

#90170p7685 06/19/1990 ~PR Newswire

NEW YORK (JUNE 19) PR NEWSWIRE - Citibank said today that its Card Acceptance Services subsidiary is introducing a new product to improve the tracking and settlement of credit card transactions for hotel and property management businesses around the country.

The product, called ControlPoint, provides hotels with centralized control of all credit card auditing and settlement functions, and can track and analyze transactions paid for by customers with MasterCard, Visa, Diners Club, Carte Blanche, Discover or American Express cards. Hotels typically operate a variety of locations where credit card transactions occur, such as restaurants, gift shops, pro shops and boutiques, as well as the front desk.

"The development of ControlPoint reflects Citibank's commitment to innovation in the credit card processing business," said Bruce M. Weber, president of Citicorp Card Acceptance Services (CAS). "In a highly competitive credit card processing industry, service excellence sets Citibank apart from the competition."

ControlPoint, which is an IBM-compatible software package, is tied via point of sale terminals to CitiNet, Citibank's proprietary end-to- end credit card transaction delivery system. CitiNet is one of the largest networks of its kind. Weber explained that for most hotels, the credit card transaction auditing process is accomplished manually, with the original paper credit card transaction receipts collected and manually input into the hotel's PC. This also requires the terminal at each location to be manually accessed to retrieve transaction data on a daily basis.

With ControlPoint, each terminal is polled in an automated fashion and can be programmed to be accessed based upon the needs of the user.

ControlPoint can support up to 125 terminals per location. It

significantly reduces the time needed to audit and settle credit card transactions, and has the capability of supporting multiple locations.

CAS provides a full range of credit card processing services, including support for VISA, MasterCard, American Express, Discover, Diners Club, Carte Blanche, as well as check guarantee. CAS is headquartered in Melville, N.Y., and has operating and customer service facilities in Hagerstown, Md., and Sioux Falls, S.D.

#90170p7687 06/19/1990 ~PR Newswire

OLYMPIA, WASH. (JUNE 19) PR NEWSWIRE - The Department of Ecology has fined J.D. Bertolini Industries Ltd. $81,500 for numerous hazardous waste violations and ordered the company to determine the extent of soil contamination at it's manufacturing site in Fife, Wash.

The enforcement action was taken after the company failed to respond to repeated requests from Ecology to comply with state hazardous waste management regulations. The company, which is located at 1222 46th Avenue East, manufactures large shipping containers for trucks, trains and ships.

"We provided the company with technical assistance and gave it every opportunity to come into compliance with regulations for the proper management of hazardous waste," said Terry Husseman, Ecology assistant director for waste programs. "Because the violations are serious and the company has been recalcitrant in responding to our requests for compliance a substantial penalty is warranted."

Husseman added that if the hazardous waste management practices at the facility aren't corrected now, much more serious contamination problems could occur in the future.

According to the enforcement action, Ecology inspectors documented numerous violations at the facility including paint waste spills during inspections on Jan. 2, Jan. 9 and April 9, 1990. Specifically, the company failed to:

-- report and clean up three separate hazardous waste spills; -- install spill containment structures in the waste storage area; -- prevent spills from leaking containers; -- close or cover containers containing contaminated materials; -- designate hazardous waste; -- properly label and manage hazardous waste containers; -- prepare spill contingency plans and respond to and report all spills; -- Prepare a comprehensive employee training plan; and -- train company personnel concerning chemical hazards

and proper management methods to prevent spills or contamination.

Husseman said Ecology has ordered the company to determine the extent of soil contamination caused by the solvent-based paint waste and comply with all appropriate hazardous waste regulations.

WASHINGTON (JUNE 19) PR NEWSWIRE - The Department of Transportation has approved Lufthansa German Airlines' application to fly between Frankfurt, West Germany, and Charlotte, N.C., Secretary of Transportation Samuel K. Skinner announced today.

In an order issued today, the department said Lufthansa's request meets all criteria under the new program, which creates new opportunities for foreign carriers to serve more U.S. cities, except for the absence of a fully deregulated pricing regime. In view of that, the department approved a limited-term exemption permitting Lufthansa to serve Charlotte for a 179-day period while negotiations between the United States and the Federal Republic of Germany (FRG) seek a mutually satisfactory solution to U.S. pricing concerns. In the more liberal pricing regime the United States seeks, U.S. carriers would be able to set fares for flights originating in Germany without control or disapproval by the German government.

Skinner, speaking at a news conference, said: "The department's approval will bring the economic benefits of increased international air service to Charlotte. We have begun to tear down the walls that prevent open skies around the world. This is the third award under our new program. We have a fourth application pending and we welcome requests from other foreign air carriers."

On March 27, DOT approved a request by KLM Royal Dutch Airlines to fly between Amsterdam and Baltimore. On June 8, DOT approved Chilean carrier Ladeco, S.A.'s request to fly between Santiago, Chile, and Washington. Swissair has applied to provide service between Zurich and Philadelphia.

On Jan. 30, 1990, the department adopted a program to permit eligible foreign carriers to serve more U.S. cities providing certain criteria are met. In reviewing the Lufthansa application, DOT noted that no carrier currently provides service between Frankfurt and Charlotte. The order also said that except for pricing freedom, the U.S.-FRG bilateral agreement provides for open entry, unrestricted capacity and U.S. rights to operate service from any U.S. point to any point in the FRG. DOT

added that its approval was in keeping with the "friendly and productive bilateral aviation relationship we have enjoyed for many years with the Federal Republic of Germany, which we anticipate will facilitate achievement of the solution we seek."

Under the order, Lufthansa must begin service to Charlotte within 90 days.

INDIANA, PA (JUNE 19) PR NEWSWIRE - National Mine Service Co. (NMS) today announced the creation of a new organization to provide expanded service to the mining industry in North America.

The new structure combines three well-known mining sales and service organizations. They are Anderson Mavor Inc., based in Evans City, Pa.; Morgantown Machine & Hydraulics, based in Morgantown, W.Va., and the Distribution Division of National Mine Service, based in Carnegie, Pa.

These three organizations will come under the management of National Mine Service Co., a wholly-owned subsidiary of Anderson Group PLC, a worldwide mining engineering company headquartered in Glasgow, Scotland.

According to Herbert F. Gerhard, president and CEO of National Mine Service, the creation of the new structure is "consistent with our commitment to provide optimum service to the mining industry. As one unit " he said, "we can serve our customers more efficiently and respond more quickly to their specific needs." He also said the new structure will improve supply and repair service of longwall shearer components to ensure prompt availability of after-sale original equipment replacement parts.

The new structure will provide a broad range of services and equipment to the mining industry. Anderson Mavor, for instance, sells, installs, and services longwall mining shearers developed specifically for the U.S. coal market. Morgantown Machine & Hydraulics provides repair and service for pumps, motors, valves, and cylinders used in mining and steel industries. National Mine Service's Distribution Division is a leading supplier of safety and health equipment, as well as other mine supplies. All three divisions operate a network of regional service centers.

BOSTON (JUNE 19) PR NEWSWIRE - Sam Marinella, chief executive officer of Liberty Financial Companies, Inc., announced today the appointment of Kenneth R. Leibler, president of the American Stock Exchange, as president and chief operating officer. Liberty Financial Companies, Inc., a diversified financial services organization with an asset base of more than $21 billion, is a wholly owned subsidiary of Liberty Mutual Insurance Company.

In his new post, Leibler, 41, will have direct responsibility for eight operating companies, including two investment management companies, Stein Roe & Farnham and Liberty Asset Management, with combined assets under management of more than $15 billion; a major insurer, Keystone Provident Life, with more than $6 billion in assets; an investment services company; a venture capital firm; a real estate investment advisor and management company and two retail broker/dealers.

Leibler will report to Marinella, who has more than 30 years of experience in financial services and has been the chief architect of Liberty Financial Companies' strategic development since its inception in 1985.

Leibler has been in the securities industry since graduating magna cum laude from Syracuse University in 1972. He joined the American Stock Exchange in 1975 after having managed the retail options department at Lehman Brothers. Leibler rapidly rose to the top of the Exchange, holding senior positions in options, marketing and finance. In January 1986, at the age of 36, he became the 22nd president of the AMEX -- the youngest president of any exchange in the nation.

Leibler is widely credited with transforming the AMEX from an equities-only exchange to a diversified marketplace for stocks, bonds, options and commodities. He played a leading role in launching the Major Market Index, which has become the world's second-largest index option product, in establishing several international trading links, and in launching the AMEX's highly successful warrants on Japan's Nikkei Index.

Liberty Mutual Insurance Company provides a wide range of personal and business insurance, as well as financial services. It has been the country's leading writer of workers compensation insurance since 1936 and

employs more than 23,000 employees in more than 340 locations throughout the United States and Canada. Based on total assets of more than $35 billion, Liberty Mutual is one of the leading providers of insurance and financial service products.

SAN FRANCISCO (JUNE 19) PR NEWSWIRE - Polaris Aircraft Leasing Corp., a subsidiary of GE Capital, is ending the second quarter of 1990 with a flourish. The San Francisco-based aircraft leasing corporation has announced the purchase and leaseback of eight 737-236ADV jet aircraft with a combined value of approximately $124 million to British Airways, the United Kingdom's largest airline.

"We believe this new relationship with British Airways is the result of our strong emphasis on service and flexibility," said Marc Desautels, president of Polaris. "British Airways is one of the recognized leaders worldwide, and it is the highest compliment to have been selected to work with them."

The 737-236ADV aircraft for British Airways, some of which are in charter configuration, will be leased to the Heathrow-based international carrier for a period of five years, with certain options to extend. All will be used for British Airways' European and domestic routes, which include 15 U.K. destinations, and virtually every major airport on the Continent. The aircraft were delivered in April.

This is Polaris' first transaction with British Airways, the world's largest international airline, serving 164 destinations in 75 countries.

Separately, Polaris ordered six firm JT8D-219 engines for three MD-83 aircraft scheduled for delivery late this year, and six option engines for three additional MD-83s scheduled for 1993 delivery. All MD-80 series aircraft use Pratt & Whitney JT8D-200 engines exclusively.

Polaris manages more leased aircraft than any other leasing company in the world. Its fleet of 398 commercial jet aircraft, valued at over $6.2 billion, includes 256 of its own jetliners and 142 additional aircraft managed for GE Capital, representing almost 5 percent of the commercial jet aircraft in current use throughout the world. Polaris' own fleet generates in excess of $450.8 million in lease revenues from 30 operators, including such domestic and international carriers as Alaska, American, Bahamasair, Britannia Continental, Gulf Air, Maersk, Northwest, Pan American, Southwest and USAir.

The 15-year-old company is also the leading sponsor of aircraft leasing limited partnerships, having raised nearly $1.3 billion in investor capital and sponsored 42 publicly and privately registered programs with over 86,000 investors.

MOUNT LAUREL, NJ (JUNE 19) PR NEWSWIRE - Marlton Technologies, Inc. (AMEX: MTY) announced that Samuel W. Fleming III was elected a director of the company at its annual shareholders' meeting held today.

The company also announced that in relation to its proposed acquisition of Sparks Exhibits Corporation, the sellers have approached management with respect to certain changes in the transaction necessitated by tax concerns of the sellers, and in consideration thereof, the sellers have agreed to make certain additional changes for the benefit of the company. The company stated that it will be considering the possibility of revising the terms of the transaction which would require the approval of the transaction by a majority of votes cast, which majority approval has already been obtained, and that there were insufficient votes at the meeting to approve the existing transaction by two-thirds of the votes present.

The company stated its belief that the proposed acquisition can be restructured in a manner more favorable to the company. It therefore adjourned the meeting until Tuesday, Aug. 7, 1990, to provide time to discuss restructuring with the sellers and to supplement the company's

proxy materials to reflect the outcome of such discussions.

CINCINNATI (JUNE 19) PR NEWSWIRE - Eagle-Picher Industries (NYSE: EPI) today announced that sales for the second quarter ended May 31, 1990 were $184.4 million compared with $193.1 million in the second quarter of 1989. Operating income was $14.4 million compared with $15.2 million. Net

income was $22.6 million or $2.11 per share compared with $13.0 million or $1.22 per share. In March, Akron Standard Division was sold for $39 million in cash, resulting in a gain of $11.9 million or $1.11 per share after certain other adjustments. In the second quarter of 1989, Akron Standard had sales of $10.2 million and operating income of $1.3 million.

During the second quarter of 1990, approximately 6,200 new asbestos claims were received compared with 4,000 and 4,900 in the second quarters of 1989 and 1988 respectively. For the six months, approximately 11,300 new claims were received compared with 11,000 and 9,500 in the first half of 1989 and 1988 respectively. During the second quarter, approximately 3,600 were disposed of compared with 3,400 and 1,500 in the second quarters of 1989 and 1988 respectively, at an average cost, excluding legal and administrative expense, of $6,100 compared with $5,000 and $7,100. For the six months, approximately 7,800 claims were disposed of compared with 7,100 and 3,400 in the first half of 1989 and 1988 respectively, at an average cost, excluding legal and administrative expense, of $5,900, $5,600, and $7,100 respectively. Total settlement, legal, and administrative costs for the second quarter were $31 million and for the six months were $62 million. As of May 31, 1990, there were outstanding agreements to settle approximately 9,300 claims for approximately $52 million with scheduled payments in 1990 and beyond. At the end of the quarter, there were approximately 62,100 claims outstanding.

ANAHEIM, CA (JUNE 19) PR NEWSWIRE - Odetics Inc. (AMEX: OA, OB) has announced the purchase of all assets and on-going operations of K-Systems Inc. of El Paso, Texas, and Infodetics Corp. located here.

K-Systems is a designer and manufacturer of board-level timing products that are sold to the electronics, space, defense and communications industries. "K-Systems has a well-designed product that complements the timing product line currently offered by Odetics' Precision Time Division " explains Joel Slutzky, Odetics' chairman of the board and chief executive officer. "This combined with Odetics' marketing resources and expertise will make for a very synergistic relationship." Under the terms of the agreement, K-Systems President, John Kates, manages the operation which is now referred to as the KSI Division of Odetics. The KSI Division will remain in El Paso.

Infodetics was founded in 1972 to provide computer-based, turnkey document management and control systems for government installations and contractors. Until November 1982, Odetics was a major shareholder of Infodetics. Today, as Odetics' Data Management Systems (DMS) division, the operation's business is focused on service and support products for the technical information management marketplace.

"A supplier of automated tape library systems for numerous applications, Odetics is the fastest growing company supplying these systems to the broadcast industry," said Slutzky. "The addition of Infodetics enables

the company to expand that technology into the technical document storage and retrieval market. As our DMS division we intend to grow Infodetics' products support business and develop new information management products for the industry."

Odetics, headquartered in Anaheim, is a leading manufacturer of intelligent machines, including information systems, for collecting digital and analog data, a well as robotic and artificial intelligence systems.

CHARLOTTE, NC (JUNE 19) PR NEWSWIRE - The board of directors of First Union Corporation (NYSE:FTU) today elected John R. Georgius president of First Union Corporation.

In this position, Georgius will manage First Union's banking operations and related staff in five states and will continue as chairman and chief executive officer of First Union National Bank of North Carolina. He was named to those posts in 1988. He was appointed vice chairman of the corporation in 1987.

"John Georgius has demonstrated exceptional leadership and a keen vision of our company's future," said Edward E. Crutchfield Jr., First Union Corporation chairman and chief executive officer. "It is with a great deal of pride that I announce this promotion in recognition of his contributions to First Union and to the communities we serve," Crutchfield said.

Georgius is past chairman of the Charlotte Chamber of Commerce, where he was instrumental in the development of the chamber's education initiatives. Under his leadership, First Union Corporation has adopted a corporate commitment statement that commits corporate resources and employee talents to improving education throughout First Union's five-state operating region.

Georgius, 45, began his banking career in 1963 and joined First Union in 1975. He was named head of the Trust Division in 1979 and was promoted to executive vice president to head the First Union National Bank of North Carolina's General Banking Group in 1981, to vice chairman of the bank in 1983, and to bank president in 1984.

Georgius is a graduate of Georgia State University. He is a member of the board of Merchants Distributors, Inc., (MDI) in Hickory, a trustee and member of the executive committee at Queens College, a member of the Board of Advisors at the College of Business Administration at Georgia State University, and a member of the board of directors of the Foundation For The Carolinas. He is also a member of the Board of Directors of the Presbyterian Hospital Foundation and the Charlotte Chamber of Commerce.

Georgius is a member of the Young Presidents' Organization and the Association of Reserve City Bankers.

First Union Corporation reported assets of $39.1 billion as of March 31, 1990 and operates 821 banking offices in North Carolina, South Carolina, Georgia, Florida and Tennessee and 278 nonbanking offices in 36 states.

CINCINNATI (JUNE 19) PR NEWSWIRE - On Friday, June 22, from noon until 1 p.m. at Fountain Square in downtown Cincinnati, Delta will celebrate its new nonstop service to Paris, which begins July 1, 1990.

It will be a grand celebration at Fountain Square with instrumental music, dancing and singing. A gigantic, colorful balloon will adorn the festivities. Of special interest is the fact that persons attending the celebration will have the opportunity to register to win two free round-trip tickets on Delta to Paris, plus a 6-day/5-night vacation at Hotel Du Louvre.

Local dignitaries will join Dorsey Jones, Delta's district director of marketing in Cincinnati, and other Delta officials at the Fountain Square celebration. Delta will receive a special proclamation from the mayor in conjunction with Delta's new Cincinnati-Paris service.

The public is invited to attend the celebration. For further information contact Delta's local marketing office at 513-352-5100.

Delta will officially inaugurate new nonstop service to Paris on July 1, 1990. Flights will depart Cincinnati at 8:45 p.m., arriving in Paris the next morning at 8:05 a.m. The return flight will depart Paris at 1:05 p.m. and arrive in Cincinnati at 4:30 p.m.

NEWTON, MASS. (JUNE 19) PR NEWSWIRE - Health and Rehabilitation Properties Trust (NYSE: HRP) today announced that it has completed $33 million of five year financing from a syndicate of lenders led by National Westminster Bank USA, a subsidiary of a United Kingdom bank based in London. The financing was arranged by Kleinwort Benson Limited, another London-based bank, and includes National Westminster Bank USA and two Japanese lenders, Crown Leasing USA Inc. and Mitsui Leasing USA Inc.

The financing is secured by first mortgage liens on three rehabilitation and skilled nursing facilities which are owned by HRP. The loan can be drawn anytime through Dec. 31, 1990. The interest rate on the financing is determined by a LIBOR-based formula which has been fixed, in part, by hedge arrangements at a minimum of 9 percent per annum and a maximum of 10.5 percent per annum.

David J. Hegarty, treasurer of HRP, stated that $17 million will be drawn this week to principally repay outstanding borrowings on the revolving line of credit. Presently, all of the company's debt is interest rate collared and not subject to interest rate exposure.

One of the financed properties is the Greenery Rehabilitation and Skilled Nursing Center in Boston, Mass. which is leased to Greenery Rehabilitation Group, Inc. This facility specializes in the treatment of head trauma patients. The other financed properties are Brook Hollow Healthcare Center and Cedar Lane Rehabilitation and Healthcare Center, both located in Connecticut and leased to Continuing Health Care Corporation of Boston, Mass. These two facilities provide psycho-social rehabilitation, head trauma rehabilitation and skilled and intermediate nursing care.

HRP is a real estate investment trust headquartered in Newton, Mass., which invests in health care related real estate throughout the United States. HRP began operations in December 1986 with investments in eight facilities totaling approximately $63 million. Today, HRP has investments in 22 rehabilitation facilities, psychiatric hospitals and nursing homes which total approximately $228 million. HRP Common Shares of Beneficial Interest are listed on the New York Stock Exchange.

BISMARK, N.D. (JUNE 19) PR NEWSWIRE - Calling offshore drilling "safer and more economically sound for the nation than any other alternative," Paul J. Hoenmans, executive vice president of Mobil Oil Corporation and president of the company's exploration and producing division, yesterday called on the members of the Interstate Oil Compact Commission (IOCC) to raise their voices to help stem the tide of legislation against exploration and development of petroleum resources offshore the United States.

Delivering the June 18 keynote speech to the mid-year meeting of the IOCC, an organization of 35 oil and gas producing states dedicated to the conservation of the nation's petroleum resources, Hoenmans said, "Surely, all of us want to protect the environment. However, much of the present hysteria about offshore drilling has been brought about by damage caused by tanker incidents. So, to shut down oil and gas exploration because of a transportation spill -- thereby increasing tanker traffic into the United States -- is logic I personally find difficult to understand."

Hoenmans then asked his audience a series of questions, the answers to which pointed out that:

-- according to the National Academy of Sciences, offshore petroleum operation caused less pollution to the oceans than river runoff, natural seeps and municipal discharges;

-- drilling for petroleum and pumping it ashore through pipelines is both safer and more economically beneficial than importing crude oil in tankers;

-- Three-fourths of U.S. offshore drilling has occurred in Louisiana, which leads the nation in commercial fish catch.

The Mobil executive also had some questions which he left unanswered. "Are Louisiana and Texas and Alabama and Mississippi expected to be the offshore providers to the rest of the coastal states? And what about onshore states, whose production will continue to be depleted while federal offshore areas that can be explored safely stand idle?" he asked. "Who determines what's fair here?"

CHICAGO (JUNE 19) PR NEWSWIRE - For the year ended April 30, 1990, Methode Electronics (NASDAQ: METHB) today reported substantially improved earnings of $5,096,000, up 135 percent compared to $2,166,000 for the year-earlier period. Earnings per share rose 130 percent to $.46 versus $.20 last year. Sales increased 9 percent to $132,783,000 from $122,175,000 for fiscal 1989.

For the fourth quarter of fiscal 1990, net income increased 145 percent to $1,937,000 compared to $791,000 for the same quarter last year. Earnings per share rose to $.17 versus $.07. Fourth-quarter sales rose to $36,234,000, up 10 percent from $32,831,000 a year ago.

President William J. McGinley said, "The better performance experienced during the first three quarters continued into the final three months of our fiscal year, which ended April 30, 1990. This improvement was widespread with most operations reporting favorable results.

"Importantly, those Methode operations which comprise the connector business collectively generated a 157 percent increase in profits and a 22 percent sales rise. The domestic business grew consistently throughout the year, helped by two of our well-received products, i.e., the low profile chip carrier socket and the dataMate I/O terminator. Methode's Singapore facility recorded a 60 percent increase in sales. In the year ahead, we expect continued progress in both sales and earnings for Methode's various connector operations.

"Methode's automotive electronics business grew 10 percent during fiscal 1990 and is poised to easily repeat that sales growth rate if market conditions allow. During the past year, we were involved in more significant automotive programs than ever before. The air bag clockspring activating device affords more opportunity for growth than any other singular mechanism we have ever devised.

"The company's Graphic Research subsidiary, a manufacturer of multilayer printed circuits for the defense industry, rebounded during fiscal 1990 from the negative impact of a troublesome contract in fiscal 1989.

"Bus bar operations produced a 50 percent increase in sales and a tripling of profits. As a result of strong demand for bus bar products, we are increasing automated machining capacity by 50 percent.

"Our automatic test equipment division continued to report disappointing results. We expect our new generation of bare board test equipment containing attributes technically ahead of the field will be offered during the later part of fiscal 1991.

"We are also anticipating completion of our long-awaited manufacturing defects analyzer, but the timing of this introduction is not as critical to short-term profitability as that of the new bare board tester.

"Barring a downturn in the nation's economy and/or an automotive industry strike, we look for continued improvement over last year's results and believe that we should achieve both record sales and earnings levels in fiscal 1991," McGinley concluded.

METHODE ELECTRONICS INC.

Period ended April 30:	Three months		12 months

#90170p7775 06/19/1990 ~PR Newswire

COLUMBIA, MD (JUNE 19) PR NEWSWIRE - At an analyst meeting in New York today, Ryland officials cautioned housing industry analysts about a slowdown of new home sales in the short-term.

"My sense is that the year may not be as good as we would wish for, but it will likely not be as bad as you fear," said Charles E. "Ted" Peck, chairman and CEO of The Ryland Group, Inc. (NYSE: RYL). "Unit sales in April and May for Ryland Homes and Brock (Ryland's homebuilding subsidiary in California) were down about 24 percent from 1989 levels, while settlement units were down only 4 percent.

"The shift of our business away from the relatively higher margin markets of Washington, D.C., and Southern California is making it difficult to match last year's profits," said Peck. "And, the issuance and advisory portions of our mortgage company continues to find a weak market."

Peck said that the events of this year have resulted in a weaker outlook for 1990, but are encouraging in strengthening long-term prospects for Ryland. "This business has been able to grow shareholders' wealth at an annual compounded rate of 17 percent. I don't see why this track record

should end," he said.

In addition, Peck remarked on the trend toward consolidation of the homebuilding industry. "There are several major forces behind a possible industry consolidation. First, the problems of the thrift industry are making it hard for smaller builders to find funds for acquisition and development. Second, the continuing shortage of labor will also affect the viability of smaller builders, Peck said. "Third, the credit crunch is depleting funding opportunities for small- and middle-sized builders. And finally, there are opportunities for larger builders to establish brand franchise opportunities in the U.S."

The Ryland Group, Inc., one of the nation's largest homebuilders, has built more than 90,000 homes since it was founded in 1967.

WASHINGTON, (JUNE 19) PR NEWSWIRE - American Mobile Satellite Corporation (AMSC) announces the receipt of three bids for its mobile satellite service (MSS) spacecraft procurement.

A bid was received from TRW, Inc. (NYSE: TRW) of Redondo Beach, Calif., and two distinctly different bids were received from Hughes Aircraft Corporation (HAC) of Los Angeles. The TRW bid includes COM DEV of Cambridge, Ontario, as a subcontractor, and both the HAC bids include Spar Aerospace, Ltd. of Toronto as a subcontractor. AMSC expects to make the award by the end of July.

"This has been an intense and exciting process," said George Tellmann, chief executive officer of AMSC. "The satellite manufacturers' great interest in AMSC makes it clear that they believe there is a large and viable market for mobile communications via satellite."

AMSC is licensed by the U.S. Federal Communications Commission to launch and operate the MSS system for the United States (including all 50 states, Puerto Rico, the Virgin Islands, and 200 miles of coastal waters). AMSC will offer voice, fax, positioning, and data communications to all mobile users, whether on land, in the air, or at sea. AMSC plans to launch its first satellite in 1993. Until then, AMSC will be offering data services via space segment leased from an existing satellite.

#90170p7782 06/19/1990 ~PR Newswire

MENLO PARK, CA (JUNE 19) PR WIRE - Consolidated Freightways Inc. (NYSE: CNF) announced today that it had received a commitment from Chemical Bank of New York to provide $500 million of a new senior secured credit facility of up to $860 million.

It was also announced that Chemical Bank has agreed to act as agent and use its best efforts to syndicate the credit facility. One or more of the company's existing relationship banks will be invited to act as co-agents in the transaction.

"This new banking relationship recognizes the strengths and resources of the CF organization and will provide the company with greater operating and financial flexibility over the next five years," said Lary R. Scott, president and chief executive officer. "We are pleased that Chemical Bank will be working with the company to meet our long-term objectives."

The new credit facility is subject to the satisfaction of various conditions. It would be made available to the company and its trucking subsidiaries for general corporate purposes as well as investments and advances to the company's subsidiaries. These investments and advances would be subject to limitations to be established.

Also, to the extent required, the credit facility will be used to refinance existing debt.

It was also announced today that Chemical Bank has advised the company that it will make available, subject to certain conditions, a $75 million financing facility covering designated receivables, which will be used for working capital purposes. It will supplement the company's existing bank arrangements, which have been substantially limited as a result of the continuing losses of Emery Worldwide.

The company's existing bank arrangements, as amended, as well as the new $860 million credit facility, will preclude payment of common stock dividends for the near-term. The new credit facility will permit the company to pay dividends on its common stock in the future, subject to meeting certain performance standards.

The company indicated that although operating losses at Emery Worldwide have been reduced from preceding months, Emery's long-term prospects are dependent on substantially increased business levels, which that company continues to focus on obtaining.

Consolidated Freightways Inc. is a diversified transportation company with businesses in long-haul trucking, regional overnight trucking, air freight and intermodal rail and ocean services.

#90170p7783 06/19/1990 ~PR Newswire

WEST PALM BEACH, FL (JUNE 19) PR NEWSWIRE - Jewelmasters, Inc. (AMEX: JEM) today reported results for the first fiscal quarter ended May 5, 1990.

Net sales for the quarter were $9,544,553 compared to $14,214,851 in the year-ago period. The company had a net loss of $609,412 ($.31 per share) vs. $129,970 ($.06 per share) last year.

In the fiscal 1990 first quarter, comparable department sales, consisting of 62 departments, increased 7.7 percent. Sales increased $565,000 at five leased fine jewelry departments and the company's freestanding JEM fine jewelry store, which were opened in 1989. In addition, first-quarter sales benefited from Jewelmasters' participation in going-out-of-business sales at Bonwit Teller. These increases, however, could not offset $3.9 million of sales for 44 departments closed in 1989 and $3,057,000 in wholesale sales in the year-ago quarter.

Comparable department sales exclude sales at the Bonwit Teller, Woodward & Lothrop and John Wanamaker groups, which are scheduled to be closed in the second quarter of the current year, as previously announced. First-quarter sales for these groups were $3,250,000 compared to $1,950,000 last year. The sales increase of $1.9 million for Bonwit Teller is attributable to the company's participation in the Bonwit Teller going-out-of-business sale. Sales for the Woodward & Lothrop and John Wanamaker groups decreased $600,000 in the quarter.

Cost of sales including buying and occupancy expenses as a percentage of sales increased from last year. The increase is primarily due to reduced manufacturing efficiency as a result of reductions in volume, the higher cost of sales percent for the JEM operation and a closeout of a watch line.

Selling, general and administrative expenses decreased $1,087,000 from the prior-year quarter. The decrease is attributable to the reductions in expense levels resulting from the reduced number of departments the company operates. The year-ago 13 weeks also included $316,000 incurred in connection with the termination of the former company president.

Interest expense decreased in the first quarter as a result of lower borrowing levels due to reduced inventories, compared to last year.

Jewelmasters, Inc. designs, manufactures and sells fine jewelry through leased departments in better department and specialty stores nationwide.

MEDIA, PA (JUNE 19) PR NEWSWIRE - Robert S. Bollinger, president and chief executive officer of Susquehanna Bancshares Inc. (NASDAQ-NMS: SUSQ) in Lititz, Pa., and Lewis W. Walters, president and chief executive officer of Elmwood Federal Savings Bank (NASDAQ-NMS: EFSB) in Media, announced today the execution of a definitive merger agreement pursuant to which Elmwood will become a wholly owned subsidiary of Susquehanna.

Susquehanna will acquire all of the issued and outstanding shares of common stock of Elmwood in exchange for 1,285,000 shares of Susquehanna common stock. The exchange rate of approximately .88 shares of Susquehanna for each share of Elmwood equates to $16.73 for each share of Elmwood stock at the closing price of Susquehanna on Monday, June 18.

The merger agreement is subject to, among other terms and conditions, a 30-day period during which each party will review the operational and financial condition of the other. This due diligence period may be renewed for an additional 30 days by either party. During the due diligence period either party may terminate the merger agreement without prejudice.

Susquehanna previously received regulatory approval to proceed with negotiation of a definitive merger agreement and preparation and delivery of applications to federal and state authorities. The merger will be described in a joint proxy statement/prospectus prepared by Susquehanna and Elmwood and distributed in connection with special meetings at which shareholders will vote on the transaction.

Elmwood is a federally chartered savings bank with total assets of $236.6 million and stockholders' equity of $22.4 million at March 31, 1990. Elmwood serves Philadelphia, Delaware and Chester counties of southeastern Pennsylvania through nine offices with headquarters in Media.

Susquehanna, a multibank holding company, had total assets of $1.548 billion at March 31, 1990, with 63 banking offices throughout central Pennsylvania and northern Maryland. Susquehanna is the parent company of six community banks including Citizens National Bank of Southern Pennsylvania, Greencastle, Pa.; Farmers and Merchants Bank of Hagerstown, Hagerstown, Md.; Farmers First Bank, Lititz; First National Trust Bank, Sunbury, Pa.; Spring Grove National Bank, Spring Grove, Pa., and Williamsport National Bank, Williamsport, Pa.; a leasing company, Susque-Bancshares Leasing Co. Inc; and an insurance company, Susque-Bancshares Life Insurance Co.

Susquehanna's common stock is listed on the NASDAQ National Market System under the symbol SUSQ. Elmwood's common stock is listed on the NASDAQ National Market System under the symbol EFSB.

BOSTON (JUNE 19) PR NEWSWIRE - John R. Laird, chairman and chief executive officer of The Boston Company, announced today that George W. Carmany III will join the company on July 1, 1990, as senior executive vice president in charge of the company's international, administrative and corporate planning and development functions. He will also be proposed as a member of the board of directors of The Boston Company.

Carmany will report directly to Laird and will oversee the international business group as well as the systems and operations, finance, legal and credit areas of the company. He will also establish and oversee a corporate planning and development function at the company. The company's core businesses of private banking, master trust and global custody, institutional asset management and fund administration will continue to report to William J. Nutt, president of The Boston Company.

Carmany joins The Boston Company from American Express Company, where he most recently served as senior executive vice president and chief administrative officer of American Express Bank Ltd. Carmany began his career with American Express Bank in 1975 and subsequently held senior positions in the strategic planning and Travelers Cheque divisions of American Express before rejoining American Express Bank in 1982.

Laird said, "We are very pleased to have a person of George's caliber join the company. The strengths and abilities he has demonstrated in strategic planning and administration during his tenure at American Express will be enormously beneficial to the company as we go forward in each of our strategic markets."

Laird added, "George's support of quality and customer service throughout his lengthy international career with American Express will serve him well at The Boston Company, where we share a tradition of similar values."

The Boston Company is an international financial services firm with over $240 billion in assets under custody and management. The company provides private banking, master trust and global custody, institutional asset management, and fund accounting and administration through its offices in Boston, California, New York, London and Zurich.

The Boston Company is a wholly owned subsidiary of Shearson Lehman Hutton (NYSE: SLH), and American Express company.

NEW YORK (JUNE 19) PR NEWSWIRE - Vernitron Corporation announced today that it has received the final report from the inspectors of election regarding the results of voting at Kollmorgen Corporation's (NYSE: KOL) annual meeting of shareholders.

Vernitron also announced that last week, following a review of the preliminary tally performed by the inspectors, Vernitron presented a number of significant challenges to votes affecting hundreds of thousands of shares for the inspectors to rule upon. Vernitron believes the inspectors erred in ruling with Kollmorgen management on these challenges and is considering appropriate legal action.

Vernitron also noted that the final tally did, however, confirm that a plurality of Kollmorgen's independent shareholders voted in favor of Vernitron's nominees. Approximately 10.9 million shares were voted at the meeting and about 3.1 million shares are held by the Ruttenberg group, Kollmorgen management and related parties.

SAN FRANCISCO (JUNE 19) PR NEWSWIRE - Chevron U.S.A. Inc. announced a change in the posted prices it will pay for crude oil from California and Alaska fields. Postings are decreased by varying amounts.

The change was effective today at 7:00 a.m. Chevron will now pay:

for 35 API -- Cook Inlet -- $11.15
26 API -- Buena Vista -- $11.45
19 API -- Huntington Beach -- $11.10
13 API -- Kern River -- $10.00
27 API -- Long Beach -- $11.80
13 API -- Midway Sunset -- $10.00
17 API -- Wilmington -- $10.90

The gravity adjustment scale is as follows:

Above 40.0 deg. -- $0.000 per tenth degree API
20.0 to 40.0 -- $0.010 per tenth degree API
Below 20.0 -- $0.010 per tenth degree API

New prices for all fields are reflected in Chevron's California and Alaska Crude Oil Price Bulletin 90-CA18. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

JERICHO, NY (JUNE 19) PR NEWSWIRE - Getty Petroleum Corp. (NYSE: GTY) announced today that it has been advised by the U.S. Attorney's Office in Brooklyn, N.Y., that the U.S. government intends to seek indictments against the company's subsidiary, Getty Terminals Corp., and one of the company's officers for an alleged conspiracy with a customer to evade certain federal gasoline excise taxes in 1985.

Getty believes that the allegations are without merit and, if indicted, will vigorously defend itself.

The company said it will make further comments at such time as formal action is taken by the U.S. Attorney.

Getty Petroleum Corp., one of the nation's largest independent marketers of gasoline and petroleum products, markets in a 13-state area, Maine through Virginia. The company is also a major marketer of heating oil and is a wholesale distributor of a variety of petroleum products through its East Coast petroleum storage and distribution network.

#90170p7803 06/19/1990 ~PR Newswire
VIENNA, VA (JUNE 19) PR NEWSWIRE - Perpetual Financial Corporation (NASDAQ-NMS: PFCP) today announced that its wholly owned subsidiary, Perpetual Savings Bank, F.S.B., has adopted a strategic plan to position

it for the challenges it faces in the 1990s.

The objective of the three-year plan is to restructure the bank into a stronger, more streamlined consumer and mortgage bank.

In underscoring the fundamentals of the plan, Thomas J. Owen, Perpetual's chairman and chief executive officer, said: "Historically, Perpetual has demonstrated great strength in its ability to generate deposits and to meet the consumer and residential mortgage financing needs of its customers. This will be our primary emphasis for the foreseeable future. To that end, we will intensify our marketing and sales efforts to meet the primary retail depository and borrowing needs of our customers in the greater Washington area, which we have served for more than a century."

While the plan calls for Perpetual to downsize overall, Perpetual intends to increase its total retail deposits and percentage of customers who rely on Perpetual as their primary bank. It will also stress direct consumer lending through its existing services that include home equity and personal lines of credit, second trust mortgages, credit cards and collateralized consumer debt, particularly automobile, boat and home improvement loans. Another integral part of Perpetual's emphasis will encompass its executive banking and small business lending programs.

This new strategy is in response to changes in the regulatory environment resulting from the enactment of the Financial Institutions Reform, Recovery and Enforcement Act of 1989, the current softness of the economy and the real estate market, and the recent examination of Perpetual by the Office of Thrift Supervision.

Said Owen: "The goals of this plan are to alter the composition of both our assets and liabilities, preserve capital and enhance the value of our franchise. The combination of the soft market and our determination to address the issue of our problem loans dictates that we focus on efforts to reduce our non-performing assets which have continued to increase in the third quarter. As part of these efforts, our plan addresses asset quality issues through the reshaping of our asset mix as well as programs to continue to pursue resolution of our non-performing loans." As previously announced for the first two quarters of fiscal year 1990, Perpetual Financial reported a net loss of $62.1 million.

The new plan calls for phasing out certain lines of business including corporate lending, commercial real estate lending, auto leasing and investment in real estate joint ventures. As part of this, the plan calls for winding down existing real estate joint venture projects.

Perpetual believes that the plan should result in long-term benefits for the company, but the competitive market in which it operates and the softness of the economy and real estate market could make it difficult for

Perpetual to accomplish all elements of the plan (such as winding down of the real estate joint venture assets). Due to the current market uncertainties, Perpetual could recognize further losses and/or could experience difficulties maintaining future regulatory capital requirements.

Owen said: "We will continue to focus on mortgage lending both for Perpetual's portfolio and for sale in the secondary market through our mortgage banking subsidiary, which is the largest residential loan originator in the Washington metropolitan area.

"We also expect to continue originating loans for residential construction to selected home builders and developers in this marketplace through our real estate division." Owen noted that the real estate division will be reorganized to better serve traditional small builders while providing larger loans to established major home builders.

Perpetual Financial Corporation, with assets of $5.7 billion, is the holding company for Perpetual Savings Bank, F.S.B., the largest thrift institution in Virginia, Maryland and the District of Columbia.

ST. LOUIS (JUNE 19) PR NEWSWIRE - Large businesses in Southwestern Bell Telephone's (SWBT) territory, as well as throughout the country, can now reach (SWBT) directory assistance by computer.

The new SWBT electronic access service, DirectLine Custom(SM), lets a customer get SWBT's customer listings for every area code except the customer's own via a terminal or a personal computer. For example, a customer in Dallas can access all of SWBT's 15 area codes except for Dallas' 214. However, a business outside SWBT's territory, such as one in Los Angeles, could have access to customer listings in all 15 area codes.

Already, AT&T has indicated it plans to purchase the service. AT&T, in turn, plans to package the service as AT&T Find America(SM).

SWBT provides network exchange service to nearly 9 million customers in Arkansas, Kansas, Missouri, Oklahoma and Texas.

Customers who could benefit from the service include large business customers, interexchange carriers and private network providers.

"DirectLine Custom gives customers the same information available to our

directory assistance operators," explains Gary Moser, division manager-operator services. "And, in many cases, customers can get accurate multiple listings at less than the cost of assisted calls."

Charges include a one-time establishment fee of $4,152. Access is by screen. Each screen is billed at 9.3 cents. The charge for the initial "log-in" identification (ID) number is $8.80. Additional IDs are 30 cents each. Also, customers will have to provide their own transport to the database, located in St. Louis.

DirectLine Custom is unique in that it provides access to 15 million customer listings in five states. Other telephone companies have on-line directory access; however, their offerings are generally only for one state.

With DirectLine Custom, customers have a choice of listings: residential, business or government (federal, state, county and city). Information for each customer record includes name (for residential customers) or business name, street address and phone number. Searches may only be initiated by using a name.

Listings for non-published and unlisted numbers are not included. The database is updated daily. Security features prevent the possibility of altering data.

Southwestern Bell Telephone is a wholly owned subsidiary of Southwestern Bell Corp.

NORTH HIGHLANDS, CA (JUNE 19) PR NEWSWIRE - Michigan General Corporation announced today that negotiations for sale by the company's Diamond Lumber Inc. subsidiary of all of Diamond's 24 lumberyards located in the state of California and in Reno, Nev., to BMC Holdings, Inc. of Boise, Idaho, have ceased. The company continues to discuss other asset sale possibilities with BMC.

The company also announced that Diamond is consolidating ten of its California lumberyards into 14 of its most successful distribution centers to reduce debt and improve cash flow.

"Our salesmen will continue to serve these markets from better stocked and more productive locations. We are eliminating duplications for greater economy, better use of working capital, and increased productivity," said Bernard Kritzer, chairman of Michigan General Corporation and Diamond

Lumber, Inc.

Diamond is the company's sole operating subsidiary and is engaged in the sale of lumber and building materials.

ATLANTA (JUNE 19) PR NEWSWIRE - The Home Depot, Inc. (NYSE: HD) announced today that it has filed a registration statement with the Securities and Exchange Commission providing for the issuance of $200 million of convertible subordinated notes due June 15, 1997. The notes will be convertible at the option of the holder into shares of common stock of the company at any time prior to maturity, unless previously redeemed. The First Boston Corporation and Invemed Associates, Inc. will co-underwrite the proposed offering.

The net proceeds from the sale of notes will be used principally to finance the company's capital expenditure programs over the next several years, including planned store expansion and renovations, and for general corporate purposes.

Home Depot is a leading retailer in the growing home center industry. It operates "Do-It-Yourself Warehouse" stores which sell, largely on a cash-and-carry basis, a wide assortment of building materials and home improvement products. Home Depot currently operates 125 stores ranging in size from approximately 67,000 to 140,000 square feet of enclosed space in Alabama, Arizona, California, Connecticut, Florida, Georgia, Louisiana, New Jersey, New York, South Carolina, Tennessee and Texas.

#90170p7836 06/19/1990 ~PR Newswire

LONDON (JUNE 19) PR NEWSWIRE - Pergamon AGB plc, Europe's leading quality television research and audience measurement company, recently privatized, has, in one of the biggest surprises in the market research business, been asked by the United States television networks, NBC, CBS and ABC, to re-enter the American market. The networks are keen to review AGB's updated plans for devising a new quality television measurement system in the United States, the company said today.

This request has been made to correct the inherent weakness and apparent

unreliability of Nielsen's TV audience measurement data that is causing so much financial damage to the networks. NBC, CBS and ABC have maintained for months that Nielsen's figures have "become unreliable."

Some two years ago, AGB plc, a British public company prior to its recent acquisition by Pergamon, lost some 50 million pounds sterling trying unsuccessfully to enter the American television measurement market.

Pergamon AGB currently operates television audience measurement research with its People Meter System in some 15 countries, including the United Kingdom, Italy, Australia, the Netherlands, Belgium, Spain and Hong Kong. BARB, the U.K. organization representing ITV and the BBC, recently agreed to award Pergamon AGB the major part of the audience measurement contract in the United Kingdom for a further seven- year period to 1998, against competition from Nielsen's.

The U.S. networks probably recognize that Pergamon AGB's approach to market research is based on quality. On the other hand, in the opinion of many knowledgeable people in the industry, Nielsen is apparently not interested in quality, focusing instead (as is its right) on achieving bigger margins.

Robert Maxwell says, "A war appears to be going on between the U.S. networks and Nielsen's, and inevitably innocent parties such as advertisers are being caught in the crossfire."

Larry Hoffner, NBC's executive vice president of sales, has told The New York Times that, "The unexpected decline of national television viewing in the first three months of the year had cost NBC $40 million." The networks were being pressured to give advertisers free commercial time when the network's programs failed to reach the number of viewers they had guaranteed to advertisers under the Nielsen system.

Hoffner's view is that, "NBC must protect itself from the inconsistent data being reported by Nielsen."

Maxwell concluded that, "The networks' stake in this issue is large: U.S. advertisers will spend more than $40 billion on network commercial time during the forthcoming upfront sales season." At the heart of the U.S. television network complaints of the Nielsen system is that many viewers are being left out of the rating books unnecessarily, according to the company.

EDEN PRAIRIE, MN (JUNE 19) PR NEWSWIRE - CPT Corp. (NASDAQ: CPTC) announced today that it has formalized its business operations and corporate structure to assure focus on various segments of its products and distribution opportunities and to encourage each area of activity to operate with greater autonomy and fiscal accountability.

This completes the process of corporate reorganization begun by CPT's new president and chief executive officer, Arun Dube, who took office May 23. "This move complements the reorganization, announced last week, of the company's engineering, marketing, and support personnel into separate business units," said Dube. "The focus of CPT is to transform and regenerate itself into a market-driven company by building on its strengths and reputation of excellent customer support and loyalty."

The six distinct operational units are as follows: -- The CPT Multilingual Translations Division, a new operating division, will market CPT's new automated language translation system, which electronically translates text from one language to another and has strong sales potential in bilingual Canada and the multilingual European Economic Community. The current product simultaneously supports six languages. CPT expects to become a worldwide leader in this specialized market.

The company announced today that it has received an order for this product in excess of $100,000 from the Municipality of Ottawa. Additional installations are in Canada and Washington, D.C.

-- CPT Software Division, another new operating division, will market CPT's unbundled software products. The mission of this division will be to develop new opportunities for CPT software offerings for third-party computing hardware. Initial offerings will include CPT EasyAccess(TM), which allows both MS-DOS and UNIX systems to interconnect, and the software for the CPT Image File(TM) System.

-- SMR Computer Services Inc., 100-percent owned by CPT, will continue to operate its business of providing computer services to the medical profession. This operation has been in business for many years and was acquired by CPT in 1986.

-- International activities will be operated through CPT (A.G.), a Swiss company, 100-percent owned by CPT, established for the purpose of transacting business with the CPT's international distributors and vendors. CPT (A.G.) has subsidiary and/or affiliated operations in the United Kingdom, Finland, Ireland, and Mexico.

CPT announced today that it has completed the installation of a CPT Image File System at PowerGen Ltd. in the United Kingdom. CPT successfully competed against every major product in the imaging market and was chosen for its capabilities. PowerGen is the British utility company that

supplies electric power to England and Scotland. CPT expects to compete for an additional 21 PowerGen installations throughout the U.K.

-- CPT Business Systems Ltd., 100-percent owned by CPT and based in Ottawa will oversee the company's Canadian sales operations.

-- CPT Domestic Operations Division, which will consist of activities directly related to the development, production, and domestic distribution of CPT's office automation products. These products include the CPT Image File(TM) System (IFS), an optical disk-based filing and retrieval system, the CPT Office Dialog System(TM) (ODS)(R), a powerful networking system, and the company's line of personal computers, software, and peripherals.

These operations will continue as entities of CPT Corporation and operate as business units responsible for their respective revenues and profits. Each will have responsibility for marketing and distribution of products in areas for which they are established. Corporate financial, legal, and other staffs will continue to be centralized as to all operations. Product development will continue to be the responsibility of the Domestic Operations Division.

With headquarters in Eden Prairie, Minn., CPT Corporation is a leader in the development, manufacture, and worldwide marketing of related products and services designed to make office workers more productive.

#90170p7844 06/19/1990 ~PR Newswire

SACRAMENTO, CA (JUNE 19) PR NEWSWIRE - San Diego Gas and Electric Company (SDG&E) has requested approval from the California Energy Commission to construct and operate an additional electric generation facility at its South Bay power plant site in Chula Vista.

The project is known as the South Bay Augmentation. The South Bay location is also one of five sites proposed in a separate proceeding before the Commission for a Combined-Cycle Project.

A Committee of the California Energy Commission will conduct a public informational hearing and site visit for the South Bay Augmentation on June 21, 1990, beginning at 10 a.m. in the Chula Vista City Council Chambers. A Commission public informational hearing for the Combined-Cycle project was held in Chula Vista last month.

The South Bay Augmentation will produce 140 megawatts (MW), enough electricity to meet the needs of more than 100,000 homes, and the Combined-Cycle project will produce 460 MW, enough electricity to meet the

needs of more than 331,000 homes. These two projects represent a total capital cost of approximately $600 million.

Vice Chair Barbara Crowley, who serves as the presiding committee member for the Combined-Cycle project and is the second committee member for the Augmentation project, encourages the public to participate in both of the Energy's Commission's power plant siting proceedings.

"The major reason for an informational hearing is to explain to the public agencies and local officials all aspects of the process the Energy Commission will follow. Every effort will be made to hold future hearings and workshops in the local area to accommodate the public because we value their opinion," explained Vice Chair Crowley.

"Providing the public multiple opportunities to understand, review and comment on a project is essential to the Commission's siting process," said Commissioner Art Kevorkian, second member of the Combined-Cycle Committee.

The presiding committee member for the Augmentation project is Robert Mussetter. "The Energy Commission has a very open and exhaustive process that consistently and repeatedly encourages and values participation by the public, local and state agencies, and all other interested parties," explained Commissioner Mussetter.

SCHWECHAT, AUSTRIA (JUNE 19) PR NEWSWIRE - The group which owns the Head, Tyrolia and Mares worldwide sports equipment businesses announced today that it has completed the acquisition of Calzaturificio Brixia S.p.A., a manufacturer of ski boots based in Crespignaga di Maser, Montebelluna (Treviso), Italy. HTM Sports Holding B.V., which produces and distributes Head skis and tennis racquets, Tyrolia skis, ski bindings and cross country systems as well as Mares diving equipment, is one of the largest sports equipment companies in the world. Calzaturificio Brixia S.p.A., a privately-owned company, is one of the largest manufacturers of brand-name ski boots.

The acquisition of Brixia represents an opportunity for the Head/Tyrolia/Mares group to offer a complete line of skiing equipment, including skis, ski bindings and ski boots. Skis are currently sold under the Head and Tyrolia brand names. Tyrolia ski bindings are one of the most popular brands in the world with more than 40 percent of the market in 1989. The addition of ski boots will allow Tyrolia and Head to develop new technologically advanced high performance skiing equipment.

Franz Deutsch, president of Tyrolia, and Peter Stangl, president of Head, are both delighted with this acquisition which gives HTM a very strong position in the winter sports business.

Brixia manufactures the Sanmarco and Munari ski boot brands which are sold around the world. The company has recently completed the construction of a new ski boot factory located in Crespignaga di Maser, Montebelluna (Treviso), Italy. Mateja Svet, winner of the gold medal at the 1989 world championships in Vail, uses Sanmarco ski boots.

The management of Calzaturificio Brixia S.p.A., Enzo Prandina, president, and Germana Congiu, managing director, have expressed their satisfaction in becoming part of the HTM group, foreseeing important synergies for the winter sports equipment businesses in which they operate.

Prandina and Congiu have become shareholders of HTM Sport Holding B.V. and will continue in their present management roles at Calzaturificio Brixia S.p.A.

CHICAGO (JUNE 19) PR NEWSWIRE - Dr. James S. Todd, has been selected today as the executive vice president designate (pending agreement on final terms) of the American Medical Association by its board of trustees at 4:30 p.m. (CDT). ''The AMA's board of trustees believes that Dr. Todd has the leadership abilities and management skills to represent America's physicians as executive vice president,'' said Dr. John J. Ring, chairman of the AMA board of trustees. ''We interviewed several well qualified candidates, but we believe Todd is the man we need as we enter the 1990s. He is a superb administrator as well as an excellent advocate for physicians and their patients on Capitol Hill.''

Todd had been the AMA's acting executive vice president since Feb. 9, 1990. He left his general surgery practice in Ridgewood, N.J., in 1985, to serve as senior deputy executive vice president at the AMA. He was a member of the board of trustees from 1980 to 1984 and served as a commissioner to the Joint Commission on Accreditation of Hospitals from 1982 to 1985.

Born in 1931, Todd was graduated cum laude from both Harvard College and Harvard Medical School. He interned and served his residency in surgery at Columbia Presbyterian Medical Center in New York City. He became chief resident in 1963. He is a diplomate of the American Board of Surgery and

a fellow of the American College of Surgeons.

He has been a director of the Institute of Society, Ethics, and the Life Sciences at the Hastings Center and was a councillor-at- large of the Harvard Medical Alumni Association. He served on the Committee to Establish Guidelines for the Care of Comatose Patients, State of New Jersey, in 1977. Dr. Todd received the Edward J. Ill Distinguished Physician Award of the New Jersey Academy of Medicine in 1980 and the Distinguished Service Award of the New Jersey Hospital Association.

Todd has served as trustee and chairman of the board of trustees of the Medical Society of New Jersey; chairman of the New Jersey delegation to the AMA House of Delegates; and chairman of the Ad Hoc Committee to review the AMA's Principles of Medical Ethics.

SEATTLE, (JUNE 19) PR NEWSWIRE - Sea-Land Service Inc., in conjunction with its exclusive Mexican agent, Trafimar Inc., recently launched a new less-than-truckload (LTL) service from all origins in Asia to Mexico City and Guadalajara, Mexico. "With the assistance of our exclusive Mexican agent, Trafimar Inc., we have opened up a completely new market. No other ocean transportation carrier can offer a top-quality direct bill-of-lading LTL service into the interior of Mexico," said Tom Cowan, vice president and general manager of sales and operations for Sea-Land's Pacific Division.

"Before, LTL shippers to Mexico faced complications and delays due to the difficulty of dealing with a number of different intermodal transport agencies. Sea-Land's new service eliminates the need for multiple transactions, and takes away the language and regulatory barriers to doing business in Mexico," he added.

"Our new Asia-to-Mexico LTL service offers our customers the advantage of one-stop-shopping," said Brian Taylor, Southwest sales manager. "By having Sea-Land handle all of their logistical requirements, it saves our customers both time and expense."

With the new service, Asian cargo bound for Mexico is booked on a through bill-of-lading. The cargo moves on Sea-Land's intermodal system through Laredo, Texas, to its destination in Mexico. The new Asia-Mexico LTL service features several time and cost-saving advantages. For example:

-- The consignee or shipper will receive a through bill-of-lading with one charge for ocean freight and inland transportation,

simplifying the payment procedure.
-- Cargo moves on a daily service to Mexico City and Guadalajara.
-- Trafimar Inc. will expedite deliveries to their final destination so that inventories and customer deliveries can be accurately maintained. In addition to Mexico City and Guadalajara, Cowan anticipates that two new destinations, Monterrey and Saltillo (located southwest of Nuevo Laredo), will be added to the service this fall.

Sea-Land Service Inc., a unit of CSX Corp., Richmond, Va., is a world leader in international intermodal freight transporation and related trade services. Sea-Land's U.S.-flag fleet numbers 40 container ships. Overall Sea-Land operates more than 60 container ships and 128,000 containers in U.S. and foreign trade, and serves 80 ports in 70 countries and territories around the world.

#90170p7856 06/19/1990 ~PR Newswire
BEAVERTON, ORE (JUNE 18) PR NEWSWIRE - Nike (NASDAQ: NIKE) Chairman and Chief Executive Officer Philip H. Knight today announced the appointment of Richard K. Donahue as the firm's new president and chief operating officer. The appointment will be effective July 1.

"In the past year, Nike surpassed Adidas to become the number one sports and fitness brand in the world. The tremendous success we are experiencing has also put pressure on the organization and on me," said Knight, who founded the company with his track coach Bill Bowerman in the '60's. "I look forward to sharing my responsiblities with Dick and together preparing the managment of this company for the year 2000."

Donahue is a partner at Donahue & Donahue, Attorneys in Lowell, Mass. He has played an active role in Nike's management since joining board of directors in 1978, In the past three years, in particular, Donahue has reduced the time devoted to his law practice in order to direct Nike's expansion internationally.

"As president and chief operating officer, my goal is to shoulder enough responsibility to allow Nike Inc. to continue to move forward as aggressively as we have in the past several years," said Donahue. "Some companies would simply fan the flames of their success. At Nike, we plan to pour gasoline on them."

Knight made it clear that he will remain as involved in Nike's operations as he is now. "I am not going anywhere," he said. "I just need more help

organizing a company as strong as Nike to continue to capitalize on the huge opportunities that exist for us all over the globe. What better time to add someone of Dick's great abilities than right now when things are going so well. This is not a change in Nike's management structure but a supplement to it. We still have an extremely strong core of officers who have brought the company to where it is today. They will continue to do what they have been doing and so will I."

As a trial lawyer in the firm founded by his grandfather in 1887, Donahue has been president of the Massachusetts Bar Association and the New England Bar Association. He is on the board of the American Bar Association and presently serves as chairman of its Section on Individual Rights and Responsibilities. He is a Fellow of the American College of Trial Lawyers, the International College of Trial Lawyers and the Board of Trial Advocates.

Donahue was assistant to President John F. Kennedy from 1960 to 1963, serving as Congressional Liaison for the White House. Currently he is a member of the board of the John F. Kennedy Library and chairman of the Profiles in Courage Awards of the JFK Library Foundation. Donahue is also on the board of the Joyce Foundation in Chicago and the University of Lowell. He graduated from Dartmouth College and Boston University Law School.

"Nike is poised to be as universally recognized and respected as Disney or Coca-Cola," said Donahue. "We aspire to the integrity and credibility of those companies. We can get there by maintaining our commitment to authentic athletic products and by building our management base. That is what Phil Knight and I plan to do together."

Donahue is married and is the father of 11 children. When asked why he would move from a successful career as a trial lawyer to Nike, he replied, "I have worked everywhere from the White House down. This is the only thing that will actually impress my kids."

Nike Inc. is the world's leading manufacturer of innovative athletic footwear, apparel an accessories. In the trailing 12 months, the company broke the $2 billion mark in revenues for the first time in history. The company is based in Beaverton, Ore.

#90170p7860 06/19/1990 ~PR Newswire

CUPERTINO, CA (JUNE 19) PR NEWSWIRE - Measurex Corporation (NYSE/PSE: MX) announced second quarter net income was $4.0 million on revenue of $63.4 million.

Revenue for the quarter, which ended June 3, 1990, decreased 12 percent from last year's second quarter record of $72.0 million. Net income for the second quarter was down 61 percent from last year's record $10.2 million in the comparable quarter, which ended June 4, 1989. Income per share was $.22, a decrease of 59 percent from $.54 in last year's second quarter.

For the first six months of 1990, net income declined 44 percent to $11.2 million, or $.62 a share, from $19.8 million, or $1.05 a share, in the comparable period in 1989. Revenue was $131.2 million, a 7 percent decrease from $140.5 million a year ago.

System backlog at the end of the quarter was $102 million, equivalent to that at the end of the first quarter in 1990 and a decrease of 16 percent from $121 million at the end of last year's second quarter.

System orders of $40 million represented a 29 percent decrease from $56 million in 1989's second quarter. For the first six months, orders were $77 million, down 22 percent from $99 million in the comparable period in 1989. Industrial Systems orders were at an all-time high for any quarter but were offset by shortfalls in pulp and paper. Second quarter orders included three separate contracts, totaling $6 million for aluminum, chemical and paper factories in the U.S.S.R.

The drop in revenue and income, as announced in April, is due to lower system sales, reduced gross margin percentages on lower volume, and one-time costs for consolidating certain operations.

During the second quarter, Measurex and Beloit Corporation agreed to significantly expand and strengthen their successful strategic alliance. This cooperative arrangement now includes provisions for the integrated marketing and sales of all Measurex controls with Beloit's full line of pulp and paper machinery. Simultaneously executed was a seven-year "standstill" agreement between Measurex and the parent company of Beloit, Harnischfeger Industries, Inc., whereby Harnischfeger may buy up to a maximum of 20 percent of Measurex's stock on the open market. Harnischfeger's Chairman and Chief Executive Officer, William W. Goessel, has been elected to Measurex's Board of Directors as part of the agreement.

The Board of Directors declared a quarterly dividend of $.11 a share, payable July 18 to stockholders of record on July 5. This was unchanged from the prior quarter.

Measurex, which stands for measurement excellence, provides the world with computer-integrated manufacturing through design, production, marketing and servicing of sensor-based information and control systems.

#90170p7861 06/19/1990 ~PR Newswire

TORONTO (JUNE 19) PR NEWSWIRE - Canadian Pacific Hotels Corp. of Toronto, Ontario and Metropolitan Life Insurance Company of New York, announced today that they had reached an agreement in principle for Canadian Pacific Hotels to acquire an 80 percent interest in MetHotels Inc. of Phoenix, Arizona from Metropolitan Life Insurance Company. MetHotels owns both Doubletree Hotels and Compri Hotels.

Robert S. DeMone, chairman, president and chief executive officer of Canadian Pacific Hotels, said: "With globalization of the hospitality industry and free trade between Canada and the United States, there will be ever-increasing traffic between our countries. We have been looking for some time for a compatible group of U.S. based hotels as our entry into the United States market, and Doubletree/Compri certainly meets our criteria for growth southward. The excellent reputation of Doubletree and its management team will also facilitate future growth into other U.S. city center and resort locations."

The management of MetHotels will continue to operate and expand its United States base of hotels from its headquarters in Phoenix as an affiliated company within the Canadian Pacific group of companies.

G. Peter Bidstrup, chairman, president and chief executive officer of MetHotels, said: "We are delighted with this opportunity to expand our network of hotels through the association with Canadian Pacific. The two groups will have approximately 28,000 rooms in 85 locations, giving the combined entity an important place in the North American hotel marketplace."

The reservations and marketing and sales efforts of both organizations will be dedicated to increasing brand awareness of the combined Doubletree/Canadian Pacific hotel chains. Bidstrup adds: "We are most encouraged by the marketing potential created by this combination, and our development opportunities in the northeastern United States and elsewhere should be enhanced by this association."

The Doubletree/Compri system consists of 63 hotels located in 21 states in the United States, primarily throughout the Southwest. Doubletree manages and operates 37 full-service hotels. Compri, founded in 1985, embodies in luxury boutique hotel concept featuring a club-type atmosphere, and is both a franchising and management company with 26 hotels. MetHotels also has a number of hotels under development including a property in Osaka, Japan.

Canadian Pacific Hotels and Resorts is the largest hotel company in Canada with 25 properties located in prime city center and resort locations from coast to coast. In addition to its collection of landmark, heritage hotels, Canadian Pacific Hotels recently opened the Chateau Whistler Resort at the foot of Blackcomb Mountain in Whistler, British Columbia; and the SkyDome Hotel, located within the SkyDome sports and entertainment complex in Toronto. The Waterfront Centre Hotel in Vancouver and the historic Hotel Macdonald Centre Hotel in Edmonton are currently under development for 1991 openings.

#90170u0023 06/19/1990 ~United Press International

SACRAMENTO, CA (JUNE 19) UPI - Sacramento County's top prosecutor said Monday a sexually explicit album by Miami rap group 2 Live Crew is not obscene and record store owners would not be arrested for selling the album.

District attorneys for San Diego and San Francisco counties would not rule out prosecuting music store operators who sold the record, ''As Nasty As They Wanna Be.''

Several residents of California's capital who think the album is obscene have asked Sacramento County District Attorney Steve White to file charges against record stores that sell the controversial album, which has been declared obscene in at least nine counties in Florida.

''The substance of the album is extraordinarily crude and offensive,'' White said in a statement.

''To be legally obscene, however, a work must appeal to purient interest, describe sexual conduct in a patently offensive way, and taken as a whole, lack seriously literary, artistic, political or scientific value as judged against a contemporary statewide standard,'' White said.

''Measured against the statute and a substantial body of legal precedent, the album does not meet this test. Accordingly, it does not violate the law and does not present a case for prosecution,'' he said.

In San Diego, District Attorney Edwin Miller has made no decision about prosecuting people who sell 2 Live Crew albums. ''We haven't had time to think about it,'' said Steve Casey, a spokesman for Miller.

''I can't imagine that it would ever find its way to the top of our

priority list. If the world calms down and there's no more rape or dope or robbery, we might consider it,'' Casey said.

San Francisco District Attorney Arlo Smith, the Democratic candidate for attorney general, would not say whether he would prosecute record store retailers who sold the rap album.

Smith said California record retailers are not affected by a Florida federal court judge's June 6 ruling that the album's lyrics vividly depict sexual acts and lack any redeeming social value.

''It has not been addressed by the California courts and the ruling is not relevant or binding,'' Smith said through a spokesman.

His Republican opponent for attorney general, former Rep. Dan Lungren, said he had not listened to lyrics on the album and had no position on whether it should be declared obscene.

''Something can be considered obscene in one community and not another. It really depends on the particular community,'' Lungren said in a telephone interview.

#90170u0171 06/19/1990 ~United Press International

PINE BLUFF, Ark. (JUNE 19) UPI - A convicted killer described as the most dangerous on Arkansas' death row was put to death in the electric chair Monday night in the state's first execution in 26 years.

John Edward Swindler, 46, a husky, red-faced native of Columbia, S.C., who was sentenced to die for the 1976 shooting death of Randy Basnett, 30, a police officer in Fort Smith, Ark., apologized for any pain he caused and said he was not angry at anyone.

The convicted killer, described as the most dangerous on Arkansas' death row, was strapped into a wooden chair called ''Old Sparky'' and subjected to 2,300 volts of electricity at 9:02 p.m. CDT. He was declared dead at 9:05 p.m.

Swindler did not make a last statement, but Monday evening told the Rev. John O'Donnell, a Roman Catholic priest from North Little Rock, that he had ''no animosity toward anyone.''

''I hope this brings to light the injustice of capital punishment and the need to abolish it. I encourage people to help the people on death row because they are a lot of guys in need of love and attention and religious guidance,'' Swindler told the priest.

''I'm sorry for any pain I caused anybody.''

The 11 witnesses consisted for law enforcement and state officials and two members of the media. Swindler requested that his family members not attend.

A leather mask was placed over Swindler's face, exposing only his nose and lower chin.

There was a discernible click when the 2,300 volts were released and Swindler's body became stiff, but did not shake. A clear fluid dribbled down his neck and his skin turned a shade of purple.

Glenn Yates, a Fort Smith police officer, said after the execution he was thinking about ''Randy's family.''

''Hopefully they can have some peace of mind now and get on with their lives.''

Dub Arnold, a prosecuting attorney in Arkadelphia, Ark., said he believed the public should be allowed to watch executions.

''The real deterrent of the death penalty is if it is being carried out,'' said Arnold.

Swindler, who also has been convicted of killing two teenagers in South Carolina and was charged with killing a Pennsylvania student in Florida, was put to death at the state's Cummins prison unit about 20 miles southeast of Pine Bluff.

After Seindler was released from Leavenworth prison in Kansas in September 1976, he abducted Dorothy Ann Rhodes, 18, and her boyfriend, Greg Becknell 19, in Columbia, S.C. Becknell was sexually assaulted and both were shot in the head.

After leaving Columbia, Swindler later told police he headed for Kansas intending to shoot as many Kansans as he could because he was angry at his treatment at Leavenworth. Instead, because he could not read, he became lost and ended up in Fort Smith, stopping at a service station to ask directions.

Basnett was at the station, recognized Swindler by his description and confronted him. Swindler shot him twice in the chest. He sped away but surrendered in a woods near the station after being surrounded by police.

He also was charged but never tried in the slaying in Florida during the Christmas holiday period of 1975 of Jeffrey McNerney, 19, of Pittsburgh, who was on holiday break from college.

His lawyers, whose request for a U.S. Supreme Court stay of execution was rejected Saturday on a 7-2 vote, said they planned no last-minute appeals because they had no new grounds. They also said they knew of no attempts at intervention by outside groups.

Swindler was the first person executed in Arkansas, and the 130th in the nation, since the Supreme Court reinstated the death penalty in 1976. Charles Franklin Fields, a convicted rapist executed in 1964, was the last person put to death in Arkansas.

About 50 Amnesty International protesters wearing black armbands held a silent vigil on the steps of the state Capitol in Little Rock Sunday, asking Gov. Bill Clinton to halt the execution.

Swindler spent Sunday writing letters, watching televison and praying, authorities said. O'Donnell said the prisoner was nervous and apprehensive.

Swindler once claimed to be a Satanist, but O'Donnell said he will have a Christian funeral and will be cremated. O'Donnell will claim the body because a brother of Swindler's said the family would not.

#90170u0184 06/19/1990 ~United Press International

JORDAN, MT (JUNE 19) UPI - Paleontologists presented the most complete skeleton of a tyrannosaurus rex ever found, contorted in rigor mortis atop the green clay on which it roamed 65 million years ago.

''This will be the animal you'll see in the textbooks,'' exulted Greg Erickson, a crewmember of the Museum of the Rockies, after stepping out of the shallow 25-foot-square pit where brown hip, leg and backbone fossils poked several inches above the surface.

The 40-foot-long animal - only the seventh tyrannosaurus rex ever found, and the sixth from Montana - was preserved lying on its left side in the Fort Peck reservoir on the Missouri River in the badlands of northeastern Montana, about 400 miles northeast of Helena. There was no indication how it died.

Its neck had curled over its back as the muscles stiffened after death, Erickson said, and the skull had come loose but appeared to be complete.

Erickson said that on Sunday the crew uncovered what apparently was the detached tip of the nose after removing the plaster-and-burlap ''winter jacket'' that had protected the exposed fossils since fall.

Much of the tail had become detached, but the 10 crew members were still optimistic they could find virtually all the bones.

Researchers earlier examined the animal's left arm and determined it could lift and hold 400 pounds even though it was the same length as man's.

Most of the skeleton remained encased in light gray sandstone formed atop the green clay from the sediments of a catastrophic flood that trapped and preserved the carcass shortly after the seven-ton, carnivorous animal died crew members said.

''It is the biggest meat-eating animal that ever walked on this earth,'' museum Curator Jack Horner said while strolling area around the dig site, where he recently found a 10-inch-long Tyrannosaurus tooth on the ground. ''It had a whole mouthful of steak knives.''

The remote dig site, situated in the sparsely grassed mud and sandstone badlands around Fort Peck Reservoir, will remain closed to the general public, but reporters and photographers were permitted to visit it Monday.

The paleontologists last week used jackhammers to remove up to 12 feet of sandstone covering the skeleton. For work on and near the bones, they relied on more delicate tools, including brushes, whisk brooms and a yellow mustard squeeze bottle filled with a plastic solution that both protected the bones and highlighted their red-brown color.

Back in the laboratory, technological advances will let researchers explore the structure of the bone and its blood vessels, which also are preserved in the fossil.

''You don't have to take it apart anymore,'' said crew member Scott Sampson. ''Nowadays you can throw things into CAT scanners and look inside the bones.''

Some scientists also are hoping to recreate dinosaur DNA by studying the minerals that replaced animal material in fossilized bone, Erickson and Sampson said.

The tyrannosaurus skeleton and its encasing rock will be removed in about five pieces, starting next week, dig supervisor Pat Leigge said.

It will be prepared in public view at the museum in Bozeman over the next three years, Horner said.

The fossil was found in 1988 by amateur hunters Cathy and Tom Wankel of Angela when they noticed a half-inch-wide light brown fossilized bone protruding 2 inches out of dried mud near the reservoir.

#90170u0186 06/19/1990 ~United Press International

(JUNE 19) UPI - Hours before he was executed Monday night, John Edward Swindler told a priest he would encourage people to work with death row inmates because they are- quote- ''in need of love.'' The 46-year-old Swindler was put to death in Arkansas' electric chair for the 1976 shooting death of a Fort Smith police officer. He was the first person executed in Arkansas... and the 130th in the nation... since the Supreme Court reinstated the death penalty in 1976.

Authorities in Jacksonville, Florida, are searching for a motive behind Monday's massacre at an auto loan office. They say the gunman had recently had his car repossessed and that could've triggered the bloodbath that left nine people- including the gunman- dead and at least five others wounded. Police say 42-year-old James Edward Pough had a violent criminal record and was a suspect in a double killing Saturday.

The Soviet Interior Ministry says negotiations continued Monday with the inmates still holed up in a section of a Ukranian prison, 550 miles south of Moscow. At least one person was killed in the early part of the uprising that began Thursday night. The prisoners are demanding better conditions. A revolt Sunday, at another prison 900 miles east of the Soviet capital, was put down by heavily armed troops Monday.

It was almost like the Charles Bronson movie ''Breakout.'' A stolen helicopter plucked two inmates from the execise yard of a maximum-security prison 80 miles east of Vancouver, Canada, Monday. British Columbian authorities say the chopper then flew away in a hail of gunfire. The helicopter's pilot... who had been kidnapped... was later found UNharmed. The inmates are still missing.

BURBANK, CA (JUNE 19) UPI - Leonard Goldenson, founder of the ABC television network was voted the Governor's Award by the Academy of Television Arts & Sciences, the academy said Monday.

The Governor's Emmy is awarded annually to a person, company or organization for outstanding achievement in the arts, sciences or management of television that is either cumulative or so extraordinary as to be beyond the scope of the regular Emmys, said Leo Chaloukian, president of the academy.

The award will be presented during the telecast of the 42nd annual primetime Emmy Awards Sept. 16.

Previous winners in the 12 years the award has been given are Lucille Ball Bill Hannah and Joe Barbera, Grant Tinker, Red Skelton, Alistair Cooke, Johnny Carson, Walter Cronkite, Hallmark Cards for ''The Hallmark Hall of Fame,'' Bob Hope, William S. Paley, Elton Rule and Pat Weaver.

#90170u0205 06/19/1990 ~United Press International

(JUNE 19) UPI - A woman UNsuccessfully prosecuted for child abuse for allegedly drinking while pregnant has given birth to an apparently healthy baby boy. In January, Diane Pfannenstiel was arrested after tests showed she was intoxicated when brought to the hospital for treatment of injuries she suffered in an alleged attack by her husband. The charges were dropped when prosecutors could NOT prove Pfannensteil's 14-week-old UNborn child was harmed by the alleged drinking. Her husband goes on trial next month on assault charges.

New York City is banning tobacco companies from handing out free or discount cigarette samples in public places. The measure signed into law Monday by Mayor David Dinkins is part of a package of bills aimed at limiting smoking by minors. The most far-reaching proposal- which would restrict or completely ban cigarette vending machines in the city- is still under consideration.

#90170u0222 06/19/1990 ~United Press International
CHICAGO (JUNE 19) UPI - House Ways and Means Chairman Dan Rostenkowski, D-Ill., told the nation's mayors not to expect money from a ''peace dividend'' because it is going toward bailing out the troubled savings and loan industry.

Addressing the U.S. Conference of Mayors on Monday, Rostenkowski said the savings from democratic reforms in the Soviet Union and Eastern Europe ''has already been invested in the savings and loans.''

The mayors had been hoping to tap into a peace dividend and planned to call on the federal government to provide more funds for the nation's cities.

Deregulation of the thrift industry led to unsafe lending practices in the 1980s and the collapse of hundreds of thrifts. Congress already has appropriated billions of dollars to pay for a bailout of the industry and estimates of losses range in the hundreds of billions.

Chicago Mayor Richard Daley said a major investigation should have been conducted before any federal money is pledged to a bailout.

''It makes everybody angry, not just big-city mayors,'' Daley said. ''I would have never bailed them out.''

''It's outrageous to think that all that money has been usurped from any use by the cities and towns where I think it rightfully belongs,'' Springfield, Mass., Mayor Mary Hurley said following Rostenkowski's speech.

Atlanta Mayor Maynard Jackson said more cities are beginning to believe Congress does not care about them.

''It is purely a question of what the Congress wants to do. The cities are being put on the back burner,'' Jackson said.

''There is a critical need for a partnership of levels of government in the struggle for a safer America, a better-housed America, a better-educated America, a better-employed-and-trained America and a higher quality of life.

''If we cannot achieve that through cooperation - the cities cannot do it alone - it will go down the drain.''

Boston Mayor Raymond Flynn called Rostenkowski's speech ''very depressing.''

''What he basically is saying is that the U.S. government is more

concerned about bailing out a corrupt savings and loan industry than they are about helping poor and needy people in cities across America. Those are really misguided priorities,'' Flynn said.

''I don't have to tell you how hard it is to keep the customers satisfied these days,'' Rostenkowski told about 100 of the 250 mayors attending the conference. ''But we also know that talk is cheap, and you can't feed people with empty promises.''

Rostenkowski said no more money will be freed for cities until ''the budget blockade is broken.''

#90170u0238 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - President Bush has written Israeli Prime Minister Yitzhak Shamir to congratulate him on the formation of his new government and to urge him to move the peace process along, a spokesman said.

White House press secretary Marlin Fitzwater said Monday Bush called on the prime minister ''to pursue the Shamir initiative for peace'' - a proposal for local elections involving Palestinian Arabs.

Bush's letter was written amid increasing U.S. frustration over inability to get Israel and Palestinian representatives to the peace table.

In congressional testimony last week, a harshly critical Secretary of State James Baker said he doubts the Israeli government is serious about seeking peace and said that if it gets serious, ''call us.'' Baker then rattled off the White House phone number, sparking thousands of calls that overloaded the switchboard.

Fitzwater said, ''The president sent a letter to Mr. Shamir within the last few days congratulating him on the formation of a new government and urging him to pursue the Shamir initiative for peace and committing the United States to help promote the peace plan.''

In May 1989, Shamir put forward a plan for Palestinian Arabs to take part in voting on choosing representatives to run their local affairs - ''autonomy'' is the word used in the plan.

The United States, while not fully satisfied by the proposal, supported it but Shamir has resisted putting the plan into action.

The administration has continued to use the Shamir plan as a starting point to get the peace process moving.

The previous Israeli coalition fell over a peace process rift between the Labor Party and the Shamir's Likud party.

In an interview Monday broadcast by Jerusalem Television, Shamir said he had recived a letter from Bush and ''naturally we will reply.''

''We will explain the best of our ability our attitude, our proposals, and I sincerely hope if, here and there, there are differences of opinion, we will reach an agreement,'' he said.

#90170u0263 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Former Sen. J. William Fulbright expressed disappointment with his successors in government, saying it is a ''great tragedy'' that politicians have shifted their attention from world events to debate a constitutional amendment to ban flag burning.

The 85-year-old Democrat from Arkansas invited reporters to his home Monday to call for greater funding for the scholarship program that bears his name and has helped nearly 180,000 students worldwide attend universities in other nations.

But Fulbright, the longest-serving chairman of the Senate Foreign Relations Committee and an early congressional foe of the Vietnam War, also surveyed the world scene and found much to his liking.

''I feel more optimistic about the international situation than anytime I was in the Senate,'' he said, adding that he believed even the Chinese would ''come around'' and join the world move toward democracy.

But Fulbright was clearly troubled by the response of American politicians faulting President Bush for refusing to cut defense spending or raise taxes, criticizing the invasion of Panama and the funding of the Contra rebels in Nicaragua, and accusing Democrats in Congress of timidity.

Asked to comment on the flag amendment, he said, ''I think it's a great tragedy that in this time of very promising issues that we should be diverted by such an ... utterly emotional and unimportant issue.''

''I just don't understand it,'' Fulbright said. ''But I thoroughly disapprove of fooling with it. I think it ought to be left alone.''

Fulbright said the United States remains an economic power but Bush's refusal to raise taxes and thereby reduce the federal deficit has put America at risk.

''We have a major problem now. We don't pay any taxes,'' he said. ''I

don't see any justification for no new taxes.''

However, Fulbright did not assign all the blame to Bush. Of Democrats in Congress, he said, ''I don't think they're doing a very good job.''

''They don't seem to say much or do much,'' Fulbright said, adding, ''I think they're afraid to say much about taxes.''

Although Fulbright, a member of Congress from 1932 to 1974, repeatedly referred to himself as an ''old man,'' he was set to leave this week on a trip overseas to receive honors in Britain and the Soviet Union.

On June 23, a quadrangle of Pembroke College at Oxford University, where Fulbright studied as a Rhodes scholar, will be named after him. On June 28 Fulbright will receive an honorary doctorate from Moscow State University.

Stressing the importance of international educational exchanges, Fulbright said the Fulbright exchange program created by 1947 legislation was his ''principal'' accomplishment in Congress.

''I look at it as being a very sound business proposition. ... I call it an intelligent investment of your time and money,'' he said. ''I think if President Johnson had a Fulbright to Japan or somewhere, he would have never ventured over there (in Vietnam).''

(JUNE 19) UPI - Authorities in Jacksonville, Florida, suspect the recent repossession of James Edward Pough's car may've pushed him over the edge. They say the 42-year-old man walked into a G-M-A-C loan office Monday morning and opened fire with a semi-automatic rifle... killing eight people and wounding at least five more. Then he killed himself. Police say Pough had a violent criminal record and was suspected in two killings early Saturday.

The convicted killer described as the most dangerous man on Arkansas' death row was executed Monday night in an electric chair known as ''Old Sparky.'' 46-year-old John Edward Swindler was put to death for the 1976 shooting death of a police officer in Fort Smith. Swindler had NO final statement. But a few hours earlier, he apologized for any pain he caused and said he was NOT angry at anyone.

In Toronto, South African nationalist Nelson Mandela was the guest of honor Monday night at a dinner for 15-hundred people hosted by Canadian Prime Minister Mulroney. Mulroney used the occasion to announce Canada would spend five-Million dollars this year for resettlement of South African exiles. Mulroney described the apartheid system as ''uniquely

evil.''

The Peoria, Illinois, parents of mine engineer kidnapped two months ago arrived in Quinto, Ecuador, Monday. And the mother of 27-year-old Scott Heimdal vows she and her husband will NOT leave South America without their son. She says they'll meet with Ecuadoran and U-S Embassy officials Tuesday to see why their son is still in the hands of Colombian rebels after the family paid a 60-thousand-dollar ransom.

(JUNE 19) UPI - The Sacramento County, California, district attorney says the album ''As Nasty As They Wanna Be'' by the controversial rap group 2 Live Crew is NOT obscene. And he says record store owners in the county will NOT be arrested for selling it. Steve White says several people had asked him to charge record stores selling the album... which has been declared obscene in at least nine Florida counties.

The world's largest maker of condoms has come up with an interactive video game that teaches high school and college students about safe sex and the use of condoms. The game will be UNveiled at the sixth annual International AIDS Conference this week in San Francisco. London International president Alan Woltz says his firm will offer the game at cost, less than five dollars, to the American public school system in September.

#90170u0431 06/19/1990 ~United Press International

(JUNE 19) UPI - The Detroit Tigers dropped 103 games in the lost season of 1989, but this year they're harboring dreams of mediocrity, and in the AL East that can be a dangerous vision.

After a decisive 7-2 victory over the world champion Oakland Athletics Monday, the Tigers were two games short of breaking even on the season and only six games behind the AL East-leading Toronto Blue Jays.

''The first step is getting back to .500,'' said shortstop Alan Trammell, who belted a three-run, first-inning home run to point Detroit toward its fifth win in six games.

''I don't think anybody's ever won a division playing under .500,'' said Trammell.

''We're getting a feel for things. We're 65 or 66 games into the season. Of course, a lot of it has to do with Cecil (Fielder, major league home run and RBI leader).

''You see a guy doing what he's doing every day for six weeks, it rubs

off. It's got to have a certain effect on the other guys. We're better in the field and our relief pitching has just been outstanding.

''We've been playing very well of late. I know how quick things can turn, though. The next month is going to be very important for us to stay where we're at. We've got a couple of long road trips coming up.''

Jeff Robinson pitched 6 2-3 innings of six-hit ball for the Tigers.

Robinson gave up two runs to Rickey Henderson, one set up by the Oakland left fielder's 902nd career stolen base and the other his 10th homer of the season, but held the rest of the Athletics at bay to square his record at 5-5.

Edwin Nunez finished up for his second save.

''Some of my teammates all came to the same conclusion,'' Robinson said. ''I wasn't following through on my pitches. I think it made a big difference.

''I kept the ball down more, and when I was successful in the past I kept the ball down. I really feel good now. This was a very positive outing, something I can build on.''

After first-inning singles by Lou Whitaker and Ed Romero, Trammell lined a 1-2 pitch from Curt Young, 3-2, over the left field fence for his fifth home run.

''We had too many bases on balls,'' Oakland manager Tony LaRussa said. ''We were not aggressive enough on the mound and that leads to problems. We were behind in the count too much.

''One of the best players in baseball hit a three-run home run in the first inning. That got us behind. We tried to get back in the game but we just couldn't.''

John Shelby hit a two-run homer, and Lloyd Moseby and Mike Heath added RBI singles to account for the other Tigers runs.

Elsewhere in the American League Monday, Baltimore bopped Boston 7-2; Texas mauled Minnesota 7-1; Milwaukee nailed New York 4-2; California clubbed Chicago 4-1; and Kansas City slugged Seattle 6-2.

In the NL, it was: Montreal 5, Chicago 1; San Francisco 2, San Diego 1; Los Angeles 5, Houston 2; Pittsburgh at Philadelphia, ppd. rain; St. Louis at New York, ppd. rain.

-- AROUND THE AL --

Orioles 7, Red Sox 2

At Baltimore, Randy Milligan hit a two-run single to highlight a five-run second inning against Roger Clemens, 11-3, and snap a five-game losing streak. Dave Johnson, 6-4, scattered nine hits for his second complete game. Clemens was tagged for seven hits and three earned runs in one and two-thirds innings. Ellis Burks had three hits for Boston, including his ninth home run.

Rangers 7, Twins 1

At Arlington, Texas, Charlie Hough pitched a 4-hitter, Gary Pettis homered and newcomer Scott Coolbaugh highlighted a five-run second inning with an RBI single. Hough, 7-4, registered his third complete game, giving up four hits, striking out six and walking three. Dave West, 2-5, lasted only 1 1-3 innings, allowing five runs and six hits.

Brewers 4, Yankees 2

At Milwaukee, Mark Knudson scattered seven hits over 7 2-3 innings to help the Brewers stop a three-game losing streak. Knudson, 5-3, allowed two runs, one earned, and Chuck Crim worked out of a bases-loaded jam in the ninth for his fifth save. New York starter Tim Leary, 3-9, took the loss, yielding four runs and 10 hits in his fifth complete game. The Yankees have scored just eight runs in eight of Leary's losses.

Angels 4, White Sox 1

At Chicago, Jim Abbott won his second game since May 18 and Lance Parrish hit a two-run homer and an RBI single to hand the White Sox their fourth straight defeat. Abbott, 4-5, gave up seven hits, struck out six to tie a season-high and walked one over eight innings. Brian Harvey pitched the ninth, posting his ninth save. Jack McDowell, 3-4, took the loss, giving up five hits over six innings. Parrish, who hit a grand slam Sunday, now has six home runs and 14 RBI this month, compared to one homer and four RBI in June 1989.

Royals 6, Mariners 2

At Kansas City, Mo., Bo Jackson hit a three-run home run and Mark Gubicza beat Seattle for the seventh consecutive time. Gubicza, 4-6, gave up five hits, walked four and struck out nine in improving to 12-3 lifetime against the Mariners. Erik Hanson, 6-6, took the loss.

#90170u0466 06/19/1990 ~United Press International

SAN FRANCISCO (JUNE 19) UPI - For Trevor Wilson and his teammates it has been both the best and worst of seasons.

While Wilson spent the springtime in Phoenix, San Francisco's AAA affiliate, the Giants were mired near the bottom of the National League West.

But all that has changed.

Wilson scattered three hits in 6 1-3 innings Monday night and Matt Williams homered to lift the Giants to a 2-1 victory over the San Diego Padres, keeping the Giants' June revival rolling.

Wilson, 3-0, who one-hit San Diego last Wednesday, struck out three and walked four.

''Trevor pitched a real good game ...,'' manager Roger Craig said. ''He's an altogether different pitcher than the one we saw this spring.''

And the Giants are an altogether different ballclub than the one that finished the month of May 10 games below .500 at 19-29.

''I don't think I've ever been involved with a club that's gone as bad as you can go,'' Craig said. ''The players will look back on it and say, hey, we saw the worst of it and the best of it - and they are reaping the benefits now.

San Francisco has now won nine straight and 16 of their last 17. Wilson has reflected the Giants' resurrection, winning three straight since recently beingcalled up from the minors.

''He just has so much natural stuff,'' Giants catcher Terry Kennedy said of Wilson. ''He's more relaxed out there. He's a lot calmer than he used to be.''

Ed Whitson, 5-5, gave up just four hits in seven innings in taking the loss.

Jeff Brantley allowed two hits over 2 1-3 innings for his eighth save.

Williams clubbed his 14th home run of the year with one out in the seveth inning to make it 2-0. Williams, who leads the National League with 56 RBI extended his hitting streak to a career-high 15 games.

The Giants led 1-0 in the first on an RBI double by Rick Leach.

Lynn ended the Giants shutout bid in the eighth with his fourth homer of the year.

Elsewhere in the National League: Montreal dumped Chicago 5-1, San Francisco nipped San Diego 2-1, Pittsburgh at Philadelphia was postponed due to rain as was St. Louis at New York.

In the American League it was: Baltimore 7, Boston 2; Detroit 7, Oakland 2; Texas 7, Minnesota 1; Milwaukee 4, New York 2; California 4, Chicago 1; and Kansas City 6, Seattle 2.

-- AROUND THE NL --

Expos 5, Cubs 1

At Montreal, Dennis Martinez, 5-4, tossed a complete game four-hitter and Tom Foley drove in three runs with a two-run triple and an RBI double. Mike Harkey, 5-3, suffered the loss. Montreal's Spike Owen tied the all-time National League record for consecutive games without an error for shortstops. Owen has played in 60 straight games, 245 chances, without a miscue, tying Kevin Elster of the New York Mets for the record.

Dodgers 5, Astros 2

At Los Angeles, Kal Daniels collected three hits, including a two-run double, to lead Los Angeles. Tim Belcher, 5-4, gained the win despite giving up nine hits and two runs over 7 1-3 innings. Jay Howell pitched the ninth for his third save. The loss went to Bill Gullickson, 4-5. Kirk Gibson was forced to leave the game in the first inning with a strained right groin muscle.

#90170u0489 06/19/1990 ~United Press International
(JUNE 19) UPI - Israeli Prime Minister Shamir is urging Syrian President Assad and other Arab leaders to hold peace talks with Israel. Shamir also is calling on Washington to break off dialogue with the P-L-O. But in Paris, a French Jewish leader says Jews outside Israel may have to negotiate with the P-L-O if Israel does NOT.

House Ways and Means Chairman Dan Rostenkowski told the nation's mayors yesterday NOT to expect money from a ''peace dividend.'' The Illinois Democrat spoke to the mayors in Chicago where they're holding a national conference. He said any extra funds will have to go toward bailing out the troubled savings and loan industry.

The parents of a kidnapped Peoria, Illinois, man are in Ecuador to speak with government officials investigating the abduction. Roy and Marge Heimdal say they will NOT leave the South American country without their son, Scott, a mining engineer. The Heimdals have paid 60-thousand dollars

in ransom money, but the kidnappers now say they want more.

Booms were set out along the sensitive Texas coastline yesterday to protect against any oil washing ashore from a crippled Norwegian tanker. Volunteers worked to clear trash from a 40-mile stretch of beach, but Coast Guard officials say wind conditions are keeping the oil away. Skimmers are still working to clean up oil in the water.

Paleontologists in the badlands of northeastern Montana have uncovered the most complete skeleton of a tyrannosaurus rex ever found. The 40-foot-long animal, which roamed the earth 65-Million years ago, is only the seventh tyrannosaurus rex to be found. Researchers say it was the biggest meat-eating animal to ever walk the Earth.

#90170u0533 06/19/1990 ~United Press International

SHADYSIDE, OH (JUNE 19) UPI - Weather forecasters are defending their actions in the hours before deadly rains hit eastern Ohio, causing floods that killed 21 people and left 13 missing in the state's worst weather disaster in 21 years.

The National Weather Service issued no flash flood warning before last week's deluge that sent a wall of water up to 20 feet high crashing through the valley, tossing cars and flattening homes.

The National Oceanic and Atmospheric Administration, parent agency of the NWS, has begun a routine investigation into the forecasts issued that night. ''The policy is whenever five people or more die, they have a review board check the areas of responsibility to see if there was anything we missed or if there are weaknesses,'' said Ed Heath, meteorologist in charge of the Akron-Canton bureau.

''As far as I'm concerned nothing broke down,'' Heath said, adding it was impossible to predict based on weather radar that 5.5 inches of rain would fall in Shadyside in 3 1/2 hours last Thursday night.

The body of the 21st victim of the storm was discovered Monday morning. Searchers found the body of Kerri Jo Polivka, 12, in the Ohio River near Wegee Creek, said Charles Vogt, inspector for the Belmont County coroner's office.

Polivka had been babysitting 9-year-old Amber Colvin when the raging floodwaters destroyed the Colvin home. Amber held on to a log and pulled herself out of the Ohio River.

Fire Chief Mark Badia said the number of missing dropped Monday from 16 to 13.

Intermittent rain overnight hampered the search effort, and a brief thunderstorm Monday raised fears of more flooding but the storm ended quickly with only minor damage.

Last week's flooding was the worst weather disaster to hit Ohio since 1969 when 40 people died as severe thunderstorms swept off Lake Erie while residents enjoyed Fourth of July festivities.

Tom Allison, 38, who lost just about everything except his dog and the clothes he was wearing when he fled his house, said a warning would have been meaningless.

He would have ''probably (done) nothing, because who would think of a flood on that creek? When they say flood in this area, you think of the Ohio River.''

At this point, Allison said he's more concerned about rebuilding his life. All that's been found of his most prized possesion, his truck, has been one tire.

''It's like being 16 again and starting all over,'' said Allison, wearing clothes donated at a crisis center in Shadyside.

How long will it take to rebuild? The unemployed pipe fitter replied: ''About 20 years. That's how long it took me to put everything together.''

Ray Ponzo, a school teacher now running the crisis center, questioned how many of the people will move back to the creek area torn apart by what was described by one weather official as a once-in-a-thousand-year storm.

''I bet you some of these people won't even attempt to rebuild in that area,'' Ponzo said. ''A lot of them were in the category of retired. And there were a lot of rentals down there too.''

Unemployment also runs high in the area because of lost jobs in coal mines once the dominant employer in the region.

Officials have estimated that 60 to 70 homes were gone and another 30 to 40 needed extensive repairs before they were habitable.

Most of the displaced people were living with friends and relatives. Only a few people were still living in a Shadyside school being used as the crisis center.

Local churches planned to hold a joint memorial service for the flood victims Wednesday at the high school football stadium.

#90170u0540 06/19/1990 ~United Press International

MUENSTER, West Germany (JUNE 19) UPI - The Soviet and West German foreign ministers, meeting amid increasing calls for German unification by year's end, apparently failed to reach agreement on Germany's military future.

In a joint statement Monday after meeting for more than six hours in the historic city of Muenster, West German Foreign Minister Hans-Dietrich Genscher and his Soviet counterpart, Eduard Shevardnadze, said they ''got closer and made progress on important issues.''

Speaking at a news conference after the talks - their eighth meeting this year - they said they had agreed to meet again later.

Disagreement on several key issues was obvious. Shevardnadze said the question of troop strength of a united Germany's defense force should be determined at the six-nation German unity negotiations, known as two-plus-four. Genscher, however, said the issue should be included in East West disarmament talks held in Vienna.

Although they did not spell it out, it was clear the two also failed to reach agreement on the key question of Germany's military affiliation.

West German Chancellor Helmut Kohl reiterated Monday that a united Germany must be a member of the NATO Western military alliance - a suggestion the Soviet Union has rejected with varying degrees of emphasis.

''We have now reached a turning point,'' Shevardnadze said as he entered the Muenster's Gothic city hall, where a peace treaty was signed in 1648 ending the 30-year war that had shattered much of Europe.

In an interview with Soviet television, Shevardnadze, asked whether he thought the German position was changing, said, ''I do not think so.''

Asked whether positions were becoming closer on some issues, he said, ''Yes on the question of the European process, on the structures of the military blocs, on future relations between the blocs, bilateral relations.''

The Muenster meeting follows similar talks 10 days ago in the Soviet city of Brest, where Shevardnadze had suggested the Soviet-led Warsaw Pact and NATO should cooperate in several areas, including joint maneuvers.

Alliance membership has been the major stumbling block in the two-plus-four talks, which involve the two Germanys, Britain, France, the Soviet Union and the United States.

In Bonn, Kohl told a meeting of his conservative Christian Democratic Union, ''1990 will be the year of German unity,'' putting him at odds with East German Prime Minister Lothar de Maiziere.

De Maiziere Sunday effectively shelved a proposal for quick and full unification of the German states made by the arch-conservative German Social Union.

Kohl admitted Monday there will be some ''unavoidable transitional problems'' in uniting the nations and he acknowledged unification will be expensive. But he repeated his pledge to not raise taxes to meet the costs.

The chancellor also stressed Germany will not sign a peace treaty formally ending World War II. Such a document would make it possible for several countries, including Poland, to issue massive war reparation claims against Germany.

The foreign ministers of the six nations are due to meet in East Berlin Friday for the second session of the two-plus-four talks expected to focus on the military angle of the unification process.

Economic union of the Germanys is already scheduled to occur next month, with the introduction of the West German currency in East Germany.

(JUNE 19) UPI - Torrential downpours kept flood waters high in the Midwest early Tuesday, while violent thunderstorms raked the Plains and the South baked under scorching heat.

Thunderstorms swept across South Dakota, and Kansas during the night, while rivers climbed banks and closed roads in Iowa and Nebraska.

A flash flood watch was posted in southern and eastern Nebraska, where thunderstorms dumped up to 1 1/2 inches of rain on already soaked counties and caused new rises in levels of the Rawhide and Maple creeks. Much of eastern and southwestern Nebraska has been declared a state disaster area.

The National Weather Service said more thunderstorms were possible, posing a severe threat of flash flooding in the same area where the body of an elderly man who had been swept away by flood waters of the weekend was found Monday.

Heavy rains also caused small stream flooding in central North Dakota with an unofficial report of between 5 and 6 inches of rain falling west of Halliday, the NWS said. Many rivers and streams were at or above flood stage in the state.

Rapidly moving, intense thunderstorms that rolled through the Dakotas, Minnesota and Nebraska brought heavy rain and gusty winds into Illinois.

A flash flood watch was posted overnight in western Iowa. Four people have been killed by floodwaters in the state, where Gov. Terry Branstad Monday declared 21 counties disaster areas.

Thunderstorms struck flood-ravaged southern Ohio early Tuesday, but no additional flooding was reported. Crews near the town of Shadyside Monday found a 21st body from last week's massive flash flood, reducing the number of missing to 13 in the state's worst weather disaster in more than two decades.

Hazy, hot and humid weather blanketed the south with overnight temperatures in the 70s and scattered rain in the Carolinas, Alabama and Mississippi.

In Altamont, Tenn., lightning struck eight boy scouts sitting at a picnic table Monday, but none was seriously injured.

''The boys were apparently sitting around a bench or picnic table when the lightning struck,'' hospital spokeswoman Sandy Terrill said. ''We're not sure if any took a direct hit, but seven of them have got some burns, so they definitely got some electricity.

Fair skies and warm temperatures dominated the Southwest and mid-South early Tuesday, with some isolated thunderstorm activity in far west Texas and eastern New Mexico.

Triple-digit temperatures accompanied by high humidity made it feel like 105 to 110 degrees across Oklahoma, Arkansas and Texas Monday, which a repeat of the high temperatures expected for Tuesday.

The heat index - which takes temperature, humidity and other factors into account - reached 110 in southwest Texas, 106 in Dallas and 105 in southern Oklahoma Monday, the NWS said.

Colorado was clear but had cooler temperatures, dipping into the 40s and 30s in the Rocky Mountains.

In the West, thunderstorms formed over the mountains of northern California, moving south to the northern Sierra Nevada, but the rest of the state was sunny except for the usual morning fog along the coasts.

Nighttime and low morning clouds formed along the Oregon coast, but were expected to burn off by midday. Temperatures will be close to 10 degrees above normal much of the week.

Temperatures were expected to reach 100 degrees in Las Vegas Tuesday under mostly sunny skies. Monday's high was 98.

(JUNE 19) UPI - Gunman kills eight people and himself in Jacksonville, Florida... the death toll in Ohio flooding climbs to 21... argu- ments begin in the trial of Washington, D-C, Mayor Barry... U-P-I has those stories and more.

A man whose car had been repossessed walked into a loan office in Jacksonvil- le, Florida, yesterday, and opened fire. When it was over, James Edward Pough had shot and killed eight people and injured at least five others. He then shot himself to death. Authorities are investigating how Pough, a convicted felon, obtained the licensed revolver he was carrying during yester- day's assault. The gunman pleaded guilty to aggravated assault in 1971, but a handgun was registered in his name- a violation of Florida state law. Pough also used a semi- automatic carbine during the attack, picking off customers and employees at random. Investigators found more guns in Pough's car, but they are NOT sure if he had permits for those weapons. Duval County Sheriff James McMillan says it was one of the worst things he seen in some 20 years of police work. In his words- ''He didn't say anything. He just walked in and started shooting indiscriminately.'' The attack was the nation's worst mass fatal shooting since September 14th when a press- man on disability shot eight people to death and wounded 12 others in a printing plant in Louisville, Kentucky. -19- Questions are being raised about the way weather forecasters handled last week's rainstorm that devastated the small eastern Ohio town of Shadyside. Meteorologists at the National Weather Service say there was NO way to predict the town would be hit with five-and-a-half inches of rain in just three-and-a-half hours. 21 people died in the resulting flash flood and au- thorities say 14 others remain missing. The government agency that oversees the N-W-S has launched a routine investi- gation into why the weather service did NOT issue a flash flood warning. The National Oceanic and Atmospheric Ad- ministration looks into all weather disasters that result in five or more deaths. The chief meteorologist at the N-W-S Akron-Canton bureau says a review board will determine if anything was missed or there were any weaknesses. But Ed Heath adds he doesn't think that was the case. Shadyside residents are trying to piece together thier lives in the aftermath of the flood. Officials estimate between 60 to 70 homes were destroyed and 30 to 40 others will need extensive repair.

#90170u0609 06/19/1990 ~United Press International

(JUNE 19) UPI - Black South African nationalist leader Nelson Mandela says he's counting on the ''tremendous support'' he's received so far from Americans and Congress for a successful visit to the United States.

Mandela is in Canada today... on the eve of his arrival in the United States. Yesterday Mandela told reporters that he could NOT predict the outcome of meetings with Bush administration policy makers.

The 71-year-old Mandela is on a six-week, 13-nation tour. He arrived in Toronto yesterday after addressing Canada's Parliament in Ottawa.

In Ottawa, Mandela reiterated his call for continued ecomonic sanctions against South Africa to end its system of racial separation and predicted the eventual dismantling of apartheid.

Mandela flies to New York tomorrow to begin 12-day, eight-city tour of the United States. It will include a ticker-tape parade in New York tomorrow and a rally at Yankee Stadium Thursday before addressing the United Nations Friday.

The drug and perjury trial of Washington, D-C, Mayor Marion Barry begins this morning with opening statements from prosecution and defense attorneys.

An 18-member jury panel was seated yesterday and then sequestered.

The 18-member panel consists of 15 women and three men. 13 members of the panel are black, including 12 women. Five are white.

U-S District Judge Thomas Penfield Jackson commended members of the jury for what he called their ''willingness, if NOT enthusiasm, to serve as jurors.''

The trial is expected to last about one month.

Barry faces perjury and drug charges dating back to 1984. Barry has admitted smoking crack cocaine during a January 18th F-B-I-police sting operation... but also has said he does NOT believe a jury in Washington would convict him.

The three-term mayor is one of the nation's most prominent black politicians. Many of his supporters claim the federal case against him is an effort by the white establishment to undercut black leaders.

NEW BRUNSWICK, NJ (JUNE 19) UPI - Separate suspicious fires erupted within minutes of each other in five buildings occupied by Rutgers University fraternities, fire officials said Tuesday.

No one was injured, but 21 students were left homeless by the blazes, all of which were reported between 10:30 p.m. and 11 p.m. Monday, said Deputy Fire Chief James Riley.

''These were very suspicious fires,'' Riley said. ''They were practically simultaneous. We don't have any idea who lit them yet, but the investigation is under way.

''Fortunately, no one was injured,'' Riley said. ''The kids all got out on their own. By the time the trucks arrived, everyone was out on the street.''

All the fires were out by 1 a.m. Tuesday, although campus authorities ordered the fraternities to appoint students to stay up all night and guard the houses, said Teresa Loser, Dean of Fraternity and Sorority Affairs at Rutgers.

The first fire was reported at 10:38 p.m. at a private home occupied by fraternity members. In one ground floor room, there were three separate fires, prompting firefighters to suspect arson, Riley said.

BEIJING (JUNE 19) UPI - A mid-level U.S. State Department official will visit Beijing next week, the first such trip this year, but he will not meet with senior Chinese officials, a U.S. Embassy spokesman said Tuesday.

The United States officially suspended high-level visits to China among sanctions imposed after the June 1989 crackdown on the democracy movement. Next week's visit will be in line with that policy, said U.S. Embassy spokesman Sheridan Bell.

Last December, U.S. national security adviser Brent Scowcroft and Deputy Secretary of State Lawrence Eagleburger visited Beijing on a trip intended by President Bush as a gesture toward mending relations with Beijing.

But critics accused the White House of ''kowtowing'' to Beijing.

The official, Desaix Anderson, deputy assistant secretary of state for East Asian affairs, will be in Beijing for two days early next week and will meet only with Chinese officials ''at his level,'' not with senior officials, Bell said.

''He hasn't been out here since he was named to the post,'' Bell said. ''He is visiting his areas of responsibility.''

#90170u0668 06/19/1990 ~United Press International

EAST BERLIN (JUNE 19) UPI - East German police arrested two more people in a continuing crackdown on suspected West German extremists, including a man believed involved in a 1981 attack on a U.S. military base, a top official said Tuesday.

The capture of the two brings to eight the total number of alleged ultra left-wing activists arrested in East Germany over the past two weeks.

Interior Minister Peter-Michael Diestel told a news conference that Henning Beer, 31, and Silke Meier-Witt, 40, were arrested on Monday. Both are believed to be former members of the extremist Red Army Faction and are wanted by the West German authorities for a series of violent attacks.

Beer is accused of participating in a 1981 explosives attack on the U.S. Air Force base at Ramstein in West Germany.

Maier-Witt is accused of participating in the 1977 kidnapping and killing of the head of the West German Employers Federation, Hans Martin Schleyer.

Both Beer and Maier-Witt are believe to have lived in East Germany for several years.

The six others arrested earlier are wanted in West Germany for a string of attacks, including kidnappings, killings and bank robberies.

Diestel said earlier that the secret police of the former Communist authorities had helped the extremists start a new life in East Germany under assumed names. He said some of the suspects had lived in East Germany for almost 10 years.

The eight arrested in East Germany since June 6 are on the list of 30 most wanted extremists in West Germany.

But West German intelligence officials say that the suspects arrested in

East Germany had quit the Red Army several years ago, and that the ''hard-core'' members were still on the run, probably in Western European countries.

The West German authorities are reportedly considering bringing charges against former East German leader Erich Honecker and members of his government for ignoring international arrest warrants issued against the alleged extremists.

West German opposition leader Hans-Jochen Vogel said Tuesday he was convinced the former East German leadership had been aware that wanted ''terrorists'' were harbored in the country.

Vogel, who heads the Social Democratic Party, described this as ''an incredible occurence'' and demanded that investigations be launched against those responsible.

#90170u0680 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - A good Samaritan who came to the aid of an elderly mugging victim on the Lower East Side shot and wounded one of the suspected thieves, police said Tuesday.

The gunman ran away but the wounded man was nabbed at his home and taken in good condition to Beekman Downtown Hospital by housing police, said city police spokesman Sgt. Tina Mohrmann.

Mohrmann said the incident began at 10:45 p.m. Monday, when a 64-year-old Asian man walked into the lobby of a Lower East Side housing project.

''Three men grabbed the victim from behind, took his wallet and money and fled,'' Mohrmann said.

The victim, whose name wasn't immediately released, then ran frantically into the street, screaming after the fleeing suspects, Mohrmann said. A passerby asked the elderly man what happened, and then took off after the suspects after the victim pointed them out and explained that he had been mugged, Mohrmann said.

''He ran after them, caught one and threw the man down,'' Mohrmann said. ''Witnesses then heard two shots ring out.''

The gunman fled and housing police later arrested the wounded man, identified as Richard Lynn, 23, at his house, Mohrmann said. Lynn had been shot in the right leg, and also sustained a possible head wound, she added.

Lynn was charged with robbery, a spokesman for the housing police said.

#90170u0689 06/19/1990 ~United Press International

BEIJING (JUNE 19) UPI - One of three key Chinese dissidents detained by police before the anniversary of last year's crackdown on the democracy movement emerged Tuesday after 18 days, but said he had no information on the other two.

Zhou Duo, 43, was one of the three dissidents who vanished May 30, the eve of a scheduled news conference at which they planned to issue an open letter to China's hard-line leaders.

The letter asked the government to free political prisoners still held since the June 1989 suppression of the pro-democracy protests.

Until Tuesday, there had been no confirmation that the three had been detained because the government has rebuffed repeated inquiries.

But in an interview at his home in western Beijing, Zhou told United Press International he was freed Sunday after being held by police since the night of May 30 at a hotel in the city's suburbs.

He said uniformed police came to his home the night before the planned news conference and took him away, saying he would be detained until tension surrounding the approaching June 3-4 anniversary had abated.

''They said they were going to choose a place for me to go and take a break, to have some fun,'' Zhou said. ''They said they guessed I'd be away for about a week. But they really didn't even know themselves.

''They said they were taking me away for my own good,'' he said. ''They were extremely polite and forthright from the beginning to the end.''

Zhou said he was treated well during the 18 days of confinement at a suburban hotel whose name and location he declined to disclose. He said he complied with official requests to write about his personal circumstances and his opinions, and kept copies of his writings for himself. He declined to disclose their contents.

He said he learned that one of the other two, Taiwan-born pop singer Hou Dejian, was being held in the same hotel, but said he never was allowed to see him.

Zhou said he was told the third dissident, Gao Xin, had written a flurry of letters home and had been allowed to go fishing during part of his time in detention. But Zhou said he had been unable to learn if Gao had been freed.

Hou had added mystery to the trio's disappearance by telephoning his home on the eve of the planned news conference to say he had to ''attend to personal business'' and regretted he would miss the event.

Hou's niece said Tuesday at his home that she had still knew nothing of his whereabouts.

Zhou, Hou, Gao and a fourth dissident, university lecturer Liu Xiaobo, conducted a last-ditch hunger strike last June in Tiananmen Square just before Chinese troops moved in and crushed the six weeks of protests. Liu remains in a prison north of Beijing.

Hou, 33, sought refuge in the Australian Embassy in Beijing for two months last summer after the crackdown, finally coming out on his own after receiving guarantees from the Chinese government he would not be prosecuted.

Zhou was among 211 prisoners freed in early May after spending nearly a year in jail and losing his job as an executive at China's most successful private computer company, Stone Co. Gao Xin had been freed last December.

The three dissidents had been the only ones bold enough to resume speaking out freely nearly a year after the government cracked down on dissent, but the timing of their news conference proved to be too sensitive, Zhou said.

Looking nervous and sounding somewhat chastened, Zhou said China's touchy political situation is ''even more sensitive'' than it was before the anniversary of the crackdown and vowed to pour his energy into developing a money-making enterprise.

''Right now I don't have a job and I don't have any income,'' he said. ''Some friends and I are exploring the idea of raising animals.''

The letter they had planned to release at the aborted news conference asked for the release of all other detainees and specifically for the release of Liu Xiaobo.

Zhou said officials ''suggested'' that he not renew contact with Western reporters but did not explicitly prohibit interviews.

China has acknowledged it still holds 355 detainees in Beijing in connection with last year's protests, including student leaders. Thousands of others are believed held outside of Beijing.

#90170u0693 06/19/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JUNE 19) UPI - A right-wing extremist on the run following a military weapons theft declared war on South Africa's reformist government in a videotape, a newspaper reported Tuesday.

Piet ''Shoot'' Rudolph, deputy leader of the white-separatist Boerestaat Party, said in the tape sent Monday to the Afrikaans-language Beeld, that he would fight the ''government with every means at our disposal, and its overthrow is our highest priority.

''There is no time to plan a counterrevolution,'' he said. ''It is open war now.''

A number of right-wing extremists have vowed to fight the reforms initiated by President Frederik de Klerk, who freed political prisoners and lifted a 29-year ban on the African National Congress this year.

Rudolph was taped sitting in front of a 19th century settler republic flag and was flanked by four masked men in fatigues, two carrying military assault rifles, a photograph of the scene showed.

Police are hunting Rudolph and have questioned members of his small and secretive party over the April 13 theft of arms and ammunition from air force headquarters in Pretoria.

''If it ever was necessary to follow a scorched-earth policy, it is now,'' Rudolph said. ''We must not waste time. It is either our heads which will roll or the enemies.''

#90170u0734 06/19/1990 ~United Press International

(JUNE 19) UPI - A hijacking of a Soviet airliner has ended peacefully. A Foreign Ministry spokesman in Finland says three men who hijacked a Soviet Aeroflot airliner with more than 50 people aboard today surrendered to police after forcing the plane to land in Helsinki. The aircraft was on its way from the Latvian capital Riga to the northern Soviet city of Murmansk when it was commandeered.

Opening statements in the trial of District of Columbia Mayor Marion Barry on drug and perjury charges begin this morning in a federal courtroom in Washington. After two weeks of questioning, 12 jurors and six alternates were seated yesterday in about an hour. The panel members will be sequestered throughout the trial, which is expected to last about one month.

Police in Florida are trying to determine whether James Edward Pough had permits for the semi-automatic rifle he used in an attack yesterday at a Jacksonville G-M-A-C loan office that left eight people and Pough dead.

Pough's car had been repossessed iun January... and authorities believe that may have triggered the onslaught. Pough was a convicted felon.

The House votes today on funding for the superconducting super collider that's to be built in Texas. The collider appropriation is part of a nearly 21-BILLION-dollar fiscal 1991 spending package for energy and water development projects. Texas lawmakers say they expect easy approval for the 318-Million-dollar gigantic particle accelerator.

#90170u0826 06/19/1990 ~United Press International

(JUNE 19) UPI - A Soviet Interior Ministry spokesman says armed police have sealed off a prison where inmates have been rioting for six days. He says the situation is ''peaceful'' and negotiations are under way.

Official election results from Bulgaria show the former Communist Party

winning a majority of seats in Parliament. Bulgaria is the second East Bloc nation to freely choose communist leadership after four decades of monopoly rule.

A U-S Embassy spokesman in Beijing says a mid-level State Department official will visit China next week. The spokesman says the official will meet with Chinese representatives on his own level, NOT those holding senior posts.

Fire officials in New Brunswick, New Jersey, say separate fires of questionable nature erupted within minutes of each other on the Rutgers University campus. The fires occurred in fraternity houses, but there were NO injuries.

Federal and state agencies have filed suit against eight alleged corporate polluters. The suit, filed in California, charges the companies with dumping toxic waste into Southern California coastal waters for years.

It soon may be easier for low-income women to get screened for breast and cervical cancer. The House yesterday passed a 50-Million-dollar bill to provide states with matching money for such screening programs.

-30- 1501

#90170u0840 06/19/1990 ~United Press International

JERUSALEM (JUNE 19) UPI - The Foreign Ministry said Tuesday that Iraqi President Saddam Hussein's threat to use poison gas if Israel attacks an Arab state is being taken seriously but denied Israel had any ''aggressive intentions.''

''We do not take Iraq's threats lightly,'' a Foreign Ministry statement said. ''This is a sad confirmation of the negative trend revealed at the Baghdad summit, which said no to peace with Israel, no to recognition of Israel and no to dialogue with Israel.''

Repeating similar comments made by Prime Minister Yitzhak Shamir this week the Foreign Ministry said Israel ''has no aggressive intention towards her neighbors.''

The statement said the Iraqi president's comments underlined the need to work toward fulfilling Israel's May 1989 peace initiative, which includes proposals for non-belligerency agreements between Israel and her Arab neighbors.

Saddam's comments Monday were a reaffirmation of remarks the Iraqi president made earlier this year to wipe out half of Israel with poison gas in case of an Israeli attack.

Egypt's Middle East News Agency reported that Saddam, addressing a session of the Popular Islamic Conference in Baghdad held to support Iraq, said he would come to the aid of Syria even if his arch ideological foe, Hafez Assad, was still the ruler.

''Iraq will respond against Israel if it attacks Syria, even if Hafez Assad is still the ruler of Syria ... we will wipe out half of Israel with fire if there is an attack,'' he said.

-30- 1699

#90170u0844 06/19/1990 ~United Press International

DNEPROPETROVSK, Ukraine, U.S.S.R. (JUNE 19) UPI - Stubborn prison rioters surrendered Tuesday to riot police, ending a six-day uprising that left their former jail in smoking ruins and at least four of their comrades dead.

Emerging from 18th century cells converted to bunkers, the insurgents were loaded onto trucks and paddy wagons and whisked to other prisons. Authorities said the inmates released their hostages unharmed but did not say how many had been held captive or who they were.

The approximately 2,000 innmates left behind a demolished and smoldering prison, with a yard bloodied by the slaughter of pigs for a final feast. On the eve of their surrender, the inmates slaughtered and roasted 100 pigs from the kitchen and downed them with gallons of vodka.

The prisoners, who had rioted for improved conditions, also left the prison yard littered with needles they used to inject themselves with drugs.

''All windows are broken. There is fire around,'' a witness said. ''The whole pigsty with 100 pigs is burned.''

Authoriites said it was the worst prison riot in Ukrainian history.

Police closed the more than 200-year-old facility built by Empress Catherine the Great in Dnepropetrovsk, in the Ukraine about 550 miles south of Moscow. Additions were built in 1906 and 1910 to house the growing number of prisoners in Czarist Russia.

Monday night in Chelyabinsk, in the Russian Urals about 900 miles from Moscow, hundreds of heavily armed troops suppressed another, 24-hour prison takeover by 1,000 inmates, killing one inmate and wounding several before regaining control.

Interior Ministry troops and other forces in red and blue berets searched the Dnepropetrovsk facility cell by cell after the surrender Tuesday to

account for all of the inmates.

At least a dozen inmates were missing and authorities said some might have escaped.

Four were known dead - one hanged himself, another overdosed on drugs, a third was shot by guards and the fourth died of injuries sustained during the takeover Thursday night, witnesses said.

Police with Kalashnikov rifles and wearing riot helmets sealed off the prison earlier Tuesday and a Ukrainian legislator negotiated with the rioters, who had a list of 20 demands.

Other prisoners shouted complaints over the prison walls and some stood on the roof of the three-story brick facility waving blue-and-yellow Ukrainian nationalist flags.

The inmates demanded improved sanitary conditions and a promise that the police would not use violence against them, represenatives told United Press International.

Witnesses said the riot began Thursday night when 40 prisoners packed into a single cell were holding a party and a guard asked them for their radio. The prisoners reportedly went wild, broke down the wall of their cell and seized axes.

Families of the prisoners stood guard outside the facility during the riot in the grimy industrial city of 1.3 million people.

One woman likened the prison to a pigpen.

''There are cockroaches as big as horses and there are lice in the prison cells,'' she said.

''My son, 16, was taken into custody for being in a brawl and I haven't seen him for five months,'' another woman said.

Although conditions in Soviet prisons are believed to be quite harsh, the human rights group Amnesty International said methods of punishment have improved recently.

The report acknowledged that prisoners in punishment cells now have the right to hot food every day but ''there appears to have been no improvement to the general inadequate diet of Soviet prisoners otherwise.''

TOKYO (JUNE 19) UPI - Mexican President Carlos Salinas de Gortari said Tuesday a free trade agreement between Mexico and the United States also will benefit other Latin American nations.

Salinas, on his first visit to Japan since taking office two years ago, also said he was encouraged by a positive response from Japanese business leaders to his calls for greater Japanese investment in Mexico.

''We consider the Uruguay Round (of multinational trade talks for freer world trade) is important but we consider our negotiations with the United States (on a free trade agreement) also are important for Mexico,'' Salinas said.

''A free trade agreeement (between Mexico and the United States) will provide greater export opportunities for other Latin American countries,'' he said.

Salinas stopped in Washington en route to Tokyo for negotiations on a free trade agreement with U.S. officials.

''The agreement will afford lasting, stable access of our exports to the United States and attract greater investment flows from that country to Mexico,'' he said.

Salinas also said he was pleased with a positive attitude of the Japanese business community toward investment in Mexico.

He said he received more than 30 investment proposals from Japanese business leaders and predicted Japan's investment in Mexico will soon double.

He declined to go into details but said Mexico hopes Japanese investment in electronics and automobile-related sectors as well as the financial area.

Salinas met Tuesday with leaders representing five major Japanese business organizations, including the power Federation of Economic Organizations, known as Keidanren.

The Japanese representatives expressed hope that the Mexican government will pursue a consistent policy to help encourage Japanese investment, he said.

Salinas said Mexico offers the ample potential of a stable economy, a rapidly expanding market and a climate conducive to investment and the development of productive projects.

Salinas highly appreciated the Japanese government's positive approach

toward protection of global environment.

He described Japan's major aid package for Mexico's pollution control programs as ''unprecedented in scale and nature.''

Japan pledged Monday a loan package equalling about $779 million for Mexico's pollution control and other projects, climaxing Salinas' five-day trip to Japan.

The fund will be used for desulphurization, rolling stock improvement and lead-free gasoline projects, government officials said.

Salinas and Japanese Prime Minister Toshiki Kaifu also agreed to upgrade and increase government-to-government contacts to further develop bilateral partnership toward the 21st century, the officials said.

Salinas, accompanied by his wife and three children, arrived in Tokyo Saturday on a leg of his Asian tour, which includes Singapore and Australia.

Salinas and his party are scheduled to visit Osaka, Japan's second largest city and business center about 250 miles west of Tokyo before leaving for Singapore Wednesday.

(JUNE 19) UPI - --repeating--

In Jerusalem, the prosecution is expected to finish its presentation today or tomorrow in the final appeal of convicted war criminal and former U-S auto worker John Demjanjuk. He was convicted in April 1988 of being a guard known as ''Ivan the Terrible'' at the Treblinka death camp in Nazi-occupied Poland. Demjanjuk's lawyers say the case is one of mistaken identity.

Secretary of State Baker met with Central American presidents yesterday in Guatemala and proposed a development plan to help ''consolidate democracy'' in the region. Baker proposed the formation of a group of industrialized Western nations to oversee development and aid for the struggling economies of Central America. Reaction from the Central American leaders generally was favorable.

Former Senator J. William Fulbright is expressing disappointment with his successors on Capitol Hill. The Arkansas Democrat told reporters yesterday that it's a ''great tragedy'' that politicians have shifted their attention from world events to debate a constitutional amendment to ban flag burning. He called the flag amendment- quote- an ''utterly

emotional and unimportant issue.''

Prosecutors on opposite sides of the United States are taking opposite views on whether 2 Live Crew's album ''As Nasty As They Wanna Be'' is obscene. In California, Sacramento County's top prosecutor say the sexually explicit album is NOT obscene... and record store owners would NOT be arrested for selling the album. Several Florida counties said they would prosecute store owners.

CHAAM, HOLLAND (JUNE 19) UPI - A fourth suspected member of the Irish Republican Army was arrested Tuesday when detected by specially trained dogs in a wooded area in Holland, police said.

Authorities said the unarmed man, who was not immediately identified, surrendered as police approached him in the woods near Chaam.

Police have arrested three other suspected IRA members in the past week in what spokesmen have described as a major breakthrough in efforts to contain a wave of violence linked to the IRA, which opposes British rule in Northern Ireland.

The suspects were discovered when a farmer in Belgium overheard target practice in woods near his house and called police, who discovered three suspected IRA members and a cache of automatic weapons.

A woman identified as Donna Maguire, 23, of Ireland, was arrested at the site but two men with her escaped. One of them, identified as Gerard Harte 26, was arrested Saturday in Holland.

The other, identified by police as Michael Collins, 31, of Ireland, was captured by Dutch police Monday near the Belgian border after a massive manhunt.

West German authorities are expected to seek the extradition of Maguire, who is wanted for questioning in a June 1989 attack on a British army barracks and the July 1989 slaying of a British soldier.

It was not clear how the man arrested Tuesday was linked to the other three. Police had sought a man whom they said ran a police roadblock in Holland near where Collins was arrested.

(JUNE 19) UPI - Stock prices on the Tokyo Stock Exchange closed broadly

lower in quiet trading Tuesday, discouraged by Monday's tumble in New York.

The blue-chip Nikkei Average of 225 selected issues, which fell 161.60 points Monday, lost another 336.42 points to 32,040.38.

The broader-based Tokyo Stock Exchange Price Index of all major listed sharesfell 27.10 points to 2,353.93.

An estimated 330 million shares changed hands, up slightly from the 320 million shares on Monday.

Declines overwhelmed advances 813 to 182, while 129 issues remained unchanged.

Elsewhere in Asia, stock prices posted solid gains in active trading on the Hong Kong Stock Exchange, amid strong interest in secondary issues.

The blue-chip Hang Seng Index, which gained 9.97 last Friday, climbed 27.50 points to 3,229.02. The market was closed Monday for the Queen's birthday.

Among the narrower indexes, utilities gained 2.78 points, financials rose 4.80, industrials climbed 8.13 and properties added 7.26 points.

Volume was fairly heavy at an estimated 2.07 billion shares, up from Friday's turnover of 1.96 billion shares.

In Singapore, stock prices closed slightly lower in light trading on the Singapore Stock Exchange in line with Monday's drop on Wall Street.

The key Straits Times Industrial Index, which climbed 14.43 points Monday, dropped 10.85 points to 1,534.87. The narrower All Singapore Index fell 3.46 points to 430.67.

An estimated 35.9 million shares changed hands, up slightly from the 32.6 million shares on Monday.

In Manila, stock prices closed slightly lower in moderate trading on the Manila Stock Exchange ending a seven-day winning streak amid some profit-taking.

The key Manila Composite Stock Index of 25 selected issues, which climbed 32.53 points Monday, eased 9.64 points to 910.87.

In Australia, stock prices closed lower in moderate trading on the Sydney Sharemarket dragged down by Monday's drop on Wall Street and a surge in the Australian dollar.

The closely-watched All Ordinaries Index, which gained 3.6 points on Monday, fell 6.5 points to 1,499.3.

An estimated 76.1 million shares changed hands, compared with 85.4 million shares on Monday.

BEIRUT, Lebanon (JUNE 19) UPI - Rival Christian forces pounded each other with artillery in Christian east Beirut Tuesday while a French envoy met President Elias Hrawi in a fresh attempt to end Lebanon's 15-year-old civil war, police said.

They said troops loyal to military leader Gen. Michel Aoun and Samir Geagea's Lebanese Forces militiamen exchanged volleys of artillery, machine-gun fire and rocket-propelled grenades along east Beirut

frontlines.

Shells slammed into the residential areas of Nabaa, Sin El Fil and the militia-controlled Beirut port, killing three people and wounding three others, police said. Among the dead were two of Aoun's soldiers, they said.

Tuesday's fighting was the fiercest since the Vatican arranged a general truce in the Christian enclave May 26 to end nearly five months of bitter fighting between followers of Aoun and Geagea.

More than 1,050 people have been killed and 3,000 others have been wounded since Jan. 31, when Aoun launched a futile military campaign to wipe out Geagea's militia.

Meanwhile, the director-general of the French Foreign Ministry, Francois Scheer, met Hrawi at the temporary presidential headquarters in Moslem west Beirut.

Scheer, who arrived in Beirut late Monday, said after the meeting that France's dialogue with the legitimate Lebanese authorities would help promote a peace accord.

''Under the current circumstances, there is hope in restoring Lebanons complete sovereignty and national reconciliation,'' Scheer said.

Asked whether his efforts were in line with an initiative launched by the Vatican to reconcile Lebanese warring factions, Scheer said ''all efforts exterted by France, the Vatican, the Arab League and the Lebanese themselves will help restore a united and sovereign Lebanon.''

The French envoy said he will meet Papal Nuncio Pablo Puente and Sunni Prime Minister Selim Hoss later in the day before heading to Damascus where he is scheduled to hold talks with Syrian officials.

A French Government statement said Scheer's mission to Beirut and Damascus was part of France's efforts ''in the interest of a solution in Lebanon and in light of latest developments.''

Puente has succeeded in arranging a general truce in the Christian heartland and releasing some militia prisoners held by the army.

But the truce has repeatedly been violated by recurring exchanges of mortars, rockets and automatic weapons.

#90170u0906 06/19/1990 ~United Press International

TOKYO (JUNE 19) UPI - The U.S. military announced Tuesday it will return

to Japan about 2,500 acres of the nearly 62,000 acres under U.S. control on Japan's southernmost region of Okinawa.

The U.S. announcement came just four days before the 30th anniversary of the U.S.-Japan security treaty, which took effect June 23, 1960.

Japan and the local government of Okinawa, where 11 percent of the land is designated for U.S. military use, asked the United States two years ago to consolidate its facilities so as to make more land available to Okinawans.

Twenty-three U.S. military facilities, ranging from an 1,100-acre training site to a 100-square-meter refrigeration unit, will be consolidated or relocated, the U.S. Forces Japan said in a release.

The U.S.-Japan security treaty grants the U.S. military the right to operate about 100 military facilities, including about a dozen large bases throughout Japan. But it requires the United States to return facilities whenever they become unnecessary.

About 55,000 U.S. troops are based in Japan, including 25,000 Marines in Okinawa, a group of islands 930 miles south of Tokyo.

The United States plans to trim the troops stationed in Japan by 10 percent over the next three years, but a substantial military presence is expected to remain in Okinawa.

Some details of the land return, including timetables and relocation sites for some facilities, have yet to be worked out, the military said.

Nevertheless, the Japanese government was clearly pleased by the move.

''We believe this sort of effort bodes well for the smooth operation of the Japan-U.S. security mechanism in this country,'' said Taizo Watanabe, chief spokesman for the Foreign Ministry.

He said it would help persuade Okinawan residents of the importance of stationing U.S. forces on their islands.

The government may continue to negotiate for the return of other facilities, especially in Okinawa, where community objections have been strongest, Watanabe said.

#90170u0923 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Construction of new housing fell 1.4 percent in May to the lowest level since the 1982 recession, the government said Tuesday.

Analysts, who expected a much poorer showing, blamed the fourth consecutive monthly decline in housing starts on unusually heavy rains that drenched many parts of the United States.

''Starts continue to dance to the tune of this year's eccentric weather,'' said analysts at Fuji Securities in Chicago. ''They were boosted by unseasonably balmy conditions in January and February.''

May's 1.4 percent decline - to an annual rate of 1,207,000 units - follows a plunge of 6.4 percent in April, according to the monthly report compiled by the department's Census Bureau.

A government spokesman said the overall rate was the lowest since 1,173,000 housing starts in October 1982.

''May was the fourth wettest May on record - in 96 years,'' said analysts at Mitsubishi Bank in New York.

Applications for new building permits, a barometer of future housing activity, dropped by 4.6 percent in May.

Construction of single family homes slipped by 1 percent last month to an annual rate of 896,000 units in the worst showing since 862,000 units in December 1982, the Commerce Department said.

In the South, where flood waters raged, total housing starts managed to increase by 3.2 percent in May.

''Precipitation was most heavy in the South, which routinely accounts for 40 percent of the nation's housing market activity,'' the Fuji analysts said.

In the overbuilt Northeast, housing starts were also up - by 1.6 percent.

But housing starts plunged by 8 percent last month in the Midwest, which also suffered heavy rain after showing signs of renewed strength, while housing construction was off by 3.3 percent in the West.

In the apartment sector, starts on new buildings with two, three or four units plunged 33.3 percent in May while work on new structures with five or more units advanced 3.8 percent, the department said.

#90170u0934 06/19/1990 ~United Press International

HELSINKI, Finland (JUNE 19) UPI - A hijacker surrendered to police Tuesday after forcing a Soviet Aeroflot airliner with 60 passengers and

crew on board to land at Helsinki international airport.

''One hijacker has given himself up,'' Foriegn Minsitry spokesman Tom Westergard said. ''The police are questioning two other people who are suspected of being accomplices.''

The brief hijacking Tuesday was the second Soviet plane to pirated to the Nordic region and the third of a Soviet airliner since June 8.

Radio Finland reported the unidentified hijacker was a ''young man who wanted to go to Israel through Sweden'' but the report could not be independently confirmed and the Israel Embassy in Finland refused comment.

The Tupolev 134 aircraft with 55 passengers and five crew aboard was on its way from the Latvian capital of Riga to Murmansk on the northern Soviet Kola peninsula when it was commandeered, the National Aviation Authority said.

Airport authorities at Stockholm's Arlanda International Airport said shortly after the plane was hijacked that plans had been made there to receive the airliner.

But 15 minutes later, at 10:15 a.m., Helsinki airport announced the aircraft had landed in Finland. The hijacker surrendered an hour later.

Westergard said the plane had been intercepted by two Finnish air force fighters when it entered Finnish airspace. He would not confirm that the two fighters had forced the plane to land at Helsinki but said, ''The captain may have tricked the hijacker or hijackers into thinking they were on their way to Sweden.

''When they landed, the hijacker was mixed up and thought he was in Sweden '' Westergard said.

It was not immediately apparent what means the hijacker had used to force the plane to leave its course.

Finnish authorities would not confirm reports that the hijacker had an explosive device, although Finnish police technicians continued to search the aircraft four hours after it landed.

Westergard said the hijacker had requested political asylum in Finland.

''We do not even know if we could give political asylum because of accords with the Soviet Union and the fact that the aircraft was hijacked,'' he said.

The last time a Soviet airliner was hijacked to Helsinki, in 1978, Finland

refused the hijackers political asylum and returned them for trial in the Soviet Union.

Unlike Sweden, Finland has never afforded Soviet citizens political asylum.

A Finnish police spokesman said agreements would probably preclude any Soviet hijacker receiving asylum in Finland.

''In 1974 Finland and the Soviet Union signed a strict agreement on hijacking stipulating that the Soviet Union can require the hijacker to be returned to the Soviet Union,'' said Chief Inspector Pertti Virolainen.

Two weeks ago, a 17-year-old Soviet boy hijacked a Soviet airliner with 135 passengers and crew on its way from the Byelorussian capital Minsk to Murmansk, forcing it to land in Sweden.

No one was hurt in the incident and the young man, who said he hijacked the plane following a conflict with his parents, remains in custody in Sweden.

Monday, a pilot hijacked a single-engine Soviet plane from Izmail in the southwest Ukraine and flew the 12-seater Aeroflot craft to Turkey.

The pilot, Valery Yurevic, 29, who landed the plane on a Black Sea beach in northwestern Turkey, has asked for political asylum.

The recent spate of Soviet hijackings landing in the West appeared to underline a Soviet wish to end hijackings peacefully, rather than force a landing inside the Soviet Union.

Until 1988, all efforts were made by Soviet authorities to force hijacked aircraft down over Soviet territory.

But following a March 1988 incident in which Soviet commandos stormed a hijacked plane and left nine dead and 19 wounded, Soviet authorities changed their policy, preferring to demand the extradition of hijackers from foreign countries.

(JUNE 19) UPI - Police in Jacksonville, Florida, are investigating how James Edward Pough obtained a license for the revolver he carried while gunning down eight people in a loan office yesterday. Five others were wounded in the attack before Pough turned the gun on himself. Authorities say Pough was convicted of aggravated assault in 1971. They also say they suspect he was responsible for last Saturday's slaying of a prostitute and

her pimp.

The government says housing starts fell one-point-four percent in May, the fourth consecutive monthly decline and the lowest level since the 1982 recession. Analysts predicted a much poorer showing and blamed the decrease in housing starts on the unusually wet weather that drenched many parts of the country.

Meteorologists at the National Weather Service say there was NO way to predict the torrential downpour that caused flash flooding in Shadyside, Ohio. Nevertheless, the parent agency of the N-W-S- the National Oceanic and Atmospheric Administration- is conducting a routine investigation into why the N-W-S did NOT issue a flash flood warning. 21 people died in the flood and 13 others are missing.

The fate of Washington, D-C, Mayor Marion Barry will be decided by a jury made up mostly of black women who have been affected by substance abuse, but who are NOT sure if race played a role in his case. Following two weeks of often tedious questioning, Judge Thomas Penfield seated 12 jurors and six alternates to hear Barry's drug and perjury case. The panel members will be sequestered throughout the trial which begins tomorrow and is expected to last about one month.

#90170u1055 06/19/1990 ~United Press International

MADRID, SPAIN (JUNE 19) UPI - Novelist Mario Vargas Llosa said in an interview published Tuesday he lost Peru's presidential elections June 10 because Peruvians distrust the system and familiar faces associated with it, including his.

''A Peruvian campesino told us he voted for (Peruvian President-elect Alberto) Fujimori because he knew nothing about him,'' Vargas Llosa said. ''That impressed me. It means that the Peruvian people were saying they have known only bad politicians.''

Fujimori was a political unknown at the start of the campaign to fill the post being vacated later this month by Alan Garcia. He surprised political observers and forced a runoff with Vargas Llosa, which he won with about 56 percent of the vote to Vargas Llosa's 39 percent.

Vargas Llosa flew to Paris three days after the elections. He assessed the results in an interview which appeared in Tuesday's editions of the Madrid newspaper El Pais.

His aim, he said, had been to try to get Peru to drop its post-feudal, mercantilist economy and establish a modern, popular capitalist system.

''The opposition got money from the government and started a dirty campaign saying we were going to introduce an economic 'shock treatment,' raising prices and leading Peru into an apocolypse,'' he said. ''And eight or nine sensationalist newspapers started to vomit all kinds of insults.''

''It was a very dirty campaign and it lacked decency,'' Vargas Llosa said, but added he had learned a great deal from the experience.

''A lot of good people left their jobs to work on the campaign,'' he said, ''And my wife, Patricia, established action committees in the pueblos jovenes,'' he said, referring to the shantytowns that have popped up in recent years around Lima.

Most of all, he said, he was able to propagate what he said was the ''exotic'' idea of the value of private initiative. ''The 38.9 percent of the vote we got was for these ideas, not just for me. People voted to turn Peru into a modern country that would open up to the outside world.''

Resistance to these ideas showed that many in power, particularly on the left, were unable to ''renovate'' themselves, he said.

Vargas Llosa said the election loss enabled him to return to writing. ''I have recovered my liberty,'' he said. He said he has ideas for a novel but he did not discuss it.

He did say that he plans to write about Victor Hugo's Les Miserables and about the French-Peruvian feminist Flora Tristan.

Asked about speculation that he would never enter politics again, he said ''never say never, it's too eternal.''

But for the time being, he said, he feels that writers can do more for their countries as writers than as politicians.

Vargas Llosa bases his novels and short stories on satire with biting atttacks on Peruvian socialites and military dictators. He is best known in the United States for ''Aunt Julia and the Scriptwriter.

His best-selling novel, ''La Guerra del Fin del Mundo,'' (The War of the End of the World), is a 531-page chronicle of a messianic cult in late 19th century Brazil. Published in 1981, it was his first novel based set in a country other than Peru.

#90170u1093 06/19/1990 ~United Press International

CHICAGO (JUNE 19) UPI - Members of the Air Traffic Controllers Association say breakdowns of outdated communications equipment at the Aurora control center have resulted in ''frightening'' episodes of lost contact with jetliners.

''There are periods where, for up to a minute to a minute and a half to two minutes, we have not been able to speak to the airplanes because our frequencies are completely dead,'' said Mark Scholl, a member of the Air Traffic Controllers Association, during a Monday news conference.

''It usually happens suddenly,'' he said. ''You'll be working a sector and issuing instructions and nobody answers you so you know you've lost some

kind of communication. If you lose your frequency, there is really nothing you can do but watch. It is very frightening when it happens.''

Scholl said luck has been a big factor in avoiding collisions because air traffic controllers allow a certain amount of altitude and longitude spacing between airplanes.

Scholl said the association has documented 500 cases of lost communication at the Chicago Air Route Traffic Control Center in Aurora, which covers seven states in the Midwest and handles 2 million planes a year.

Federal Aviation Administration spokesman Mort Edlestein disputed the figures and the seriousness of the problem. He said there is sufficient backup equipment and that only 20 communications outages of one or two minutes have been reported in 1990.

''There have been occasions when the main and backup frequencies have been lost for a period of one or two minutes,'' Edlestein said. ''All were backup systems of additional transmitters and receivers and backup emergency communications equipment normally precludes a total outage.''

Association officials said the FAA announced that in 1984 it would replace old communications equipment at Aurora but in 1989 delayed those plans and set a new deadline of 1995.

''Air and ground communications projects at Chicago Center have been extensive since April 1987,'' Edlestein said. ''We've spent $740,000 to improve communication channels at the Chicago Center.''

''To date, five of 18 communication channels have been relocated and an additional two others are in progress. The remainder will be completed in 1990.''

#90170u1119 06/19/1990 ~United Press International

CHATTANOOGA, TN (JUNE 19) UPI - Roy McDonald, longtime publisher of the Chattanooga News-Free Press, died Tuesday at his home, officials of the newspaper said. He was 88.

A spokesman said McDonald left the newspaper earlier than usual Monday, complaining of not feeling well, and did in his sleep.

McDonald, a native of Graysville,left Georgia Tech after two years to assume management of his father's grocery stores in Columbia, S.C., and Jacksonville, Fla. He managed the chain of 70 Home Stores before they were sold in 1967 and then concentrated on the newspaper business.

McDonald's introduction to journalism came when he was a bicycle-borne delivery boy for the Chattanooga Times, which he would later compete against.

He became a publisher as a result of his grocery business. In 1933, McDonald began publishing and distributing a weekly circular that carried Home Store grocery specials.

The ''throw sheet'' increased in size and added news bits while still being given away. That provided a basis for the name Free Press when it became a daily on Aug. 31, 1936.

#90170u1142 06/19/1990 ~United Press International

MOSCOW (JUNE 19) UPI - Soviet President Mikhail Gorbachev gave a ringing defense of his economic and political reforms Tuesday to a hostile audience of hard-line conservatives at a conference of Russian Communists.

But Gorbachev received only tepid applause for his attack on those ''who dogmatically reject perestroika'' while the next speaker, Ivan Osadchii, was interrupted with applause five times for his call to restore the Communist Party to its former greatness.

Gorbachev issued the most forceful direct attack in his five-year rule against the policies of Josef Stalin, whose name is a rallying cry for conservatives yearning for the order the dictator instilled by his rule of fear and mass arrests.

Gorbachev warned the communists of the Russian Republic, who are for the first time forming a branch of the Communist Party of the Soviet Union, not to turn their newly found group against perestroika under Stalin's banner.

''We have to say unambiguously without any qualifications, uncompromisingly that the Communist Party of the Soviet Union rejects the ideology and practices of Stalinism, which trampled on the spiritual and moral ideals of socialism,'' Gorbachev said.

''Supporters of such views are counting on turning the Communist Party of Russia against perestroika,'' he said.

But Osadchii, capturing the mood of the 2,744 delegates three weeks before the nation's 28th Communist Party Congress, blamed Gorbachev and his policies for emasculating what once was the most monolithic Communist Party in the world.

''The party is in the grip of a crisis, it is losing more and more of its

fighting spirit, surrendering its position without a fight and losing the role of the political vanguard for the Soviet people,'' Osadchii said.

He said the party leadership, with Gorbachev at the top as general secretary, has pursued ''a very contradictory and at times unpredictable policy.''

Gorbachev's vacillating policy, he said, had allowed anti-socialist forces to consoliate and led the party to abandon its leading role.

Applause cascaded down on Osadchii as Gorbachev watched, flanked by Russian Republic President Boris Yeltsin and a glum Soviet Premier Nikolai Ryzhkov.

Gorbachev's and Osadchii's back-to-back speeches signalled the opening battle of the of 28th Congress of the Communist Party slated to open on July 2 when the party will have to begin fighting to remain the dominant organization in a multiparty state.

Osadchii's attack was a cry of protest against Gorbachev's maneuvers at the February plenum of the Central Committee, in which the Soviet leader led the elite of the party to vote to give up its guaranteed Communist Party monopoly.

Gorbachev then went on in March to create an executive presidency, had himself elected to the post by the Congress of People's Deputies and formed a 16-man Presidential Council, relegating the once dominant Communist Party Politburo into the background as a policy making organ.

In addition, the Soviet Communist Party is experiencing mass resignations. A total of 130,000 Communists have turned in their party cards this year, a six-month figure equal to all of last year's defections.

Not only have the Lithuanian, Estonian and Latvian Communists split from the Soviet parent to form independent Republican parties, but factions are forming in the Soviet party itself.

The Democratic Platform group has threatened to split away if the Soviet Communists don't change their name, abandon Marxism-Leninism, sever ties with the KGB and the army, and give up it patronage system, known as nomenklatura, that reserves the most vital jobs in the country for Communists.

COLOMBO, SRI LANKA (JUNE 19) UPI - Air force bombers pounded Tamil rebel positions on the eastern coast Tuesday and guerrillas launched fresh

attacks on northern army camps in a day of fighting that left at least four people dead and 27 wounded, a military source said.

The source said an area commander for the Liberation Tigers of Tamil Eelam and three Sri Lankan soldiers were killed during fighting at an army detachment in the northern town of Vavuniya, 135 miles northeast of Colombo.

Five other soldiers were wounded in fighting that erupted at the camp after guerrillas attacked soldiers with mortars and small arms fire, the source said.

Rebels launched mortar and sniper attacks on military installations at Jaffna, where six soldiers were wounded. They also attacked Kankesanturai on the northern tip of the teardrop-shaped island, and Mankulam, about 15 miles southwest of Vavuniya, the source said.

Until Tuesday, the Tigers staged most of their attacks in the eastern province around Trincomalee, 150 miles northeast of the capital, and Batticaloa, about 60 miles south of Trincomalee.

But the government said it had regained many of the positions captured by the guerrillas during bitter fighting that erupted one week ago and has claimed at least 600 lives.

A spokesman for the Defense Ministry's operations headquarters said security forces regained control of Batticaloa and the nearby army camp at Kiran.

At least 16 soldiers were wounded in the fighting around Kiran, the spokesman said.

Also, air force bombers pounded Tiger strongholds around the adjacent villages of Valachchenai and Chenkaladi, about 30 miles north of Batticaloa.

The attack was followed by a seaborne landing of about 300 troops brought in to rout rebel forces, the spokesman said.

The government said this week that it would wage an all-out attack on the rebels, following the failure of two cease-fire agreements.

Thousands of people have died in ethnic violence since 1983 when Tamil militants began waging a bloody campaign to establish in the northern and eastern provinces an independent homeland for the mostly-Hindu Tamils.

Tamils demanded a separate state because of years of alleged discrimination by the majority Buddhist Sinhalese, who control the Colombo

government.

#90170u1166 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - China, the No. 1 customer for U.S. wheat in the past two years, bought 359,775 metric tons of soft red winter wheat at subsidized prices, the Agriculture Department reported Tuesday.

The grain was worth $43.5 million based on Chicago prices. At 36.7 bushels to the ton, the transaction called for the delivery of the equivalent of 13.2 million bushels of wheat during October.

With the sale, Beijing has purchased 2.04 million tons of U.S. wheat for delivery during the 1990-1991 marketing year, which opened June 1.

Although it is one of the world's largest wheat producers, China has been a major importer because domestic production has not kept pace with population growth and increased demand for wheat.

China bought the latest batch of wheat through the Export Enhancement Program, the major U.S. export subsidy program. Under it, exporters are given bonus amounts of surplus commodities if they lower their prices in order to make a sale to a targeted country. Six exporters received subsidies worth $16.62 a ton, or 45 cents a bushel, for making the sale.

Beijing has the opportunity to buy an additional 1.15 million tons of wheat at cut-rate prices.

(JUNE 19) UPI - The opposition newspaper Romania Libera returned to stands in Bucharest today for the first time since last week's violent outbreaks. But the paper now carries a disclaimer by printing workers, who say the newspaper staff writers- quoting now- ''distort reality.'' The largest opposition paper in Romania halted publication last Thursday, after its offices were trashed by supporters of the ruling National Salvation Front.

A Commerce Deparment report shows that new house building dropped one-point-four percent in May... to its lowest level since the 1982 recession. May's decline to an annual rate of one Million 207-thousand

units follows a plunge of six-point-four percent in April. Some private economists blamed the drop on unusually heavy rains in the South and Midwest. But Mortgage Bankers Association economist Richard Peach blamed the economy. In his words- ''I think interest rates could explain this decline. You've got an environment of high rates.''

A skyjacking drama ended with the arrest of the hijacker after he forced a Soviet Aeroflot jet with 60 people aboard to land in Helsinki, Finland. Police were questioning two other people suspected of being accomplices. Radio Finland described the sky pirate as a ''young man who wanted to go to Israel through Sweden,'' but that report could NOT immediately be confirmed. The jet was going from Latvia to the northern Soviet Kola peninsula when it was hijacked.

KUWAIT (JUNE 19) UPI - Iraq's oil minister predicted an increase in demand for OPEC oil and said the current price slump on world markets is temporary, a Baghdad newspaper reported Tuesday.

''This unnatural period represented by the deterioration of oil prices is a temporary period, where 1990 will witness an increase in demand for oil '' the official Iraqi news agency INA quoted Issam Abdulrahim Chalabi as saying in an interview with the Iraqi newspaper Al Iraq.

Chalabi's upbeat prediction contrasted sharply with statements from OPEC President Sadek Boussena, who was quoted Monday as warning of a price collapse on world oil markets unless the cartel strictly adhered to its May accord on production quotas.

U.S. crude prices nosedived Monday on the New York exchange to below $16 a barrel for the first time in nearly 19 months, following Boussena's grim predictions.

King Fahd of Saudi Arabia, the world's largest crude exporter, on Monday called on member states of the Organization of Petroleum Exporting Countries to stick to their quotas, saying, ''This is the only way to improve the situation and stabilize the market.''

Fahd, speaking after a Cabinet meeting in the Red Sea resort of Jeddah, was quoted by the kingdom's information minister as saying, ''Saudi Arabia has preserved and is still preserving its full adherence to its quota.''

#90170u1201 06/19/1990 ~United Press International

JERUSALEM (JUNE 19) UPI - A prosecutor told an appeals court Tuesday that a Nazi photo identification card was authentic and proved convicted war criminal John Demjanjuk was the death camp guard ''Ivan the Terrible.''

Prosecutor Michael Shaked, dismissing defense claims that the card is a forgery, reviewed the testimony of experts who determined the card was genuine.

The defense maintains the card is a Soviet KGB forgery designed to link Demjanjuk, a native Ukrainian, to Nazi atrocities for serving in an anti-Soviet militia toward the end of World War II.

Technical issues regarding the card dominated the next-to-last day of prosecution arguments Tuesday, six weeks into Demjanjuk's appeal of an April 1988 conviction of war crimes. A five-judge panel of the Supreme Court is hearing the appeal.

The prosecution is expected Wednesday to ask the justices to uphold the lower court verdict finding the retired autoworker from a suburb of Cleveland as the sadistic guard who herded hundreds of thousands of people mostly Jews, to their deaths in Treblinka gas chambers. He was sentenced to hang.

After the prosecution rests, the court will recess until June 25, when Demjanjuk's Israeli defense lawyer will have three days to rebut the

prosecution's arguments. He opened the appeal May 14 and spent three weeks arguing that a lower court's procedures and verdict were flawed.

At issue is whether the photo and signature on the document - said to be one of thousands issued to Ukrainian war prisoners trained to man Nazi death camps - are those of Demjanjuk.

Demjanjuk, 70, has said the signature and photograph on the document do not appear to belong to him. Even if the document were authentic, the defense maintains, its postings would not place its bearer at Treblinka at the time most of the camp's victims died.

Demjanjuk, a Red Army conscript during the war, has said he was a Nazi prisoner of war at Chelm, Poland, when most of the people died at Treblinka, also in Nazi-occupied Poland.

Shaked argued that despite some flaws - including a loose photo and staple marks that probably could not have been made at Treblinka - it was nonetheless a genuine Nazi ID card that belonged to Demjanjuk and not a KGB forgery.

''If the Soviets wanted to forge (the ID card), is this the way they would go about it?'' the black-robed prosecutor said to the justices. ''It's so illogical, so unreasonable, that it's really quite unacceptable.''

The defense claimed the Soviets hoped to drive a wedge between Jews and Ukrainians by fabricating the card and linking Demjanjuk to Nazi war crimes.

Demjanjuk, a naturalized U.S. citizen, was stripped of his citizenship in 1981 and extradited to Israel five years later.

Adolf Eichmann, the mastermind of the Nazi's plan to exterminate European Jews, is the only person convicted and executed under Israel's 1950 Nazi and Nazi collaborators law.

#90170u1245 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - The 8th Annual PC Expo opened Tuesday at the Jacob K. Javits Convention Center to a sold-out attendance and an expected record number of visitors.

A record 600 exhibitors were represented at the trade show, a main event for corporate volume buyers and trade resellers of computer products and services.

The show is expected to be attended by 60,000 visitors and buyers from 45 countries, officials said.

The trade show opened with a keynote address by Francis Lorentz, chairman of France's Groupe Bull, entitled ''Strategies and Requirements of a New

Information Order in the 90s.''

Many major computer and software manufacturers, including International Business Machines Corp., Apple Computer Inc., Compaq Computer Corp., Microsoft Corp., and Software Publishing Corp., are exhibiting their latest products at PC Expo.

IBM in presenting a new development in its computer-based training programs which combine the resources of a personal computer with laser technology for information storage. The new system allows multiple users to access and process data, text, audio and visual information from a same disc simultaneously and at different location.

The show also features a ''Windows Showcase Pavillion,'' displaying applications of Microsoft's newest icon-based operating system Windows 3.0 from more than 20 key vendors, and a Connections Lab, demonstrating various solutions for computer networks.

Microsoft also announced that a new $125 Mouse package was immediately available with new features tailored for use with Windows 3.0. The company described the new mouse, or the independent command allowing for quick moves along menus, as ''the most advanced mouse available for the Windows environment and other mouse-supported environments.''

Apple made a full products presentation entitled ''Look who's talking...'' and including its top-of-the-line personal computer, the Macintosh IIfx.

Apple also announced the AppleTalk license program to provide low-cost access to its Apple networking software. AppleTalk is a group of protocols that can be used to communicate between Macintosh and IBM or IBM-compatibles.

Ashton-Tate Corp., headquartered in Torrance, Calif., announced at the show that a new version of its word processor, Multimate 4.0, will be shipped to retailers this week. The company said it was lowering the price of the new Multimate version to $565 for network users and $495 for single users. The workstation version will be available at $195 per unit.

#90170u1256 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - The Federal Reserve Board said Tuesday it approved an application by Fleet/Norstar Financial Group, Inc., to engage in brokerage and advisory services for institutional and retail customers.

The Providence, R.I., bank holding company, the 16th largest in the United States with assets of $33.4 billion, will engage in the business through its subsidiary, Adams McEntee Fleet Norstar Securities, Inc., of New York.

The firm will also act as an agent in the private placement of all types of securities, including related advisory services, the Fed said.

Fleet/Norstar, which operates eight subsidiary banks, already underwrites and deals in certain securities and provides other financial services not traditionally offered by banks, the board said in its order.

''Under the framework established in this and prior decisions, consummation of this proposal is not likely to result in any significant adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices,'' the Fed said.

''Consummation of the proposal would provide added convenience to Fleet/Norstar's customers,'' the board said, noting it expects the new services will ''increase the level of competition'' among brokers and other financial service providers.

But Fleet/Norstar's entry into the market was formally opposed by the Securities Industry Association, a trade association of investment bankers and the Investment Company Institute, a mutual fund trade association.

The SIA raised concerns about a bank entering the brokerage field, while the Investment Institute raised questions about Fleet-Norstar offering securities in companies to which the firm and its affilates also serve as financial advisers.

#90170u1265 06/19/1990 ~United Press International

PARIS (JUNE 19) UPI - France and its former African colonies began a three-day summit Tuesday expected to be dominated by discussion of the political and social changes sweeping the continent and Paris's changing role in the region.

The Francophone summit at the Brittany seaside resort of La Baule is being attended by 33 nations, 10 of which are not French-speaking, including Namibia and Mozambique, which are present for the first time.

President Francois Mitterrand is expected to announce that he will ask the other major industrialized powers at the forthcoming Houston economic summit to reduce the debt of Gabon, Cameroon, the Ivory Coast and the Congo, according to diplomatic sources.

''I will repeat it during the coming weeks just as I have done for years: There is no democracy without development,'' Mitterrand said in the Seychelles Islands during a visit to four African states last week.

While Paris welcomes recent moves by key African countries, including Gabon, the Ivory Coast, and Zaire, to create multi-party political systems the wave of change sweeping Africa also has raised serious questions about France's future role in an area of the world it has always considered its special domain.

French aid to its former African colonies is considerable, amounting to $2.5 billion in 1988 compared with $516 million given by Britain to its former protectorates that year. France also has maintained the African franc at the overrated fixed exchange rate of 50 to 1 since 1948, encouraging unhealthy financial speculation even by government officials.

Since the independence movements of the 1960s, Paris has supported one-man rule in many of its former colonies by pouring large amounts of technical and financial aid and at times by flying in troops to defend wobbly regimes.

The most evident case is that of Felix Houphouet-Boigny in the Ivory Coast but others, including Omar Bongo of Gabon, Paul Biya of Cameroon, Mathieu Kerekou of Benin, and until 1981 Leopold Senghor of Senegal, also have used French aid to remain in power.

With many of the pro-French old guard leaders now under attack by emerging opposition movements, however, Paris risks losing its influence on the continent if it does not adapt to the changes, according to a wide range of African affairs analysts.

''There are global problems but there is no crisis of the French system in Africa,'' Mitterrand spokesman Hubert Vedrine told reporters at a pre-summit briefing.

Paris, which has been criticized in the past for supporting one-man regimes in order to exercise maximum influence, is showing more caution in its military interventions to avoid accusations that it is helping repress budding opposition movements.

Among those who will not be attending the summit are President Mobutu Sese Seko of Zaire, whose regime is accused by opponents of killing several dozen university students last May 11 and 12.

The official French position is that while human rights and economic development should be encouraged, the absence of either or both should not be used as an excuse to cut off aid.

''We should not dictate to them what they should do,'' French Cooperation Minister Jacques Pelletin said of the African countries during a recent interview with Radio Monte Carlo. ''We should encourage them to move

towards democracy, a state of law, and the absolute respect of human rights.''

#90170u1282 06/19/1990 ~United Press International

CHICAGO (JUNE 19) UPI - U.S. District Judge Charles Norgle has ordered Amoco Corp. to pay $158 million plus interest for the 1978 wreck of the supertanker Amoco Cadiz off the French coast.

Norgle Monday said Amoco owes damages to the French government and to Royal Dutch/Shell Group, which paid for the supertanker's cargo. Norgle asked all parties to present interest calculations by July 24 so he can finalize the total damages.

Norgle's order affirmed recommendations made by retired U.S. District Judge Frank McGarr, who heard the trial.

Attorneys for both Amoco and the plaintiffs said they will appeal.

Amoco attorney Frank Cicero noted the company has won a judgment against the Spanish company that built the supertanker, Astilleros Esponoles S.A., holding it responsible for damages because of shoddy workmanship. He also said international maritime agreements limit Amoco's liability.

''We think McGarr erred in a lot of his evidentiary rulings,'' Cicero said.

Warren Marwedel, representing the French government, which was awarded $123 million of the total, said he thought the amount was too low and that Amoco should be held accountable for more substantial damages.

Shell was awarded $35 million.

The Amoco Cadiz ran aground off the coast of Britanny during a fierce March 1978 storm. The tanker, whose steering mechanism broke, split in half and spilled 68 million gallons of Iranian crude before sinking - the largest spill ever to reach shore.

The area claimed millions of dollars in losses from damage to the tourism and seafood exporting industries.

McGarr blamed Amoco for the spill, saying the company had not maintained the supertanker adequately.

#90170u1300 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - A freeze in crop subsidy rates may be the

extent of deficit-cutting steps written into the new farm policy law, a key senator said Tuesday, although the administration says deeper cuts will be needed.

During a breakfast session with reporters, Indiana Sen. Richard Lugar, the Republican leader on the Senate Agriculture Committee, said separate legislation probably would be required to carry out any spending cuts.

The committee's chairman, Sen. Patrick Leahy, D-Vt., has proposed a freeze on crop target prices as part of a package aimed at bridging a gap between Republicans like Lugar and Midwestern Democrats who want higher target prices and loan rates.

Lugar indicated Leahy would have Republican support for his package. When asked about Agriculture Secretary Clayton Yeutter's argument that Congress would have to do more than simply freeze target prices, Lugar said:

''I don't know how we can do (budget) reconciliation and a farm bill simultaneously.''

The senator went on to differentiate between the task of meeting fiscal 1991 budget goals and the challenge of writing a five-year farm law. But, he agreed agriculture will have to make a contribution if the deficit reduction goals of the Gramm-Rudman law were to be met for fiscal 1991.

''I don't see how you can get $60 billion to $80 billion in savings without touching agriculture,'' Lugar said.

The House Agriculture Committee's version of the farm bill, which would spend nearly $55 billion on commodity support programs over the next five years, includes a freeze on support prices for grain, dairy, cotton, sugar and rice.

Yeutter wrote to senators last week to suggest the best way to meet budget guidelines would be a combination of target price cuts and limits on acreage eligible for support payments.

Also during the session with reporters, Lugar said he probably would try during Senate debate on the farm bill to abolish the sugar program and he might try in committee to limit farmers to receiving farm program payments on a set number of bushels. He also criticized the limited form of ''planting flexibility'' that has been approved by the committee.

Lugar also underlined his willingness to force extensive debate in committee and on the floor if there are partisan attempts to write an unrealistic bill.

#90170u1324 06/19/1990 ~United Press International
BANGKOK, THAILAND (JUNE 19) UPI - Government radio said the armed forces of the Vietnamese-backed government in Cambodia repelled a resistance attack on a provincial capital, killing 56 guerrillas, amid reports of government talks with a U.N. official on peace moves. Earlier, a spokesman for the U.S.-supported resistance said its forces briefly captured the capital of Kompong Thom province, about 100 miles north of Phnom Penh, before retreating.

Phnom Penh radio, in a broadcast late Monday, said a force of about 700 to 800 fighters thrust into the province Sunday.

''Our armed forces valiantly counterattacked the enemies, defeating them and causing them to retreat in great shame back into the jungle,'' the radio report said.

It said the government forces killed 56 members of the attacking force, wounded 82 and seized 34 weapons.

The resistance has yet to give an account of casualties in the attack of Kompong Thom, but it has touted the operation as a success because it claimed to have made its first capture of a provincial capital, even though it said controlled the town only briefly.

The government report did not say whether the town had fallen briefly, but it confirmed there had been heavy fighting in a province dangerously close to the national capital.

Ek Sereywuth, spokesman for the guerrilla forces loyal to Prince Norodom Sihanouk, said the resistance still held positions around Kompong Thom and controlled the main highway leading to the northwest.

The three-party opposition coalition says it is fighting to force the Phnom Penh government, installed by Vietnam's 1978 invasion, to agree to an equitable peace settlement supervised by the United Nations.

The official Cambodian news agency, meanwhile, reported Tuesday that Cambodian Prime Minister Hun Sen held talks with U.N. Deputy Secretary-General Ahmed Rafiuddin on the search for a political solution to the Cambodian conflict.

The agency said Hun Sen met Rafiuddin Saturday in Phnom Penh to reaffirm that his government was ready to join in a Supreme National Council meeting with resistance representatives to work out a cease-fire.

It said Rafiuddin briefed Hun Sen on the results of studies by U.N. technical teams in Cambodia on problems of rebuilding the country once a

peace settlement is reached.

''The meeting proceeded in a cordial atmosphere permeated with a sense of mutual understanding,'' the agency said, even though the United Nations recognizes the resistance coalition rather than the Hun Sen government as the legal government of Cambodia.

The report said Rafiuddin visited the war-threatened temple ruins at Angkor Wat in northwestern Cambodia during his two-day stay.

Earlier, the news agency called on the resistance to go ahead with the planned National Council meeting supposed to take place before the end of July.

An agreement on the Council and a cease-fire was signed earlier this month in Tokyo by Hun Sen and resistance leader Sihanouk.

Since then, however, Sihanouk has said the agreement would be impossible to implement without the cooperation of the Khmer Rouge, the most powerful of the three resistance groups.

The Khmer Rouge has refused to sign the agreement or to nominate representatives to the council because it was not recognized as a separate party to the accord.

Sihanouk and the other non-communist group leader, Son Sann, have nominated only two representatives each, leaving two seats vacant for the Khmer Rouge on the 12-seat council. The other six positions are held by the Phnom Penh government.

''Both Sihanouk and Son Sann are trying to neglect the Tokyo joint communique because the Khmer Rouge 'Polpotists' are turning a blind eye to the document,'' the Cambodian government news agency said.

It questioned whether the two non-communist leaders had the courage to go ahead with the Council meeting without the Khmer Rouge.

''The people of Cambodia urge that all the 12 members of the Supreme National Council be nominated to represent the two governments in settling the Cambodian issue,'' it said.

So far no place or date has been set for the council meeting.

HOLLYWOOD (JUNE 19) UPI - ''Dick Tracy'' blazed its way into 2,332 North American theaters last weekend and collared $22.5 million, setting a Walt

Disney Studios record but falling far short of any industry records.

The movie version of the old comic strip hero and his weirdo adversaries was directed by Warren Beatty - who stars in the title role - and despite more hype than any film since ''Batman,'' it fell fall short of awesome.

Although it received generally good reviews for its artistic innovations, ''Dick Tracy'' failed to top the openings this year of ''Total Recall'' and ''Back to the Future III'' - which grossed $25.5 million and $23.7 million respectively.

And it was way behind last year's eye-popping opening of ''Batman,'' which amassed $40.4 million in its debut weekend.

Still, the highly stylized ''Tracy'' broke the Disney opening weekend record held by last summer's ''Honey, I Shrunk the Kids,'' which racked up $14.2 million.

''Tracy'' swept ''Another 48 HRS.'' out of its one-week stand at the top of the box-office rankings, according to Entertainment Data Inc. The much-panned, repetitive Eddie Murphy comedy nosedived 45 percent from its opening week to score $10.7 million in 2,301 venues.

While dropping to No. 2, ''Another 48 HRS.'' has collected $37.6 million in two weeks.

Slipping to No. 3 over the weekend was ''Total Recall,'' falling 32 percent below the previous week's gross. The violent sci-fi drama, starring Arnold Schwarzenegger trashing the planet Mars, posted $10.2 million at 2,095 theaters for a three-week gross of $67.6 million.

Good reviews didn't do much for ''Gremlins 2: The New Batch.'' The comedy opened on 2,075 screens and scared up $9.7 million to gain the No. 4 spot.

No. 5 was ''Back to the Future III,'' which dropped 37 percent from the previous week. The Michael J. Fox time-travel comedy grossed $4.8 million in 2,070 houses for a four-week tally of $57.5 million.

The only other newcomer for the week was the re-issue of a modest little kiddie comedy titled ''The Adventures of Milo and Otis,'' which ranked ninth with an anemic $1.7 million in 914 theaters.

Worth noting was the continued popularity of ''Pretty Woman,'' the unheralded romantic comedy starring Richard Gere and Julia Roberts. Now in its 13th week, it was No. 6 with a gross of $3.3 million and a total of $138.7 million.

Last week's $110.9 million North American box-office tally was off $10

million from the 1989 total of $120.9 million for the equivalent week. But so far in 1990 the overall gross is $1.9 billion, compared with 1989's record-setting $1.8 billion.

The top 10, last week's gross, total gross, weeks in release:

1. ''Dick Tracy,'' $22.5 million, 1 week.

2. ''Another 48 HRS.,'' $10.7 million, $37.6 million, 2 weeks.

3. ''Total Recall,'' $10.2 million, $67.6 million, 3 weeks.

4. ''Gremlins 2,'' $9.7 million, 1 week.

5. ''Back to the Future III,'' $4.8 million, $57.5 million, 4 weeks.

6. ''Pretty Woman,'' $3.3 million, $138.7 million, 13 weeks.

7. ''Bird on a Wire,'' $3.1 million, $55 million, 5 weeks.

8. ''Milo and Otis,'' $1.7 million, 1 week.

9. ''Cadillac Man,'' $859,196, $24 million, 5 weeks.

10. ''Teenage Mutant Ninja Turtles,'' $857,317, $124.6 million, 12 weeks.

(JUNE 19) UPI - Leaders of former French colonies in Africa are holding a three-day summit in Paris expected to be dominated by talks of the changing role of France in the region. The summit at a Brittany seaside resort is being attended by 33 nations, 10 of which are NOT French-speaking.

Officials in Lincoln, Nebraska, say autopsies confirm the deaths of two heart surgery patients resulted from infections traced to a contaminated surgery solution. Officials say eight patients who had heart surgery at Bryan Memorial Hospital suffered the infections, including the two who died.

Fire officials are investigating five blazes that broke out almost simultaneously last night at New Jersey's state university in New Brunswick. NO one was hurt in the fires... that were all put out several hours after they began. But 21 students did have to spend the night elsewhere.

#90170u1368 06/19/1990 ~United Press International
SRINAGAR, INDIA (JUNE 19) UPI - Moslem guerrillas, apparently shooting from houseboats, fired rockets Tuesday at two hotels being used as military barracks on picturesque Lake Dal, killing six Indian paramilitary policemen and wounding nine others, authorities said.

It was the first time Kashmiri Moslem guerrillas, who are fighting for

independence from India, have used rockets against Indian security forces. The use of the Chinese-made rockets marked an intensification of the militants' struggle, which until Tuesday was confined to grenade and automatic rifle attacks.

A man describing himself as the press coordinator for the banned Moslem Janbaz Force, the militant wing of the outlawed People's League, claimed responsibility for the attack on behalf of his organization.

''We claim responsibility for this action in which two hotels ... were damaged extensively,'' he said in a telephone call.

The government of India did not immediately comment on the incident, but one official source said the attack showed that the militants were succeeding in moving heavier weapons across the border from Pakistan.

''They (border security forces) have captured some people carrying these rockets,'' he said. ''Now they have used them, so some people must have escaped detection.''

India has accused Islamic Pakistan of training and arming the Moslem rebels from bases in Azad, or Free Kashmir. Pakistan denies the charge but acknowledges it lends moral support to the guerrillas.

More than 450 people have been killed in northern Jammu and Kashmir state since mid-January, when a simmering 2-year-old Moslem secessionist movement flared into a full-fledged popular uprising against Indian rule.

Moslems in Kashmir say they need an independent state because for years they have been denied government service jobs, economic development aid and educational opportunities by the Hindu-dominated government in New Delhi.

The Moslem rebels, apparently hiding on houseboats or cargo boats in Lake Dal, fired three rockets into the Duke and ., authorities said. A senior official said the Chinese-made rockets killed at least six members of the paramilitary Central Reserve Police Force and wounded nine others.

A row of multi-story hotels lines one side of the lake, about 500 yards across the waterway from the first row of houseboats. The hotels have been seized from their owners for use as military barracks, and sandbag bunkers have been built on many balconies.

Abid Goona, who owns a hotel facing the Duke and Boulevard hotels, said, ''I saw the upper story of the four-story Boulevard Hotel completely blown up.'' Goona, who used to run the Boulevard, said the upper floor was a large hall where troops may have been sleeping.

The Press Trust of India news agency said the rocket attack was followed by a 90-minute gun battle.

''Soldiers immediately went into action, jumped into a motor launch and traced (down) the place of the launching of the rockets,'' a government spokesman said. He said paramilitary police were conducting an intensive search of houseboats on the lake.

The attack came one day after paramilitary troops surrounded a house in southern Srinagar, surprising a group of rebel Kashmiri Moslems and killing the chief commander of the Hizb ul Mujahideen, one of the largest militant organizations fighting Indian rule.

The government imposed a round-the-clock curfew on Srinagar, the summer capital of Jammu and Kashmir state, and ordered security forces to shoot curfew violators on sight, official sources said.

The sources said the state government was concerned that mass demonstrations and violence might erupt following the killing of Mohammad Abdullah Bangroo, 25, the Hizb ul Mujahideen commander.

#90170u1370 06/19/1990 ~United Press International

CHICAGO (JUNE 19) UPI - Trading was choppy in the grain and soybean complex and midmorning prices were mostly lower Tuesday on the Chicago Board of Trade.

The market was weak from the opening bell, and despite efforts to rally, could not overcome the selling pressure.

Soybeans were slightly higher early in the day in a continuation of Monday's rally, then turned lower as the selling activity picked up. Losses in soybeans were limited by a firm cash market and weather-related planting delays.

Corn was lower after one hour of trading, but had underlying support from the weekly crop reports. There are indications that farmers will plant very little more corn because of the lateness of the season. Although the condition of the crop improved slightly during the past week, the report showed plants are not as tall as normal for this time of year.

Wheat had underlying support from China's purchase of 360,000 tons under the export bonus program. The crop report showed deteriorating conditions in wheat, and that also kept a floor under prices.

Country movement was light.

The midmorning prices:

Corn Jly 2.83 1/2 off 3; Sep 2.80 1/2 off 2 1/2; Dec 2.77 1/4 off 3 1/4.

Soybeans Jly 5.91 off 5; Aug 5.97 off 5 1/4; Sep 6.01 1/2 off 3 3/4; Nov 6.10 off 4 1/2.

Wheat Jly 3.30 1/4 up 1/4; Sep 3.35 off 1/4; Dec 3.49 off 1/2.

Oats Jly 1.39 1/2 off 2 3/4; Sep 1.47 1/2 off 2 1/2; Dec 1.57 1/2 off 3 1/2.

AUSTIN, Texas (JUNE 19) UPI - A federal judge Tuesday ordered Motorola Inc. to take one its most profitable computer microchips off the market because of a patent infringement involving Hitachi Ltd.

The ruling by U.S. District Judge Lucius Bunton III of Midland could deal a major blow to Motorola, whose 68030 chip generated more than $100 million in sales last year.

Motorola said it would appeal the ruling to the federal patent appeals court in Washington.

''We are confident the (court) will promptly stay the lower court's decision, pending appeal,'' the company said in a prepared statement.

Bunton ruled in March that Motorola's chip, which was designed and manufactured in Austin, infringed on a Hitachi patent, but temporarily delayed putting any order into effect. Bunton informed both companies Monday he would implement the decision Tuesday.

The ruling bans both companies from making or selling microprocessors in the United States, but is expected to have little effect on Hitachi. The chip made by the Japanese firm, the H8/532, is not actively marketed in this country.

Motorola's 68030 chip, however, is the second most successful microprocessor of its kind in the computer industry. Bunton's ruling could also harm Motorola customers who use it, including Apple Computer Corp. and Sun Microsystems Inc., analysts said.

Motorola, which employs 5,000 people in Austin making a wide array of computer chips, said in its release late Monday it was confident that it would continue to provide an interrupted supply of chips to its customers. The company did not say what affect the ruling would have on jobs at its

Austin facility.

The ruling stems from a lawsuit filed in January 1989 after Motorola and Hitachi ended a long-term technology sharing agreement. Each company claimed in the lawsuit that the other company had infringed on its patents.

Bunton has urged both companies to settle the case out of court. They are currently engaged in discussions aimed at reaching a settlement, and Motorola said in its statement that ''each company remains dedicated to resolving this issue.''

Carolyn Rogers, an analyst with Hambrecht & Quist in San Francisco, told the Austin American-Statesman that Bunton's ruling will force Motorola to settle with Hitachi.

''This is a huge chip for Motorola and its customers,'' she said.

#90170u1375 06/19/1990 ~United Press International

CAIRO, EGYPT (JUNE 19) UPI - Arab nations critical of Israeli Premier Yitzhak Shamir's new right-wing government reacted Tuesday with conflicting interpretations of Washington's policy intensions in the Middle East and how Arabs should respond to them.

While Egypt called for the diplomatic exploitation of a perceived rift in U.S.-Israeli ties, Palestinian leaders rejected what they described as Washington's attempts to blackmail the Palestine Liberation Organization.

Yasser Abd Rabbou, head of the PLO delegation to talks with the United States, told the Kuwaiti daily Al Anbaa: ''The United States is seeking to turn the seaborne (Palestinian guerrilla attack on an Israeli beach) into an element of continuous blackmail for the Palestinians, by laying down conditions that are both impossible to meet and unacceptable.''

President Bush has said his administration is contemplating whether to halt its 18-month dialogue with the PLO after the aborted May 30 attack, which a member of the PLO Executive Committee, Abul Abbas, claimed responsibility for organizing.

Rabbou accused the United States of abandoning its efforts to promote peace in the Middle East.

''Indications from Washington show that it is abandoning its effort to promote peace in the Middle East, and that its policy is aimed at allowing the government of Yitzhak Shamir to carry out its plan against the intifada and to threaten the Arab countries,'' he was quoted as saying.

In Tunis, Tunisia, Bassam Abu Sharif, a senior adviser to PLO chief Yasser Arafat, said the PLO was ready to sign a treaty with Israel but it was also prepared to defend itself.

''We are ready to sign a peace treaty, but we are also always prepared to defend our existence and peace,'' he said.

Sharif accused the United States of being responsible for the current stalemate in the Middle East, and said, ''Israel plans to carry out a wide-scale assassination campaign'' against Palestinian leaders.

In congressional testimony last week, a harshly critical Secretary of State James Baker said he doubts the Israeli government is serious about seeking peace and said that if it gets serious, ''call us.'' Baker then rattled off the White House phone number, sparking thousands of calls that overloaded the switchboard.

The previous Israeli coalition fell over a rift about the peace process between the Labor Party and the Shamir's Likud party.

Bush has written Shamir to congratulate him on the formation of his new government and to urge him to move the peace process along. The letter was written amid increasing U.S. frustration over inability to get Israel and Palestinian representatives to the peace table.

Egypt's semi-official Middle East News Agency, meanwhile, urged Arab nations to take advantage of the perceived rift in U.S.-Israeli relations.

''Arab sources in Washington expressed their belief that the best attitude the Arabs should adopt in their efforts at this stage, is to try to exploit the existing contradictions between the U.S. and Israeli governments,'' the news agency said.

The agency said Arabs should aim to support Bush's avowed Middle East policy aims of pushing the peace process forward, exchanging land for peace and protecting the Palestinian inhabitants of the Israeli-occupied territories.

''This could result in reemphasizing the declared U.S. position on the Middle East, foremost of which are trading land for peace, rejecting settlements in the occupied territories and securing American support for Arab efforts to protect the Palestinian inhabitants of the territories,'' the agency said.

Jordan's Foreign Minister, Marawan al Qassim, meanwhile, told the Paris daily Le Figaro that Shamir was determined to settle Soviet Jewish immigrants in the occupied territories, and such a move would scuttle any hopes for peace in the region.

''Shamir is determined to settle the Soviet Jews in the occupied territories. ... The program of his new government clearly refers to the occupied territories as an inseparable part of greater Israel, and that Jordan is a Palestinian state,'' Al Qassim was quoted as saying.

''All this is bound to scuttle any prospects of peace in the region,'' the Jordanian minister said.

BEIJING (JUNE 19) UPI - Floodwaters and torrential rains submerged an entire county in China, burst dams in Vietnam and destroyed houses in Korea, killing more than 200 people and affecting the lives of tens of millions of others across Asia, officials said Tuesday.

A tropical storm also swirled slowly across the South Pacific toward the Phillipines, prompting authorities to post weather warnings.

A spokesman for the foreign affairs office of inland Hunan province in southern China, contacted by telephone from Beijing, said heavy rainstorms between June 11-16 had caused ''severe flooding'' in 43 counties.

The floods left 198 people dead and 1,527 injured, destroyed 130,000 village houses and affected the lives of more than 20 million people, the official said.

Unusually heavy rainfall damaged 2.6 million acres of crops, according to the official spokesman, citing figures higher than those reported by the official Chinese media.

Many of the casualties occurred in central Xupu county, which the official described as ''entirely under water.'' A semi-official China News Service report Tuesday said 33 people were killed and more than 180 seriously injured in Xupu alone.

Hunan provincial governor Chen Bangzhu personally took charge of disaster relief, allocating 33 million pounds of rice and $595,744 in relief funds to stricken areas, CNS said.

Heavy rains at the same time triggered floods in Vietnam that burst dams, destroyed houses and killed at least 25 people, the official Vietnam News Agency reported.

''Recent prolonged torrential rains from June 12-16 in the Central Highlands province of Darlac'' killed two dozen people and burst four small dams, the agency said.

It said 9.8 inches to 11.8 inches of rain fell on the province, destroying hundreds of acres of rice crops.

On June 15, eight hours of ''torrential rain'' hit mountainous Son La province on the border with Laos, the agency said.

The rain ''caused a big flood, sweeping away dozens of houses, killing at least five persons, submerging all rice fields in six districts and destroying many bridges and roads in the locality,'' it said.

''This is the biggest flood in 10 years in Son La,'' it said.

Vietnam' s northern and central provinces are regularly the victims of rain storms and typhoons which cause heavy damage each year.

In South Korea, downpours that began Monday killed at least four people, injured 50 and left two others missing, flooded farms in central areas of South Korea, police said Tuesday.

Four other people were killed in a provincial area and Seoul in traffic accidents on wet roads, police said.

The area hit heaviest by the rainstorms was Kanghwa Island, 30 miles west of Seoul, where nearly 12 inches of rain fell since Monday.

A family of three were crushed to death on the island when their house collapsed under the downpours, police said.

In the South Pacific Tuesday, tropical storm Orphelia plodded toward the central Philippines Tuesday with peak winds of 46 mph, prompting authorities to raise storm warnings in the region.

In the capital, police said four people were missing and feared to have drowned when a ferry crossing the murky Pasig River sank during a thunderstorm Monday night. Four others were rescued.

The Manila Weather Bureau at midday located Orphelia in the Pacific Ocean 250 miles east-southeast of the central island of Samar.

The second storm to affect the Philippines this year was moving west-northwest at 4 mph and was expected to strike the northern portion of Samar and the southern section of Luzon island early Wednesday.

Storm warnings were raised in the rice-producing region of the eastern coastal region.

#90170u1407 06/19/1990 ~United Press International

SCHENGEN, LUXEMBOURG (JUNE 19) UPI - France, West Germany, Belgium, The Netherlands and Luxembourg signed a landmark accord Tuesday to abolish all border controls and establish a new free-travel zone.

The agreement means people will be allowed to travel freely without stopping at border checks.

At the same time, controls at the external borders of the five countries will be stepped up to keep terrorists, drug traffickers and illegal immigrants out of the new free-travel zone.

Parliaments of the five countries must first ratify the accord, which is expected to take effect by the end of next year.

The agreement signed at a ceremony on a boat moored on the Moselle River - where France, Luxembourg and West Germany converge - is seen as a key stepping stone and crucial test for the 12-nation European Community plans to abolish all border controls by 1993.

''Creation of a true control-free area represents a major step, not only for the five countries participating but equally for all the citizens of

the European Community,'' said the EC executive Commission.

The agreement nearly fell apart after the Berlin Wall toppled last fall, but the speed toward German unification convinced all parties to apply the new accord to the territory of East Germany.

It will succeed a far more modest 1985 agreement between the five countries, which called for random border checks.

Close cooperation between police and intelligence services in the five countries is seen as critical to the agreement's success.

The new accord creates a state-of-the-art computer data bank in Strasbourg France, enabling authorities to share information on undesirables, and it allows police to pursue fleeing suspects up to 6 miles into neighboring countries covered by the pact.

Some details must first be sorted out, including redesign of some airports to separate arriving ''foreign'' travelers from those flying within the five-nation zone.

#90170u1414 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - The Commerce Department has proposed new rules that would eliminate export licensing requirements for about $30 billion in exports of high-technology products to U.S. allies.

''This new regulation is one of the most significant steps to relax strategic trade controls'' with U.S. allies in the post-war era, Dennis Kloske, under secretary for export administration, said Monday in a release.

''The new procedure will eliminate export licensing requirements on about $30 billion yearly in U.S. trade with our major allies.''

The new general license authorization would eliminate the need for exporters to obtain individual licenses on widely traded items such as computers, telecommunications equipment and other high technology goods.

The authorization only applies to exports to destinations within COCOM, the 17-nation Coordinating Committee for Multilateral Export Controls that regulates Western sales of sensitive goods to communist nations.

The Commerce Department noted the new rules provide additional streamlining of controls beyond the changes for East-West trade announced by COCOM at its high-level meeting in Paris June 6-7. COCOM then relaxed the sales of high-technology goods to the nations of Central and East

Europe in transition to democratic political systems.

The new trade rules will apply in two weeks.

The Commerce Department's Bureau of Export Administration said certain items, because they are particularly sensitive, would continue to require an individual license for export to COCOM destinations. They include advanced computer equipment, underwater detection equipment and cryptographic equipment, as well as products are controlled for foreign policy reasons.

CAIRO, EGYPT (JUNE 19) UPI - Egypt's outlawed Moslem Brotherhood welcomed the victory of Algeria's fundamentalists in elections last week, and expressed hope that Egypt's government would allow similar balloting, the Cairo daily Al Shaab reported Tuesday.

''The Islamic world and even the world at large received the news of the latest elections in Algeria with great pride and joy, and consider it a major historic event,'' the Brotherhood said in a statement published in Al Shaab.

''(Algeria's election result) will have a profound impact on the lives of Moslems in the Arab world.''

The Moslem Brotherhood was banned in the 1950s after a member of the Islamic group was accused of trying to assassinate Egypt's leftist leader Gamal Abdel Nasser.

The Islamic Jihad, a splinter from the Moslem Brotherood, claimed responsibility for the 1981 assassination of Egyptian President Anwar Sadat.

The Moslem Brotherhood is currently allied in parliament with the Social Labor opposition party. President Hosni Mubarak's ruling National Democratic Party held the majority of seats in the house until June 2, 1990.

The Supreme Constitutional Court at that time published a decree declaring parliament null and void, because lawmakers had been elected on a party slate and not on an individual basis as required under the Constitution.

A lawyer allied with the Moslem Brotherhood helped engineer the Supreme Court ruling, and supporters of an Islamic state in Egypt welcomed the chance of new parliamentary elections in the hope of winning a majority in the house.

The government has not yet announced the date of new elections, but political observers said they believed a national poll would be held in the fall.

In an editorial, Al Shaab called on Mubarak's government to hold ''free and fair elections.''

GENEVA (JUNE 19) UPI - Two Swiss workers of the International Commitee of the Red Cross missing in Mozambique since June 1 have returned safely to their base following two weeks of negotiations with their captors, the organization announced Tuesday.

The Red Cross statement said Thierry Tribolet and Brigitte Kehrer had been kidnapped by rebels of the RENAMO movement while working with the civilian population at Quelimane, Mozambique.

It said the all-Swiss relief organization had been engaged in intensive negotiations to free them since their kidnapping June 1 and that they had returned to Quelimane late Monday.

The Red Cross has been active in Mozambique since 1980, providing food and medical aid and visiting prisoners in both government and rebel-held zones of the southeast African nation.

GENEVA (JUNE 19) UPI - Japan, Switzerland, the United States and West Germany have the world's most competitive economies, but may soon be displaced by Asian countries, a report by a Swiss management school said Tuesday.

The International Institute for Management Development said in its annual ''World Competitiveness Project'' report that major changes in the domestic markets of the four industrialized nations may allow Singapore, Taiwan and Hong Kong to catch up in the next few years.

The rankings are produced jointly each year by IMD and the World Economic Forum, which sponsors the annual Davos management symposium.

The report analyzes 326 criteria to produce a ''world competitiveness scoreboard'' that ranks nations according to their standing with the international business community and with international organizations such as the World Bank.

In addition, the report also highlights how leading countries see their economic progression in the next decade.

Of South Korea, for example, the IMD said that while the international business community ranks that country highly, entrepreneurs in the country itself are very gloomy about the future.

Ireland on the other hand, is not seen by the business community as a rising star but is respected for its industrial growth and business outlook, much as the newly-industrialized countries of southeast Asia.

#90170u1468 06/19/1990 ~United Press International

PARAMARIBO, SURINAME (JUNE 19) UPI - Surinamese guerrillas, their leader arrested Tuesday in French Guiana, clashed with troops near the rebel-held town of Moengo and threatened to blow up an American-owned bauxite plant.

The military reportedly reinforced its position in the area and surrounded the town, about 100 miles east of the capital of Paramaribo, where rebels of the Suriname National Liberation Army reportedly have control of the Suralco bauxite plant.

Two rebel spokesmen, Kofi Ajonponge in Suriname and Eddie Josefsson in the Netherlands, said the insurgents had mined the plant, which is believed jointly owned by Alcoa of Pittsburgh and the Surinamese government.

They said the rebels would blow it up if the army attacked but Josefsson said it would not be destroyed indiscriminately.

''If we have to, we will, but only as a last resort,'' he said.

Alcoa spokesmen would not comment on the reports, nor would the former Dutch colony's embassy in the Netherlands.

Communications with Moengo were cut by the army, which Monday warned the town's 3,000 residents to stay indoors. But sources contacted by telephone Monday before communication lines were cut reported they had heard gunfire and explosions in recent days.

Ajonponge and Joseffson said the South American country's military had attacked rebel posts in heavy fighting over the weekend but they did report any casualties.

Officials in Paris said Tuesday that French police arrested guerrilla leader Ronny Brunswijk at the Cayenne airport in French Guiana while he was trying to go to the Netherlands on false papers.

They said France was discusing Burnswijk's fate with the Netherlands.

Brunswijk was arrested in Paramaribo in March as part of an investigation into cocaine smuggling while the guerrilla leader was negotiating a peace plan with Suriname President Ramsewak Shankar.

Brunswijk was released several days later after intervention by Army Commander Deysi Bouterse, for whom Brunswijk once was a bodyguard.

Suriname, wedged between Guyana and French Guiana, obtained independence from the Netherlands in 1975.

Authorities said the clashes between the rebels, who have been fighting to overthrow the elected government since 1986, and the military began Sunday although rebels have occupied Moengo since October.

The government announced a week ago it wanted all insurgents to leave the Moengo area, a center of bauxite mining. Bauxite is an ore used in the production of aluminum.

Last Thursday, a team of government ministers headed by Bourterse met with Brunswijk in French Guinana and asked him to vacate his forces from Moengo but the rebel leader reportedly refused the demand.

The rebels took control of Moengo last October after signing an accord with a smaller splinter rebel group, the Union for Democracy and Development, which had established a toehold in the region.

Josefsson said in the Netherlands the rebels would continue to fight even without Brunswijk.

''We are not depending on his presence. We know what we are fighting for '' he said.

The Netherlands traded Manhattan, now one of New York's boroughs, to

Britain in 1667 for Suriname, which became independent on Nov. 25, 1975.

Shankar, of the Hindu-backed Progressive Reform Party, was elected president in January 1988 in a return to democracy after eight years of military rule. He replaced the military government led by Bouterse, who seized power in 1980 to depose a corrupt civilian regime.

#90170u1469 06/19/1990 ~United Press International

LUXEMBOURG (JUNE 19) UPI - European foreign ministers wrapped up a two-day meeting Tuesday that set the stage for a European Community showdown in Ireland next week concerning sanctions against South Africa.

The foreign ministers also paved the way for European Community leaders to decide at a June 25-26 summit at Dublin Castle to call a December conference on the ''political union'' of Western Europe.

A decision was also reached to put a proposed trade agreement with Romania on hold because of ''indiscriminate use of force by the Romanian government and its supporters'' in putting down anti-government protests in Bucharest last week.

The foreign ministers on Tuesday discussed Japanese car imports and the Uruguay Round of trade-liberalization talks of the General Agreement on Tariffs and Trade.

Most of their work was completed at a marathon session Monday, which lasted late into the night.

Britain has pushed for months to have European Community sanctions relaxed to show support for South African President Frederik de Klerk, and the issue likely will be decided at the Dublin summit.

British Foreign Secretary Douglas Hurd said a majority of European Community nations favor a ''step-by-step approach'' on the easing of sanctions imposed in 1986 but admitted there was no consensus on what the first step should be.

Ireland and Denmark are staunchly against the lifting of sanctions, with Irish Foreign Minister Gerard Collins citing a lack of ''final evidence of an irreversible'' change in South Africa.

The European Community's economic sanctions on South Africa include a ban on new investments and a prohibition on imports of iron, steel and gold coins.

A December conference on political union seems likely after the foreign

ministers approved a five-page working paper for the Dublin summit. It outlines several items for discussion at a conference to change the 1957 Treaty of Rome, the European Community's founding document.

The conference on political union would run parallel to a conference already scheduled for December on economic and monetary union.

(JUNE 19) UPI - Boat crews are combing the Ohio River as the search resumed today for 13 people still missing five days after flash floods washed across eastern Ohio. Shadyside Fire Chief Mark Bodia says the hunt will continue indefinitely- in his words- ''until we feel we have done everything we humanly possibly could.'' Funerals are scheduled today for two of the 21 confirmed dead in the floods.

Police are painting a disturbing picture as they piece together the background of the gunman behind yesterday's massacre in Jacksonville, Florida. Authorities and court files show James Pough had a history of arrests and violent behavior before the outburst that left nine dead, including Pough. Pough was convicted of aggravated assault in 1971... and is suspected of killing a prostitute and her pimp during the weekend.

Police say Pough's criminal record dates back to 1965, when he was arrested twice for vagrancy. Attempted robbery and assault with intent to murder charges were filed the following year, though it is NOT clear if Pough was convicted. Pough was convicted of aggravated assault in 1971 in the shooting death of a man gunned down outside a nightclub.

The Air Traffic Controllers Association blames outdated equipment at a Chicago-area facility for what members say are ''frightening'' episodes of lost contact with jets. Member Mark Scholl says there are times of up to two minutes when the center is NOT been able to contact planes because the center's frequencies went dead. The Chicago Air Route Center in Aurora, Illinois, covers seven states in the Midwest and handles about two-Million planes a year.

BY NEIL FLEMING - UPI

MONROVIA, LIBERIA (JUNE 19) UPI - There is no refrigeration in the morgue of the John F. Kennedy Memorial Medical Center in Monrovia, and it looks like a loading dock.

The bodies, wrapped in filthy sheets or sacking, are stacked on wheeled stretchers in a wet, unlighted corridor, or propped on slabs in the two post-mortem rooms. Some dark fluid of decomposition drips from their wrappings. There is a thick wall of smell in the hot air.

There are five of them left. There were 14, but some have been claimed. They have been rotting here for a week, shot up or chopped up by men in uniform ''looking for rebels'' in the capital. They were from the wrong tribe.

Their relatives are either too afraid to come to identify them or dead themselves or taking refuge among 8,000 others in church compounds around the city.

They are mostly from the Gio and Mano tribes of Nimba country, the eastern province of Liberia where rebel leader Charles Taylor chose to start his five-month military campaign to unseat President Samuel Doe.

It is no longer safe for people from there to walk the streets of the capital. With Taylor's rebels on the doorstep and army discipline collapsing, at least 30 civilians have been shot or had their throats cut in Monrovia in the past three weeks.

This is not a bad dream. It is not fiction. It is the dark heart, the temporary essence of a country founded less than 150 years ago to atone for inhumanity.

American philanthropists invented Liberia for freed slaves, shipping them back to an imagined home in West Africa in 1822. The country has been independent since 1847. Doe has been in power since 1980.

The hospital has no money and is appealing to the public for 500 Liberian dollars - between $150 and $200 on the black market - to buy chemicals and plastic sheeting to get rid of the stinking bundles of horror in its care.

A girl's hand, shriveling and melting, sticks out of the fly-covered sheet. White maggots go purposefully across the concrete floor. The masked mortician shrugs. He is busy suturing shut the eyes of a normal corpse, a middle-aged man in a suit whose casket waits in the hall.

The acrid stench burns the throat and sticks to everything.

''It's worse than South Africa,'' says a middle-aged, gray-haired man called James. ''I soldier, but I Gio. I had to run away.

''Government says: 'You Nimba, you rebel. Take all your things, cut your throat,''' James says.

''They try to shoot us at the barracks, but we jump over the wall. There's 500 Gio and Mano soldiers in the stockade at Barclay,'' he adds.

Barclay Training Camp is the main barracks in Monrovia.

James sits in the warm green gloom of St. Peter's Lutheran Church, less than a mile from the hospital. It is temporary home to about 4,000 unprotected people from Nimba country.

A very small baby sleeps face down on a foam cushion beside James. Children run in the aisles. Most of the adults sit facing the altar, not moving, not talking.

They have nothing to do in the day. At night, they sleep fitfully on the church pews or in the open compound. They are all frightened they will be massacred.

Rumors circulate of mass graves where ''over 100'' babies have been buried alive.

As the children, most now orphans, line up for food in the noisy heat, their elders peer warily through the church railings.

When an army truck passes, they run to the other side of the compound.

''Any man can force this gate,'' says Boake Selekpo, a young man who cannot find his father or his sisters. ''We are kindly asking the U.S. government to please help us. If things settle down, we can come out.

''We are lucky ones.''

NEW YORK (JUNE 19) UPI - The long-awaited reopening of Ellis Island has been set for Sept. 8-9 and will feature a gala celebration highlighted by the dedication of a new immigration museum by President Bush, it was announced Tuesday.

The famous island, where at least one relative of 40 percent of all living Americans first set foot on U.S. soil, has been undergoing a $128 million renovation since 1984.

''Ellis Island is one of America's most hallowed places,'' Lee Iacocca, chairman emeritus of the Statue of Liberty-Ellis Island Foundation, said in a statement.

''When Americans in the years ahead visit Ellis Island, they'll understand what America meant to those who came before,'' he said.

Opening ceremonies will include musical events, a swearing-in ceremony for 50 new U.S. citizens and the dedication of the American Immigration Wall of Honor, which contains 200,000 names so far.

Nearly 17 million immigrants passed through Ellis Island between 1892 and 1954, when it was closed.

The island sat unused for more than 10 years. Some thought it should be sold. In 1965, President Lyndon Johnson placed it under the care of the National Park Service, which reopened the site as an immigration museum and as part of the Statue of Liberty National Monument.

During the long renovation period, Ellis Island's buildings have been restored, including the cavernous, tile-vaulted ''Great Hall,'' called by many the ''Hall of Tears.''

The museum will include historical displays and a computer genealogy room, where visitors can trace how their relatives arrived in the country.

(JUNE 19) UPI - Defense cuts in Britain sent the London international stock exchange into a tailspin... with defense-related industries leading the decline. Defense Procurement Minister Alan Clark yesterday announced plans to cut more than one-BILLION dollars from Britain's military budget. Clark indicated that inflation was pressuring the military's running costs. Hardest hit is British Aerospace, which loses a 906-Million-dollar order for 33 Tornado fighter-bombers.

The Republican leader on the Senate Agriculture Committee says a freeze in crop subsidy rates may be the extent of deficit-cutting steps in a new farm policy law. Indiana's Richard Lugar says separate legislation probably will be needed to carry out any spending cuts. Lugar says Republicans will support a Democratic plan to freeze crop target prices. Bush administration officials have said Congress must do more than just freeze target prices.

#90170u1519 06/19/1990 ~United Press International
WOODS HOLE, MA (JUNE 19) UPI - A cruise ship that ran aground in Buzzards Bay and leaked about 7,500 gallons of fuel oil began a slow trip to New York Tuesday with the help of a tugboat.

The Bermuda Star, which lost the oil after running aground June 10, left Buzzards Bay at 5:30 a.m. for a Brooklyn shipyard, where it will be placed in a graving dock for permanent repairs, Coast Guard Petty Officer Paul Gerecke said.

One tugboat is towing the passenger liner and two others are accompanying them. The convoy will be moving no faster than three knots and the trip is expected to take about 56 hours.

Officials estimate 1,000 of the 7,500 gallons of the sticky No. 6 fuel oil that spilled from the ship washed up on Naushon and two other islands south of Cape Cod.

A 90-foot gash in the hull was patched by early Sunday morning.

The ship's owners said Monday that bridge officers aboard the liner were not under the influence of drugs or alcohol when it ran aground.

The ship's captain, third officer, helmsman and others on the bridge at the time of the grounding tested negative for controlled substances, said EffJohn International, the parent company of the Bermuda Star Lines.

Coast Guard and Bermuda cruise lines officials met with the captains of the Ports of Long Island Sound and New York in order to process the paperwork for the ship's transfer to New York.

''They're sizing up the problems and making sure there won't be any more '' Fitzpatrick said.

Meanwhile, workers from Clean Harbors Inc., of Quincy, continued their cleanup efforts on the islands and area beaches.

The ship's owners have been cited for violating the Clean Waters Act, but the amount of the fine has not been set, the Coast Guard said.

#90170u1545 06/19/1990 ~United Press International
BOSTON (JUNE 19) UPI - A study of more than 5,500 Canadian college freshmen found that most of them were sexually active but relatively few used condoms regularly, scientists said Tuesday.

In addition to avoiding condoms, a ''significant proportion'' of the students engaged in risky sexual practices, such as multiple partners and anal intercourse, the study said.

As a result, the students appear to be at ''high risk'' for acquiring such sexually transmitted diseases as gonorrhea and chlamydia and at ''substantial risk'' of becoming infected with the AIDS virus, said Dr. Noni MacDonald, of the Children's Hospital of Eastern Ontario in Ottawa.

The survey of 2,248 men and 3,266 women at 45 community colleges and universities across Canada found that three-quarters of the men and nearly 70 percent of the women reported being sexually active. The students ranged in age from 18 to 24, with an average age of 19.7.

Of those sexually active, only 25 percent of the men and 16 percent of the women said they ''always'' used condoms, while 24 percent of the men and 30 percent of the women said they never did, MacDonald and colleagues reported in the Journal of the American Medical Association.

Thirty-four percent of the males and 44 percent of the women said they ''sometimes'' used condoms, while the rest said they ''often'' used them.

Condom use was lowest among those students with the greatest number of sexual partners, the study found. Among the 21 percent of men and 8.6 percent of women who reported having 10 or more sexual partners in their lives, only 21 of the men and 7.5 percent of the women said they regularly used condoms.

The women with the greatest number of partners had the highest incidence of sexually transmitted diseases, or STDs. Of the women with 10 or more partners, 24 percent had been diagnosed with at least one STD, compared to only 3 percent of women who had only one partner. Nearly 11 percent of the men with 10 or more partners had at least one STD, compared to less than one percent of the men with only one partner.

Overall, 14 percent of the men and 18.6 percent of the women said they engaged in anal intercourse at least once, but the figures were twice as high among those with at least 10 partners - 27 percent of the men and 35 percent of the women in this category said they had anal sex.

The study said the rate of anal intercourse among women was ''particularly alarming'' because scientific data suggests that the AIDS virus is transmitted through anal intercourse more readily than through vaginal sex.

The frequency of condom use in the Canadian survey was considerably lower than that found in a recent study at Brown University, where 41 percent of women undergraduates said they regularly used condoms. However, MacDonald

noted that the Brown survey involved only 132 women who were age 21.6 on average - two years older than the Canadians.

When the Canadian students were asked why they did not use condoms, their answers ranged from embarrassment about buying them to difficulty in discussing condoms with sexual partners and the belief that condoms interfere with sexual pleasure, the researchers said.

In addition, they said that although the students knew which kinds of sexual activity increased the risk of getting AIDS, they were naive about other aspects of sexually transmitted diseases: 50 percent did not know that an STD could have no symptoms, nearly 20 percent thought that once they had an STD they could not get it again and 10 percent of women thought birth control pills could protect them from becoming infected.

MacDonald said the study results suggest that better sex education programs are ''urgently needed'' to promote safe sexual practices and curtail an ''epidemic'' of sexually transmitted diseases.

#90170u1553 06/19/1990 ~United Press International

CLINTON, IA (JUNE 19) UPI - Chico the parrot is at the center of a custody battle - not necessarily because he's lovable but because he inherited $18,000 from his owner.

Ellen Bengston left almost her entire estate to her feathered friend when she died last year.

Chico has been roosting at the home of Humane Society manager Margaret Swank, but Swank wants $50 a month from the bird's trust fund to pay for food and upkeep.

Harold Bengston, the owner's brother and the bird's trustee, has balked at the request. He said he knows of a couple willing to keep the bird for free.

Swank said she did not know about the trust fund when she began taking care of the large green parrot and would be ''devastated'' if the bird were removed because it has become part of the family.

Chico dances to music, laughs and only swears ''when he's really excited '' Swank said.

A probate court will decide the bird's fate.

#90170u1557 06/19/1990 ~United Press International

ROSEBURG, OR (JUNE 19) UPI - Nina Rust celebrated her 109th birthday by going on a safari but she declined to ride an elephant, complaining that she tried that on her 99th birthday and found the pachyderm ''too bumpy.''

Rust visited Wildlife Safari, a wild animal park in nearby Winston, where she was the guest Monday of owner Frank Hart.

The drive through the animal park was somewhat tame compared to some past birthday celebrations.

At age 100, she took her first plane ride. At 101 she and her daughter, Phyllis McMeeking, drove from Oregon to Haines, Neb., to visit the area where Rust was born in a sod hut in 1881. Then they flew to the East Coast.

At 105, Rust partied at a senior citizens center, dancing with her son-in-law. At 106, her grandson gave her a motorcycle ride around the trailer court where she lives with her daughter.

Nina said she loves to read, play Scrabble and crochet - all of them a lot easier to do since she had a cataract implant at 107.

Nina married Samuel Rust in 1902 but he died in 1943. They had 12 children and 11 are still living, ranging in age from 65 to 87.

Mrs. Rust has 211 descendents: 36 grandchildren, 86 great grandchildren, 74 great-great grandchildren and four great-great-great grandchildren.

#90170u1559 06/19/1990 ~United Press International

PROVIDENCE, RI (JUNE 19) UPI - Identical twins Roland and Robert Huegenin are alike in more than their looks. They also don't pay their taxes and are facing the penalty.

A U.S. District judge Monday sentenced Roland Huguenin, 59, to three years in prison and ordered him to pay $23,000 in fines and back taxes for the years 1984-1986, Assistant U.S. Attorney Seymour Posner said.

Judge Ronald Lagueux also placed Huguenin on five years' supervised probation once he is released from jail. Huguenin was sent to prison pending appeal for three counts of tax evasion.

Robert Huguenin was convicted of the same crimes on Friday. Posner said Robert owes more than $11,000 in back taxes and will be sentenced Aug. 8.

The twins filed false W-4 forms claiming they were exempt from paying taxes, Posner said. They argued their wages from the Kent County Memorial

Hospital were not taxable, Posner said.

#90170u1595 06/19/1990 ~United Press International
NEW YORK (JUNE 19) UPI - The judge in the murder trial of a man accused of recruiting the white mob that killed a black teenager last summer refused Tuesday to suppress the man's admission before a grand jury that he knew someone was carrying a gun.

Assistant District Attorney Pamela Hayes, at a hearing with the jury out of the room, read a section of the grand jury testimony quoting John Vento as saying, ''I don't know what was said. I just know there was a gun on the scene.''

''You want that suppressed?'' Owens asked Vento's attorney, Gerald DiChiara.

''Yes,'' DiChiara replied.

''Forget it,'' the judge snapped.

Vento, 21, the third man to stand trial in the slaying, is charged with second-degree murder in the killing of Yusuf Hawkins, 16, after reneging on a deal to testify against his friends in the racially explosive case.

Hayes said Monday during opening statements Hawkins was shot ''all because Johnny Vento and the boys went along with a plan to take care of 'the niggers.'''

Hayes said she would try to prove that even though Vento did not shoot Hawkins, he should be convicted of second-degree murder because he knew a gun was present when the gang confronted Hawkins and three black friends.

''John Vento knew a risk of death was present because he knew a gun was on the scene,'' Hayes said. ''Johnny Vento directly participated in the entire episode.''

In testimony before a grand jury in exchange for conditional immunity, Vento implicated Joseph Fama, Keith Mondello and others in the death of Hawkins. Vento later reneged on his deal with prosecutors, fled, finally surrendered and was indicted for second-degree murder.

DiChiara, said in his opening statements that Vento did not know Fama had a gun and did not share Fama's intent to kill.

''John Vento was not playing the same game as Joey Fama, not playing the same song,'' DiChiara said ''Was he on the scene? Yes. Did he know Joey

Fama had a gun? No.''

''There is no evidence they can show that he somehow aided Joey Fama,'' DiChiara said.

The Hawkins killing on Aug. 23 inflamed racial tensions across the city and led to a series of protest marches.

On June 11, Fama, 19, the accused triggerman in the killing, and Mondello, also 19, the accused ringleader of a mob, were sentenced to maximum prison terms in the slaying.

Fama, convicted of second-degree murder and a series of lesser charges, was sentenced to 32 2/3 years to life in prison. Mondello, 19, who was acquitted of murder but convicted on lesser charges, was given a term of 5 1/3 to 16 years in prison.

In Monday's testimony, seven witnesses, including a ballistics expert, a medical examiner and several detectives testified for the prosecution about the basic facts of the case.

Prosecutors say they have 20 witnesses and their case should take up most of the week. Vento's grand jury testimony was expected to be read later in the week.

Vento is the third of eight young men from the Bensonhurst neighborhood accused in the killing to go on trial. Fama and Mondello were tried together, but before separate juries.

MONROVIA, LIBERIA (JUNE 19) UPI - Rebels of Liberia's National Patriotic Front fought Tuesday with government troops at Careysburg, 24 miles northeast of the capital, government officials said.

It was the rebels' closest approach to Monrovia in the six months since their leader Charles Taylor launched a bloody civil war to topple his arch-enemy President Samuel Doe.

But Western military officials in Liberia said it was not clear whether a full-scale assault on Careysburg was in progress or whether fighting was scattered. Reporters attempting to reach the town were turned back at a government roadblock.

A Ministry of Information spokesman said he was aware of a few refugees from Careysburg heading toward Monrovia, where a siege mentality has prevailed since the rebels moved into the Bridgestone-Firestone rubber

plantation three weeks ago, within 35 miles of the city.

Government soldiers at checkpoints on the outskirts of the capital spoke of a major rebel assault on Careysburg but admitted they had not witnessed the assault.

On Monday, Taylor told the British Broadcasting Corp. he would not observe a cease-fire ahead of a second round of peace talks between his side and the government slated for June 25.

No cease-fire was agreed at the first round, which ended Saturday in neighboring Sierra Leone. But negotiators issued a communique calling on the two sides to keep military activity to a minimum.

Western military specialists, who asked not to be identified, predicted over the week-end that impatience and lack of food in the rebel ranks would compel Taylor to continue fighting, despite a reportedly congenial atmosphere at the peace talks.

Government officials familiar with the talks but who spoke on condition that they not be named, confirmed that both sides were in broad agreement on the need for greater political diversity in Liberia, free elections in the near future and an end to tribal rivalries.

''The only thing that needs resolving is the issue of the president's resignation,'' said one official.

Taylor has made clear that only the immediate departure of Doe will satisfy him, and that the president's pledge 10 days ago not to stand for re-election in a promised 1991 poll is not an acceptable substitute.

Doe, who seized power in a violent 1980 coup, has refused to step down and accused the United States, which poured aid into Liberia in the early 1980s, of deserting him.

Most of his Cabinet had by Tuesday also deserted him, meanwhile, and the president was expected to announce the sacking of all those government ministers no longer at their posts.

Over 20 ministers, senior officials and military top brass are believed to have abandoned the country since the start of June. These included the entire ranking staff of the Liberian Finance Ministry, from minister Emmanuel Shaw down.

GRAND ISLAND, NE (JUNE 19) UPI - A boy driving an all-terrain vehicle

destroyed two nests of endangered birds last week, the U.S. Fish and Wildlife Service said Tuesday.

The boy, who was not identified, drove over least tern and piping plover nests with an all-terrain vehicle last week near Alda.

''This little guy drove into the nesting colony to see if any eggs had hatched,'' service ornithologist Craig Faanes said. ''After talking to the boy, we concluded that he made an honest mistake.''

The least tern and piping plover are protected by the Endangered Species Act. The maximum criminal penalty for destroying the nests or harassing the birds is a $100,000 fine and one year in jail.

Instead of imposing criminal penalties, it was decided that the boy and his mother will donate their time over the next four weeks contacting all-terrain vehicle operators to inform them about the presence of the birds. They will encourage them to avoid contact with the birds, Faanes said.

When the school year starts in the fall, the boy will put together an educational program for elementary school classes in his home town, Faanes said.

The program is to include discussions of the mistake he made and will involve telling his peers about the importance of protecting Platte River habitats for endangered species.

#90170u1625 06/19/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JUNE 19) UPI - Parliament approved a major reformist bill Tuesday to abolish a 37-year-old law racially segregating trains, buses, toilets, libraries, swimming pools and other public amenities.

The Discriminatory Legislation Regarding Public Amenities Repeal Bill, proposed in November by President Frederik de Klerk, scraps all laws dealing with separate facilities for blacks and whites. It is scheduled to take effect Oct. 15.

While welcoming the action, African National Congress spokesman Ahmed Kathrada called it ''a small step.''

''The government has so much left to do,'' he said.

ANC leader Nelson Mandela, too, has said the issue of separate amenities is ''not very important,'' given the broad range of race reform it seeks.

But he has repeatedly said de Klerk is a man of ''integrity'' regarding race-reform efforts.

The ANC notes laws are still on the books that segregate suburbs, reserve the majority of land for whites, and classify people by race. In addition, the South African Parliament permits no black representation, segregated or otherwise.

The major effect of Tuesday's action is to give substance to de Klerk's pledges to abolish racial discrimination throughout the country and to carry forward the reform package he started in February, analysts said.

The bill passed 105 to 38 with one abstention in the racially segregated Parliament. Only the Conservative Party opposed the measure.

''(It) is destroying whites' rights to self-determination in every facet of daily life,'' said Jan Hoon, a Conservative member of Parliament.

Anti-apartheid activists viewed the measure skeptically.

Some public facilities - hotels, municipal parks, movie theaters and bus and train services - have been desegregated in liberal centers of South Africa in recent years. Last September, for instance, the Transvaal provincial division of the Supreme Court ruled public parks could not be reserved on the basis of racial discrimination.

The current bill specifically targets the Reservation of Separate Amenities Act of 1953, one of the key pieces of apartheid legislation upholding white-minority rule, but it also affects sections of other legislation segregating nightclubs, public transport and restaurants.

A memorandum attached to the bill declares the legislation's intention to scrap all laws that ''authorize differentiation between persons on a racial basis in relation to public amenities.''

The National Party, which has ruled since 1948 on a platform to protect white interests, introduced the Reservation of Separate Amenities Act partly in response to a defiance campaign led by Mandela.

In 1952, while a partner in a Johannesburg law firm, Mandela sent groups of blacks into ''European Only'' entrances to railway stations and counters at post offices.

The government, after losing several court cases ruling segregated facilities must at least be equal, passed the act specifically stating separate amenities do not have to be equal.

A defiance campaign similar to the 1952 protest was conducted last fall

across South Africa as candidates ran for parliamentary seats in elections that led to de Klerk's presidency. Blacks entered whites-only hospitals for treatment, boarded whites-only buses and swam in whites-only pools.

The campaign ended when de Klerk initiated reforms, including the release of Mandela Feb. 11 after 27 years in prison. Other reform steps include provision for public protest, the legalizing of the black opposition and a promise to scrap apartheid laws.

The black movement also rejects the structure of South Africa's Parliament which has separate houses for whites, South Africans of mixed race, and Asians, while excluding completely the black majority.

Approval of the bill Tuesday coincided with the end of a U.N. team's 10-day fact-finding visit to evaluate progress toward ending apartheid.

#90170u1633 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - A House panel decided to sit out the debate over government funding of the arts Tuesday, voting instead to pass the political hot potato to the full House for consideration.

Under an agreement worked out by its leadership, the Education and Labor Committee approved by voice vote and sent to the full House legislation reauthorizing without restriction the embattled National Endowment for the Arts for five years. The Senate is considering a similar measure.

Rep. Pat Williams, D-Mont., chairman of the subcommittee first charged with handling the bill, said the agreement to refrain from attaching restricting amendments in committee was worked out ''to protect the opportunity for all the members of the House to work their will on this legislation.''

''Because of the unusual circumstances ... we feel it is very appropriate for the action to shift to the floor,'' said Rep. Thomas Coleman, R-Mo., the subcommittee's ranking Republican.

Those unusual circumstances stem from the national debate over government funding of the arts after the NEA funded a Robert Mapplethorpe photography exhibit that included homoerotic subjects and an exhibit including a photograph by Andres Serrano of a crucifix submerged in a bottle of urine.

Congress has been under increasing pressure by conservative groups who want to restrict the NEA's grant-making process or even ax the agency over its backing of art works they view as obscene or objectionable.

Rep. Fred Grandy, R-Iowa, called the committee's action ''the last

cease-fire on this issue.''

Noting that the bill faces a plethora of floor amendments aimed at reforming the endowment process, Grandy, a former actor, said he preferred the ''risk'' that the agency would occasionally fund arts some would find objectionable.

''You cannot have art without risk,'' Grandy said. ''If you can it's not worth it. ... I am more concerned about mediocrity than I am about pornography. That's why the endowment was funded - to fight mediocrity.''

But other committee members agreed with Rep. Marge Roukema, R-N.J., who said NEA backing of the Mapplethorpe and Serrano exhibits showed ''on a few occasions the public trust was violated and public funds were misspent.''

''I believe something went wrong with the grant-making and Congress needs to fix it,'' Roukema said. ''If we do not accept this challenge I would suggest that the endowment is in danger of losing its funding.''

The full House is expected to take up the measure in mid-July.

Williams said he had assurances from House Speaker Thomas Foley, D-Wash., that the floor debate would be open to ''significant amendments'' of the measure.

#90170u1659 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - The administration reaffirmed its objections Tuesday to a civil rights bill pending before Congress, with Republicans and Democrats trading accusations of blame over the political impasse blocking its passage.

Meeting with Republican congressional leaders at the White House, President Bush called again for changes to ensure the legislation would not encourage hiring quotas and clog the courts with anti-discrimination cases.

Despite assertions to the contrary by the bill's major backers, including Sen. John Danforth, R-Mo., White House press secretary Marlin Fitzwater said the administration still believes the measure would condone quotas and ''inequitable'' legal provisions.

Fitzwater kept the tacit threat of a veto in the air while adding that there had been ''some indication'' in talks with members of Congress ''that we will be able to work out compromise language that would satisfy our concerns.''

It was not clear, however, where the impetus for compromise would originate.

While suggesting on the one hand that the bill's chief sponsors - Sen. Edward Kennedy, D-Mass., and Rep. Augustus Hawkins, D-Calif. - have resisted the changes sought by Bush, Sen. Orrin Hatch, R-Utah, also indicated the White House has not exactly seized the initiative to find common ground.

''I have not seen any new language (offered by the White House) to this day,'' he told reporters.

The bill, titled the Civil Rights Act of 1990, would reverse a series of Supreme Court rulings last year that made it more difficult to prove job discrimination.

The administration contends key provisions of the bill would encourage employers to adopt direct or indirect quotas to meet racial, ethic or sex-based hiring guidelines, shift the burden of proof from the accuser to the accused in bias cases, and provide legal remedies for cases of proven discrimination that would create a litigation bonanza for lawyers.

When asked about the possible political implications of Bush's vetoing the civil rights bill, especially in an election year that finds the GOP actively courting black voters, Hatch said blacks would ''understand that this is a complex bill.''

''This is intricate stuff. This is not simple,'' he said. ''This isn't just labeling something 'civil rights' and expecting everybody to vote for it. This involves some of the most intricate, difficult rights in our society.''

#90170u1682 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - A former Federal Home Loan Bank president defended Tuesday his decision to delay taking action against Silverado Banking, Savings and Loan Association.

The Denver thrift, taken over by government regulators in December 1988, collapsed after the once high-flying Denver real estate market was grounded by the troubled oil industry. Rescuing the failed thrift is expected to cost taxpayers $1.6 billion.

Rep. Henry Gonzalez, D-Texas, chairman of the House Banking Committee, which is investigating Silverado's collapse, appeared to suggest that regulatory action against the thrift was delayed for political reasons.

Neil Bush, the president's son, was a director of the thrift but stepped down four months before Silverado was taken into receivership by federal regulators.

Gonzalez said Kermit Mowbray, the former president of the Federal Home Loan Bank in Topeka, Kans., submitted a formal recommendation that Silverado be placed into receivership one day after George Bush was elected president.

''This committee has yet to receive a complete and satisfactory explanation about the regulators' hesitation that delayed the closing,'' Gonzalez said. ''Nothing has been more costly than regulatory hesitation through the entire savings and loan crisis.''

In July 1987, examiners from the Federal Home Loan Bank Board of Topeka, which had supervisory control over Silverado, found a number of regulatory violations, including the self-funding of stock sales and the sales of shares in a loan pool.

The examiners recommended that a cease and desist order be issued against Silverado, but Mowbray declined. He testified the he made the decision because the recommendation was based on a preliminary examination.

Instead, the thrift was issued a supervisory agreement, a milder rebuke that restricted the activities under question.

''I disagreed with the staff's recommendation,'' Mowbray said. ''I take responsibility for choosing the supervisory directive over the cease and desist.''

''Unfortunately the delay in placing Silverado in receivership resulted in additional losses,'' he said.

Mowbray said his decision to delay Silverado's take over by the government was not influenced by the presence of Neil Bush on the thrift's board.

''I have never met Neil Bush and I never received any official or unofficial inquiries on his behalf,'' Mowbray said.

The president's son also has denied exerting any political pressure on regulators on behalf of Silverado.

Shortly after Silverado was placed into receivership, Mowbray resigned after being told by M. Danny Wall, then chairman of the Federal Home Loan Bank Board, that he would not be renamed as the principal supervisory agent for the 10th Federal Home Loan Bank District.

He said he has been ''unjustly accused of law supervision and political favoritism'' since his resignation.

#90170u1686 06/19/1990 ~United Press International

PARAMARIBO, SURINAME (JUNE 19) UPI - Surinamese guerrillas, their leader arrested Tuesday in French Guiana, clashed with troops near the rebel-held town of Moengo and threatened to blow up an American-owned bauxite plant.

The military reportedly reinforced its position in the area and surrounded the town, about 100 miles east of the capital of Paramaribo, where rebels of the Suriname National Liberation Army reportedly have control of the bauxite plant owned by Suralco, the Suriname Alumuinum Co., a wholly owned subsidiary of Alcoa of Pittsburgh.

Two rebel spokesmen, Kofi Ajonponge in Suriname and Eddie Josefsson in the Netherlands, said Tuesday the insurgents mined the plant and surrounding roads. They said the rebels would blow up the facility if the army attacked but Josefsson said it would not be destroyed indiscriminately.

''If we have to, we will, but only as a last resort,'' he said.

A spokesman for Alcoa in Pittsburgh, Al Posti, said the rebels have been threatening to blow up the plant for two or three weeks.

Most of the employes at the facility - which has been closed - are Suriname nationals but some are Americans, he said.

Communications with Moengo were cut by the army, which Monday warned the town's 3,000 residents to stay indoors. But sources contacted by telephone Monday before communication lines were cut reported hearing gunfire and explosions in recent days.

Ajonponge and Joseffson said the South American country's military had attacked rebel posts in heavy fighting over the weekend but they did report any casualties.

Officials in Paris said Tuesday that French police arrested guerrilla leader Ronny Brunswijk at the Cayenne airport in French Guiana while he was trying to go to the Netherlands on false papers.

They said France was discusing Burnswijk's fate with the Netherlands.

Brunswijk was arrested in Paramaribo in March as part of an investigation into cocaine smuggling while the guerrilla leader was negotiating a peace plan with Suriname President Ramsewak Shankar.

Brunswijk was released several days later after intervention by Army Commander Deysi Bouterse, for whom Brunswijk once was a bodyguard.

Suriname, wedged between Guyana and French Guiana, obtained independence from the Netherlands in 1975.

Authorities said the clashes between the rebels, who have been fighting to overthrow the elected government since 1986, and the military began Sunday although rebels have occupied Moengo since October.

The government announced a week ago it wanted all insurgents to leave the Moengo area, a center of bauxite mining. Bauxite is an ore used in the production of aluminum.

The demand may have been triggered by a letter Alcoa sent to the government June 5 threatening to suspend currency exchanges with Suriname unless the roads and a river to the Suralco plant were reopened.

Last Thursday, a team of government ministers headed by Bourterse met with Brunswijk in French Guiana and asked him to remove his forces from Moengo, but the rebel leader reportedly refused.

The rebels took control of Moengo last October after signing an accord with a smaller splinter rebel group, the Union for Democracy and Development, which had established a toehold in the region.

Josefsson said in the Netherlands the rebels would continue to fight even without Brunswijk.

''We are not depending on his presence. We know what we are fighting for '' he said.

The Netherlands traded Manhattan, now one of New York's boroughs, to Britain in 1667 for Suriname, which became independent on Nov. 25, 1975.

Shankar, of the Hindu-backed Progressive Reform Party, was elected president in January 1988 in a return to democracy after eight years of military rule. He replaced the military government led by Bouterse, who seized power in 1980 to depose a corrupt civilian regime.

#90170u1687 06/19/1990 ~United Press International

(JUNE 19) UPI - Opening arguments were made today in Marion Barry's drug and perjury trial in Washington, D-C. A federal prosecutor says the mayor has been- quoting now- ''snorting cocaine and smoking crack for years.'' But defense attorney Kenneth Mundy says he will prove during the proceedings that Barry was entrapped and- as Mundy puts it- ''the depths

to which the government is willing to go.''

The civil war raging in Liberia is moving closer to the capital of Monrovia. Government officials say rebels of Liberia's National Patriotic Front fought today with government troops at Careysburg, 24 miles northeast of the capital. But Western military officials in Liberia say it is NOT yet clear whether a full-scale assault is being waged by the rebels trying to topple the government of President Samuel Doe.

About 40-thousand people jammed the area outside the Ontario provincial legislature in Toronto, where South Africa's Nelson Mandela praised Canada's anti-apartheid moves. The black nationalist leader compared the fight against South Africa's racial policies to a steeple chase race. In his words- ''The last hurdles are the most difficult to overcome.''

Chinese officials say about 200 people were killed when heavy rains left an entire county submerged in China... caused dams to burst in Vietnam, and toppled homes in Korea. In southern China, reports indicate that storms last week caused flooding in 43 counties, destroying 130-thousand homes, affecting 20-Million people. The official Vietnam News Agency says 25 people were killed in storms that caused a dam break last week. South Korean officials say heavy rains yesterday left at least four people dead in central areas of the nation.

#90170u1688 06/19/1990 ~United Press International

BOSTON (JUNE 19) UPI - Chlamydia, the most common sexually transmitted disease in the United States, could be contributing to an ''epidemic'' of a serious pregnancy complication in which the fetus begins developing outside the womb, researchers said Tuesday.

A new study found 306 women who had ectopic pregnancies - in which their fertilized eggs started developing outside the womb - were more than twice as likely as 266 women who had normal pregnancies to have had a prior chlamydial infection.

Most ectopic pregnancies occur in the fallopian tube, which carries the egg from the ovary to the uterus. Unless doctors intervene surgically, the tube can burst, frequently leading to serious medical complications.

The United States is experiencing an ''epidemic'' of such pregnancies, with 78,400 cases reported in 1985, Joan Chow of UCLA and her colleagues said in the Journal of the American Medical Association.

Several recent studies have found a ''strong association'' between chlamydia trachomatis - which annually infects an estimated 4 million Americans - and ectopic pregnancies, which account for 11 percent of

maternal deaths.

In the new study, researchers used blood tests to detect signs of past chlamydial infection in women who sought treatment at the Los Angeles County-University of Southern California Medical Center Women's Hospital and San Francisco General Hospital.

After taking into account other factors that might affect the risk of ectopic pregnancy, such as age at first intercourse, number of lifetime sexual partners, a history of infertility, and douching habits, the scientists found women with a past chlamydial infection were 2.4 times more likely to experience an ectopic pregnancy than those who never had chlamydia.

The scientists suggested that chlamydia may set the stage for an ectopic pregnancy by damaging the fallopian tube. They noted that tubal damage associated with chlamydia also has been blamed for cases of infertility.

The study also found that douching is associated with an increased risk of having an ectopic pregnancy. Chow said ''chlamydial infection could cause symptoms that would lead women to douche.''

The researchers noted that about 70 percent of the women studied were relatively poor and Hispanic, and thus not representative of the general population. However, they said their results are similar those of other studies conducted in Sweden and Canada.

The study emphasizes the need for greater efforts to control the spread of chlamydia as a means of reducing not only ectopic pregnancies, but tubal infertility and pelvic inflammatory disease, they said.

#90170u1727 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Jesse Jackson rallied striking Greyhound workers Tuesday, urging a rider boycott of the financially bankrupt bus line and backing their effort to buy the company from its present owners.

''I say to Fred Currey,'' Jackson said, invoking the name of Greyhound's president, ''if you cannot run the compnay, let the workers buy the company.

''Let's get equity and not just salaries for our effort,'' he said.

Jackson, with civil rights heroine Rosa Parks at his side and carrying a sign urging ''street heat now,'' led 300 striking workers and their supporters on a half-mile march from the city's Greyhound terminal to a rally in front of the Amtrak station and just blocks from Capitol Hill.

Parks, whose refusal to move to the back of a segregated Montgomery, Ala., bus in 1955, sparked a mass bus boycott and thrust the Rev. Martin Luther King into national prominence, also voiced her support, telling the cheering strikers she will continue to support the boycott ''as long as necessary.''

Jackson, invoking memories of the previous bus boycott and King, quoted the slain civil rights leader, who said then, ''It is better to walk in dignity than to ride in shame.''

''Workers must unite and fight for economic justice for everyobdy,'' Jackson said.

Some 9,300 Greyhound workers, members of the Amalgamated Transit Union, have been on strike since March in bitter, sometimes violent dispute with mangement. One striker, Robert Waterhouse, was killed by a replacement worker-driven bus and there have been some two dozen incidents of buses or terminals being shot at.

Efforts by the Federal Mediation and Conciliation Service to bring the two sides together have failed, largely over Greyhound's refusal to bargain.

In May, the National Labor Relations Board filed an unfair labor practice complaint againt the company and on June 4 the company filed for protection under Chapter 11 of the federal bankruptcy laws.

Just days before Greyhound announced its brankruptcy filing, the union said it had hired a consultant to explore the possibility of a worker buyout of the company.

Currey and other management officials have dismissed the impact of the strike, saying it was ''essentially over'' because they have hired enough replacement workers to keep the company operating.

Currey and his claim were the object of boisterous derision by strikers and speakers alike at the rally.

''Fred Currey must be stopped,'' Kenny Young, representing AFL-CIO President Lane Kirkland told the crowd. ''This Lorenzo of the highways must be stopped,'' he shouted to cheers and referring to former Eastern Airline head Frank Lorenzo, one of the most-hated owners among union members. ''Greed is leading this man (Currey) the wrong way down a one-way street.''

The peaceful rally turned tense only once, when picketers spilled into the streets in front of the Greyhound terminal and blocked two buses trying to enter. Taunting, jeering strikers managed to turn off the engine of one bus, trapping its replacement driver and about eight passengers inside for nearly half an hour.

District of Columbia police warned the strikers their permit would be revoked if they did not free the passengers and allow them to enter the terminal. A Greyhound worker finally got the bus started and police escorted it into the terminal.

-30- 3616

#90170u1735 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - White House press secretary Marlin Fitzwater said Tuesday that much of the blame for the nation's savings and loan crisis lies with Democrats and dared them to make it a campaign issue in November.

''I just want to put them on notice that this plays both ways and we're ready to play,'' Fitzwater said of the nation's greatest financial disaster since the Depression.

Fitzwater, for the first time, said Democrats were responsible for much of the scandal, in large part because they pushed through a change in the

limit on funds that could be secured by the government, thereby boosting depositors' losses and the eventual cost to the taxpayers.

''The big part of the problem here is that in the dead of night a few years ago the Democrats pushed through raising the limit to $100,000 a person,'' Fitzwater said. ''... I don't think you hear any serious analysis of this problem that doesn't point to former Rhode Island Democrat and Senate Banking Committee Chairman Freddie St. Germaine and the changes that were made in the banking laws back then.''

Fitzwater's attack, complete with a warning and challenge to Democrats if they make the crisis a campaign issue this Novemeber, came as the administration took up critical negotiations with Congress on a budget reduction plan that officials now concede will require cuts of up to $80 billion, due in large part to the cost of the government's thrift bailout program.

Cost of the bailout now is expected to run between $130 billion and $500 billion.

The attack also coincided with new House hearings into the collapse of Silverado savings and loan in Denver. President Bush's son, Neil, was on the board of the failed thrift.

Asked specifically if he was saying Democrats were responsible for the crisis, Fitzwater said, ''I'm saying the Democrats have a big role in it.''

The spokesman went a step further and named specific Democrats, including Sen. Bob Kerrey, D-Neb. Sen. Donald Reigle, D-Mich., chairman of the Senate Banking Committee, Sen. Dennis DeConcini, D-Ariz., former House Speaker Jim Wright of Texas and former Rep. Tony Coelho, D-Calif.,

''Take a look at all of them,'' he said. ''They want to make this a political issue, we'll be glad to do it.''

Asked if the past administration carried any blame, especially for cutting back on number of industry regulators, he condeded, ''There's a lot of responsibility for every place but I see some disturbing signs of Democrats wanting to make this political . ... I think Senator Kerrey and others are clearly trying to make it a campaign issue and if they want to do it, so be it.

''There are a lot of battles that can be fought on this turf, and we're ready,'' he said.

His comments appeared to be a response to mounting criticism in Congress about the pace of the administration's efforts to clean up the thrifts and prosecute those responsible.

''We do expect results but it's not going to be a quick and easy process '' Fitzwater contended, echoing recent remarks of Treasury Secretary Nicholas Brady, who also serves as chairman of the oversight board of the Resolution Trust Corp. ''We're talking about a decade of negligence and mismanagement that has to be corrected.''

The RTC, created last August by Bush's thrift rescue bill, is responsible for overseeing the dismantling of failed thrifts. The agency hopes to have 300 investigators tracking thrift fraud and other criminal conduct in the savings industry by year's end, while legislators also have turned up heat on the Justice Department to investigate and prosecute thrift fraud.

Asked if the administration now was considering a change of the $100,000 limit, Fitzwater said, ''We're taking a look at all of that now. ... In retrospect, we think it helped lead to a lot of the problems here.''

#90170u1749 06/19/1990 ~United Press International

LONDON (JUNE 19) UPI - Representatives of 75 nations gathered Tuesday for a 10-day conference aimed at forging a global strategy and finding funds to preserve the Earth's ozone shield.

The conference is to begin Wednesday and organizers said a main objective would be to help developing countries avoid the mistakes of the industrialized world.

The 1987 Montreal Protocol has been ratified by 58 countries and the European Community and the signators are expected to pledge to eliminate ozone-depleting chlorofluorocarbons, CFC, by the year 2000.

The new timetable is twice as fast as that envisaged initially by the pact because new assessments show the protective ozone shield is diminishing at a faster rate, increasing the chances of mammoth ecological disaster.

''Since the Montreal conference three years ago, ozone layer depletion seems to have been occurring twice as fast as predicted,'' said Mostafa Tolba, executive director of the U.N. Environment Program.

''People get frightened when they hear and read that a 1 percent decrease in ozone is likely to cause a 4 percent increase in skin cancer.''

Another 16 non-signatory nations will be represented, as well as 30 organizations directly involved in CFC production or global conservation. Advisors will meet for a week, with enviornment ministers of the 59 signators gathering June 27-29 at the climax of the conference organized by the U.N. organization.

Tolba said a priority would be finding ways to fund the transfer of ozone-friendly technology from developed to undeveloped nations.

The conference will focus on CFCs, which are blamed for depleting ozone, which absorbs cancer-causing ultraviolent radiation from the sun.

CFCs are used in refrigerators, air conditioners, insulation, food packaging, dry cleaners, spray cans, car seats and furniture, as well as to clean computer microchips.

The first issue confronting the advisers is crafting a method for helping poorer countries conform to the Montreal agreement.

Tolba said estimates for a three-year price tag for transferring environmentally safe technology range from $150 million to $260 million, with $220 million the most realistic figure.

The total cost is supposed to be agreed upon at the preparatory session, then adopted at the ministerial-level meetings.

Questions must be resolved regarding who administers the money, and levels of contributions and expenditures.

''About one thing, however, there can be no discussion,'' Tolba said. ''The funds must be additional funds and not money already earmarked for development aid.''

Initially, the United States was the only industrialized power opposed to the creation of the new fund, saying aid should come from existing international lending institutions, such as the World Bank.

The White House bowed to pressure last week by saying it would support a new fund if it was administered by the World Bank and did not exceed $260 million.

Among the nonratifying countries expected to attend the conference are China and India, whose combined populations of about 2 billion account for almost 40 percent of the world's people.

Beijing and New Delhi refused to ratify the Montreal Protocol because they wanted to see whether wealthy nations that benefitted from using ozone-depleting chemicals were prepared to fund and help the developing nations in using expensive ozone-friendly chemicals.

''If the developed countries fail to rise to the challenge and to face up to their responsibilities, then the outlook for North-South cooperation in coping with global climate change and in protecting biological diversity -

which will both involve technology transfer and massive financial support - is grim,'' Tolba said.

In 1987, developed countries meeting in Montreal agreed to reduce their consumption and production of CFCs by 50 percent by mid-1998, achieved through a 20 percent cut by 1993 and a second cut of 30 percent by 1998.

The use of halons, chemicals mainly used in fire extinguishers and believed to be 10 times more damaging to the ozone layer than CFCs, was set to be frozen at the 1986 level by 1992.

Tolba wants to speed up the pace of cuts. In a note to the 56 treaty ratifiers and the European Community, he urged a reduction in consumption and production of CFCs of 20 percent in 1993, 85 percent in 1997, and 100 percent in 2000.

The 59 countries account for more than 90 percent of 1986 estimated global consumption of the controlled substances.

#90170u1802 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Farmers who produce organic food Tuesday asked for passage of a bill to set national standards for certifying their products, but federal officials said it was misguided and would not add to food safety.

''There remain too many questions and too little consensus within the industry to move forward,'' Daniel Haley, head of the Agricultural Marketing Service, told two House Agriculture subcommittees in urging ''some in depth study'' of the matter.

The Agriculture Department, the parent agency of the marketing service, and the Food and Drug Administration oppose the bill, which has been approved by the Senate Agriculture Committee.

It would require farmers to go three years without use of synthetic chemicals before they could qualify for the federal ''organically produced'' label. Their products would be subject to periodic testing for residues and there could be surprise inspections to make sure chemicals were not used.

States would be allowed to enact stricter standards but they could not bar the sale of produce from other states if it carries the Agriculture Department seal.

Interest in organic food has blossomed in recent years due to public concern over food safety. Organic food accounts for about 2 percent of

retail food sales. At present, 22 states have organic food standards but they sometimes conflict, one reason why the industry wants a nationwide standard.

In a statement, the FDA said an labeling program for organic food could erroneously imply that foods produced under conventional methods were unsafe.

''FDA's monitoring of the food supply over 25 years has shown that fruits and vegetables grown using agricultural chemicals contain only low levels of pesticide residues and that residues above legally established tolerances are rarely found,'' the statement said.

''We do not believe the bill does anything to ensure food safety, contrast to what has been stated by some in the past,'' Haley said.

The American Farm Bureau, the nation's largest farm organization, said it could support the legislation if major changes were made, including elimination of an organic promotion program and removal of the authority for states to set different standards.

The United Fresh Fruit and Vegetable Association, whose members handle 90 percent of the fresh produce sold in the United States, said ''a federal definition should be passed by this Congress'' and the Senate bill, if amended, could be the foundation.

''The organic industry is mainstream America,'' said Mark Retzloff, chairman of the Organic Food Alliance, an alliance of growers, processors and merchandisers of organice products.

''The organic industry has grown to the point that it needs a set of rules to protect itself and the consuming public ... It is now essential that organic products be regulated in the marketplace like other commodities.''

Retzloff urged the subcommittees to ignore suggestions for further study and to proceed with legislation now. Consumer groups and several associations of organic food producers also called for action.

Patti LaBoyteaux, representing the Organic Farmers' Association Council, said federal standards would ''maintain the integrity of the meaning of 'organically produced' as more farmers, more handlers and more consumers become interested.''

#90170u1803 06/19/1990 ~United Press International

SHADYSIDE, OH (JUNE 19) UPI - Authorities estimated Tuesday that 841 homes in four eastern Ohio counties were either destroyed or damaged in

last week's flash floods that killed at least 21 people and left 13 missing.

As federal and state disaster officials began assessing the cost of the cleanup and recovery, about 1,000 emergency workers pressed their search on the Ohio River and isolated mountain creeks for 13 people still missing from the Thursday night disaster.

The Federal Emergency Management Agency and its state counterpart said 339 homes were damaged in Belmont County - where all the fatalities occurred - with 87 destroyed and 48 suffering major damage.

More homes were damaged - 454 - in Jefferson County to the north but only 18 suffered major damage. Harrison County reported damage to 51 homes and Monroe County said five homes were damaged.

The bodies of 21 victims have been uncovered and those still missing are feared dead.

''They're going to continue on indefinitely, until we feel we have done everything we humanly possibly could,'' Shadyside Fire Chief Mark Bodia said.

Nearly 1,000 Ohio National Guardsmen, state and local officials and volunteers have been working on the cleanup effort and providing help to displaced families since the floods.

Some 5 1/2 inches of rain fell in about 3 1/2 hours Thursday night, sending 20-foot walls of water crashing through valleys in eastern Ohio, smashing houses and cars and washing them down to the Ohio River.

About 216 homes in Belmont County were either washed away or so severely damaged they are inhabitable, said Al Hahn coordinating officer for the Federal Emergency Management Agency. He said another 120 homes suffered some damage but are livable.

The deaths were isolated to people in homes along three creeks, with seven near Shadyside, on the Wegee Creek, 12 near Dilles Bottom to the south, on the Pipe Creek and two near Glencoe to the northwest, on the McMahon Creek.

Badia said the search along the Wegee was limited to the last mile before the Ohio River and where debris accumulated in areas of the Pipe Creek near Dilles Bottom.

''It will be a very careful search through the debris to see if there are any missing,'' Hahn said.

Another 150 National Guardsmen were sent to the community Monday and

Tuesday, bringing the total to 520. Night work in certain areas was conducted until flares ran out at 2:30 a.m. Tuesday and were to continue Tuesday night and Wednesday morning.

''It was much more efficient because we didn't have local traffic and it was cooler for the troops,'' said Guard Col. Jim Wilder. Daytime temperatures had been in the 90s since the flooding but cooled to the 70s Tuesday with a threat of rain.

Funerals for three victims were Monday and two more were scheduled for Tuesday. Local officials are planning a combined memorial service at Shadyside High School's football stadium Wednesday night.

Donations began pouring in almost immediately after the disaster and WTRF-TV in Wheeling, W.Va., conducted a telethon Monday night, obtaining pledges for about $75,000. Radio station WOMP in Bellaire reported raising $10,000 in cash donations, along with food and clothing.

It was the worst weather disaster to hit Ohio since 1969 when 40 people died as severe thunderstorms swept off Lake Erie while residents enjoyed Fourth of July festivities.

#90170u1810 06/19/1990 ~United Press International

WASHINGTON (UPI) - The U.S. ambassador to Romania will boycott the inauguration of President-elect Ion Iliescu Wednesday to protest the violent suppression of peaceful demonstrations by pro-government forces, the State Department said Tuesday.

The State Department, which has already put off consideration of economic assistance and most-favored-nation tariff treatment for Romania, also issued a travel advisory, warning U.S. citizens who do not have urgent business in Romania to defer their travel until further notice because of the continuing unrest and potential for violence.

U.S. estimates say that six people were killed in the suppression of the demonstraters and another 500 injured, with several hundred people being arrested. Other estimates put the toll of dead and injured much higher.

State Department spokesman Richard Boucher said that Ambassador Alan Green met with leaders of the National Peasant Party and the National Liberal party. The headquarters of both opposition parties were ransacked by pro-government forces, called in by Iliescu to counter political demonstrations in Bucharest.

Iliescu later publicly thanked the houndreds of miners who were in the vanguard of the attacks on demonstraters.

Boucher said, ''Ambassador Green will also be meeting with senior (Romanian) government officials to express our concerns about the situation there, and he will not attend Wednesday's inauguration of President Iliescu.''

Although U.S. election observers noted some irregularities in the parliamentary elections, Boucher made it clear that the reason for the U.S. snub was the wholesale violation of human rights since the elections.

He said other western countries have also said they will boycott the inuguration. The Secretary General of NATO also expressed his concern.

''The member governments of the North Atlantic Alliance are deeply concerned about last week's outbreaks of violence in Romania which threaten to overwhelm progress toward democracy,'' NATO Secretary-General Manfred Woerner said in a statement. ''The allies equally deplore the acts of violence by forces in opposition to the government.''

Boucher also expressed U.S. concern over a new law taken up by the Romanian parliament, which would make illegal some kinds of protest demonstrations.

Boucher said, ''The law is clearly not intended to protect human rights.''

#90170u1813 06/19/1990 ~United Press International

(JUNE 19) UPI - The prosecution says Washington, D-C, Mayor Marion Barry used cocaine for years and lied about that drug use to a grand jury and to voters. Assistant U-S Attorney Richard Roberts says Barry smoked cocaine-laced cigarettes the mayor nicknamed ''M-B specials.'' The defense says Barry was lured and entrapped.

Police in Jacksonville, Florida, are trying to fit together the puzzling and violent history of a man who entered a loan office yesterday and fatally shot nine people, including himself. Five other people he injured are hospitalized. Records show that James Pough was convicted of aggravated assault in 1971.

The parliament of South Africa today approved a bill that does away with all laws that demand separate facilities for black and whites. Among the facilities now legally separated by race are movie theaters, trains, buses toilets, libraries and swimming pools. The law takes effect on October 15th.

A familar masthead returns to the newstands of Romania today. The opposition paper Romania Libera is being sold for the first time since

violent anti-government protests last week. However, today's paper carries a disclaimer from NON-editorial workers, who say the opposition writers ''distort reality.''

Soviet President Gorbachev received only lukewarm applause today following a speech to hard-line conservatives in Moscow. Gorbachev hailed perestroika. In contrast, the audience interrupted the next speaker five times as he called for restoring the clout of the Communist Party.

#90170u1817 06/19/1990 ~United Press International

JERUSALEM (JUNE 19) UPI - Masked Palestinian gunmen Tuesday shot and killed a Gaza Strip Arab suspected of dealing drugs, Palestinian sources said.

Mahmoud Abu Harb, 35, of Rafah City, was shot in the head while riding in a taxi from Rafah City to the Gaza Strip city of Khan Younis, the sources said. A Gaza Strip police spokesman confirmed the killing and said the motive was criminal, not political.

Since the start of the 30-month-old uprising against Israeli rule in the occupied territories, more than 200 Palestinians suspected of collaborating with Israeli authorities and engaging in activities labeled immoral, such as drug dealing and prostitution, have been killed by other Arabs.

Israel's new defense minister, Moshe Arens, toured parts of the Gaza Strip under heavy guard Tuesday. Arens arrived by helicopter and visited Gaza's central administration offices, a prison, military base and a hospital.

Despite scattered clashes, most of the West Bank and Gaza Strip were relatively calm. The army declared the West Bank village of Teqo'a, near Bethlehem, a closed military area after residents clashed with soldiers, Palestinian sources said. The disturbances began after two illegally built houses were demolished.

Palestinian sources attributed the relative tranquility in the territories to final exams for high school students in progress until June 26 and the popularity of World Cup soccer matches, broadcast daily on Israeli and Jordanian television.

In the Israeli town of Acre, a Magistrate's Court ordered Arab Israeli poet Shafik Habib confined to house arrest until legal proceedings against him are completed.

Investigators said Habib's recent book included poems in which he encourages people to use stones and firebombs against the Israeli army.

The court said he must submit his poems to the military censor before they can be published.

Habib, of Dir Hannah village, has denied the charges and said the censor never objected to his poems when they were published previously in newspapers.

#90170u1824 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - Weakness in natural gas prices following slack demand during this year's warm winter is driving down earnings of oil and gas companies, especially the smaller independents, an analyst said Tuesday.

''Natural gas prices have really been very weak and have hurt companies particularly on the domestic side,'' said Robert Weiss, an oil and gas analyst with Standard & Poor's Corp.

''Earnings and cash flow in the industry have just not materialized to our expectations for many companies,'' he said.

''Until we see a turnaround in natural gas prices, which could be several years away, there will continue to be pressure on earnings, especially of the independent oil and gas companies concentrated on natural gas,'' Weiss said.

He said major U.S. international oil companies with a heavy emphasis on natural gas, such as Amoco, Mobil and Chevron, have more flexibility and will not be hit to the extent of smaller independent companies.

Last month, S&P's downgraded the senior debt of Burlington Resources Inc. of Seattle, which is heavily concentrated in natural gas, because ''earned returns'' were weak,'' Weiss said.

In February, the rating agency also downrated the subordinated debt of Mesa Limited Partnership of Amarillo, Texas, because Mesa ''was paying out a high dividend in anticipation of natural gas prices improving,'' the analyst said.

In addition to weak natural gas prices, oil company earnings have been hit by a falloff in profits from their petrochemical units.

S&P's Monday lowered its rating of Occidental Petroleum Corp.'s senior debt and preferred stock because of Occidental's substandard earnings ''for the foreseeable future.''

Any earnings improvements from rising world oil prices ''are likely to be

offset by profit shortfalls stemming from the present down cycle in commodity chemicals,'' S&P's said.

Thomas Samuelson, an analyst with Duff & Phelps Inc., Chicago, projected Monday a 9 percent decline in 1990 domestic oil industry earnings to $4.9 billion ''due mainly to the year-over-year falloff in chemical earnings.''

Samuelson, however, forecast an 11 percent increase in 1991 earnings for the domestic companies to $5.4 billion because of better chemical earnings ''plus the positive impact of higher crude oil and natural gas realizations.''

But because of the unusually warm winter, the analyst said Duff & Phelps had lowered its overall 1990 average natural gas price projection from $1.90 a 1,000 cubic feet to $1.75 per mcf.

Larry Crowley, a natural gas analyst with Rauscher, Pierce Refsner, Houston, said natural-gas cash prices are currently running at $1.44 per mcf, up slightly from last month's $1.40, but down considerably from January's $2.41 per mcf.

The normal seasonal price swing was accentuated by lack of demand during the warm weather this winter.

''We literally had no winter,'' the analyst said. ''You don't build a supply-demand balance on this kind of weather.''

He said he had been projecting an overall natural price for 1990 of $1.75 per mcf. The average to date has been running at $1.71 per mcf, the analyst said.

Crowley saw ''a better pricing scenario as early as 1991'' with the return of more typical seasonal changes in weather.

''We think we'll see a little strength this summer and more as we move into the fall and winter heating seasons,'' Crowley said.

#90170u1835 06/19/1990 ~United Press International

OAXTEPEC, MEXICO (JUNE 19) UPI - Salvadoran rebel representives sat down Tuesday with government negotiators to tackle one of the toughest bargaining points in ending 10 years of civil war - reform of the armed forces.

Reductions in the army and security forces are among rebel demands for a cease-fire sought by the government, although the government has said it cannot consider reducing the military until the rebels of the Farabundo

Marti National Liberation Front, known as the FMLN, lay down their arms.

Salvadoran President Alfredo Cristiani expressed optimism Monday there would be progress at the U.N.-mediated talks, which began Tuesday morning in Oaxtepec, 50 miles south of Mexico City in the state of Morelos.

''I consider this to be a very key meeting for the future development of the (peace) process,'' Cristiani said at a news conference in El Salvador. ''In effect, it is the first meeting in which we have been able to advance to such a degree that the topics to be discussed are of a substantive nature.''

A tentative timetable, set last month in Caracas, Venezuela, calls for a cease-fire by September, depending on the amount of progress made at the negotiating table.

The agenda for Tuesday's meeting, drawn up in Caracas, calls for discussion on respect for human rights, improvement of the justice system, modification of electoral laws, constitutional reforms, social and economic problems and U.N. verification of agreements.

The question of the armed forces was not on the agenda, but the Mexico City-based Salvadoran news agency Salpress said ''two things are clear ... the delegations are in Mexico ready for the event and the theme to be discussed will be the armed forces.''

Salvador Samayoa, an FMLN political leader and member of the rebel negotiating team, said in an interview Monday with Salpress that serious discussion about the military and security forces was essential for ''solid progress in the search for peace.''

''This means discussing the future of security forces and the paramilitary civil defense, as well as the cleaning up of the army and an end to impunity of high-ranking officials involved in human rights abuses,'' Samayoa said.

Cristiani's government has come under increasing pressure from the U.S. Congress to advance the peace process and to prosecute members of the military involved in the Nov. 16 killings of six Jesuit priests.

Congress has also threatened to cut by half the $85 million El Salvador is expected to receive this year in U.S. military aid.

The rebels have said they will launch another major offensive if the military blocks efforts to reach a political solution.

''If (the talks) do not advance because of the military's stubbornness in holding on to its system of impunity, the offensive will gain tremendous

legitimacy,'' a rebel communique said.

A week after talks broke down last November, the rebels launched their biggest offensive of the war, attacking the capital San Salvador and other major cities.

Observers say current conditions are better than ever for ending the civil war, citing pressure on the government and political isolation of the rebels with the electoral defeat of Nicaragua's Sandinista government and changes in Eastern Europe.

#90170u1842 06/19/1990 ~United Press International

LONDON (JUNE 19) UPI - The U.S. ambassador to Britain has written an acerbic letter to New York Mayor David Dinkins because the city named a street after a convicted killer of the outlawed Irish Republican Army, which he described as a ''gang of murderers.''

Henry Catto's open letter to Dinkins said Americans in particular should revile terrorism and urged the city to reconsider.

The letter dated Monday was released by the embassy Tuesday.

''I was shocked to read in the London press that New York City has named a street after a convicted IRA killer, Joseph Doherty. Terrorism is contemptible, regardless of any claimed justification, but it is especially so for Americans. The IRA is a terrorist organization whose latest victims have included women, infants and tourists,'' Catto wrote.

''I cannot urge strongly enough that you and the people of New York City reconsider this action. Mr. Doherty is no hero. The IRA is a gang of murderers which deserves New York City's condemnation, not its commemoration.''

Doherty, 35, has been in jail in New York for seven years fighting extradition charges that would lead to him serving a life sentence for murdering Special Air Service Capt. Herbert Westmacott in an attack on an army patrol in Belfast, Northern Ireland in 1980.

Doherty escaped during his trial in Britain and was convicted in absentia.

Federal appeals courts rebuffed attempts by President Bush and former President Reagan to extradite him, ruling he is a political prisoner.

While avoiding his return to Northern Ireland to serve his sentence, Doherty has won support among U.S. congressmen and senators and has enhanced his reputation as a folk hero, known as ''the man who has no

country, only a cell.''

His greatest coup is changing his address at the Metropolitan Correction Center to 150 Joseph Doherty Corner.

Catto has in the past come down strongly on the side of the British government in opposing American support for the IRA.

''It looks to me as if these people have their arms from the loonies of Libya and their inspiration from Don Corleone and the Mafia. It's not a happy combination,'' he said last June after a fact-finding mission to Northern Ireland.

Americans who support the IRA are ''misguided and ignorant,'' he said.

Doherty, however, has won support from leading Americans.

Jesse Jackson and New York Cardinal John O'Connor have spoken out on his behalf, and actor Mickey Rourke donated $1 million to his campaign.

The FBI arrested Doherty in 1983 while he was serving drinks at a New York bar. He claimed to be a ''guerrilla warrior'' and asked for political asylum.

The IRA has used violence to try to force British troops from Northern Ireland so the mostly Protestant province can be united with the mostly Catholic Irish Republic.

#90170u1852 06/19/1990 ~United Press International

WARSAW, POLAND (JUNE 19) UPI - Poland said Tuesday it has asked Soviet authorities for access to two mass grave sites of War II officers - sites the Polish media said Moscow had unofficially confirmed were the last remaining burial grounds for thousands of Polish officers killed during the war.

Soviet authorities unofficially have confirmed the sites probably hold the remains of more than 10,000 Polish army officers killed by Soviet secret police during the war, Polish press reported Tuesday. The Soviets said the sites most likely are the last remaining burial grounds of Polish officers reports said.

The two sites are believed to hold the remains of officers from two prisoner-of-war camps - Ostaszkow and Starobielsk - who were slain by the NKVD, the forerunner of the KGB, in 1940.

The Foreign Ministry said Tuesday it asked Moscow to let the Polish Red

Cross assist in the exhumation and identification of victims found in the graves near Kalinin, 100 miles northeast of Moscow, and Kharkov, about 400 miles south of the capital.

Some 4,250 bodies of officers from a third camp, Kozielsk, were discovered in 1943 in the Katyn forest near Smolensk by Germans who had invaded the Soviet Union. But until now, the location of the bodies of other officers were unknown.

The Soviet KGB turned over to the Polish consul in Kiev on Monday documents and evidence, including a uniform button with the Polish eagle, from a mass grave in a forest near Kharkov. The evidence confirms some 4,000 Polish officers from the Starobielsk POW camp were buried there, apparently after execution at a nearby prison.

The Polish news agency PAP, citing unconfirmed reports from a Polish parliamentary delegation visiting the Soviet Union, said, ''Soviet authorities have unofficially disclosed that Polish prisoners from Ostaszkov were buried in a forest near Miednoye, which lies close to the highway connecting Moscow and Leningrad.''

The Miednoye site also contains the bodies of thousands of Soviet victims.

Foreign Ministry spokesman Wladyslaw Klaczynski said documents turned over to Polish officials in Kiev included some describing the attitudes of officers after they learned they were leaving the Starobielsk camp.

''The prisoners thought they would be sent to Siberia, not that they would be sent to death,'' Klaczynski said.

''In the case of Kharkov, we demand the participation of our experts from the Red Cross, and in the case of Miednoye - if it is confirmed - we would like this as well,'' he said.

The officers, the cream of the Polish intelligentsia, were captured in the weeks following the Soviet invasion of Poland 17 days after the German attack on Sept. 1, 1939, which unleashed World War II.

The families of the officers received letters until 1940. Then all correspondence suddenly ceased.

Three years later, when the Germans discovered the mass graves in the Katyn forest, the Soviet Union denied responsibility and said the Germans killed the Polish officers.

It was not until earlier this year that Moscow finally admitted responsibility for the slayings.

#90170u1876 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Defense Secretary Dick Cheney, defending the ''overall quality'' of the U.S. invasion of Panama, said Tuesday the ''friendly fire'' deaths and wounds suffered by American soldiers do not detract from the operation.

His comments came as the Pentagon revised downward, from 19 to 16, the number of American soldiers wounded in Panama by so-called friendly fire from other U.S. troops. A total of 310 Americans were wounded in combat, the Pentagon said.

On Monday, the Pentagon said two and possibly three of the 23 American soliders killed in Panama died as a result of ''friendly fire.''

''Nobody's ever satisfied with a situation in which you take casualties as a result of friendly fire,'' Cheney said at a news conference Tuesday. ''But the fact of the matter is, in modern combat that often happens.

''When you've got thousands of people involved in complex military operations at night with all kinds of dangerous and highly lethal weapons, that unfortunately is one of the byproducts. ... You take casualties as a result of friendly fire.''

''I wish it had not happened,'' Cheney said. ''On the other hand, I don't think it detracts from the overall quality of the operation. And, I'll just leave it at that.''

The invasion last December toppled Gen. Manuel Noriega and a U.S.-backed government took power. Noriega is now in Florida face drug charges.

In addition to the 16 wounded by U.S. troops, another 21 wounded American soldiers might have been hit by either U.S. fire or enemy fire in the area around the Commandancia, headquarters of Noriega's Panama Defense Forces, the Pentagon said.

Pentagon spokesman Pete Williams disclosed for the first time Tuesday that videotape recorded from an AC-130 gunship showed the craft had fired in

the direction of these American troops, though it was unclear whether it hit the U.S. troops.

Asked if the gunship mistook the Americans around the Commandancia for PDF forces, Williams said, ''I believe that's what happened.''

''Of the 21,'' Williams said, ''it's impossible to say which were attributed to AC-130 fire and which were attributed to (PDF) mortar fire. I don't think we'll ever know the answer on the 21.''

Williams also said President Bush, Cheney and Army Gen. Colin Powell, chairman of the Joint Chiefs of Staff, had known about the ''friendly fire'' deaths and injuries in Panama.

The information was not made public, however, until Newsweek magazineran a story Sunday quoting military sources as saying up to nine of the 23 Americans killed were hit by U.S. fire.

Williams, when asked why the public had not been told of this part of the highly praised Panama operation, replied, ''I'm not sure I totally know the answer to that. Obviously we need to do better.''

#90170u1877 06/19/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JUNE 19) UPI - President Vaclav Havel is expected to ask Prime Minister Marian Calfa to form a new government Wednesday, 11 days after the country's first free parliamentary elections in 44 years.

The new government would include a deputy premiership for the defiant Slovak-based Christian Democratic Movement, and would form a broad anti-communist coalition that would dominate parliament.

A spokesperson for Civic Forum, the pro-democracy coalition that finished first in the elections, told United Press International that Civic Forum's Slovak sister-organization, Public Against Violence, had offered the CDM a deputy prime minister post.

''We would like them to really participate in the federal government as representatives of a very strong Slovak party,'' said Civic Forum spokeswoman Jana Ryslinkova, referring to the Christian Democrats.

Havel was meeting Tuesday evening in Prague Castle with representatives of Civic Forum and PAV to determine the final makeup of the government.

''If they agree today on the principal names, there is no reason not to have a new government by tomorrow afternoon,'' Ryslinkova told UPI.

A spokesman at the CDM headquarters in Bratislava said the party's leadership was expected to confer late into the night, but had not decided whether to accept the offer.

In the June 8-9 parliamentary elections, Forum and PAV together took 170 of the 300 seats in the two houses of the Federal Assembly. But they seek broader support to counter the second-place Communist Party, which won 47 seats, and to pass essential economic and constitutional reforms, which require a three-fifths majority vote for approval.

Throughout last week, the CDM - and its ally in the Czech lands, the People's Party - had refused to participate in the government, saying it did not want to be a weak coalition partner. The Christian Democrats came in third nationwide, winning only 20 seats in the federal parliament. CDM chairman and outgoing Deputy Prime Minister Jan Carnogursky would not serve in the new government, according to Ryslinkova.

Sources close to Christian Democrat leaders indicate the CDM's change of heart came at a meeting Sunday in which the membership opposed the position of the party's leaders.

(JUNE 19) UPI - Arab nations are in conflict over interpreting Washington's Middle East policy. Egypt's news agency today urged its Arab allies to take advantage of a perceived rift in U-S-Israel relations. But Palestinian leaders reject what they describe as U-S attempts to blackmail the Palestine Liberation Organization.

Government officials in Liberia say rebels clashed with government troops at Careysburg today, just 25 miles northeast of the country's capital of Monrovia. The renewed fighting follows a breakdown in peace talks to end Liberia's six-month-old civil war. The talks are to resume later this month.

#90170u1916 06/19/1990 ~United Press International

(JUNE 19) UPI - The Coast Guard says there is little chance that oil will leak from a barge whose four tanks ruptured yesterday when it ran aground three miles west of Buzzards Bay, Massachusetts. Rescuers refloated the vessel and towed it to deeper, more sheltered waters, where crews are pumping out the light diesel oil.

Police in Terrell, Texas, say a former mental patient walked into a police station today carrying a gasoline-soaked bag and a lighter and set himself on fire. Police say a small boy was among the stunned bystanders. An

officer doused the fire, and the man is being treated for severe burns.

Houston police say a wife who shot and wounded her husband yesterday convinced her nine-year-old daughter to accept the blame. Officers say they initially believed the girl when she said she shot her father while playing with a gun. But the girl's mother later admitted to pulling the trigger.

#90170u1926 06/19/1990 ~United Press International

TERRELL, TX (JUNE 19) UPI - An escaped mental patient set himself on fire in the lobby of the police station Tuesday as hospital staff members waited elsewhere in the building to assist in his capture.

The unidentified man, a 45-year-old walkaway from the nearby Terrell State Hospital, entered the police station lobby about 8 a.m., carrying a gasoline-filled beer bottle in a paper bag in one hand and a cigarette lighter in the other, Police Chief David Walker said.

Sgt. Don Echols was slightly burned as he tried to stop the man.

''He walked over and sloshed gasoline all over me,'' Echols said. ''I tried to stall for time so I could get myself evaporated and wipe all the gasoline as best I could off my bare skin.''

Officers were getting other people, including a small boy and an older woman, out of the lobby when the man sparked the cigarette lighter.

''As they started to move out the door he was distracted for a moment. I tried to knock the sack out of his hand and at that time we literally both went up in flames,'' Echols said.

The officer rushed the burning man outside and rolled in the grass to put out the flames on both of them.

''I've seen some high stress situations like this, but have never seen an officer take care of a situation better than this,'' said Walker.

The mental patient was taken to Colonial Hospital in Terrell and then transferred to Parkland Memorial Hospital in Dallas for treatment of second and third degree burns over 42 percent of his body, hospital officials said.

Echols singed the hair on his arms, but was otherwise unhurt.

Don Gilbert, administrator of the Terrell State Hospital, said the patient escaped from a locked unit about 6:20 a.m. by climbing over a 6-foot-high

chainlink fence surrounding a patio.

Hospital attendants chased the man across the grounds, but then called police at 6:35 a.m. when the man went out a gate.

Gilbert said two members of his staff were at the police station to help bring the man back.

''After waiting some time, they were apprised that he had just set himself on fire in another part of the building,'' Gilbert said.

Escapes are not unusual at the state hospital which does not have a maximum security unit, Gilbert said.

''It's not a secure facility. While it's not an everyday occurrance, it's not unusual. We have open gates. People can earn privileges to go out on the grounds.''

#90170u1935 06/19/1990 ~United Press International

PHILADELPHIA (JUNE 19) UPI - Bell Atlantic Corp., in its first venture into the health care field, announced the purchase Tuesday of a California information management firm, which is to become a new health care systems subsidiary.

Bell Atlantic will purchase the stock of Simborg Systems Corp., a leading provider of hospital information management systems, and rename the firm Bell Atlantic Healthcare Systems. Terms of the acquisition were not disclosed.

The new subsidiary will market STAT LAN, a hospital network systems integration product developed by Simborg, and Bell Atlantic's complementary network and business systems products.

The hardware and software package allows hospitals to connect the various computer systems already in operation in their departments. It is used in 25 major hospitals nationwide, including the Hospital of the University of Pennsylvania in Philadelphia and the Medical Center of South Carolina, Charleston, S.C.

''Healthcare is a major thrust for Bell Atlantic,'' said Jeffrey S. McDermott, president of Bell Atlantic Software and Systems Solutions. He said the acquistion of Simborg ''sets the right strategic course for today's health systems.''

Simborg founder and president Dr. Donald W. Simborg will become president of Bell Atlantic Healthcare Systems. The company has 40 employees at

offices in Greenbrae, Calif. and Atlanta. Those offices will remain open.

''The most important element of this acquisition is what Bell Atlantic Healthcare Systems can now offer to hospitals - the best in open architecture network design, software solutions and implementation of the total solution,'' Simborg said.

''Hospital chief executive officers and CIOs have confirmed our assessment that the 1990s will require this new strategic direction for information systems,'' he said.

Bell Atlantic Health Care Systems will maintain Simborg's joint marketing agreements with a number of distributors, including Andersen Consulting and Ameritech. The latter, like Bell Atlantic, is one of the ''baby Bell'' regional telephone companies created by the 1984 breakup of their former parent, American Telephone and Telegraph Co.

Bell Atlantic is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone Co. and the Chesapeake and Potomac Telephone companies of Maryland, Virginia, West Virginia and Washington, D.C.

#90170u1947 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - A shouting match erupted Tuesday between the judge and a defense attorney at the Central Park jogger trial when the lawyer said media covered the case soley because the rape victim is white and the defendants black and Hispanic.

By early afternoon, four jurors were selected for the 12-person jury that will deliberate the fate of the first three youths to go on trial for rape and attempted murder. All four jurors are male, one Hispanic, one white and two black.

The defendants are accused of beating and gang raping the 29-year-old investment banker and leaving her for dead in a moonlit Central Park on April 19, 1989.

During jury selection at state Supreme Court in Manhattan, defense attorney Robert Burns touched a raw nerve when he questioned whether racial prejudice against minorities brought intense media coverage of the case.

''There was a racially motivated case in Bensonhurst and in Howard Beach. None received the kind of publicity as this case did,'' said Burns, who is defending Yusef Salaam, 16.

''Objection!'' said Assistant District Attorney Elizabeth Lederer.

''Sustained. Don't make statements, just ask questions,'' Justice Thomas Galligan.

''Your honor, this is my examination here!'' snapped Burns.

''I want it done - '' the judge began.

''Your honor, you had no objection when Miss Lederer made statements about the law,'' Burns complained.

''I sustained the objection, if you recall. I'm the judge here. Do not make speeches. Just ask questions,'' Galligan admonished him.

''I'm getting ready to ask the questions,'' Burns remarked, turning his back on the judge and facing the jury pool.

Burns then asked prospective jurors why they thought the case drew such intense media attention.

''Do you suppose it had anything to do with the fact that the defendants are all minority members, black or Hispanic, from a class that has no influence or power?''

''I'm not prejudiced. I don't know why,'' answered prospective juror Juanita Rivera.

''Do you think it has anything to do with the fact that she is white from the upper class? Do you think it would be the same if the jogger were black?'' he pressed.

''I think it would be the same,'' Rivera answered.

#90170u1952 06/19/1990 ~United Press International

BUCHAREST, ROMANIA (JUNE 19) UPI - Despite official disavowal of last week's vigilante attacks by miners, evidence suggests the government tacitly approved of the violence against opposition parties and offered extensive logistical support.

Several witnesses also have alleged the attacks were directed by plainclothes police using tactics similar to those of the outlawed Securitate, former dictator Nicolae Ceausescu's dreaded secret police.

The witness accounts and other evidence appears to support opposition claims of a sharp turn toward authoritarianism in Romania. The

authoritarian trend follows a period, after Ceausescu's ouster, in which democracy seemed to gain a foothold.

The miners' ability to rampage unhindered through the streets of Bucharest attacking passersby indiscriminately and ransacking the headquarters of opposition political groups, prompted the United States and some of its allies to withhold consideration of financial and other aid to the new Romanian government, which was elected May 20.

''We are in full terror,'' said Sorin Botez, spokesman for the opposition National Liberal Party, after an estimated 10,000 coal miners swarmed into Bucharest early Thursday and began beating opposition supporters and ransacking their homes and offices.

The miners traveled to the capital by train after President-elect Ion Iliescu called on workers to assist police in crushing anti-government violence.

Interim Prime Minister Petre Roman repeatedly has denied his government was responsible for the miners' 36-hour terror spree that essentially shut down the opposition in Bucharest.

Roman told reporters that Iliescu did not specifically invite the miners, but instead appealed generally to workers to defend his government. Roman said the ruling National Salvation Front did not condone the destruction of opposition party offices or the assaults on unarmed people.

''The miners came on their own,'' Roman told the news conference Saturday. ''They were not asked by the government. We only guided them.''

But witness accounts and other evidence paint a different picture:

-The government supplied food and water to the miners during their 36-hour stay, housed them overnight in two large sport halls and provided transportation for them. The government has admitted this support.

-Iliescu personally thanked the miners for their help at a rally Friday before they returned home.

-Although they live about 250 miles from Bucharest, the miners quickly found and ransacked the houses of several opposition leaders, including that of National Peasant Party chief Ion Ratiu, who lives in a residential section about a mile from the center of Bucharest.

-The miners were able to single out the homes of Gypsy families for apparently racially motivated attacks in three ethnically mixed neighborhoods.

''They came straight here and stopped their buses right in front of our courtyard,'' said Radu Constantin, describing an attack on his house Friday. Constantin said miners beat him.

-The miners appeared to be led by plainclothes police.

Constantin said a man who barked orders in the miners' attack on his house wore clean workclothes and had ''clean fingernails,'' while the other assailants were covered with coal dust.

-After ransacking the headquarters of the opposition National Liberal Party and Peasant Party Thursday, the miners continued to occupy the buildings for the next 24 hours, systematically destroying virtually every piece of equipment and furniture.

-Police were deployed at the two political party offices Friday but made no attempt to remove the miners or halt the destruction.

-Food was delivered to the miners while they were inside the party buildings.

On Saturday, large crates of uneaten bread, pork bones and and soda bottles lay amid the other debris at the office of the National Peasant Party.

-The miners located and opened a large safe hidden inside a plaster-covered wall in the Peasant Party office.

Party officials said they did not know the safe existed. Roman quoted miners Saturday as saying they had found guns, counterfeiting equipment and other contraband in opposition party buildings.

WASHINGTON (JUNE 19) UPI - Supporters of a constitutional amendment to require the federal budget to be balanced each year succeeded Tuesday in prying the measure out of committee for a vote by the full House.

The proposed amendment had been stalled in the House Judiciary Committee, but a petition to force a floor vote was signed by 218 representatives, a majority of the House. The final two signatures were obtained Tuesday.

A House vote was expected the week of July 23. It would be the first vote on a balanced budget amendment since 1982.

Supporters of the amendment complained that Democrats, who have a majority on the Judiciary Committee, had kept the measure bottled up.

The proposed amendment would require that federal spending not exceed estimated revenues except during war or if three-fifths of both the House and Senate vote to approve a specific budget deficit.

If the amendment is approved by two-thirds majorities in both the House and Senate, it be sent to the states for ratification. Three-fourths of the states - 38 - would have to approve the change to make it part of the Constitution.

James Davidson, chairman of the National Taxpayers Union, called the successful discharge petition drive ''a critical victory'' in the effort to enact the amendment. ''I'm optimistic that the Balanced Budget Amendment has a good chance of passing this session in both houses of Congress,'' he said.

Rep. Larry Craig, R-Idaho, one of the amendment's 250 co-sponsors, said, ''The time has come for a permanent structural solution to this nation's spending problem.''

Rep. Chuck Douglas, R-N.H., said the amendment would be ''a gigantic step forward in trying to restore some fiscal sanity to the out-of-control habits of Congress.''

#90170u1973 06/19/1990 ~United Press International

BROWNSVILLE, TN (JUNE 19) UPI - A freight train slammed into an alcohol tanker-truck at a railroad crossing Tuesday, igniting a giant fireball that roared into the locomotive and killed three crew members, authorities said.

Eleven firefighters were injured extinguishing the flash fire, but the truck driver and a conductor aboard the CSX train survived with only slight injuries, authorities said.

''I crossed the track about 10 minutes before the accident,'' Haywood County Executive Franklin Smith said. ''The train hit the alcohol tanker just about dead-center. It exploded on impact and there was just a tremendous fireball.''

Two engineers and a brakeman, whose names were withheld, were in the locomotive consumed by the fireball and ''were killed by the intense heat '' police Lt. John Booker said.

The conductor, Roy Dennis Graham of Paris, Tenn., survived because he was riding in the train's third engine, Booker said.

The truck driver, John S. Gilboy, of Englishtown, N.J., walked away from the wreckage and was charged with failure to yield, a misdemeanor that carries a $60 fine, he said.

''I don't know if he tried to outrun the train or just didn't see it. Witnesses say it looks like he may have tapped his brake just before crossing the track but he was unable to stop,'' Booker said.

Gilboy was tested for drugs and alcohol and the results will be turned over to the district attorney's office, but he did not appear to be intoxicated, Booker said. The bodies of the train crew members also were tested.

The 11 firefighters were taken to hospitals for treatment of smoke and fume inhalation and heat-related injuries.

The truck was delivering the alcohol to the Haywood Co., a rubber and plastics manufacturer, when the train slammed into it at 8:15 a.m. and shoved the alcohol tank 300 yards down the track in an industrial section of Brownsville, authorities said.

Booker said both the train and the truck were traveling within the speed limit at about 30 mph. It took 30 minutes to put out the fire.

''The truck was within 100 yards of its destination,'' Smith said. ''The crossing does not have arms. There are flashing red lights and bells. But a man in a tractor-trailer truck with the air conditioning running and the windows rolled up might not have seen or heard anything.''

#90170u1979 06/19/1990 ~United Press International

BLOOMINGTON, MN (JUNE 19) UPI - Bob Gainey, a defensive specialist who helped the Montreal Canadiens win five Stanley Cup championships, Tuesday was named coach of the Minnesota North Stars by general manager Bob Clarke.

Gainey, 36, spent last season as a playing coach for Epinal, a second division French team.

''It was an easy decision for me,'' said Clarke. ''Bob Gainey is one of the most experienced men at winning I know. We were looking for someone who could provide that quality at the NHL level - someone who would represent our team with class and dignity.''

''I have some butterflies in my stomach about this, but I am looking forward to the challenge,'' Gainey said. ''I have spent a lot of time on the bench but not that much behind the bench, but I feel ready to take on this responsibility.''

Gainey spent 16 seasons with the Canadiens, including eight years as captain. Four times he was the winner of the Frank Selke trophy as the NHL's best defensive forward.

''That was the role the Canadiens needed him to play,'' said Clarke. ''He could dominate a game without scoring. He was the best there was at the defensive side of the game. I don't think that anyone else is even a close second.''

Clarke said that Gainey's limited coaching experience was not a factor. ''I took it into consideration but Brian Sutter did a good job stepping in at St. Louis and Doug Reisborough hasn't had much experience but has the job at Calgary. Bob has so many other qualities that make up for that (lack of coaching experience). He knows what is necessary to win. He knows the sacrifices that need to be made.''

Gainey played his first NHL game on Oct. 10, 1973 at Met Center and scored the first of his 239 career NHL goals against Minnesota goalie Cesare Maniago on Oct. 27, 1973. He was Montreal's first round selection (8

overall) in the 1973 draft.

In his 16 years at Montreal, Gainey played in 1,160 games and accumulated 501 points. In 182 playoff games, he scored 25 goals and 48 assists.

''I'm looking forward to working in Minnesota's hockey community where the people know and understand the game,'' Gainey said.

Gainey replaces Pierre Page who resigned early in May to take a job as general manager at Quebec.

Gainey will retain former teammate Doug Jarvis as an assistant coach. The status of Craig Hartsburg, an assistant coach for the North Stars last year, is uncertain.

#90170u2004 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - Actors may appear to be warm, fuzzy, vulnerable nice guys, but they're not.

And that's the ''Price of Fame,'' according to Charles Grodin's appealing new comedy which he wrote and stars in, now onstage at the Roundabout Theater.

What this talented film and stage actor/playwright/producer/director seems to be telling us is: Scratch an actor and he will bleed pure ego.

Take Roger Carstairs, a household name, one of the 10 most popular movie stars in the country. His last four pictures have flopped and he is now being offered barely decent roles.

For the film he is currently making, a sci-fi opus with outer space creatures, he was eighth choice as star. His just-released last film is dying at the box office.

When we meet Roger in his sleek, paneled motor home on the movie lot, he is on his mobile phone desperately trying to get some encouraging box office figures. He is railing against the ad agency who put a horse in the movie ad when a reporter for Vanity Fair named Karen comes to interview him.

After the reporter assures him pique is ''funny, human, vulnerable and real,'' she secretly tapes her impression that ''Carstairs is a movie star on the ropes and he acts like it.''

We know that Karen is assigned to do a hatchet job on Roger, but he only discovers her real intent accidentally. We see him visibly stiffen his guard, now suspicious and defensive about everything she asks.

As a series of movie types bang in and out of his motor home dressing room between takes, Roger begins to reveal himself under Karen's probing questions. He then turns the questions on her and the interview begins to evolve into a flirtation and ultimately a seduction.

As playwright and star, Grodin perfectly captures the movie set ambiance - the sense of urgency alternating with long waits, the agonizing over minute details, such as whether the outer space creatures make the right sound, and the pandering to the star. Then, too, there is the sense that in the end, the only criteria for the value of the work is the box office.

Grodin also captures the movie star's obsessive concern with his image, which is, after all, what he has to sell. In a diminishing market, he will do whatever he can to protect it.

Grodin, a smooth actor with enormously appealing self-awareness, is perfect in the role he has created, capturing both the charm and the agonizing desperation of a man on his way down.

He is well counter-pointed by Lizbeth Mackay as Karen, a young professional fulfilling an assignment that quickly becomes distasteful as she increasingly is drawn to her subject. She skillfully and touchingly reveals Karen's need for a real and lasting connection.

Jeannie Berlin, who co-starred with Grodin in ''The Heartbeat Kid,'' is credible and likeable as Evelyn, Roger's nakedly insecure co-star in the movie. Jace alexander is very effective as Roger's neglected teenage son who is working on the movie because he wants to be near his father.

Joseph R. Sicari is marvelous as the veteran makeup man who is an expert at reassuring small talk and pumping up actor egos. Also well-cast and effective are Michael Ingram as the special effects ventriloquist, Sam Groom as Karen's editor and suitor, and W. J. Paterson as a movie set lackey.

They are all expertly directed by Gloria Muzio, who directed the off-Broadway hit, ''Other People's Money,'' and who keeps the pace moving and the surprises coming.

''Price of Fame'' is a winningly witty insight into what it take to pay that price.

#90170u2008 06/19/1990 ~United Press International

GALVESTON, TX (JUNE 19) UPI - An oil slick from the crippled tanker Mega Borg stalled off the upper Texas coast Tuesday, leaving officials optimistic that whatever oil eventually hits the coast will have little environmental impact.

Coast Guard Capt. Thomas Greene said Tuesday the leading edge of the oil slick was stalled about 4 miles offshore. The National Oceanic and Atmospheric Administration predicted the oil might reach land late Tuesday or Wednesday.

''For the most part, the major toxicity of the oil is gone (due to evaporation),'' said Sharon Christopherson, a NOAA scientist. ''The longer it stays out there, the less oil we expect to see come ashore.''

Any oil washing ashore probably will be in the form of small tar balls along the high-water line, said Tom McCloskey, a contractor for Louisiana-based O'Brien Oil Pollution Service.

''It will be similar to a ring around a bathtub,'' McCloskey said.

Latest projections suggested High Island on the Bolivar Peninsula, north

and east of Galveston, would see most of the tar balls.

A loggerhead turtle caught by NOAA divers late Monday was transported to Galveston Tuesday. A NOAA spokesman said there was no oil on the turtle but authorities wanted to examine it for any signs of harm from the spill.

Federal officials earlier reported they spotted at least five turtles sullied by oil. They hope to catch them, then clean and rehabilitate them at a special turtle facility at the National Marine and Fisheries Service laboratory in Galveston.

Federal officials made aerial sweeps to monitor the impact on marine life, particularly dolphins and loggerhead turtles.

Ten skimmer vessels led by the Mexicaon oil skimmer Eco Pemex had removed a total of more than 378,000 gallons of oil from the Gulf of Mexico by noon Tuesday, said Coast Guard Petty Officer Dave Oney.

The Eco Pemex, owned by the national oil firm Petroleos Mexicanos, or Pemex, was brought in at the request of the Coast Guard under a U.S.-Mexican oil spill agreement, said Mexican Navy Vice Adm. Armando Espinola. He escorted the 200-foot vessel that arrived Sunday from its base in Tampico.

A Coast Guard flyover Monday afternoon indicated the spill had shifted west toward High Island. Earlier projections had the spill making landfall farther east, near Sabine Pass and Sea Rim State Park.

''This thing changes every 12 hours with the overflights. The good thing about this latest move is that hitting High Island means the marshes are less threatened,'' Chief Warrant Officer Rick Meidt said.

The Mega Borg leaked at least 3.9 million gallons of light crude oil into the Gulf after it was rocked by explosions June 8. Two men were killed and two others are missing and presumed dead.

Most of the spilled oil was consumed in a super-hot fire that burned for days following the blasts.

The flow of oil was stemmed Sunday and the slick moved away from the ship Monday, indicating no more oil is leaking.

Bob Klawetter, a Houston attorney representing the tanker's owner, said the vessel's remaining 34-million-gallon cargo was being transferred to empty tanks for a lightering operation.

Lightering involves the transfer of the tanker's remaining cargo to smaller vessels. That operation is expected to take a week, Klawetter

said. The tanker owners have not decided whether the tanker will be salvaged or where it will be towed to shore.

Coast Guard Petty Officer Gene Maestas said the lightering would not begin until at least midday Wednesday and might not start until Thursday.

The crippled, 885-foot Norwegian tanker remains anchored 57 miles off the Texas coast. Transfer of oil among the ship's cargo tanks raised the once-swamped stern of the vessel 6 feet out of the water Monday, Petty Officer Mark Sedwick said.

The Coast Guard set up a line of booms in hopes of keeping the light crude from reaching coastal marshlands.

Volunteers converged on a 45-mile stretch of beach from High Island east to Sabine Pass Monday in a cleanup effort in advance of the spill's landfall.

#90170u2050 06/19/1990 ~United Press International

LONDON (JUNE 19) UPI - The International Press Institute condemned Tuesday the arrests of reporters and the closures of their publications in Nigeria.

In a letter to Nigerian President Ibrahim Babangida, IPI Director Peter Galliner called the continuing detentions of seven journalists ''a violation of their human rights.''

He urged their immediate release.

Those listed in the letter as detained since an April 22 coup attempt include:

-Cris Okolie, publisher and editor of Newbreed magazine, who was arrested after publishing a letter from a businessman who allegedly was involved the coup.

-Banji Ogundele, editor of the Sunday News, detained in early May.

-Tolu Olanrewaju, a correspondent with the Federal Radio Corporation of Nigeria, detained April 22.

-Okoma Igeanyi, a reporter for Radio Nigeria in Enugu, detained May 4. An unconfirmed report indicated he may have been released, the IPI said.

-Deputy Managing Editor Michael Esiofor, Emmanuel Osakwe and Theophilus Osobu of the Anambra Broadcasting Corporation, detained May 4, apparently for connecting the radio station to the national network during an announcement by those who were attempting to overthrow Babangida.

The institute represents leading journalists, editors and publishers

throughout the world.

#90170u2054 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - White House and congressional budget negotiators talked taxes for the first time Tuesday as House Democrats won a first-round victory with Republicans over spending levels for 1991.

It was the first time since the bipartisan budget talks began May 15 that tax and revenue options - probably the most politcally charged subject before the negotiators - were on the agenda.

The discussions began against a backdrop of President Bush's 1988 campaign pledge not to raise taxes and his assurance to congressional Democrats before the talks began that all subjects, including taxes, would be on the bargaining table.

In the budget he submitted in January, Bush proposed new revenues of $13.9 billion, of which about $5 billion came from money the administration says will be raised by cutting the capital gains tax. Many Democrats think much more than that is needed in new taxes or user fees but are reluctant to propose them in this election year unless they can win Bush's support.

While budget negotiators were discussing ways of raising more money to help cut the budget deficit, the House got into a partisan debate about how to spend funds in fiscal year 1991, which begins Oct. 1.

The House was expected to pass and send to the Senate a $20.9 billion bill to fund various energy and water projects in the fiscal year beginning Oct. 1.

Republicans complained that the spending ceiling in the bill was higher than anything expected to emerge from budget summit talks. The GOP argued for a lower spending ceiling in the energy and water spending bill but Democrats prevailed on two procedural votes that went largely along party lines.

The spending limits in the bill conformed to higher limits set in a House-passed budget plan, which has not yet won final congressional approval. Republicans argued that lower spending levels should be used or that action on the spending bill should be delayed until there is a budget summit agreement.

''The real danger is not that we will go over the House budget limits, but that we will spend up to those limits,'' Rep. Lynn Martin, R-Ill., said in arguing against the bill.

Rep. John Myers, R-Ind., a senior member of the Appropriations Committee, broke party ranks and urged consideration of the spending bill under the Democratic-backed procedure.

''Let's get our work done today and in a timely fashion we will cut (spending) if necessary in the future,'' Myers said.

House GOP leader Robert Michel of Illinois said the Democratic-authored budget plan figures were ''totally unrealistic'' and urged, unsuccessfully that the House set a June 28 deadline for the summit to reach agreement.

Also Tuesday, the Senate voted 96-2 to prohibit Congress from considering any increase in the public debt unless the surplus in the Social Security Trust Fund is removed from the budget and deficit calculations.

The proposed removal of the surplus, estimated at $74 billion in fiscal 1991, was offered by Sen. John Heinz, R-Pa., as an amendment to major housing legislation.

The housing bill, however, is unlikely to become law before the White House seeks an increase in the public debt, probably in late July or early August.

Sen. Daniel Patrick Moynihan, D-N.Y., said the Social Security surplus should not be used as general revenues and ''should not be available for the government to spend for everything from paperclips to battleships and everything in between.''

#90170u2071 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Despite facing a dire fuel shortage, the flight crew of an Avianca plane that crashed on Long Island Jan. 25 failed to ask air traffic controllers for landing priority until two engines stalled about two minutes before impact, according to air traffic control recordings released Tuesday.

The Federal Aviation Administration's release of the tapes of communications between air traffic controllers, the Avianca crew and other flights set the stage for National Transportation Safety Board hearings into the crash, scheduled to begin Wednesday in Melville, N.Y. The FAA released transcripts of the cockpit voice recordings in March.

Avianca Flight 52, bound for New York from Bogota, Colombia, with a stop in Medellin, crashed in Cove Neck, N.Y., after apparently running out of fuel on its second approach to New York's John F. Kennedy International Airport. Of the 158 aboard, 73 were killed, including the three cockpit members, and 82 were seriously injured.

The tapes revealed that flight crews from other planes being directed into the airport during the treacherous conditions on Jan. 25 had informed air traffic controllers they were running out of fuel and were directed to safe landings. For example, the crew from an American airlines flight told controllers, ''We got enough fuel for the approach and landing and that's it.''

But the Avianca flight crew, as also revealed in the cockpit voice recordings, never specifically mentioned a fuel ''emergency'' nor communicated the gravity of their fuel situation to air traffic controllers even though members of the flight crew discussed the fuel situation among themselves.

While the flight crew told a series of different controllers that the plane was running low on fuel, it was not until 9:32 p.m. that first officer Mauricio Klotz told controllers at the Terminal Radar Approach Control Facility (TRACON), which guides air traffic between the three New York airports: ''We just, ah, lost two engines and we need priority, please.''

At that point, controllers gave the crew new instructions and received the response, ''Roger,'' from Klotz. But the plane went down in a wooded area of Long Island at 9:34 p.m., with controllers noting they had lost radar contact about one minute later.

#90170u2073 06/19/1990 ~United Press International

DNEPROPETROVSK, UKRAINE, USSR (JUNE 19) UPI - Stubborn prison rioters surrendered Tuesday to riot police, ending an uprising that left their former jail in smoking ruins and at least four of their comrades dead.

Emerging from 18th-century cells converted to bunkers, the insurgents were loaded onto trucks and paddy wagons and whisked to other prisons five days after the riot broke out. Authorities said the inmates released their hostages unharmed but did not say how many had been held captive or who they were.

The inmates left behind a demolished and smoldering prison, with a yard bloodied by the slaughter of pigs for a final feast. On the eve of their surrender, the inmates slaughtered and roasted 100 pigs from the kitchen and downed them with gallons of vodka.

The prisoners, who had rioted for improved conditions, also left the prison yard littered with needles they used to inject themselves with drugs they took from the prison pharmacy.

''All windows are broken. There is fire around,'' a witness said. ''The whole pigsty with 100 pigs is burned.''

The Soviet news agency, Tass, said the uprising caused an estimated $4.8 million damage. Among the buildings and prison equipment destroyed were a new medical facility burned and its new equipment, Tass said.

Authorities said it was the worst prison riot in Ukrainian history.

Police closed the more than 200-year-old facility built by Empress Catherine the Great in Dnepropetrovsk, situated in the Ukraine about 550 miles south of Moscow. Additions were built in 1906 and 1910 to house the growing number of prisoners in Czarist Russia.

Interior Ministry spokesman Dmitry Seleznev said in Moscow the uprising was the latest in a series of protests over poor conditions at Soviet penal institutions.

Seleznev said a year ago there was an outbreak of hostage-taking in prison and labor camps, followed by strikes in special labor-treatment camps for alcoholics. A month ago, he said there was a peaceful protest against overcrowding and poor conditions at a prison in Khabarovsk.

And by early Monday in Chelyabinsk in the Urals, 900 miles east of Moscow, hundreds of heavily armed troops had suppressed another prison takeover by 1,000 inmates, killing one inmate and wounding several to regain control.

''It is kind of like an epidemic,'' Seleznev said of the uprisings.

At one point about 2,000 inmates were believed involved in the Ukraine prison riot. Most of the prisoners surrendered during a weekend of negotiations, but about 400 were still inside Tuesday morning.

After they surrendered, Interior Ministry troops and other forces in red and blue berets searched the Dnepropetrovsk facility cell by cell to account for all of the inmates.

At least a dozen inmates were missing and authorities said some might have escaped.

Four were known dead. One hanged himself, another overdosed on drugs, a third was shot by guards and the fourth died of injuries sustained during the takeover Thursday night, witnesses said.

Police with Kalashnikov rifles and wearing riot helmets sealed off the prison earlier Tuesday and a Ukrainian legislator negotiated with the rioters, who had a list of 20 demands.

Other prisoners shouted complaints over the prison walls and some stood on the roof of the three-story brick facility waving blue-and-yellow Ukrainian nationalist flags.

The inmates demanded improved sanitary conditions and a promise that the police would not use violence against them, representatives told United Press International.

Witnesses said the riot began Thursday night when 40 prisoners packed into a single cell were holding a party and a guard asked them for their radio. The prisoners reportedly went wild, broke down the wall of their cell and seized axes.

Families of the prisoners stood guard outside the facility during the riot in the grimy industrial city of 1.3 million people.

#90170u2077 06/19/1990 ~United Press International

(JUNE 19) UPI - Opening statements made in Marion Barry's drug and perjury trial... authorities try to make sense of yesterday's massacre in Florida... and a Big Apple welcome prepared for Nelson Mandela.

U-P-I has the day's top news... next.

The jury in the drug and perjury trial of Washington, D-C, Mayor Marion Barry is hearing two widely different views of the man who manages the nation's capital.

In opening arguments, federal prosecutor Richard Roberts described Barry as a man who has been ''exercising deceit and deception'' while ''snorting cocaine and smoking crack for years all over D-C.''

Roberts alleges that Barry hid drugs in the cuffs of his pants... and often smoked cocaine-laced cigarettes he nicknamed ''M-B Specials.''

But the mayor's lawyer, R. Kenneth Mundy, told the crowded courtroom that the government decided seven years ago ''that it was going to get'' Barry. Mundy says the F-B-I used one of Barry's former girlfriends to ''warm'' and cajole him into using the drugs while secretly being videotaped.

Mundy told the jury that Barry is a victim of ''entrapment pure and simple.''

Barry is charged with three felony counts of perjury for allegedly lying to a grand jury... 10 misdemeanor counts of using cocaine... and one misdemeanor count of conspiracy to possess cocaine.

If convicted on all counts, Barry could face 26 years in prison and one-Million 850-thousand dollars in fines.

#90170u2085 06/19/1990 ~United Press International

(JUNE 19) UPI - Police are trying to make sense out of tragedy in Jacksonville, Florida.

The records on James Pough show a history of arrests and violent behavior, including a felony conviction for aggravated assault in 1971.

In March, a judge issued an injunction barring the 42-year-old Jacksonville man from contacting his wife, who was afraid Pough would harm her.

Pough stormed into a General Motors loan office yesterday, gunning down workers and customers alike with a .30-caliber semi-automatic carbine. Some of Pough's victims were shot as they hid under their desks.

The massacre ended with nine people- including Pough- dead. Five others were wounded before Pough turned his gun on himself.

Duval County Sheriff James McMillan says Pough also was a suspect in the weekend killings of a prostitute and her pimp.

The G-M Acceptance Corporation where the carnage took place is closed until Monday. The company wants to replace blood-stained carpets and windows shattered by bullets... and give workers some time away.

Witness Benjamin Jerger says Pough looked ''disturbed.'' Jerger says the experience was like something from a television show. As he puts it- ''You never think you'll be part of it, but you are.''

WASHINGTON (JUNE 19) UPI - President Bush met Tuesday with Namibian President Sam Nujoma, who said afterwards he was confident the United States would increase its assistance to his newly independent nation.

Speaking after the two conferred briefly in the Oval Office, Nujoma told reporters he had asked Bush to increase U.S. aid to Namibia over a $10 million grant already in the pipeline.

''Quite positive,'' he said of Bush's response to his request. ''Yes, I hope so.''

Earlier, posing with Bush for photographers at the start of the meeting, Nujoma said his country was ''grateful for the support of the people of the United States'' during his country's struggle to achieve full independence from South Africa, which occurred March 21 in a U.S.-brokered deal that also called for Cuban withdrawal from Angola.

Bush, in turn, expressed a ''keen interest ... and respect for the way you've taken hold and (are) running things.''

''We have great respect for that because it wasn't easy,'' Bush said.

The former guerrilla chief has overseen a smooth transition to independence under U.N. supervision and calls for reconciliation that have produced an army comprised of former guerrillas and South African-backed troops, but his country faces an uncertain future.

With budget shortfalls certain, he is in the United States seeking large infusions of foreign aid. He heads Wednesday to the United Nations to present a package of assistance for his country from the international community.

''For us to take off from the ground, we need international support,'' Nujoma told reporters.

Also on Tuesday, Bush announced his intention to nominate Genta Hawkins Holmes to be ambassador to Namibia, a new position.

Holmes, whose nomination must be confirmed by the Senate, has served as deputy chief of mission for the American Embassy in Pretoria, South Africa since 1988 and held other diplomatic positions in Haiti, the Bahamas and in France.

#90170u2117 06/19/1990 ~United Press International

WASHINGTON (JUNE 20) UPI - The U.S. Agency for International Development has completed field tests on a hypodermic syringe that can only be used once, and the agency will soon start supplying it to developing countries around the world, it was announced Tuesday.

The non-reusable device is meant to help stem the spread of infectious diseases, including AIDS, which are often transmitted through reusable syringes that are not properly sterilized.

The device was developed with AID support in 1988 and has been going through field trials in Pakistan.

Ronald Roskens, AID administrator, announced the success of the field trials in a speech Tuesday at the National Council for International Health.

The syringe has an internal flange in its cylinder. When the plunger is depressed, the flange blocks it so it cannot be pulled back for another use.

The device is to be manufactured by the Becton-Dickinson Co., of Elizabeth N.J., for the next five years under a royalty-free arrangement that will make the syringes available at what AID described as ''a very low cost.''

Roskens said, ''This is a premier example of what can be accomplished through the cooperation of the public and private sectors working for a common end.''

Doug Eldred, a spokesman for AID said, ''This was developed for use in the developing world, but I don't see why it wouldn't have the same value domestically, by helping to stop the spread of infectious diseases. I imagine we will soon see it marketed in this country.''

AID is the U.S. government agency that administers $7.2 billion economic and humanitarian assistance to more than 80 countries worldwide.

#90170u2121 06/19/1990 ~United Press International

(JUNE 19) UPI - Much of the southwest continues to bake in triple-digit heat.

North and central Texas were under an excessive heat advisory for the fourth day in a row with an expected heat index of 115 degrees.

Police in Dallas say they are trying to determine whether the hot weather caused a 95-year-old woman to die in her un-airconditioned home during the weekend. They say her body was hot to the touch when they found her on Saturday.

Heat indexes of more than 100 degrees were expected in Oklahoma and Arkansas as well. There was a chance of a thunderstorms in the panhandles, which may cool things down.

In Shadyside, Ohio, cooler weather is making easier the search for 13 people still missing after last Thursday's freak floods.

Authorities estimate that about 850 homes in four eastern Ohio counties were either destroyed or damaged in rising waters that killed at least 21 people.

Downpours hit portions of the Midwest earlier today, keeping floodwaters high in Iowa, where 21 counties have been declared disaster areas.

South African black nationalist Nelson Mandela today said that his country is- in his words- ''on the threshold of major changes,'' but that ''the last hurdles are the most difficult to overcome.''

The black leader made the comments in Toronto, Canada, the latest stop in a world tour to rally fresh support for his anti-apartheid cause.

Mandela says he is counting on ''tremendous support'' when he arrives in New York tomorrow.

The Big Apple is preparing a hero's welcome for him.

Organizers planned his three-day schedule with military precision, including a ticker tape parade, a Yankee Stadium rally and a star-studded Big Apple bash.

The schedule is so busy, in fact, that organizers say they are worried about exhausting the 71-year-old African leader.

Mandela is set to meet with activists, city officials and journalists, as well as make several addresses, including one to the United Nations.

-30- 2157
#90170u2124 06/19/1990 ~United Press International
(JUNE 19) UPI - The Bush administration is pointing its Republican finger at the Democrats, blaming them for much of the nation's savings and loan crisis... the biggest U-S financial disaster since the Depression.

White House News Secretary Marlin Fitzwater took the accusation public today. He says it was the Democrats who ''in the dead of night a few years ago'' pushed through a change raising to 100-thousand dollars the amount of an individual's money that could be secured by the government.

Fitzwater says that raised the amount of money depositors could lose... and eventually increased the cost to taxpayers of covering those losses.

The bailout is now expected to cost between 130-BILLION and 500-BILLION dollars. Fitzwater also dared the Democrats to make the S-and-L crisis a campaign issue this November.

The spokesman's attack came as the Bush administration and Congress begin talks on reducing the budget... cuts that are needed partly because of the government's S-and-L bailout program.

Fitzwater's remarks also come amid new House hearings into the collapse of Silverado savings and loan in Denver. One of the failed thrift's board members is Neil Bush, son of the president.

#90170u2136 06/19/1990 ~United Press International

BUCHAREST, ROMANIA (JUNE 19) UPI - The opposition newspaper Romania Libera returned to newsstands Tuesday for the first time since last week's unrest but carried a disclaimer by press operators who said the writers "distort reality."

Romania's largest opposition daily halted publication last Thursday after its offices were trashed by supporters of the ruling National Salvation Front. Afterward, non-editorial staff refused to return to work to protest Romania Libera's anti-government slant.

The newspaper resumed operations late Monday after the management agreed to publish a disclaimer airing the press operators' views.

''The collectivity of printing workers who contribute to bringing out this publication have nothing in common with the content of the articles, which distort reality,'' the disclaimer said.

The newspaper's editorial content also was criticized by the official news agency Rompres, which said Romania Libera had ''visibily slipped into the sphere of subjectivism.''

''In fact it incited, directly or indirectly, to disorder and tension and ignored the real demands of the economic, political and social life,'' Rompres said.

Police in the capital announced that three opposition leaders had been arrested in connection with violent anti-government protests last Wednesday.

The three included Marian Munteanu, a student activist who remains hospitalized after a savage beating by miners, and Dinca Dumitru and Nica Leon, leaders of political factions that opposed the National Salvation

Front in elections May 20.

In downtown Bucharest, the central University Square was quiet early Tuesday following two days of renewed anti-government protests.

The lower house of Parliament, which is controlled by the front, called on police to keep the downtown area free of demonstrations Monday, ignoring appeals from the United States and the European Community to ease the crackdown on dissent.

In Washington, the State Department said the U.S. ambassador to Romania, Alan Green, will boycott President-elect Ion Iliescu's inauguration Wednesday to protest the violent suppression last week of peaceful demonstrations by pro-government forces.

The State Department, which has already put off consideration of economic assistance and most-favored-nation tariff treatment for Romania, also issued a travel advisory, warning U.S. citizens who do not have urgent business in Romania to defer their travel until further notice because of the continuing unrest and potential for violence.

U.S. estimates say that six people were killed in the suppression of the demonstrators and another 500 injured, with several hundred people being arrested. Other estimates put the toll of dead and injured much higher.

The State Department also expressed U.S. concern over a new law taken up by the Romanian Parliament that would make illegal some kinds of protest demonstrations.

''The law is clearly not intended to protect human rights,'' State Department spokesman Boucher said.

Among the hundreds of anti-government demonstrators on the square Monday were a number of workers who said they were appalled by Iliescu's decision last week to unleash mobs of vigilante coal miners on the capital.

''Before, we didn't have anything against Iliescu, but after seeing what the miners did I have no use for these criminals,'' said Valentin Dumitrascu, 47, one of about 500 demonstrators who gathered in the afternoon at University Square.

Chanting ''Down with Iliescu,'' they blocked traffic on a major boulevard leading to the square for a second day. The crowd dwindled to a few dozen by Monday evening.

Protesters in University Square demanded Iliescu's resignation and called for the release of those arrested during last week's unrest, the most serious violence since Communist dictator Nicolae Ceausescu was chased

from power and executed in December.

University Square was the scene of a seven-week anti-government protest that was dispersed at dawn Wednesday by riot police. The move triggered a wave of violent demonstrations that were finally suppressed when thousands of club-wielding coal miners charged into the city.

Answering an appeal by Iliescu to restore order, the miners used hammers and ax handles to smash the offices of the opposition Liberal and National Peasants parties and the newspaper and to beat scores of students, gypsies journalists and virtually anyone regarded as suspicious.

#90170u2146 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Defense Secretary Dick Cheney presented Congress with the outline Tuesday of a 25 percent reduction in U.S. forces over the next five years that would cut 442,000 troops, 111 warships and 11 Air Force wings.

Although the plan would cut projected spending by nearly $130 billion over five years, Cheney insisted at a news conference, ''It is not a new administration proposal on the defense budget.''

But, he added, ''It turns out to be, in terms of its overall thrust and direction, very close to the kinds of things that we would have to do to get to the levels in the president's budget anyway.''

He said the outline does ''track generally'' with the direction he is currently contemplating in developing a five-year defense plan to be presented to Congress in January.

Cheney presented the outline - he called it an ''illustrative example'' - at the request of lawmakers who are taking part in the budget summit negotiations with the administration.

He also presented two other outlines, each showing deeper force cuts that would have to be made from fiscal 1991-95 if Congress adopted either the Senate Budget Committee's defense proposal or the House's defense numbers.

President Bush proposed $307 billion in military spending authority for the 1991 budget now being negotiated, with spending dropping slowly in the years ahead. But the combination of easing tension in Eastern Europe and pressure from the budget deficit has led lawmakers to look for more substantial savings.

Cheney said a 25 percent reduction in U.S. forces would result in a savings of $127.9 billion from 1991-95 - only $1.3 billion less than the 2 percent-per-year reduction in dollar terms that Bush recommended.

Under this 25 percent plan, the Pentagon would:

-Cut America's 2.1 million active duty troops by 442,000 - or 21 percent - and reserves by 260,000. This would mean the deactivation of 10 Army divisions; six active and four reserve. Civilian defense personnel would also be cut by 145,000.

-Reduce the number of Navy ships from 566 to 455, including mothballing two of America's 14 aircraft carriers, all four of its battleships, and two Navy airwings. It also reduces strategic submarines by a quarter, from 36 to 25.

-Deactivate 11 Air Force tactical fighter wings, four interceptor squadrons, five fighter-bomber squadrons and 450 Minuteman II nuclear missiles.

In contrast, Cheney said the Senate budget plan would require a 35 percent reduction in U.S. force structure and would lead to a cut of 560,000 troops. The House plan would require a 50 percent force reduction and lead to the layoff of 800,000 troops, he said.

''That House-passed package involves taking out ... over a million of the 3.1 million of the military and civilian personnel in defense,'' Cheney warned.

''Force structure reductions of this magnitude would require the closure or realignment of between one-third to one-half of all military installations worldwide,'' Cheney's outline said.

Cheney said he did not include any base closings in his 25 percent plan.

He also said the outlines did not take any money from the Strategic Defense Initative - the ''Star Wars'' anti-missile program - or from research and development. His plan also did not touch strategic nuclear modernization programs.

Rep. Les Aspin, D-Wis., chairman of the House Armed Services Committee, told reporters after the presentation on Capitol Hill, ''Cheney would argue that if you cut the forces 25 percent you only get a 10 percent cut in dollars. You could get a lot more than a 10 percent cut in dollars.''

''Do we accept the Cheney proposal? It hasn't moved (from what Bush proposed in January). My guess is the answer to that is no,'' Aspin said.

Aspin characterized the reaction of Democrats in the budget talks to Cheney's presentation as ''skeptical.''

Sen. Sam Nunn, D-Ga., chairman of the Senate Armed Services Committee, said, ''I don't think we're finished with defense. ... His numbers (Cheney's) came out today about where the president's budget came out in January.''

Cheney said the negotiators are still in the ''early stages'' of budget talks and that there is still a lot of work to be done.

''Nobody's put a new proposal on the table yet,'' Cheney said. ''We have not conceded anything on defense yet - no need to.''

#90170u2148 06/19/1990 ~United Press International
(JUNE 19) UPI - Liberian rebels moved closer to the capital of Monrovia today. But western diplomats say it's NOT clear whether a full-scale assault is in progress, or whether there's only scattered fighting.

Reporters trying to reach Careysburg, 24 miles northeast of the capital, were turned back at a government roadblock. Soldiers at checkpoints near Monrovia told of a seige at Careysburg but admitted they had NOT seen the attack.

Still, it is the closest rebel approach to the Liberian capital in the six months since leader Charles Taylor began a civil war to oust President Samuel Doe. Doe agreed NOT run for re-election next year, but Taylor demands his resignation.

The first round of peace talks between government and rebel negotiators ended during the weekend with NO cease-fire deal. Officials say both sides agreed on the need for political diversity in Liberia, including free elections and the end of tribal rivalries. A second round of talks begins

next week.

A 20-year-old Soviet man who wanted to travel to America today surrendered to police in Finland after hijacking a Soviet airliner with more than 50 passengers aboard.

The Soviet news agency Tass has identified the man as O. Kozlov .

It is NOT clear why the aircraft... set for a domestic flight... landed in Finland.

Airport authorities at Stockholm's Arlanda International airport said earlier that the aircraft was bound for Sweden and preparations were made to receive it.

But 15 minutes later, Helsinki airport announced that the aircraft had landed in Finland.

The hijacker surrendered one hour later and has requested political asylum.

But Finland, unlike Sweden, has never afforded Soviet citizens that status.

BOSTON (JUNE 19) UPI - A grounded barge carrying 5 million gallons of light diesel oil was refloated and towed three miles west in Buzzards Bay, and repair crews Tuesday completed pumping oil out of four ruptured storage tanks, the Coast Guard said.

The 465-foot barge, owned by the Bouchard Shipping Co. of New York City, ran aground about mid-morning Monday in foggy weather not far from a lighthouse.

Officials said the threat of a serious oil spill remained remote, and no oil leaked while the barge was moved to deeper, more sheltered waters Monday evening, said Coast Guard Lt. James Donovan.

''The barge was refloated at 6:45 p.m. and was moved three miles west of the accident scene. It's anchored in deeper water and sheltered now,'' Donovan said. ''No oil has leaked out during the move closer to land, about one mile east of Nye's Ledge. It's sheltered from the wind and the seas aren't as choppy.''

High tide and shifting winds refloated the grounded vessel, Donovan said.

About 200 gallons of the vessel's No. 2 diesel oil leaked into the water immediately following the accident. Officials earlier thought only between

five to 10 gallons had spilled, but revised their estimate once weather cleared Tuesday,

''The conditions at the time of the initial grounding made it very difficult to get an accurate count,'' Petty Officer Paul Gerecke, a Coast Guard spokesman said Tuesday. ''After the vessel was stabilized, they found there was in fact more than the 5 gallons.''

Nearly all of the released oil had evaporated or was contained in booms, leaving ''no appreciable amount of oil left in the water.''

Donovan said the four ruptured tanks contained more than 800,000 gallons of fuel oil. The remaining 12 tanks were intact.

Workers finished pumping the oil and sea water mixture onto the barge San Juan 1 about noon Tuesday, emptying the tanks at a rate of 50,000 gallons per hour, Donovan said. The San Juan 1 then left for New York.

Workers expected to begin repairing the disabled barge's hull late Tuesday and said they would have to shift fuel among the undamaged tanks or remove more fuel to stabilize the vessel.

The grounded barge, known as Bouchard Barge 145, hit bottom on Cleveland Ledge, approximately one mile from where the passenger liner Bermuda Star ripped open its hull on rocks last week.

The groundings of the vessels were under investigation. The Coast Guard said visibility was only about one-quarter of a mile in fog at the time of the barge accident, about 5 nautical miles from the entrance of the Cape Cod Canal.

The Bermuda Star ran aground - also in heavy fog - June 10 and leaked about 7,500 gallons of heavy, sticky fuel oil into Buzzards Bay, soiling beaches and threatening a rare species of seabird.

The 617-foot cruise ship was towed from Buzzards Bay early Tuesday morning bound for a New York shipyard for permanent repairs.

#90170u2173 06/19/1990 ~United Press International

(JUNE 19) UPI - Representatives of 75 nations are gathering in London for the start tomorrow of a 10-day meeting aimed at coming up with a new global strategy for protecting the Earth's ozone.

Organizers of the conference say the meeting will try to help under-developed countries avoid the mistakes of the industrialized world.

Signators of a 1987 Montreal Protocol agreement... which has been ratified by 58 countries and the European Community... are expected to pledge to eliminate ozone-depleting chloro-fluoro-carbons, or C-F-C's, by the year 2000.

The executive director of the U-N Environment Program says representatives are under pressure to step up their effort to fight ozone depletion as the breakdown seems to be occurring twice as fast as expected.

LEBANON, IN (JUNE 19) UPI - A former motorcycle gang enforcer who said he was following his own code of honor when he killed the gang's leader was convicted of murder Tuesday.

A Boone County Superior Court jury of seven women and five men deliberated less than an hour before returning the verdict against Stephen ''Weed'' Weaver, 32, of Indianapolis. Sentencing was scheduled in 30 days.

''I don't like the verdict, but I think it's fair,'' Weaver said.

Weaver's public defender, Allen F. Wharry, offered no evidence on his client's behalf. Weaver said his attorney had done ''excellent'' work on his case.

''I didn't need to testify after the video was shown,'' Weaver said.

He was referring to a videotaped statement he made to police about how he killed David ''Pig Pen'' Lakes, 36, in November 1987 because he overheard a plot to kill his brother, James Anthony ''Wrong Way'' Weaver, who was in a California jail.

''You may look at me as a cold-blooded killer and this and that but I do have my standards and I do have my beliefs and nothing can shake those,'' he said in the recording.

Weaver also demonstrated to police in the videotape how he shot Lakes at point-blank range behind the ear.

Although McClure did not seek the death penalty, Weaver could face that fate if he is convicted in a separate dismemberment slaying of an Indianapolis man.

That killing was unsolved until August, when Weaver shot his wife, Lucinda six times in the back. She survived the attack and told police Weaver was responsible for Lakes' death in November 1987.

After the trial, Weaver reiterated that he would welcome the death penalty.

In the statement to police, he said: ''If I catch the death penalty on either one of these cases, they (the Outlaws) may be able to satisfy themselves and everyone else, but ... a life term in prison, they'll try to get me with a gun inside prison, which won't be hard. They gotta have my body for this.''

LOS ANGELES (JUNE 19) UPI - Barbara Cason, a stage, film and television actress who played Garry Shandling's mother on his Fox television series, has died of apparent heart failure, her spokesman said Tuesday. She was 61.

Cason died Monday in her Hollywood Hills home, said spokesman, Larry Frank.

Cason graduated from the University of Mississippi with bachelor's and master's degrees in theater arts. After graduation, she returned to her hometown of Memphis, Tenn., where she co-founded the Front Street Theatre.

She moved to New York in the early 1960s to appear in Julius Monks' ''Plaza 9 Revue'' at the Plaza Hotel.

During the next 10 years, Cason was cast in a number of Broadway and

off-Broadway productions, including ''Marat Sade,'' ''Oh, Coward!'' and ''Firebugs,'' for which she received an Obie award nomination.

Cason's feature film credits included ''Cold Turkey'' and ''Heretic II.'' In addition to ''It's Garry Shandling's Show,'' she also was a regular on the television series ''New Temperature's Rising'' and ''Carter Country.''

Her last stage role was last year in the Los Angeles production of ''Beyond Therapy.''

Cason is survived by her husband of 20 years, actor Dennis Patrick. The family requested that donations be made to the American Heart Association at St. John's Hospital and Health Center in Santa Monica.

Funeral arrangements were pending.

MEXICO CITY (JUNE 19) UPI - Pemex, the Mexican state-owned oil company, will absorb $775 million of a new $790 million credit granted by Japan for programs aimed at reducing pollution in Mexico, Pemex announced Tuesday.

Japan previously granted Mexico $810 million as part of a package to help in environmental protection efforts.

Mexican President Carlos Salinas de Gortari is currently visiting Japan, where he is also promoting investment in Mexico.

Pemex will invest $315 million of the loan in refineries to produce unleaded gasoline and in plants to produce an additive that increases the oxygen level in gasoline.

Mexico's leaded gasoline is blamed for much of the pollution in Mexico City.

Pemex will use another $460 million for efforts to reduce the sulfur count in diesel fuel.

Pemex, which has been criticized as one of the worst polluters in Mexico, said it is also working to improve sulfur recovery operations and reduce emissions at the Azcapotzalco refinery in Mexico City.

#90170u2200 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - A sharply divided House Judiciary Committee Tuesday sent a controversial amendment to ban flag desecration to the full

House for a vote, perhaps this week, and opponents began predicting openly of its defeat.

After six hours of arguing and two failed votes, the panel decided, 19-17, to send what could become the 27th Amendment to the Constitution to the House without any recommendation on its fate. Five Democrats joined 14 Republicans in supporting the amendment.

The measure, which must be adopted by two-thirds of the House and Senate and three-quarters of the states to be incorporated in the Constitution, is a response to last week's 5-4 Supreme Court ruling holding that flag burning is constitutionally protected free speech.

House Speaker Thomas Foley of Washington told reporters he wants to vote on the issue Thursday, but Republicans - edgy they need the weekend to get more members to their side - started talking about stalling tactics.

Before sending the measure to the floor, the panel first split 18-18 on the proposal of Rep. Don Edwards, D-Calif., to recommend its rejection by the House, just as his constitutional rights subcommittee did last week. The panel then rejected a proposal to recommend its passage, 19-17.

The amendment reads: ''The Congress and the states shall have the power to prohibit the physical descration of the flag of the United States.''

Foley predicted a ''very close vote,'' and Edwards began talking confidently of victory, which would be accomplished with only a one-third vote against the proposal.

''We will prevail. We've got momentum our way,'' said Edwards, who also prepared a resolution endorsing the freedoms in the Bill of Rights and paying respect to the flag for members to vote on.

Foley, an opponent of the amendment, said he was encouraged by the fact that ''a number of prominent conservatives'' have spoken out against the measure in the last few days. Foley said he the amendment was an issue that should be important to conservatives - ''modifying the basic organic law of this country. That's what I understand conservatism is about.''

While the committee acted, Senate Democratic leader George Mitchell of Maine delivered a powerful attack on the amendment issue, saying, ''We have personal freedom in America because we reject any government dictated patriotism.''

And retired Supreme Court Justice Lewis Powell joined amendment opponents, saying the First Amendment embodies the nation's commitment to free expression and for nearly 200 years ''has stood ... as a guardian against government censorship or limitation of vigorous public debate.''

The battle lines were clearly drawn within the committee.

Edwards noted that next week Nelson Mandela, newly freed from a South African jail, will visit Congress and added: ''Are we prepared to tell Nelson Mandela that we are having second thoughts about free speech - that we can't live with the free

''I view this as one more struggle in the culture war, the culture kampf that has been raging since Vietnam,'' said conservative Rep. Henry Hyde, R-Ill., a proponent of the amendment.

''There are those who hate America and its values and take every opportunity to demean those values. Those who are shocked and revolted by the excesses of the counter-culture, the pornography, the obscenity that innundates our entertainment industry, the drugs, the AIDS explosion the high abortion rate, view flag burning as one more slap in the face of the millions of veterans who found enough value in America to give their lives in combat, they resent the vulgarization of their country,'' said Hyde.

But Rep. Bruce Morrison, D-Conn., declared, ''The last thing we need to do is tell the flag burners they won this one'' and got Congress to take the extreme step of a constitutional amendment to curb their actions. ''We should put up for a short time with the notoriety of this issue rather than give them a permanent monument in the U.S. Constitution.''

WASHINGTON (JUNE 19) UPI - Defense Secretary Dick Cheney, kept in the dark once by the Air Force over a Panama bombing error, said Tuesday he ''was not happy'' to belatedly learn of problems with the Navy's new A-12 aircraft program.

It was not disclosed that contractors were having problems with the A-12, the Navy's new stealthy carrier-based attack plane that is to replace the aging A-6, until after Cheney completed his major aircraft review.

As part of that budget-cutting review, Cheney told Congress in April he would recommend saving money by reducing the Pentagon's desired number of A-12s from 858 to 620. But he planned to keep the production timetable on schedule.

Afterward, Cheney learned that the contractors, General Dynamics and McDonnell Douglas, had requested a delay in the first scheduled flight because of problems with the new aircraft.

Cheney, at a Pentagon news conference, was asked his reaction to having been kept in the dark by either the contractors or the Navy.

''I was not happy to discover that the contractors were having problems with the A-12,'' Cheney said. ''I have had a session in which I have expressed my views on that subject.

''Now, obviously, we are going to continue to work the problem to see if, in fact, we can't get better data than we've had to date,'' Cheney said. ''The A-12 remains an important high-priority program for us.

''Obviously, I was not happy with the way the A-12 thing was handled.''

Asked why he was not told of the problems in the review process, Cheney said, ''That's the question I've asked, and I don't have all the answers yet.''

It was disclosed earlier this year that the Air Force knew that a bomb from an Air Force F-117A stealth fighter had missed its target by a wide mark in the invasion of Panama - at a time Cheney was publicly praising the new, high-tech planes for their accuracy in the Dec. 20 operation.

Cheney was asked at Tuesday's news conference if there was something he could say to his Pentagon employees that would help him be kept better informed and ''in the loop'' of current defense-related information.

''I think I've done that in terms of my personal conversations with the people who work for me. But I prefer to keep those conversations personal '' Cheney said.

WASHINGTON (JUNE 19) UPI - Tiffany & Co. has increased by 50 percent a $60 million credit facility the company has with six banks, according to a quarterly report released Tuesday at the Securities and Exchange Commission.

The three-year, multi-currency revolving credit facility now stands at $90 million, according to the report filed Monday with the SEC.

The funds, Tiffany said, will be added to available cash and short-term

investments, which totaled about $2.9 million on Apr. 30, for new stores and renovations.

Mark Aaron, Tiffany's director of investor relations, said the decision to up the lines of credit was ''simply a matter of having the increased availability of these funds if we should decide to use it to support our planned business expansion.''

The facility is now comprised of six $15 million credit agreements concluded with the following banks: BBL Bank Brussels Lambert; CIBC Inc.; Credit Suisse; Irving Trust Co.; United Jersey Bank; and Fuji Bank Ltd.

Within the next six months, the company plans to open a new store in Philadelphia, renovate its Atlanta store and relocate its Beverly Hills, Calif., store.

The New York-based jewelry manufacturer and retailer said none of the loan's other covenants or conditions was changed.

#90170u2343 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - The dollar continued to lose ground against the key European currencies in New York trading Tuesday as players sold the U.S. currency for technical reasons and on an uncertain U.S. economic outlook.

Currency traders said the dollar was at the bottom of its trading range after momentarily dipping below the key level of 1.6700 West German marks, and would likely stay there barring new market information.

Trader Radhika Rajan of Manufacturers Hanover said the dollar's downward move was partly a correction from late last week, when players bought up the dollar on indications of strength in U.S. industry.

But rumored intervention by the West German central bank drove back the bulls and put a cap on the dollar's upward momentum.

Yet Rajan minimized the import of the dollar's decline. ''It's no big deal - the dollar's still in a range,'' she said.

Dealer O.J. Pacholczuk of the Bayerische Hypotheken-und Wechsel Bank said the dollar also took its cue from bond and stock declines, while foreign exchange market players were testing the unit's lower limits.

In late New York trading the dollar was quoted at 1.6715 West German marks down from 1.6740 at Monday's close. It was changing hands at 153.45 Japanese yen, unchanged from the previous day.

Analyst Marc Chandler of the Chicago office of MMS International, a financial markets consulting firm, said a driving factor in the dollar's decline was pressure by European currencies on the Japanese yen.

''Clearly the European currencies are in favor as opposed to the yen, which remains the favorite short in the market,'' he said.

Worries about the Japanese economy and a new political scandal in Tokyo have prompted buying of deutsche marks and Swiss francs against the yen, he said, pushing down the dollar as an intermediary currency.

Other dollar rates: 1.4090 Swiss francs, down from 1.4150; 5.6210 French francs, off from 5.6320; and 1,227 Italian lire, off from 1,229.

The British pound rose to $1.7220 from $1.7150, sterling's high point to date in 1990, analysts said.

In Europe, the dollar closed lower as the British pound took center stage on a quiet day. Analysts said players were biding time until Thursday's release of first-quarter U.S. gross national product figures.

In London, sterling strengthened against the dollar as it broke through the $1.7200 barrier to end at $1.7210 against $1.7125 Monday.

Buying interest for the pound increased after British Prime Minister Margaret Thatcher said high interest rates would damp inflation.

Analyst George McMahon of Kleinwort Benson said the pound was still riding high and was likely to do so all summer on market hopes for its entry into the European Monetary System's exchange-rate mechanism.

The mark gained on the dollar as monetary union between East and West Germany appeared to be proceeding smoothly, one dealer said.

The U.S. unit closed down in Frankfurt, at 1.6730 deutsche marks compared with 1.6835 at Monday's close. It also was lower in Zurich, at 1.4075 Swiss francs against 1.4285 the previous day.

The dollar retreated in Paris, Brussels and Milan, finishing at 5.6370 French francs against 5.6745, 34.46 Belgian francs compared with 34.67, and 1,230.15 Italian lire against 1,238.50.

Earlier in Tokyo, the dollar eased against the Japanese yen, ending at 153.72 yen compared with Monday's final price of 153.88.

Gold fell in Zurich to $348.20 an ounce, against $349.50 Monday. It declined in London to $347.75 an ounce from $349.25.

Republic National Bank in New York closed cash gold at $348.50 an ounce, off from $348.75 Monday. The New York Commodity Exchange settled gold at $349.10 an ounce, down from $349.30 the previous day.

Silver closed down in Zurich at $4.84 an ounce against $4.85, and eased in London as well to $4.84 an ounce from $4.85.

Republic closed cash silver at $4.845 an ounce, unchanged. Comex silver settled at $4.815 an ounce, down from $4.825.

LOS ANGELES (JUNE 19) UPI - A masked robber burst into an art agency's office, taped a company executive to a chair and loaded paintings, lithographs and silkscreens valued at $4.6 million into the company's van and fled, police said Tuesday.

Robert Silver, 43, chief financial officer of Eagle Limited in Van Nuys, told police the thief took hundreds of serigraphs, or silkscreens, and lithographs by three contemporary artists after confronting him in the firm's office about 8 p.m. Monday and aiming a .38-caliber revolver at his face, Sgt. Robert Pooler said.

The robber cut three original canvases out of their frames, all by Ramon Lombarte, a Spanish painter whose work is probably the best-known and most expensive of the artists represented by the art agency and publisher, said Janet Klein, the company's director of marketing.

The robber used duct tape to bind Silver to a chair, Klein said. After about three hours, Silver was able to free a hand to dial the telephone and call police.

Silver was not immediately available for comment, but Klein said the Boston attorney travels to Los Angeles about once a month to oversee Eagle Limited affairs.

Silver reported that the stolen artwork included the paintings and 318 lithographs by Lombarte, 310 serigraphs of three paintings by Portuguese artist Robert Chichorro, and 203 lithographs and serigraphs by Los Angeles artist Sonya Fe.

The robber took the works from the showroom in the company's office near Van Nuys Municipal Airport and also from an adjoining warehouse, loaded them in a blue van used by company employees and fled.

The stolen works were valued by Silver at $4,624,500.

WASHINGTON (JUNE 19) UPI - The government has "an obligation" to provide a safety net for the tens of thousands of federal civilian workers slated to lose their jobs as part of planned military base closings, lawmakers from states hardest hit by the cuts told a House panel Tuesday.

Defense Secretary Dick Cheney is considering plans to close nearly two dozen military bases in nine states and restructure scores of other bases around the country.

In a House subcommittee hearing, legislators rallied around a measure introduced by Rep. Paul Kanjorski, D-Pa., to provide job training, priority government rehiring, extended health insurance benefits and supplemental wage allowances for displaced federal workers.

The legislation is expected to carry a pricetag of between $50 million and $100 million.

''The employees who stand to benefit from this legislation have built their lives, as well as their livelihoods, around out nation's military facilities,'' Rep. James Saxton, R-N.J., told the subcommittee. ''They have been loyal, hard-working employees. They deserve a soft landing, not a hard fall.''

BALTIMORE (JUNE 19) UPI - The former director of the Food and Drug Administration's generic drug division was indicted Tuesday on two counts of perjury for allegedly lying to government investigators about his contact with pharmaceutical manufacturers.

The federal grand jury indictments, the latest round of charges in a two-year-old investigation of the FDA and the generic drug industry, named Marvin Seife, 66, of San Antonio, Texas, who retired as director of the generic drug division at the end of 1989.

If convicted of both counts, Seife faces up to 10 years in prison and up to $500,000 in fines. He is the highest-ranking former FDA official to be indicted the probe.

Seife, who was responsible for reviewing applications from pharmaceutical manufacturers seeking approval to market generic drugs, allegedly told investigators he had not discussed agency matters or eaten meals with FDA applicants, prosecutors said.

The indictments said that Seife, in 1989, lied to an FDA investigator when he denied meeting with two generic drug manufacturers in 1987 to discuss agency business and that he made a similar statement in testimony before a congressional committee.

The charges also contend that Seife lied to investigators because he often enjoyed lunches, dinners and drinks at the manufacturers' expense.

Four officials who worked for Seife's FDA division already have been convicted of corruption and racketeering charges in the investigation of the agency.

Five generic drug executives, three pharmaceutical companies and an industry consultant also have been convicted of charges of trying to influence the drug-approval process.

Generic drugs do not have brand names but are chemically equivalent to brand-name drugs whose patents have expired. They are generally cheaper than brand-name products and their wide market has sparked a fierce competition among manufacturers seeking generic drug approval.

HOUSTON (JUNE 19) UPI - Conoco (U.K.) Ltd., an affiliate of Conoco Inc., Tuesday announced the acquisition of all offshore U.K. assets of Triton North Sea Operators Ltd., a subsidiary of Triton Europe PLC., for about $61 million.

Triton Energy Co., a Dallas-based independent international energy company owns 59.47 percent of Triton Europe PLC. Triton Europe accounts for about 40 percent of Triton's proven reserves.

In April, Triton Energy withdrew an offer to sell Triton Europe, saying the offers it received were not attractive. However, the company said Triton Europe would explore the possibility of selling all or part of its assets in the United Kingdom and the Netherlands sectors of the North Sea.

Conoco's purchase does not include the Netherlands assets of Triton Europe.

The acquisition includes interests in 12 North Sea blocks. It is subject to approval by Triton shareholders and the British government.

''The North Sea is a vital strategic area for Conoco,'' said W.K. Dietrich executive vice president of international exploration and production. ''This acquisition significantly improves our asset base here and emphasizes our continuing commitment to building our position in the area.''

Conoco is a subisdiary of El du Pont de Nemours Co.

Among the blocks to be acquired are 16/26 which contains the large Alba oil field, and 16-27b. Conoco said the blocks overlie a part of a very large undeveloped natural gas and condensate field where the company already has a substantial interest.

Triton first announced the sale of Triton Europe, which has a capitilization of about $240 million, at the start of this year. Triton Europe's majority of the reserves, however, are concentrated in the Paris Basin of France which were developed about eight years ago.

The shares of Triton Europe which are not owned by Triton Energy of Dallas are traded on London's International Stock Exchange. In 1989, prices of those shares ranged from a high of $3.30 to a low of $2.48 a share. Currently they are trading at about $2.87 a share.

Under its original proposal, Triton Energy had planned to use the proceeds from the sale of Triton Europe to reduce its outstanding debt of about $250 million.

But Triton spokesman Phil Shook said proceeds from the latest transaction will not bring cash flow to the parent but help improve its balance sheet through the reduction of Triton Europe's debt.

Triton Energy currently has proven reserves of 82 million equivalent barrels Of that Triton Europe accouted for about 32 million barrles.

Triton Energy also has interests in Canada, Australia, Argentina, Gabon, Colombia, Thailand and New Zealand.

#90170u2441 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - The massive security operation planned to protect Nelson Mandela in the United States - including 12,000 police and a special ''Mandella Mobile'' in New York - will be the largest such effort ever undertaken by the U.S. State Department, officials said Tuesday.

When the African National Congress leader steps off his plane at New York's Kennedy Airport Wednesday, the plan, dubbed ''Operation Topaz'' will already have helicopters in the air and a small army of police, State Department and federal agents deployed across the city.

''Security is going to be a prime concern here and it's going to be treated like a presidential visit,'' said Capt. Stephen Davis, a police spokes- man in New York.

The plan in New York will marshal about 12,000 police officers and hundreds of them - along with federal agents and officials from the State Department's Bureau of Di- plomatic Security - will watch every move Mandela makes.

Mandela will speak at three huge outdoor rallies, including one on West 125th Street in Harlem and one at Yankee Stadium, and will be honored with a ticker-tape parade.

Meg Ravnholt, a spokeswom- an for the Diplomatic Security Bureau in Washington, said protecting the ANC leader on his 10-day trip was the biggest such operation the department has ever undertaken. The bureau protects visiting dig- nitaries, royalty and foreign ministers.

Ravnholt said the kinds of events planned, including the rallies and the parade in New York, make the security job much more complicated than usual.

''It's the first ticker-tape parade we have ever had to handle,'' she said.

Ravnholt declined to provide any details on the number of State Department agents, citing security concerns, but said 5,300 journalists would be covering Mandela on his 10-day, eight-city trip aimed at increas- ing support for intensified economic sanctions against the South Africa.

In addition to New York, Mandela will visit Boston, Washington, Atlanta, Miami, Detroit, Los Angeles and Oakland, Calif.

In New York, State Depart- ment agents will conduct security sweeps at each event hours before Mandela arrives, using bomb-sniffing dogs and electronic gear to screen media equipment.

State Department officials were so anxious to keep the lid on the tight security plans that they asked police officials to refrain from discussing the so- called ''Mandela Mobile.''

The African nationalist leader will ride in the vehicle - a specially designed truck with a bullet-proof glass enclosure - in Wednesday's ticker-tape parade up Broadway through Lower Manhattan to City Hall.

The enclosure will be large enough for Mandela to sit or stand and will accommodate the ANC leader and four aides, officials said.

Along the parade route, plainclothes police and detec- tives will move through the crowds and uniformed police Emergency Service Unit sharp- shooters will line the rooftops, police sources said.

The New York police depart- ment's part in the operation will be the largest since the visit of Pope John Paul II in 1979, said Capt. Robert Civida- nes, another police spokesman.

#90170u2443 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Senior advisers will recommend President Bush veto the housing bill now being considered by the Senate unless sweeping changes are made, the Senate GOP Policy Committee said Tuesday.

In a legislative notice, the policy group said a veto would be urged because the administration has numerous ''major problems'' with the ''current form'' of the bill - the first major housing legislation to move through Congress in more than a decade.

In a letter to Housing and Urban Development Secretary Jack Kemp, Sen. Alan Cranston, D-Calif., the Democratic floor manager for the bill, said elements of the bill can be ''improved further'' and the objections ''deserve careful analysis.''

But Cranston said the administration criticism ''reflects either a profound misunderstanding or determined misstatement of the provisions in the Senate housing bill.''

The bill, the product of three years work, would revamp federal housing policy in an effort to provide affordable housing for Americans at a time of rising prices and housing shortages.

The administration is working with several members of the Senate Banking Committee on possible amendments but no agreement has been reached. Waiting for results of the off-floor meetings, the Senate acted only on a series of minor amendments.

Kemp and budget director Richard Darman met Monday with Cranston and other Democrats and outlined their objections.

Cranston said after the meeting with Darman and Kemp that administration objections could probably be met and said he was assured by Kemp that there would be no veto if policy issues were resolved.

But the Senate Republican Policy Committee cited the cost of the bill as one of the ''major problems,'' noting the bill authorizes $5 billion more for housing than Bush requested in his budget. Cranston, however, has listed the increase at $3.1 billion.

The administration, according to the policy committee, is holding out for a bill that reforms HUD programs to eliminate fraud and abuse, focuses housing more effectively on the poor, increases the power of the poor to get into the housing market, and makes the Federal Housing Insurance Administration (FHA) single-family insurance fund financially sound.

In addition to the cost of the bill, the administration listed among the ''major problems'' a ''costly, poorly targeted new housing construction'' program called HOP; changes in low-income housing that would harm poor neighborhoods and increase the costs of elderly housing; too much money for new rural housing construction loans, and the lack of funds for public housing modernization.

#90170u2454 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - Kenneth R. Leibler, president of the American Stock Exchange, announced Tuesday he will leave his post to become president and chief operating officer of Liberty Financial Cos.

The 41-year-old Leibler, who in 1986 became the youngest president of any exchange in the nation, will have responsibility for eight operating

companies with combined assets of more than $21 billion.

The companies include the investment management companies Stein Roe & Farnham and Liberty Asset Management as well as the insurer Keystone Provident Life, a venture-capital firm, a real estate investment advisor and management company and two retail broker-dealers.

''It was an opportunity presented to me that is so different and so much broader than what I do today,'' Leibler said. ''It's really a much, much broader scope in financial services and that to me is exciting.

''I've been president almost five years and I never anticipated doing this the rest of my career,'' he said.

Leibler joined the American Stock Exchange in 1975, launched the exchange's options business and held senior positions in marketing and finance before becoming president. Prior to his stint at the exchange, Leibler managed the retail options department at Lehman Brothers.

Leibler said he was particularly proud of the expansion and diversification into stocks, bonds, options and commodities the exchange underwent during his tenure.

''I believe we've achieved a variety of products that is something I'd be personally proud of,'' he said.

Leibler said that he expects to move to Liberty Financial, a wholly owned subsidiary of Liberty Mutual Insurance Co., sometime this summer but an exact date has not been set.

#90170u2455 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Georgetown basketball coach John Thompson said Tuesday he has yet to decide if he will accept an offer to become general manager of the Denver Nuggets.

Thompson, who has coached Georgetown for 18 years, said he will make his decision ''as soon as possible'' but no timetable has been set.

''If you think I am considering an offer, you are absolutely right,'' Thompson said at a news conference at Georgetown's McDonough Arena. ''If you think I've made up my mind, you're absolutely incorrect.''

He said the Denver job was ''far more serious than any job that I've ever considered.'' He acknowledged that the offer included an opportunity to eventually own almost 4 percent of the franchise. The deal reportedly is worth $700,000 a year for four of five years.

''What I am attempting to do is go through the process of making a decision,'' Thompson said. ''Once I make that decision and I have an opportunity to talk to people at Georgetown, then I will let you know.''

Thompson, 48, has compiled a 423-142 record at Georgetown, won the 1984 NCAA championship and coached the 1988 Olympic team to a bronze medal.

''They have offered me an opportunity which is an exciting challenge,'' he said. ''I think all of us live for challenges who are in this kind of business.''

The news conference was arranged the day after WJLA-TV in Washington reported that Thompson's departure was ''90 percent likely.'' The station also said Thompson was pushing for the promotion of longtime assistant Craig Esherick to head coach and that Thompson would bring aide Mary Fenlon to Denver to be an assistant coach.

Thompson denied he was recommending anyone for his job.

''I am still the basketball coach at Georgetown University,'' he said. ''I've never been so crazy to recommend someone for my job.''

Thompson said he was in no way responsible for the news leaks.

''I am totally not responsible for any of the information that has been given so far and I am not responsible for its accuracy,'' he said. ''I don't need to use anything for leverage.''

There were reports Thompson originally turned down the Nuggets' offer, but that his interest was renewed by a more attractive offer. But Thompson said the negotiations never came to a full stop.

''I was not completely comfortable (with the offer),'' Thompson said. ''I'm not certain I'm completely comfortable now.''

Thompson said his Georgetown contract has a clause that would enable him to leave.

''I have no problem whatsoever staying here,'' Thompson said. ''I enjoy my job, I like the people I'm working with and I enjoy the kids I'm working with. It will not be a great tragedy in my life if I stay at Georgetown University. It's just that an opportunity has been presented to me that I must consider.''

#90170u2471 06/19/1990 ~United Press International

CINCINNATI (JUNE 19) UPI - A county judge ruled Tuesday that Cincinnati's premier art gallery and its director will be tried in September on child pornography charges stemming from an exhibit of photographs by the late Robert Mapplethorpe.

The charges against the Contemporary Arts Center and director Dennis Barrie arose from an exhibit of 175 photographs last spring. Five pictures showing homosexual acts and two showing juveniles' genitals were named in an April indictment after grand jurors viewed the show on opening day.

Hamilton County Municipal Judge F. David Albanese set a trial date for Sept. 24 for the count of the indictment citing use of children in nudity-oriented material, defense lawyer H. Louis Sirkin said.

Albanese postponed action on the count of pandering obscenity until after an Aug. 20 hearing on a prosecution motion that the pictures should be measured individually against obscenity standards.

The defense has argued the show should be seen as a single work of art.

They also argued Ohio law allows museums to display even obscene pictures for bona fide educational or cultural purposes, and allows pictures of nude youngsters to be taken and displayed with parental permission.

Defense lawyers have said they intend to take depositions from the parents of two children who appear in the photos with their genitals exposed. The parents have told reporters they gave Mapplethorpe permission to photograph their children and approved of his photos.

If convicted, the gallery faces up to $10,000 in fines. Barrie, if convicted, could be fined $2,000 and jailed for a year.

#90170u2488 06/19/1990 ~United Press International

(JUNE 19) UPI - Yesterday's rampage at a loan office in Jacksonville, Florida, apparently began one day earlier. Duval County Sheriff James McMillan says James Pough fatally shot a prostitute and her pimp early Sunday, then shot and wounded two teen-agers shortly after. Pough shot and killed eight additional people yesterday before killing himself at the office that had repossessed his car.

Soviet President Gorbachev vigorously defended his reform policies today but was drowned out by hard-line conservatives of the Communist Party during a meeting in Moscow. One hard-line conservative was applauded for calling on Gorbachev to resign, while another warned him against- quoting now- ''sliding toward a personality cult.''

A House panel today voted to forgo the debate over government funding for the National Endowment for the Arts by passing the political hot potato to the full House for consideration. The Education and Labor Committee sent on the full bill, which re-authorizes N-E-A funding for five years. The debate over the legislation stems from proposed restrictions on artists applying for grants.

Dutch police used hounds to track down and arrest a fourth suspected member of the Irish Republic Army. Police earlier arrested three other alleged I-R-A members following a weekend tip from a Belgium farmer who had overheard target practice near his house. The connection among the four is NOT immediately clear.

Researchers at U-C-L-A say chlamydia... the most common sexually transmitted disease in the United States... may be linked to a surge in a serious pregnancy complication. The study says women are more than twice as likely to have a tubal or non-womb pregnancy if they have had chlamydia. Researchers say that such pregnancies are on the rise and account for 11 percent of all maternal deaths.

#90170u2498 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - International Business Machines Corp. announced Tuesday a joint project with Worldspan Travel Agency Information Services that will allow travelers to watch video presentations on destinations they may want to visit.

The announcement was made at the 8th Annual PC-Expo, held at the Jacob K. Javits Conference Center, where IBM is displaying its latest multimedia systems combining the resources of personal computers and laser video technology.

The U.S. airlines Delta, Northwest and TWA, announced in February the creation of Worldspan, a joint venture operating an independent computerized-reservation system for travel agencies called IRIS.

IBM will bring to IRIS its digital video interactive technology, known as DVI.

IBM's DVI product for IRIS is called ActionMedia 750 and can deliver high-quality sound and motion video to a travel agent's computer monitor.

''Travel agency consultants will use this tool to better explain travel products while conducting telephone sales,'' IBM said. ''Customers visiting a travel agency will be able to see video presentations and make their travel plans.''

A travel agent will be able to retrieve audio, slide and video information about a wide range of destinations and travel and hotel facilities around the world for both business travelers and tourists.

The video system is supported by IBM's Token Ring network, first demonstrated at the Comdex trade show last fall.

''The delivery of motion video over networks is particularly challenging because of the high bandwidth and constant data rate requirement for 30 frames per second of TV video,'' said an IBM spokesman.

The new video system is supported by servers, or file hosts in a network, recently introduced by IBM as well as by its open system software OS/2 and the latest video storage technology.

IBM expects the ActionMedia 750 project to be followed by many more in the area of video information display on computers.

''A variety of other projects are also in progress with IBM customers who will use multimedia information to enhance the productivity of their work force,'' said Ron Palmich, IBM's director for multimedia solutions.

IBM, however, did not disclose details of its current negotiations with other potential partners or project revenues from the agreement with Worldspan.

When Delta Air Lines Inc., NWA Inc. and Trans World Airlines Inc. announced the Worldspan venture, they said they had approached IBM and American Telephone & Telegraph Co. about their new data center near Atlanta.

The airlines at the time estimated the cost of the hardware and software for the project ''in the $175 million to $180 million range.''

IBM also signed this spring a major worldwide contract to provide computers for Amadeus, a leading international travel reservation system.

IBM demonstrated for the first time at PC-Expo the simultaneous delivery of four full-screen motion video files supported by a Token Ring network to four remote personal computers.

#90170u2502 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - The United States is not going to turn its back on the Middle East situation despite recent frustrations in getting the peace process on track again, a senior administsration official said Tuesday.

''Clearly our patience is not unlimited on this,'' he added, saying that President Bush ''will know better how to proceed when we get a response'' from his letter to Israeli Prime Minister Yitzhak Shamir.

''The United States is not going to turn its back on the Middle East situation,'' he told reporters. ''We have a lot of friends out there ... Israel and the Arab states.''

The official, who requested anonymity, also said that there is no dispute between Bush and Secretary of State James Baker on how to deal with the Middle East problem.

Last week, Baker displayed his frustration with the stalemate in peace efforts by publicly announcing the White House telephone number and telling Israel when it is ''serious about peace, call us.''

A few days later, Bush sent a letter to Shamir a few days ago congratulating him on the formation of his government and saying that ''Israel's security and well-being remain an important concern to the United States,'' White House press secretary Marlin Fitzwater reported Tuesday.

Fitzwater said that in his letter Bush ''said he looked forward to working with Mr. Shamir on enhancing the freedom of Soviet Jews,'' and ''he reiterated his view that Israel's settlement activity constitutes a significant obstacle to peace.

''He reiterated his strong support for the Israeli government's May 14, 1989 initiative as the most realistic way forward in the peace process,'' Fitzwater added.

He also noted that Bush had asked Shamir for his views on the peace process ''and how they would like to proceed.''

Shamir acknowledged receipt of the letter Monday, but did not indicate when he would prepare a reply.

Fitzwater said the administration was more hopeful because ''we now have an entity to work with,'' meaning a new Israeli government.

HARTFORD, CONN (JUNE 19) UPI - Philip R. Roberts will step down at the end of the month as head of investment operations at Aetna Life & Casualty, the insurance giant announced Tuesday.

Roberts, a senior vice president who has headed the investment operations since 1985, said that after 25 years with Aetna he wanted to explore other opportunities.

Roberts joined Aetna in 1964 as a securities analyst and worked his way up through the ranks to become senior vice president for investments and chief investment officer in 1985.

His successor will be named shortly, Aetna said.

Roberts will continue to serve as the company's representative to the board of directors of the holding company for the Municipal Bond Investors Assurance Corp., which insures municipal bonds.

WASHINGTON (JUNE 19) UPI - A House-Senate conference committee on child care completed most if its work Tuesday, but Rep. Thomas Downey, D-N.Y., said decisions made so far could not win House or White House approval.

The House and Senate have passed child care bills with different funding levels and widely different approaches.

The House bill, costing about $27 million over five years, would authorize an increase in the existing Social Services Block Grant, or Title XX, entitlement program. The Senate bill, costing about $10 billion over four years, would authorize a new program of grants to states for child-care services.

The conference members from the House and Senate labor committees basically accepted the general framework of the Senate bill, which had been titled the Act for Better Child Care, or ABC. The conferees agreed - in a symbolic move - to retitle it Child Care, Development and Improvement Act. They also agreed on a $1.8 billion funding level for fiscal year 1991.

''This is an exercise in massive denial,'' Downey said, noting the House specifically voted against a grants approach and the President Bush threatened to veto a bill that looked like the Senate version.

''This is ABC by another name,'' Downey said.

The negotiators also left to another conference committee the task of figuring out how to finance the bill.

House conferees had been instructed to deal with block grant increases in the other conference committee, which is comprised of members of the Senate Finance and House Ways and Means committees.

''You're trying to create a bill,'' Rep. George Miller, D-Calif., said to Senate conferees, ''that we're not allowed to debate.''

Downey urged a delay until there were discussions with the tax conferees and the White House. The motion was rejected.

''To pack our bags and wait for what the Senate Finance and House Ways and Means committees do is ridiculous,'' said Sen. Christopher Dodd, D-Conn.

Dodd said White House chief of staff John Sununu told him in a telephone conversation the door was still open to discussions but the funding level would be a key factor.

Rep. Dale Kildee, D-Mich., said the time has come for Senate Democratic leader George Mitchell of Maine and House Speaker Thomas Foley, D-Wash., to enter the discussions.

''The leadership will take the next step. Foley and Mitchell will begin to assert themselves more to resolve the conflicts,'' Kildee said.

The conferees agreed to expand Head Start program so low-income children are cared for all day. They also agreed that any agency receiving child-care grants of more than $50,000 will provide both early childhood development services and before- and after-school child care services for so-called ''latchkey'' children.

#90170u2589 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - The leading bank creditors of Donald Trump were within striking distance of an accord late Tuesday on reviving a $60 million bailout package for the debt-burdened developer, a bank source said.

''They were making progress,'' the source said, referring to the 30 bankers and lawyers who have met at Trump's headquarters for weeks seeking to work out a solution to his acute cash-flow crisis. ''They were getting closer, absolutely.''

Negotiators established the general lines of a Trump rescue plan, similar to one that collapsed last week. ''But there was no agreement in principle yet,'' the banker said, adding that one could be reached overnight.

For three weeks, the cash-strapped dealmaker has been scrambling to refinance the $2 billion in bank debt he owes on the Trump Shuttle, the Plaza Hotel, the Grand Hyatt Hotel and other holdings and to service $1.3 billion in publicly traded debt on his three Atlantic City casinos.

With his financial destiny still in a holding pattern, Trump's East Coast air shuttle announced Tuesday it had made a $1 million interest payment on a Citibank loan taken out in connection with its $365 million acquisition from Eastern Airlines last year.

H. Charles Wedel, the Trump Shuttle's executive vice president for finance

said in a statement that the monthly payment on shuttle bank debt was made ''on a timely basis consistent with past practices.''

But Trump's Castle Funding Inc., the company behind his Trump's Castle casino in Atlantic City, remained in technical default on payment of $42.6 million in interest and principal on two series of junk bonds. Trump failed to make the bond payments Friday, when they were due at midnight.

If Trump has not made the overdue payments by midnight next Tuesday, he could face foreclosure by bondholders and possible bankruptcy.

''The clock is ticking and they need to wrap it up, or they're going to try to by this week sometime,'' the source said, referring to negotiators in the talks taking place in Trump Tower's 26th-floor offices.

The banker said Trump's two largest creditors, Bankers Trust New York Corp. and Citicorp, would put up proportionately larger shares of a $60 million new cash line than Chase Manhattan Corp. and Manufacturers Hanover Corp.

He said Bankers Trust and Citicorp would probably put up better than half of the credit extension to Trump but gave no further details.

Three New Jersey banks, First Fidelity Bancorp., Midlantic Corp. and a National Westminster Bank subsidiary, would put up even less.

The banking source cautioned that even if the main banks to which Trump owes a total of about $2 billion agree on how to pull him out of his deep financial quagmire, they still must get approval from subordinate lenders.

He said the talks were headed by Joseph A. Manganello Jr., a Bankers Trust executive vice president whose speciality is working out troubled debtor situations. ''He's the one who presents the offer sheet which is passed around,'' he said.

#90170u2605 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - President Bush, bestowed with the Sheldon Coleman Great Outdoors Award Tuesday night, called on environmentally minded Americans to urge Congress to not ''leave our tree planting initiative out on a limb.''

''We're doing our part to build that spirit (of environmental renewal),'' Bush said in remarks prepared for acceptance of the award, named for the Wichita, Kan., industrialist who amassed a fortune with a line of camping equipment. His son, Sheldon Coleman, now president of Coleman Enterprises, attended the black-tie dinner.

Noting his own backing of public-private partnerships to protect the country's natural resources, Bush also pointed to his much-touted plan to expand America's parks and forests by planting a billion trees a year.

''Tonight, I want to ask for your help,'' the self-styled environmental president said to the conservation-minded crowd of about 350. ''I've seen too many budgets frittered away on other priorities. We all agree that trees are good for our water, good for our air, good for our communities.

''So take this message to the legislative branch: Don't leave our tree planting initiative out on a limb,'' Bush said.

With a host of environmental concerns now under debate - including current efforts to help Third World countries cut use of ozone-depleting industrial chemicals - the president made no mention of other contentious questions, including Clean Air legislation pending on Capitol Hill or a decision he has been weighing for weeks on whether to allow drilling off part of the coasts of California and Florida.

#90170u2626 06/19/1990 ~United Press International

NEW YORK (JUNE 19) UPI - The stock market closed higher Tuesday in very light trading, but the blue chips, which posted their steepest drop in months Monday, outperformed the broad market.

The Dow Jones industrial average, which plunged 53.71 Monday, its biggest slump since January, rose 11.38 to close at 2893.56.

Among broader market gauges, the New York Stock Exchange composite index added0.68 to 195.61 and Standard & Poor's 500-stock index rose 1.59 to 358.47. The price of an average share gained 13 cents.

Advances led declines 771-708 among the 1,999 issues crossing the NYSE tape. Big Board volume totaled 134,930,000 shares, compared with 133,470,000 shares traded Monday.

In the wake of Monday's plunge, the Dow industrials opened lower but quicklyrebounded in early trading as institutions hunted for bargains after Monday's debacle.

After about half an hour of activity, program buying, which is used to profit on price spreads between stocks and stock-index futures, boosted prices further. The broad market, which was lower in the early going, turned higher and the blue chips built on their gains.

Before midday a round of computerized selling cut short the bid to recover

from Monday's steep drop and prices drifted lower. But in the afternoon a bout of buying before the end of the quarter, known as ''window-dressing '' bolstered prices.

At the end of the quarter money managers are evaluated on their performance and most like to show they have as much cash as possible invested, especially now with the market near all-time highs, analysts said.

But market watchers generally agreed the day was featureless.

''Today was a non-event,'' said Michael Metz, analyst at Oppenheimer & Co. ''It just looks like we went down a bit too fast on Monday and some who have missed the rally were picking up what appeared to be bargains.''

Metz said program buying boosted prices a little but ''the easing of liquidation pressure is what really helped us along today,'' he said.

''I also think a few market watchers were encouraged that there was no further setback after the big drop Monday, that the market did enough purging in one day,'' he said.

A trader at Shearson Lehman Hutton called Tuesday's action ''just a lack of selling on very light volume. A hundred and thirty five million shares isn't exactly a barn-burner.''

He also attributed the gains to the end-of-quarter phenomenon known as ''window-dressing,'' when money managers try to show they have put all their money to work prior to the evaluation of their performance.

''There's still a lot of cash on the sidelines and with the market near all-time highs people are putting their money into the market to show that they're invested,'' he said. ''Especially because this is the end of the half and how's it gonna look if 30 percent of their funds aren't invested?''

On the trading floor, Occidental Petroleum was the most active issue, down 5 to 26. The company's debt and preferred stock were downgraded late Monday by S&P's, which cited high fixed costs, heavy dividend demands and expected weak earnings. But Occidental said Tuesday it would maintain its $2.50 a share annual dividend rate.

Chrysler followed, up 1 1/8 to 16 5/8, amid speculation of an impending deal with Italian automaker Fiat SpA.

Chrysler officials declined to comment on the reports, which appeared in three trade publications, but have said previously that while Chrysler frequently talks to other companies it plans to remain independent.

Oppenheimer's ''buy'' recommendation, issued Monday, also boosted Chrysler stock. The investment firm claims the stock is very undervalued.

Philip Morris was third, up 1 1/4 to 44. IBM was also actively traded, but unchanged at 118 3/4.

Global Marine was also active, down 1/4 to 4 1/8. Over the weekend, Barron's magazine reported that a money manager who specializes in short selling has targeted three stocks, among them Global Marine, as among his favorites to sell short. In a short sale, an investor is essentially betting the price of a stock will go lower.

Among other blue chips, Boeing was down 3/8 to 58 5/8 in active trading, AT&T rose 5/8 to 42 3/8, General Electric added 5/8 to 69 3/4 and Woolworth rose 3/4 to 33 7/8.

Prices closed narrowly mixed in light trading on the American Stock Exchange.

The Amex Market Value index rose 0.07 to close at 360.83. Declines led advances 303-244 among the 800 issues traded. The price of an average share rose 1 cent. Volume totaled 9,040,000 shares, compared with 11,010,000 shares traded Monday.

Amdahl led the Amex issues, up 3/8 to 15 3/8.

The National Association of Securities Dealers composite index fell 0.26 to 460.53.

#90170u2634 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - The dairy support price would be set at a minimum of $10.10 for the next five years under revisions approved Tuesday by the Senate Agriculture Committee, with special steps to be taken if surpluses get out of control.

The package approved by the committee calls on the Agriculture Department to switch to an inventory management program if it estimates federal purchases of surplus dairy products will exceed 7 billion pounds in one year. It would be up to the department to decide what type of program to run.

However, the panel defeated, 12-7, a proposal by Sen. Richard Lugar, R-Ind., to make a price cut part of the program. It approved, 16-2, language from Sen. Max Baucus, D-Mont., to prohibit a repetition of the 1986 ''whole herd buy out,'' which paid dairy farmers to go out of

business.

The package was tentatively approved for inclusion in the new five-year farm policy law. It is similar to the plan contained in the

House Agriculture Committee version of the farm bill, although the House panel wants a two-tier price system.

Both plans would be a somewhat of change from current policy, adopted in 1985, of raising or lowering the support price to encourage or discourage production. That formula led to the price being cut to $10.10 per 100 pounds of milk at the start of this year.

Senate chairman PatricK Leahy, D-Vt., said the package approved by the committee ''breaks the pattern of price cuts.'' He said the program would fit into the $725 million a year that is expected to be available.

The House and Senate panels would allow the support price to be adjusted in coming years, but only if it does not go below $10.10.

''I think freezing the (minimum) price at $10.10 is reasonable policy,'' Leahy said when Lugar offered his amendment. ''No one is proposing (crop) target price cuts like that.''

''I have offered a very modest suggestion,'' Lugar responded, defending the idea of making a price cut of 25 cents to 50 cents a part of any inventory program.

The government used a herd buy out program in 1986 in efforts to reduce milk production. Cattlemen blamed it for a sudden drop in beef prices in early 1986 and have adamantly opposed any steps that could allow a new buy out.

''This amendment is necessary to avert another disaster,'' Baucus said.

Leahy unsuccessfully argued the committee should not limit the options available for study by the government in designing its inventory program.

The House committee plan would bar herd buy outs, programs that would pay farmers to reduce milk production, or inventory managment programs based entirely on assessments on farmers.

The committee defeated Baucus, 11-7, when he offered an amendment that would require the courts to hear a class-action lawsuit from cattle producers who claim they lost money because of the dairy buy out program.

Members also rebuffed Sen. Pete Wilson, R-Calif., when he asked for elimination of language that would bar California from offering a lower

milk price than other states.

Leahy said the committee would work on feed grains, rice and oilseed support programs Wednesday. The panel has been locked in a dispute over target prices and loan rates for wheat and feed grains for the past month.

-30- 3510

#90170u2658 06/19/1990 ~United Press International

(JUNE 19) UPI - U.S. crude oil prices continued their fall Tuesday as a supportive gasoline market faltered, bringing the drop in crude prices over the past five weeks to about 20 percent.

The benchmark West Texas Intermediate crude for July delivery ended the day on the New York Mercantile Exchange down 29 cents to $15.65 a barrel, the lowest Merc closing price since $15.49 on Dec. 6, 1988.

WTI prices have fallen by 20 percent since the $19.70-a-barrel closing of May 14 and by 25 percent since early April.

Wednesday is the final day of trading the July WTI contract and more of the trading was in the August delivery contract, which becomes the Merc's spot contract Thursday.

August WTI slipped 3 cents to $16.92 a barrel.

Unleaded gasoline for July delivery, which has been the main supporting factor in the market recently, dropped 1.64 cents to 59.92 cents a gallon on the Merc.

The drop in crude prices is mainly due to the glut of oil on world markets and the failure of the 13-nation Organization of Petroleum Exporting Countries to accomplish an output cutback of 1.4 million barrels a day promised in an early May emergency meeting.

OPEC president Sadek Boussena, who was reported Monday as warning ''things may soon get out of control'' in terms of crude prices, started a whirlwind tour of member nations to see what can be done.

''On the surface, an attempt is being made to put Humpty Dumpty together again. Attempts are being made to jawbone the market. I don't think the market is being fooled,'' said Nauman Barakat, first vice president of Shearson Lehman Hutton's International Energy Desk in New York.

''There was no bad news Tuesday. There was only a lack of good news,'' said Barakat.

''There is a feeling the July WTI contract is going to go off the board on

a weak note,'' he said.

Reports of refinery problems have helped sustain gasoline prices in recent sessions. However, ''it turns out the refinery problems are minor,'' Barakat said.

Prompt delivery unleaded was bid 65.30 cents a gallon, down 1.75 cents, on the New York Harbor cash market while losing 1.65 cents on the U.S. Gulf Coast spot market to 60.65 cents a gallon.

On the European crude spot market, Britain's widely traded North Sea Brent was up 20 cents to $15.45 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - lost 10 cents to $12.75 a barrel.

On the U.S. Gulf Coast crude market, prompt delivery WTI fell 25 cents to $15.65 a barrel.

#90170u2677 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - A federal prosecutor told jurors at Mayor Marion Barry's drug and perjury trial Tuesday that the mayor has been ''snorting cocaine and smoking crack for years all over D.C.,'' and a former city worker testified later that he and Barry used cocaine dating back to 1986.

Assistant U.S. Attorney Richard Roberts said in his opening statement that Barry used and supplied drugs to others for at least five years, calling him the ''hub'' in a cocaine conspiracy who was deeply involved in drugs while publicly making anti-drug speeches and lying to a grand jury.

Roberts said the mayor even took delivery of drugs at his City Hall office.

Defense lawyer R. Kenneth Mundy countered that he will prove Barry was entrapped. ''The government said this is a case about deceit,'' he said. ''(But) this is a case about a deal the government made with the devil.''

Barry is charged with three felony counts of perjury, 10 misdemeanor counts of cocaine use and one misdemeanor count of conspiracy to possess cocaine as long ago as 1984. If convicted he could be sentenced to a maximum 26 years in prison and $1.85 million in fines.

''The defendant has been doing for five years what he did before the grand jury'' in January 1989, Roberts said. ''The defendant, Marion Barry, has been exercising deceit and deception.''

Barry, who announced June 13 that he will not seek a fourth term, ''has been snorting cocaine and smoking crack for years all over D.C.,'' Roberts said.

The first witness, Charles Lewis, a former worker for Barry's administration and the government of the U.S. Virgin Islands, testified that he first used drugs with Barry in the Virgin Islands in 1986 and March 1988, and later at a downtown Washington Ramada Inn in December 1988.

At least seven of the 14 counts against Barry, including all three felony perjury charges, directly involve Lewis. Counts 4, 5, 6 and 7 charge Barry possessed cocaine on Dec. 16, 17, 19, and 22, 1988, at the Ramada Inn.

Lewis testified that he and Barry smoked crack from makeshift pipes on Dec. 16 and 17, 1988, inside a hotel bathroom, with Barry bringing $175 worth of the drugs to the hotel inside a matchbox and the cuffs of his pants.

The perjury counts allege Barry lied when he told the grand jury on Jan. 19, 1989, that he never knew Lewis to be involved with drugs or talked to him about drugs, never gave cocaine to Lewis and never received cocaine at the Ramada Inn.

Lewis said Barry ''smoked more than I did. He would sit on top of the toilet and I went out and lied on the bed, watched some TV and drank some wine.''

Lewis testified that Barry took lightbulbs from the bathroom for fear they were being used for surveillance, prompting Barry to laugh.

Lewis said he had not asked Barry to bring the drugs, and later bought drugs on the street with Barry's money to share with the mayor.

''I was surprised that he said when he was in the Virgin Islands I took care of him,'' Lewis testified. ''When I was in Washington he would take care of me.''

Barry has said Lewis would ''lie on the pope'' to help himself, and in his opening statement, Mundy called the government witnesses ''notorious drug dealers'' trying to help themselves.

The defense lawyer said a videotape of the Jan. 18 FBI sting operation that led to Barry's arrest at the Vista International Hotel will show that former model Rasheeda Moore - with whom Roberts said Barry carried on a ''torrid relationship'' for three years - ''warmed (Barry) and that she cajoled him,'' then offered him drugs.

The videotape allegedly shows Barry smoking crack cocaine. Roberts imitated a person inhaling from a pipe, telling the jury that's what they will see Barry do when the tape is shown as evidence.

Mundy countered, ''It will show entrapment, entrapment pure and simple.''

The defense lawyer declared, ''Approximately seven years ago the government made a determination and a quest that it was going to get Mr. Barry. The evidence will show it was prepared to go to any lengths and any

expense.''

Roberts said government witnesses will include the mayor's tennis partners girlfriends, civil rights colleagues and social acquaintances. ''Not all of them are Boy Scouts or Girl Scouts,'' the prosecutor said.

Roberts said jurors will hear from a witness who will testify he brought 2 grams of cocaine to Barry's City Hall office for a 1987 Thanksgiving trip to the Bahamas; a woman who brought cocaine and a job application to Barry in 1988; a man who will explain how Barry used the corner of a business card ''to scoop cocaine into his nose;'' and a friend from Barry's civil rights days who will testify Barry made cocaine-laced cigarettes. ''He sometimes called those 'M.B. Specials,''' Roberts said.

Mundy asked jurors to ''clean the slate'' of preconceptions as if ''awakening from a deep sleep.''

The defense lawyer said evidence will show that on Jan. 18 the government ''provided the pipe and provided the drugs and provided the know-how and Miss Moore (showed) Mr. Barry how to light the (crack) pipe.''

''You watch the videotape and see who brings up the subject of drugs,'' Mundy said.

Lewis, 49, was sentenced Jan. 19, to 15 months in prison for two counts of cocaine distribution, and fined $5,000. Under a plea agreement, 14 other felony counts - which carried the possibility of more than 150 years in prison - were dropped. Lewis was released from federal prison this month. He still faces sentencing for a drug

#90170u2695 06/19/1990 ~United Press International

SAN FRANCISCO (JUNE 19) UPI - Coordinators of the Sixth International Conference on AIDS said Tuesday they hoped to avoid disruptive demonstrations that have marred previous meetings.

On the eve of the major AIDS conference, activist groups in several cities vowed to march on offices of the Immigration and Naturalization Service to protest policies that restrict travel into the U.S. for homosexuals and those who are infected with the AIDS virus.

Scientists said activists would be represented at the conference, being held to create ''important interaction and dialogue'' among researchers and health professionals.

Dana Van Gorder, a conference coordinator, said the ''politics of outrage'' was present at the four-day gathering of some 10,000 scientists,

researchers and health workers.

Demonstrations outside of the Moscone Center focused on U.S. immigration policies, the lack of research funding for certain types of AIDS carriers and the need for early intervention programs and services.

Van Gorder said those who were HIV infected - carrying the AIDS virus - ''hope to use this conference to reach the hearts and minds of the medical community. ''They want to convince the medical community to join them in the areas of risk reduction, medical assistance, and outreach programs,'' Van Gorder said.

Dr. Paul Volberding, a leading AIDS researcher at the University of California at San Francisco, which is the host of the conference, said there would be an important exchange of information on research, treatments, and health care services that he hoped would not be disrupted by demonstrations.

''Our intent is to permit dialogue,'' said Volberding, the national coordinator of experiments with AZT, the only drug shown to prolong the lives of AIDS patients. ''We hope the disruptions won't occur inside. That's why we've given space in the program for other voices.''

Dr. Robert Wachter, the conference's program director, said the boycott of the conference by 100 international organizations to protest immigration law had ''some impact'' on registration but ''the quality of the conference has been maintained.'' He said there were about 10,000 registered participants from 74 nations, including Eastern Europe and China.

Leon McKusick, co-chairman of the Community Task Force which worked with UCSF in planning the conference and who is infected with AIDS, said passes were given to 375 HIV-infected people to assure them a voice within the proceedings.

He noted at the last AIDS confernece in Montreal, the opening speakers could not be heard because of disruptions by activists.

''We wanted to be assured that what could only be heard from the sidelines in Montreal last year would be heard from the podium this year,'' McKissick said. ''We want the scientists to see and hear our grief - our struggle to survive.''

San Francisco police, under criticizm for overreacting in past demonstrations, have approached the AIDS conference with a new crowd control manual that calls for a less forceful approach to explosive situations. They have also been providing AIDS education classes for officers and have assigned special ''gay sensitive'' units to the

demonstration sites.

President Bush was invited to speak at the opening ceremonies but declined. Instead he was scheduled to be in North Carolina with Sen. Jesse Helms, R-N.C., who authored the INS regulation that prevents travel into the U.S. for persons with the HIV virus.

WASHINGTON (JUNE 19) UPI - Bush administration officials told a House subcommittee Tuesday there is no ''consistent pattern'' of harassment of Chinese students in America by officials of their government - a finding strongly disputed by the panel's chairman.

''I'm not sure we're living in the same universe,'' Rep. Stephen Solarz, D-N.Y., said after being told of the administration's conclusion by Kent Wiedemann, director of the State Department's office of Chinese and Mongolian affairs.

If China is harassing its students in America, it would be ineligible for credits and export licenses for such goods as communications satellites and navigational equipment under a law written by Solarz, chairman of the Asian and Pacific affairs subcommittee of the House Foreign Affairs Committee.

But after Solarz and Wiedemann both attended a closed FBI briefing on the subject they disagreed over whether Chinese officials have been engaged in a systematic campaign since last June's Tiananmen Square massacre to harass pro-democracy activists among the nearly 50,000 Chinese students in America.

Wiedemann said based on frequent contacts with the FBI, the State Department knew of ''a number of actions'' by Chinese Embassy officials that ''could well have an intimidating effect on students.''

But, he said, the evidence of Chinese activities ''taken as a whole, does not reach the threshold of a consistent pattern of harassment and intimidation that would call for determination under the (Solarz) amendment.''

Wiedemann said there had been about 25 incidents of harassment that he knew of and that harassment was dwindling.

But Solarz said there were probably hundred of cases of Chinese students being threatened or intimidated and called the State Department official's interpretation Orwellian.

''I consider your testimony, sir, to be shocking. ... We are not talking about isolated incidents. We are talking about a pattern,'' Solarz said. ''Do we have to get you the transcript (of the FBI briefing), if you were not paying attention?''

Moreover, Solarz said Chinese Embassy documents disclosed by Xu Lin, an embassy official who defected last month in Washington, constituted a ''smoking gun,'' showing a plan by Chinese officials to harass students.

Xu, speaking through a translator, told the subcommittee the ''major task'' of education officials at the embassy was to intimidate Chinese students in the United States so they would not take part in pro-democratic activities.

Solarz said he and other members of the subcommittee would write President Bush calling on him to penalize China under the Solarz amdendment. He also said he would consider rewriting the 1981 law to take away the president's discretion in determining violations.

#90170u2715 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - A group of greek investors have paid $2.8 million to buy an 11.9 percent stake in Global Ocean Carriers Ltd., of Greece, documents filed with the Securities and Exchange Commission showed Tuesday.

The investors, who now own 252,000 shares of Global's common stock, said in the Schedule 13D filing that they were buying the stock solely for investment purposes.

Global is based in Greece, but its stock is listed on the American Stock Exchange.

The investors included Michael Jolliffe, the president of Global, and Sovereign Navigation Corp., a shipping management company that has a management contract with Global. Nikolas Tsakos, another one of the investors, is a director for both Global and Sovereign.

The investors used personal and general corporate funds to finance most of their purchases, although Merrill Lynch, Pierce, Fenner & Smith Inc. provided some financing.

A Schedule 13D must be filed with the SEC by investors who have acquired more than five percent of a company's stock outstanding. The filing includes information on the size of the purchase and the investor's intent in acquiring the stock.

#90170u2717 06/19/1990 ~United Press International
(JUNE 19) UPI - The House Judiciary Committee today narrowly voted to send a controversial amendment to ban desecration of the American flag to the full House. The move follows last week's 5-4 Supreme Court ruling holding flag burning is constitutionally protected free speech. Opponents are openly predicting defeat for the measure, which must be adopted by two-thirds of the House and Senate and three-quarters of the states to become a Constitutional Amendment.

The Bush administration today blamed the Democrats for the multi-BILLION-dollar savings and loan mess. White House news secretary Marlin Fitzwater said... for the first time... Democrats aggravated the situation because they pushed through a higher limitthousand dollars- on the amount that could be insured by the government and eventually made the bail out more costly.

The gunman who yesterday killed eight people and wounded five others in Jacksonville, Florida, began his rampage a day earlier. Authorities say 42-year-old James Edward Pough fatally shot an alleged prostitute and her pimp early Sunday morning... and then wounded two teen-agers 10 minutes later. Yesterday's massacre took place at a General Motors auto finance office. The shooting spree ended with Pough's suicide.

Sparks are flying in the drug and perjury trial of Washington, D-C, Mayor Marion Barry. In opening statements today, prosecutors said Barry had been ''snorting cocaine and smoking crack for years all over D-C'' and repeatedly lied to his constituents and a grand jury about it. Barry's lawyers countered by saying the government's case is based on entrapment ''pure and simple.''

-30- 1813
#90170u2755 06/19/1990 ~United Press International
(JUNE 19) UPI - A man accused of recruiting the white mob that killed a black teen-ager in New York City's Bensonhurst neighborhood last summer earlier testified someone in the gang was carrying a gun. 21-year-old John Vento made the admission before a grand jury. Today, the judge hearing the defendant's murder trial refused to suppress the testimony. Vento is the third of eight young men charged in the killing to go on trial. Two already have been convicted.

Also in New York today, a shouting match erupted between the judge and a defense attorney at the Central Park jogger trial. Three defendants are accused of beating and gang raping a 29-year-old investment banker and leaving her for dead in April 1989. The victim is white and the defendants are black and Hispanic. Tempers flared when the defense questioned whether

racial prejudice against minorities brought intense media coverage of the case.

U-S businessmen today warned a congressional subcommittee that withdrawing China's most-favored-nation trading status would have dire side effects on American industry. The testimony was part of a congressional study on whether to accept President Bush's recommendation to renew favored trade status with China. The proposal is under fire because of China's brutal crackdown on pro-democracy demonstrators last year.

The Journal of the American Medical Association reports that a study of 55-hundred college freshman in Canada found most of them were sexually active, but relatively few of them used condoms regularly. Researchers say that puts the students at ''high risk'' for acquiring such sexually transmitted diseases as gonorrhea and chlamydia and at ''substantial risk'' for contracting AIDS.

(JUNE 20) UPI - SPORTS DIGEST

Baseball

Juan Gonzalez, the youngest player in the American Association, was named minor league Player of the Week for the period ending June 17. The 20-year old outfielder batted 13 for 25 (.520) with six homers and 18 RBI for Oklahoma City, the triple-A affiliate of the Texas Rangers.

Basketball

Georgetown Coach John Thompson said he has yet to decide if he will accept an offer to become general manager of the Denver Nuggets. Thompson, who has the opportunity to eventually own almost 4 percent of the franchise and earn a $700,000 annual salary, said he will make his decision ''as soon as possible'' but no timetable has been set.

College

Kentucky basketball coach Rick Pitino disclosed plans for a chain of full-service car washes bearing his name, with his portion of the proceeds being donated to charity. Up to 20 Rick Pitino Car Care Centers are being planned for locations throughout Kentucky.

Cycling

Rolf Jarmann of Switzerland won the eighth stage of the Swiss Cycling Tour covering 133.3 miles from San Bernardino to Lenzerheide in 5 hours, 27

minutes and 31 seconds. Countryman Marco Diem finished second, 52 seconds behind. Sean Kelly of Ireland maintained the overall lead.

Football

In an effort to boost attendance, the Arena Football League's Pittsburgh Gladiators are planning a so-called ''Guaranteed Win Night.'' If the Gladiators lose to the Washington Commandos Friday, all fans who purchased tickets will receive a free ticket to the Pittsburgh-Denver Dynamite game on June 29. ...The Moscow Bears, the best Soviet football club in a 24-team league known as the USSR American Football League, will visit Tacoma, Wash., Fresno, Calif., Oklahoma City, Macon, Ga. and Charlotte, N.C. in an exhibition tour beginning June 29. It will be the first exhibition of a Soviet American football team.

Golf

U.S. Open champion Hale Irwin and runner-up Mike Donald will compete in the Buick Classic at Westchester Country Club in upstate New York June 18-24.

Hockey

Bob Gainey, a five-time Stanley Cup champion and the NHL's premier defensive forward in his prime, was named coach of the Minnesota North Stars by General Manager Bob Clarke. Gainey, who spent 16 seasons with the Montreal Canadiens, spent last season as a playing coach for Epinal, a second-division French team.

Horse Racing

Monmouth Park in New Jersey is simulcasting the top races from the Royal Ascot meet in Ascot, England, this week from Tuesday until Friday. Three races each day from the prestigious British race meet will be carried via closed-circuit television before live racing begins at the track.

Soccer

Eric Cantona, the French international striker who was suspended from the squad after feuding with its head coach, will likely be in a Marseille uniform again next season, a the French newspaper L'Equipe reported.

#90170u2784 06/19/1990 ~United Press International

AGASSIZ, BRITISH COLUMBIA (JUNE 20) UPI - Police searched fruitlessly Tuesday for two inmates who escaped from a maximum-security prison a day earlier in a hijacked helicopter that plucked them from an exercise yard.

Authorities identified the escapees as Robert Lee Ford, 32, serving a life sentence for premeditated murder, and David Ross Thomas, 24, serving eight years for robbery, breaking and entering and parole violations.

''We are concerned, particularly about Ford who has a history of violence '' said Dianne Brown, a spokesman for Correctional Services of Canada.

The helicopter touched down just before 9 a.m. Monday amid a crowd of prisoners in the yard at the Kent Institution in Agassiz, 80 miles east of Vancouver.

The two inmates jumped into the aircraft, which lifted off while an armed man inside exchanged gunfire with prison guards, wounding one of them in the knee.

#90170u2804 06/19/1990 ~United Press International

MEXICO CITY (JUNE 19) UPI - Mexico earned 113 percent more from coffee last year by allowing the ''free export of coffee grain'' and increasing shipments after International Coffee Organization members failed to reach an agreement on quotas, the Commerce Ministry said Tuesday.

From July 1989, when the organization's agreement was suspended, through the end of last year, the volume of Mexican exports grew by 231 percent, offsetting a drop in international prices from $2,900 a ton to $1,800 a ton and translating into a 113 percent net revenue gain over the same period the previous year, the ministry said in a communique.

Also in the latter half of 1989, Mexican exports rose to 186,821 tons from 56,354 tons in the same period in 1988. Net income from coffee exports rose from $161 million to $343 million in the same periods, the ministry said.

Mexican coffee sales to the United States grew by 70 percent in the second and third quarters of 1989, rising from 13 percent to 22 percent of U.S. coffee imports.

''Given that Mexico has had an excellent performance compared to other producers, our country will have strong arguments to back a request for an increased quota in the event ICO members decide to bring back the system of restrictions on export quantities,'' the ministry said.

#90170u2832 06/19/1990 ~United Press International

BRIDGEPORT, CT (JUNE 19) UPI - The reputed head of the Gambino organized

crime family in Fairfield County was sentenced to nearly six years in prison Tuesday and fined $100,000 for income tax evasion and conspiracy to commit racketeering.

Anthony Megale, 36, of Stamford received five-year sentences for each of two federal counts of tax evasion and a sentence of five years and 11 months for conspiracy to violate the federal racketeering law, all to be served concurrently.

U.S. District Judge T.F. Gilroy Daly also fined Megale $100,000 for the racketeering charge and ordered him to pay $1,415.56 each month for the cost of his incarceration at the Federal Correctional Institution in Danbury.

Megale also must pay $96.66 each month during three years of supervised release he must serve immediately after completing his prison term.

''It's a very good sentence,'' said U.S. Attorney Stanley A. Twardy. ''We now have the most recent head of the Gambino family in Fairfield County behind bars and the rest of the leadership will soon be there, too.''

Megale had pleaded guilty April 17 to conspiring to violate the federal racketeering law and to two counts of evading $54,522 in income taxes.

The charges carried a maximum 30-year prison term followed by 11 years of supervised release and $750,000 in fines.

Less than two weeks later, Megale tried to withdraw his guilty plea, but Daly rejected the request.

The government accused Megale of overseeing illegal sports betting and numbers operations throughout Fairfield County, just outside of New York City.

The government also claimed he oversaw Harry Riccio's alleged 199-member sports bookmaking operation and Aurelio Carmolingo's alleged loan-sharking operation.

Riccio, 56, and Carmolingo, 58, both of Bridgeport, were scheduled to be sentenced Wednesday by Daly on related charges, said Twardy.

On Monday, Daly sentenced Joseph Percy, 68, of Stamford to six months in prison on a gambling conviction stemming from the case.

Federal prosecutors Tuesday also have accused Megale of violating his bail conditions by twice traveling outside the state last month without court permission and meeting once with a high-ranking organized crime figure in New York's Little Italy section.

They claimed that on May 10, Megale was observed in the company of Giuseppe ''Joe'' Gambino, who they described as ''a reputed capo regime in the Gambino family of La Cosa Nostra.''

#90170u2860 06/19/1990 ~United Press International

WASHINGTON (JUNE 19) UPI - Ranchers, farmers and feedlot operators in the seven major beef states sent 1.8 million feed cattle to slaughter last month, the largest May figure in 18 years, the Agriculture Department reported Tuesday.

The marketings were 3 percent larger than May 1989 and 4 percent larger than the preceding May.

''This is the largest May total since the seven-state (reporting) series began in 1972,'' the department said.

Producers had 7.87 million head on feed at the start of this month, the department said, up 1 percent from last June but 3 percent less than in June 1988.

The department said 1.63 million head were put on feed to be fattened for slaughter during May, up slightly from May 1989 but 25 percent smaller than the May record of 2.18 million set in 1988.

Iowa had the largest increase among the major states for this May, up 8 percent for a total of 915,000 head on feed. Colorado had the largest decrease, down 7 percent to 855,000 head.

Kansas was down 6 percent for a total of 1.56 million head on feed. Arizona was up 1 percent to 172,000 head, Texas up 2 percent to 2.06 million head, California up 4 percent to 395,000 head and Nebraska up 6 percent to 1.91 million head.

#90170u2868 06/19/1990 ~United Press International

LOS ANGELES (JUNE 19) UPI - The Los Angeles Raiders have acquired running back Greg Bell from the Los Angeles Rams for an undisclosed draft choice, the team announced Tuesday.

Bell, 27, rushed for 1,137 yards last year while leading the NFL with 15 touchdowns. In his first full season with the Rams in 1988, he gained 1,212 yards and paced the league with 18 TDs.

The six-year veteran from Notre Dame could replace veteran Marcus Allen as

the Raiders' No. 1 tailback. Allen, 30, fell out of favor with management last year when he missed the exhibition season in a contract dispute, then missed much of the regular season with injuries.

Bell, who came to Los Angeles from Buffalo in the three-team Eric Dickerson trade in 1987, became expendable when the Rams signed free agent Curt Warner of Seattle March 30.

The draft pick involved reportedly is a middle-round 1991 selection.

Bell, due to earn $475,000 this season in the final season of a 2-year contract, stayed away from the Rams' recent minicamp in a bid to force the team to renegotiate. His departure still leaves Cleveland Gary, Robert Delpino, Buford McGee and Gaston Green in a crowded Rams backfield.

Bell, 5-foot-11 and 210 pounds, ran for 1,100 yards with the Bills as a rookie in 1984. For his NFL career, he has gained 4,795 yards on 1,157 carries for a 4.1-yard average and 50 touchdowns. He has also caught 152 passes for 1,263 yards and seven TDs.

#90170u2956 06/19/1990 ~United Press International

ANKARA, TURKEY (JUNE 19) UPI - Iran has asked Turkey to ban the Hollywood spy spoof ''The Naked Gun'' on grounds the movie insults the late Ayatollah Ruhollah Khomeini, a Foreign Ministry spokesman said Tuesday.

Iranian Ambassador Mohammed Reza Bagheri visited the Foreign Ministry in Ankara Saturday and asked the government to bar the comedy, currently showing in three cinemas in Istanbul and one in Ankara, the spokesman said.

The film, a send-up of James Bond movies and other American spy thrillers, has become the latest irritant straining relations between the two Middle East neighbors.

Bagheri complained the film is littered with obscenity and mocks Khomeini, the founder of the Islamic Republic. Turkey responded that it would look into the matter.

''The Naked Gun,'' starring Leslie Nielsen and directed by David Zucker, portrays Khomeini with a punk haircut in one scene. Bagheri was also offended that it presents the former leader as a supporter of violence.

Khomeini is not the only foreign leader mocked in the film. It also boasts unflattering portraits of Soviet President Mikhail Gorbachev, Libyan chief Moammar Gadhafi, Palestinian leader Yasser Arafat and former Ugandan dictator Idi Amin.

In Tehran, the Iranian Foreign Ministry summoned Turkish charge d'affaires Mufit Ozdas and protested against the screening of the film in Turkey, the official Islamic Republic News Agency said.

''The film, on screen in Turkish cinemas since last Friday, has impudently insulted the late leader of the Islamic revolution Imam Khomeini,'' IRNA said.

On Sunday, Iran accused Ozdas of trying to smuggle Iranian antiques out of the country, Reports in the Turkish press said Ozdas's car was stopped on an Iranian highway and searched, despite his diplomatic immunity.

The Foreign Ministry in Ankara issued a statement Monday saying Ozdas was innocent of the charges brought against him and described the action against him as being contrary to established legal and diplomatic practice.

The hard-line Tehran newspaper Abrar Tuesday called for Ozdas to be expelled from Iran, IRNA said.

Despite the strained relations, Iranian Foreign Minister Ali Akbar Velayati was scheduled to visit Ankara Thursday.

#90170u3009 06/19/1990 ~United Press International

(JUNE 19) UPI - The House Judiciary Committee voted narrowly today to sent the constitutional amendment banning flag desecration on to the full House for a vote. Members of the panel argued for six hours over the controversial measure. Democratic House Speaker Thomas Foley says he's pushing for a full House vote later this week and predicts it will be ''very close.''

White House and congressional budget negotiators discussed taxes on Capitol Hill today. The session marks the first time since the bipartisan talks began May 15th that tax and revenue options were on the agenda, but negotiators say NO progress was made. One leading Democrat says if White House budget director Richard Darman fails to put a proposal on the table tomorrow, ''it's possible'' Democrats will walk out of the talks.

Defense Secretary Cheney today defended what he called ''the overall quality'' of the U-S invasion of Panama. He says the so-called ''friendly fire'' casualties suffered by American G-I's do NOT detract from the operation's success. His comments come as the Pentagon says only 16 American soldiers were shot by other U-S troops last December. Other estimates put the number of wounded by fire from other Americans at 19.

A torrent of criticism today drowned out Soviet President Gorbachev's vigorous defense of his reform policies. Hard-line conservatives called

for the Soviet leader's resignation at the Russian republic conference in Moscow. Gorbachev can expect the salvo to continue next month at the crucial 28th Communist Party Congress... as more than five-thousand delegates struggle over whether to adapt to democracy or fight it.

-30- 1820

#90170u3020 06/19/1990 ~United Press International

(JUNE 19) UPI - South African black nationalist leader Nelson Mandela today sought help from students in Toronto, Canada, for impoverished blacks denied an education under South Africa's apartheid system. Mandela challenged students to establish a fund to help students in his country attain a higher education. He says black education in South Africa is far inferior and that the situation has become ''intolerable.''

A former city worker in the nation's capital testified he and Washington, D-C, Mayor Marion Barry used cocaine dating back to 1986. A federal prosecutor charged Barry was deeply involved in drugs for years, while publicly making anti-drug speeches and lying to a grand jury. The defense attorney used his opening statements to say he will prove Barry was entrapped.

Dorothea Puente showed NO emotion today when a judge in Sacramento, California, ruled enough evidence was presented to hold the former landlady for trial. The 61-year-old Puente is charged with poisoning nine tenants and burying seven bodies in the backyard of her boardinghouse near the state Capitol. The case came to light in 1988. Prosecutors charge the victims were poisoned for their benefit checks.

Today's grand opening at the world's largest hotel might have been fit for the king whose sword it was named after. The Excalibur... the newest addition to the Las Vegas strip... opened amid blaring trumpets, costumed courtiers and a balloon-filled sky. The hotel cost an estimated 290-Million dollars to build and has some four-thousand rooms... starting at 45-dollars a night.

-30- 1747

#90170u3138 06/19/1990 ~United Press International

(JUNE 19) UPI - Damaging testimony at Washington Mayor Marion Barry's drug trial... flag desecration bill heads for House vote... strident security for Mandela visit... and a former F-D-A official is indicted. U-P-I has it next:

A federal prosecutor told jurors at Marion Barry's drug and perjury trial today the Washington mayor has been ''snorting cocaine and smoking crack for years all over D-C.'' A former city worker later testified he and Barry used cocaine dating back to 1986.

Assistant U-S Attorney Richard Roberts used his opening statement to call Barry the ''hub'' in a cocaine conspiracy... saying the mayor was deeply involved in drugs while publicly making anti-drug speeches and lying to a grand jury. Roberts charges the mayor even took delivery of drugs at his City Hall office.

Defense lawyer R. Kenneth Mundy countered by saying he will prove Barry was entrapped. The defense lawyer pointed to a videotape of the January 18th F-B-I sting operation that led to Barry's arrest. Mundy says the tape shows a former model cajoling the mayor... then offering him drugs. The video allegedly shows Barry smoking crack cocaine.

Barry, who announced June 13th he will NOT seek a fourth term, could be sentenced to a maximum 26 years in prison if convicted.

Members of the House of Representatives are set to have it out over the proposed amendment to ban flag desecration.

The measure was sent on to the full House today by the Judiciary Committee.

Committee members argued for six hours and suffered two failed votes before the measure squeaked by, 19-17, with NO recommendation.

The close vote already has opponents of the amendment predicting its downfall in the full House.

Democratic House Speaker Thomas Foley of Washington says he was encouraged by the fact that ''a number of prominent conservatives'' have spoken out against the issue.

He says he will push for a vote on the flag measure on Thursday.

But Republicans reportedly hope to put off the vote until next week, giving them time to muster support.

The anti-desecration measure must be adopted be adopted by two-thirds of the House and Senate and three-quarters of the states to become a constitutional amendment.

-30- 2409

#90170u3165 06/19/1990 ~United Press International

(JUNE 19) UPI - From the moment South African black nationalist leader Nelson Mandela steps off the plane at New York's Kennedy International Airport tomorrow, ''Operation Topaz'' will be in operation.

Officials say that is the codeword for the largest security effort ever

undertaken by the State Department.

The plan includes protecting Mandela with air-born helicopter patrols, a small army of 12-thousand police, federal agents and a bullet-proof truck dubbed the ''Mandela Mobile.''

Meg Ravnholt, a spokeswoman for the Diplomatic Security Bureau in Washington, says the security job is much more complicated than usual given Mandela's string of public-speaking engagements.

She says her department has NEVER handled the scope of anything like tomorrow's planned ticker tape parade and that all precautions are being taken.

Mandela has some Canadian business to wrap up before he touches down in the ''Big Apple.''

The black leader today sought help from students in Toronto for impoverished blacks who canNOT afford higher education under South Africa's system of apartheid.

Mandela challenged them to help establish a fund for black students in his homeland.

Federal prosecutors today indicted the former director of a Food and Drug Administration division on two counts of perjury for allegedly lying to government investigators about his contact with pharmaceutical manufacturers.

U-S Attorney Breckinridge Willcox says Marvin Seife... who retired from his post as head of the F-D-A's generic drug division late last year... is the highest-ranking official to be indicted in the two-year investigation.

The corruption probe centers on whether pharmaceutical makers were allowed to substitute drugs for those that had been approved for sale.

The charges contend that Seife lied to investigators when he said he was NEVER wined or dined by executives of drug companies.

Four officials who worked for Seife's F-D-A division already have been convicted of corruption and racketeering charges in the continuing investigation, which began in 1988.

Seife faces up to 10 years in prison and 500-thousand-dollar in fines if convicted.

-30- 2363

#90170u3178 06/19/1990 ~United Press International
(JUNE 19) UPI - South Africa's parliament today approved a major bill that scraps all laws racially segregating public amenities.

The bill... proposed by President Frederick de Klerk in November... is set to go into effect on October 15th. It will integrate trains, buses, toilets, libraries, swimming pools and other facilities.

The African National Congress has welcomed the action, but its leaders say it is ''a small step'' toward the ultimate goal of dismantling the apartheid system.

A-N-C leader Nelson Mandela has said the issue of separate amenities is ''NOT very important'' given the broad range of reforms needed.

An A-N-C spokesman says there are laws still on the books that segregate suburbs, reserve the majority of land for whites, and classify people by race.

In addition, the South African Parliament permits NO black representation, segregated or otherwise.

New York City Mayor David Dinkins today accused the federal government of punishing the nation's cities.

Speaking to the U-S Conference of Mayors in Chicago, Dinkins said Washington is transfering responsibility in such areas as mass transit and housing to the cities, without providing the necessary resources. He asked the government to use the so-called ''peace dividend'' to alleviate the urban problems.

Dinkins took exception to yesterday's remarks by fellow Democrat Dan Rostenkowski, chairman of the powerful House Ways and Means Committee. The Illinois Congressman said money from the ''peace dividend'' will be used to bail out the ailing savings and loan industry.

Dinkins told some of the 250 mayors attending the conference the S-and-L crisis shows federal money abounds... and the government should stop treating cities like ''foreign nations seeking a handout.''

-30- 1959

#90170u3196 06/19/1990 ~United Press International
(JUNE 19) UPI - Law enforcement officials are trying to determine how a convicted felon obtained the licensed revolver he carried during yesterday's shooting rampage in Jacksonville, Florida.

42-year-old James Edward Pough sprayed a loan office with gunfire, killing

eight people and injuring at least five before fatally shooting himself.

Pough marched through office of the General Motors Acceptance Corporation, which had repossessed his car. As many of the 86 employees hid under desks Pough took aim and fired before turning the gun on himself.

The Jacksonville resident also was a suspect in the weekend killings of a prostitute and her pimp.

Pough served five years' probation after pleading guilty to a felony charge of aggravated assault. He also was arrested for assault with intent to murder. Authorities do NOT know if Pough had permits for the semi-automatic rifle he used in the attack... or the nine millimeter machine pistol found in his car. But the .38-caliber handgun Pough was carrying was registered in his name, apparently in violation of state law.

White House and congressional budget negotiators discussed taxes and revenue options today for the first time since the bipartisan talks opened May 15th.

One Democratic leader says NO revenue proposals were put on the table and NO comprehensive packages were discussed.

But California Democrat Leon Panetta says his party is ''operating on the assumption'' budget director Richard Darman will present a deficit cutting proposal tomorrow afternoon... and that's when the hard bargaining is expected to begin.

Panetta, who chairs the House Budget Committee, also says if Darman fails to come through, ''it's possible'' Democrats will walk out of the talks.

While talks centered on ways of raising more money to help cut the deficit the House got into a partisan debate about how to spend funds in fiscal year 1991, which begins October 1st.

The House is expected to pass and send to the Senate a 20-point-nine-BULLION-dollar bill to fund various energy and water projects in fiscal 1991. Republicans argue lower spending levels should be used... or action on the bill should be delayed until there is a budget summit agreement.

#90170u3449 06/19/1990 ~United Press International

(JUNE 19) UPI - The House tonight approved a nearly 21-BILLION-dollar spending bill that includes funding for the massive super-conducting super collider. 318-Million dollars was earmarked to build the giant particle accelerator in Texas. Scientists hope the project... which smashes protons traveling near the speed of light... will help unlock the secrets of the smallest building blocks of the universe.

The Bush administration told a House subcommittee today there is NO ''consistent pattern'' of intimidation of Chinese students in America by the Bejing government. There have been reports of harassment of pro-democracy activists in the United States following last June's Tiananmen Square massacre. After learning of the administration's conclusion, the panel's chairman responded saying- quote- ''I'm NOT sure we're living in the same universe.''

Libya's official news agency today accused the West of distorting a speech made Saturday by Colonel Moammar Gadhafi. The British Broadcasting Corporation yesterday quoted the Libyan leader as urging scientists to ''manufacture the atom in defiance of America.'' But the Libyan news

agency says what Gadhafi really said was that ''America had prevented Libyan students from studying the atom.''

France, West Germany, Belgium, The Netherlands and Luxembourg signed a landmark accord today to abolish internal border checks and establish a new free-travel zone. Officials say the agreement also steps up security along the outer border of the new zone. Parliaments from all five countries are expected to ratify the accord, which is set to take effect by the end of next year.

#90170u3455 06/19/1990 ~United Press International

(JUNE 19) UPI - The Sixth International Conference on AIDS is set to get under way tomorrow in San Francisco, and coordinators say they hope to avoid street confrontations with AIDS activists that have marred meetings in the past. Organizers say they've scheduled meetings with activists in an effort to permit interaction and dialogue. But as one coordinator said, the meeting is plagued by the ''politics of outrage.''

Federal agents in Philadelphia today arrested a blind drug smuggler and another man as part of an undercover investigation into two international drug rings. A Drug Enforcement Administration spokeswoman says Nigel Rhodes, who is blind, and James Graham were members of a ring that has brought several tons of marijuana and several pounds of cocaine into the United States during the past few years. Three other alleged ring members were nabbed last weekend.

A couple from Gulf Breeze, Florida, gave sworn testimony at a highly unusual news conference in their hometown today. At issue is a claim by Ed Walters that a series of photos he took in 1987 are of U-F-O's. He subsequently reported dozens of encounters... including a near abduction and confrontation with aliens. Walters supposedly is negotiating for movie rights to a book he wrote on the subject. But Tom and Ginny Smith say Walters faked the sightings- something they say they've known for more than two years.

Earth tremors were felt yesterday and today in the tiny community of Wheatland in southeastern Wisconsin. The tremors were recorded on monitoring devices at the University of Wisconsin-Milwaukee. But they were NOT picked up at Northern Illinois University, about 100 miles to the south... casting doubt on the tremors being earthquakes. Or as one scientist put it- the tremors are NOT a prelude to Wisconsin becoming the California of the Midwest.

COSTA MESA (JUNE 20) BUSINESS WIRE - Douglas L. Bockus, a prominent insurance executive, has been named president and chief executive officer of US Benefits Inc., a wholly-owned subsidiary of US Facilities Corp. (NASDAQ:USRE).

US Benefits is an underwriting manager for excess group medical stop-loss coverage. Bockus was also appointed a senior vice president of US Facilities.

In making the announcement, George Kadonada, US Facilities, president and chairman, also disclosed that Bockus' company, D. L. Bockus & Associates Insurance Marketing Inc. was merged into a subsidiary of US Benefits. D. L. Bockus represents A+ rated life insurance companies in the following product areas: group life, voluntary term life, long-term disability, excess medical stop-loss, group universal life and professional association products.

From 1980-1985, Bockus had been a vice president of Manhattan Life Insurance Co. and then a vice president of Professional Insurance

Underwriting Corp., a managing general agency. In those capacities, he was responsible for marketing, administration, underwriting and rating of products in the group life, accidental death and disability, long-term disability and professional association business.

Prior to that, he was a regional vice president for the Life Insurance Company of North America (now part of CIGNA), responsible for group life and health coverages sold and underwritten by the seven branch offices reporting to him. Bockus' offices were consistently national sales and underwriting profit leaders for LINA.

Commenting further on the announcement, Kadonada said: ''After a careful review of several outstanding candidates for this important position, we are extremely pleased with the selection of Doug Bockus.

''He has been a 'proven winner' in his business associations and endeavors possessing a creative and resourceful capability to innovate and deliver solid, quality products and services to the industry and companies with which he was associated.

US Facilities, an insurance and reinsurance holding company, conducts its business through USF RE INSURANCE COMPANY and US Benefits. USF RE is a property and casualty reinsurance company accepting business through reinsurance intermediaries nationwide. US Benefits is an underwriting manager for excess group medical stop-loss coverage.

FEDERAL WAY, WA (JUNE 20) BUSINESS WIRE - Pacific Nuclear Systems Inc. has announced that its PN Services group (PNS) has been selected, together with ABB Reaktor, Mannheim, West Germany, to perform the chemical cleaning of the secondary side of two steam generators for Korea Electric Power Corp. (KEPCO). The PN Services portion of the contract is valued at approximately $2 million.

The work will be performed beginning in the fall at KEPCO's KORI-1 Nuclear Power Plant. This contract is the first steam generator cleaning project awarded to the ABB-PNS team since the firms began a cooperative services venture in 1989. The contract includes laboratory testing, engineering, equipment and supplies, as well as actual chemical cleaning services.

"This overseas contract represents a major milestone for Pacific Nuclear Systems and its PN Services group," according to David Jones, president and CEO of the firm. "As the overseas market for steam generator services

expands, we feel that the ABB-PNS team is strongly positioned to be a major player in this area."

Pacific Nuclear Systems Inc. and its subsidiary companies (Nutech Inc.; NuPac Services Inc.; Nuclear Packaging Inc.; and PN Services Inc.; and Alaron Corp.) provide a wide range of services to the nuclear industry. The company, founded in 1983 and headquartered in Federal Way, is traded in the NASDAQ - National Market System under the symbol PACN.

DAYTON, OH (JUNE 20) BUSINESS WIRE - At the annual meeting of shareholders, held at Moto Photo Inc. (NASDAQ:MOTO) corporate headquarters Michael F. Adler, president and CEO, said, ''In 1990, Moto's profit performance will be substantially better than in 1989.

''The company's franchise operations and distribution of products are running at record rates and ahead of plan.''

The company's ability to generate a 1990 profit would depend on the effectiveness of newly initiated sales and marketing programs in the company stores and primarily in the Northeast.

Adler concluded, ''Once again it should be emphasized that the company will be showing significant improvement in net earnings and cash flow (earnings before interest and depreciation) in 1990. In fact, while the company is heavily leveraged, it is generating a substantial cash flow of $4.5 million prior to debt service at a breakeven level.''

In other business, Dr. Robert J. Kegerreis, Dexter B. Dawes, Frank W. Benson, Mickey L. Clagg, Jacob A. Myers, David A. Mason and Michael F. Adler were all re-elected to the board.

Moto Photo Inc. is a Dayton-based franchisor and operator of one-hour photofinishing stores with 336 stores in operation and 17 under development in the United States, Canada, Norway and Sweden.

#90171b0025 06/20/1990 ~Business Wire
NEW YORK (JUNE 20) BUSINESS WIRE - In its third major product line

expansion in the past nine months, Quantum Corp. (NASDAQ:QNTM) Wednesday introduced four high-performance, high-capacity 3 1/2-inch hard disk drives designed for the desktop workstation market.

Announced in news conferences here and in Redwood City, Calif., the new ProDrive 425 and 330 drives provide formatted capacities of 425 and 331 megabytes, respectively, with embedded SCSI or AT-bus controllers.

In announcing the new products, Stephen M. Berkley, Quantum chairman and chief executive officer, stated that the ProDrive 425 drives provide the highest capacity currently available in the 3 1/2-inch form factor.

The ProDrive 425 and 330 products establish new performance and quality standards for 3 1/2-inch drives, according to John Klonick, manager of product marketing. They feature average seek times of 12 milliseconds for read commands and less than 14 milliseconds for write commands, and data transfer rates as high as five megabytes per second.

Quantum's commitment to the highest level of quality and reliability is reflected in these drives with a Mean Time Between Failures (MTBF) rating of greater than 75,000 hours. ''We are confident these products will exceed this MTBF figure because of the track record we have established with our lower capacity 3 1/2-inch drives.

Our rigorous testing programs and data from over 1.5 million drives in the field have yielded demonstrated MTBF figures for our current ProDrive products that far exceed their initial specifications,'' stated Klonick. ''These new high-capacity drives build on the proven technology and quality standards incorporated in the earlier generation products.''

The ProDrive 425 and 330 drives also establish new standards for ease of testing and data integrity. Advanced self-test capabilities which simplify incoming and qualification testing are resident in the drive, and an enhanced error monitoring and reporting capability provides information on error patterns should a drive fail during testing or in actual use.

Quantum reports that evaluation units of the ProDrive 425 and 330 SCSI models will be available in August with volume production scheduled for November. Evaluation units of the AT-bus models will be available during the fourth calendar quarter. These drives will be manufactured at Quantum's highly mechanized manufacturing facility in Milpitas, Calif.

The U.S. evaluation quantity prices for the ProDrive 425 and 330 drives are $1,595 and $1,350, respectively.

Quantum introduced the ProDrive Series with four drives in 1988, and has expanded the product family rapidly since then. The company's recent dramatic growth is the result of the widespread acceptance of the ProDrive

Series by both OEM and distribution customers worldwide.

Quantum recently reported sales of $446 million and net income of $47.2 million for fiscal 1990, ended March 31, compared with fiscal 1989 sales of $208 million and net income of $12.9 million.

Since its founding in 1980, Quantum Corp. has emerged as a leading independent manufacturer of reliable, high-performance mass storage systems for business, engineering and scientific computing. Its hard disk drives are marketed to OEMs and distributors worldwide.

The publicly held company is recognized for setting new standards of performance, quality and reliability in disk drives destined for demanding desktop workstation and PC applications. Plus Development Corp., a Quantum subsidiary established in 1983, designs and markets personal computer storage enhancement products through 2,500 dealers worldwide. The company is headquartered in Milpitas, Calif.

#90171b0042 06/20/1990 ~Business Wire

MILPITAS, CA (JUNE 20) BUSINESS WIRE - Logic Modeling Systems Inc. Wednesday announced that Cadence Design Systems Inc. (NASDAQ:CDNC) has signed an agreement to expand the companies' OEM relationship begun in 1988 by Gateway Design Automation, now Cadence's Advanced CAE (ACAE) Division.

The expanded agreement, valued at $20 million over three years, is the largest volume contract to date between Logic Modeling and an OEM partner. It calls for worldwide marketing and sales by all divisions of Cadence of Logic Modeling's industry-standard hardware modeler line.

''Logic Modeling's hardware modelers have been a tremendous success with the Verilog-XL customer base and we recently extended the interface to address the needs of Verifault-XL users as well,'' said Prabhu Goel, president of Cadence's ACAE Division.

''This expanded agreement coincides neatly with our introduction of a complete, integrated system design solution, the Amadeus Systems Design Series based on our Design Framework II architecture.

''Logic Modeling brings accurate models of the newest complex parts to our customers. Time to market is greatly speeded up, as unnecessary board and ASIC revisions are avoided by accurate stimulation of the entire board.''

''Cadence's product line and the Verilog hardware description language (HDL) have been a strong asset for designers of high-level systems,'' said Russell Hall, vice president of marketing for Logic Modeling.

''By coupling its toolset with the hardware modeler, Cadence offers one of the richest environments for successful board and system design.

Hardware modeling solves the simulation model availability problem for system and ASIC designers by allowing the physical VLSI device to be used to model its own behavior during design verification. Hardware models are full-function and full-fidelity.

The LM-1000 provides designers with easy access to more than 600 hardware models of important VLSI devices on the market today and ASIC models can be developed in less than one day. The LM-1000 is platform and simulator independent.

Logic Modeling sells through OEM relationships with EDA vendors including Cadence, GenRad, Harris Scientific Calculations, IKOS, Mentor Graphics, Racal-Redac, Siemens, Valid, Vantage Analysis Systems, Viewlogic Systems Inc., Zycad Corp. and to companies with proprietary simultors.

The LM-1000 interface to both the Verilog-XL digital logic simulator and the Verifault-XL digital fault simulator will be shown at this year's Design Automation Conference (DAC) in Orlando, Fla., June 24-27 in the Cadence (3001) and Logic Modeling (3029) booths.

Logic Modeling is a privately held company with corporate headquarters located at 1520 McCandless Dr., Milpitas, Calif. 95035, telephone 408/957-5200.

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence operates throughout the United States, Europe and Asia. The company is headquartered in San Jose.

#90171b0052 06/20/1990 ~Business Wire
MOUNTAIN VIEW, CA (JUNE 20) BUSINESS WIRE - Adobe Systems Inc. announced Wednesday the acquisition of BluePoint Technologies, a technology leader in creating chips for rendering hinted, outline type. Terms of the acquisition were not disclosed.

BluePoint, a New Hampshire-based company founded in 1986, developed a type

rendering chip, the BP100A, that is shipping today and is incorporated in several products.

Adobe plans to use BluePoint's technology to create a chip whose input format is the Adobe Type 1 font format. Adobe plans to design the chip into Adobe controllers, and to offer it to OEM customers as an option to increase speed of text printing. No date has been set for the availability of the Type 1 chip.

''BluePoint is a pioneer and leader in the design of type rendering chips, and we are very pleased to incorporate their technology and expertise into future Adobe products,'' said Dr. Carolyn Bell, Adobe's director of Engineering, International Systems Division. ''The BluePoint acquisition is another part of Adobe's program to provide high performance hardware, including controllers and specialized ASICs, to our customers.''

''We are delighted to become part of the Adobe family,'' said Chris Hassett, chairman of the board and chief executive officer, BluePoint Technologies. ''We look forward to joining resources with them to fulfill the promise of this technology and to bring it to market in innovative products from Adobe.''

Adobe announced it will support existing products containing the BP100A and honor the company's existing OEM contracts. It did not announce any plans at this time to develop chips that accept any input format other than Adobe's Type 1 font format.

Adobe Systems Inc., founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, is headquartered in Mountain View, Calif. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a device-independent graphics software component for computer displays.

In addition, the company develops and markets the Adobe Type Library and a line of application software products. Revenues in 1989 were over $120 million.

SOLANA BEACH, CA (JUNE 20) BUSINESS WIRE - Chart House Enterprises Inc. (NYSE:CHT) announced the opening of a new Chart House restaurant at Haiku Gardens in Kaneohe, Hawaii.

The Kaneohe restaurant is the third new Chart House to open in 1990. Four

additional Chart House restaurants are scheduled to open during the third quarter of 1990.

The company also announced the acquisition of the 80 percent equity interest in Cork 'N Cleaver Inc. not already owned. The company had retained a 20 percent equity interest when it sold Cork 'N Cleaver Inc. in June 1987. Cork 'N Cleaver Inc. operates three Cork 'N Cleaver restaurants in Indiana and Michigan.

Chart House Enterprises Inc. operates 78 restaurants, including 61 Chart House, one Peohe's, 13 Paradise Bakery and three Cork 'N Cleaver restaurants located in 20 states, Puerto Rico and the U.S. Virgin Islands. In addition, the company's franchisees operate 13 Paradise Bakery restaurants in Northern California, Colorado, Arizona, Oklahoma and Oregon.

SAN FRANCISCO (JUNE 20) BUSINESS WIRE - Bank of America Wednesday named Leo D. Corradini director of its International Private Banking office in Miami.

He succeeds Vice President Felix Martinez, who was recently appointed director of the bank's Trust Marketing in Miami. An international banker for 21 years, Corradini, 50, will be responsible for the Miami operation, which promotes the bank's International Private Banking Division products in South and Central America and the Caribbean.

Bank of America is a full service provider of private banking products -- including investment, trust, treasury and consumer banking services -- around the world.

''Leo's appointment underscores our commitment to Miami and our clients who increasingly look to that city as a Latin American financial center,'' said Senior Vice President Robert Lemos, head of worldwide sales and marketing for the bank's International Private Banking Division.

''Our Latin America market is dynamic and growing,'' said Lemos, ''and Leo will capitalize on our extensive international network to expand the breadth and depth of our services to that regional market.'' Corradini joins Bank of America from the banking firm of IBJ Schroder, where he held various positions in both commercial and private banking, all related to Latin America. In 1980, he founded, and has been general manager of, Schroder's Miami office, which specialized in private banking services to high-net-worth individuals and groups.

Before joining Schroder in 1969 in New York City, Corradini had been with the Federal Reserve Bank of New York for three years. A native of Hazleton Pa., Corradini received his B.A. degree in international relations from American University's School of International Services in Washington, D.C. in 1965 and his M.B.A. degree from Fordham University in New York in 1979. He is fluent in Portuguese and Spanish.

NEW ORLEANS (JUNE 20) BUSINESS WIRE - John P. Laborde, chairman, president and chief executive officer of Tidewater Inc. (NYSE:TDW), announced Wednesday that the board of directors has elected Donald T. ''Boysie'' Bollinger and Hugh J. Kelly as directors of the company for a term expiring at the next annual shareholders meeting.

The board of directors has nominated Bollinger and Kelly for election as directors at the annual shareholders meeting for a term that would expire in 1993.

As chairman and chief executive officer of Bollinger Machine Shop & Shipyard Inc., in Lockport, La., Bollinger is a major builder of vessels for the offshore oil and gas industry and the U.S. Navy and Coast Guard.

Bollinger is a director of the National Ocean Industries Association and the Offshore Marine Services Association, the World Trade Center of New Orleans and Premier Bank, N.A. He is also a member of the Louisiana Association of Business & Industry, Young President's Organization, Louisiana Intracoastal Seaway Association, Council for a Better Louisiana and National Offshore Safety Advisory Committee.

Bollinger serves as the 1990-91 general campaign chairman for the Houma area United Way and is active in the Louisiana Republican Party.

A native of Lockport, Bollinger holds a B.S. degree in business administration from the University of Southwestern Louisiana.

Kelly, an oil and gas consultant based in Mandeville, La., retired in June 1989 as president and chief executive officer of Ocean Drilling & Exploration Co. (ODECO).

A former ODECO board member, Kelly currently serves on the board of directors of Subsea International, Hibernia National Bank, Chieftain International of Canada, American Bureau of Shipping, the New Orleans and

River Region Chamber of Commerce and the LSU Foundation.

He is past chairman of the board of the National Ocean Industries Association (NOIA) and Mid-Continent Oil & Gas Association. Kelly was general chairman of the 1982 United Way campaign for the New Orleans area and served as 1986 chairman of the United Way's board of trustees.

In 1988, Kelly was named the outstanding chief executive in the offshore drillers and oil services and equipment industry by the Wall Street Transcript.

A graduate of Louisiana State University Law School, Kelly was senior vice president of Chevron Oil Co. before joining ODECO in 1958.

Tidewater owns and operates more than 250 vessels serving the international offshore energy industry and owns and operates one of the largest fleets of gas and air compressors in the United States. The company also has modest interests in domestic oil and gas operations, real estate and insurance.

LAS VEGAS, NV (JUNE 20) BUSINESS WIRE - Sierra Health Services Inc. (AMEX:SIE) Wednesday announced that it has signed a contract extension with Humana Hospital Sunrise through Oct. 31, 1996.

Humana is the major provider of hospital care to the Las Vegas-based members enrolled in Sierra's insurance subsdiaries, Health Plan of Nevada Inc., Sierra Health & Life Insurance Co. Inc., and Sierra Healthcare Options.

''We are very pleased with the agreement,'' said Anthony M. Marlon, M.D., chairman, president and chief executive officer of Sierra Health Services. ''We believe it offers us significant financial security, operational stability, and competitive strength. Humana Sunrise enjoys an excellent reputation for medical excellence in our community, and we are pleased that our members will be able to continue availing themselves of the medical services offered there for many years to come,'' Marlon added.

Don Stewart, president of Humana Hospital Sunrise, echoed Dr. Marlon's enthusiasm with the new agreement. ''Sierra's insured population provides a steady patient flow and a stable source of income for the hospital. In addition, our working relationship has been excellent in the past, and we are confident that it will continue to be mutually beneficial in the

future.''

In addition to its contract with Humana, Sierra has hospital contracts in southern Nevada with University Medical Center, Valley Hospital, Desert Springs, St. Rose Dominican, Women's Hospital, Boulder City Hospital, Charter, and Bullhead Community Hospital.

     #90171b0117 06/20/1990 ~Business Wire
COLORADO SPRINGS, CO (JUNE 20) BUSINESS WIRE - Brown Disc Products Co. Inc. announced that it has filed with the Securities and Exchange Commission its quarterly report on Form 10-Q for the quarter ended March 31, 1990, showing an increase in sales from $869,420 in the three months ended March 31, 1989 to $1,150,381 in the three months ended March 31, 1990.

This figure represents an increase of 32 percent due to increased market coverage, however, there was significant decrease in the average selling price of all magnetic media in the three months ended March 31, 1990 compared with the three months ended March 31, 1989.

Total costs and expenses increased from $838,164 in the three months ended March 31, 1989 to $1,949,971 in the three months ended March 31, 1990. This increase in expenses was due to a severe snow, ice and rain storm March 5 and 6, 1990, which forced the company to vacate its offices and production facilities as a result of roof damage.

In addition, during the three months ended March 31, 1990, the company purchased jacket-making equipment, a portion of which was later found to be defective, resulting in increased write-off for scrap material.

The defects in the jacket-making equipment have now been remedied. When fully on-line, this equipment should give the company greater control of the manufacturing process and reduce the overall cost of the company's materials.

Profit from operations decreased from $13,905 in the three months ended March 31, 1989 to a loss of $811,069 in the three months ended March 31, 1990. This loss was due to the cost increases enumerated above, as well as to declining sales prices.

R.E. Rider, president and chief executive officer, said, ''Management has taken steps to remedy the problems experienced during the three months ended March 31, 1990 and does not anticipate that these problems will

recur. Management expects the company to regain profitability in the near future.''

SAN FRANCISCO (JUNE 20) BUSINESS WIRE - Judge Raul Anthony Ramirez, U.S. District Court, Eastern District of California, has joined Judicial Arbitration & Mediation Services Inc. (J.A.M.S), an Alternative Dispute Resolution (ADR) firm with headquarters in Orange.

Judge Ramirez will become a member of the J.A.M.S panel of retired jurists beginning June 11, 1990. He will continue as a partner in the Sacramento law firm of Orrick, Herrington & Sutcliffe.

Judge Ramirez was a judge for 13 years, serving the last 10 as a federal district court judge. He resigned from the bench on Dec. 31, 1989, to join the Orrick firm as a partner.

As a district court judge, Ramirez presided over numerous trials, the most notable of which was Nelson vs. Bennett (''Supercow''), a securities and RICO case that involved two Big Eight accounting firms and several investment companies.

Judge Ramirez earned a reputation as an outstanding settlement judge,

especially in complex multiparty cases. He also presided over a number of prominent cases involving sex discrimination, white collar crime, state licensing of religious daycare centers and environmental issues.

A graduate of McGeorge School of Law and former president of the McGeorge Alumni Association, Judge Ramirez became a panelist for J.A.M.S, affiliated with the firm's Sacramento office, on June 15, 1990.

As the largest provider of judicial ADR services in the nation, J.A.M.S has over 120 distinguished retired justices and judges on its panel in 13 locations throughout California, Oregon and Washington.

SAN FRANCISCO (JUNE 20) BUSINESS WIRE - From now through Sept. 30, Courtyard By Marriott is offering special reduced weekend rates at most of its 50 hotels in the Western United States.

The special rates, which will range from $39 to $59 per room, depending upon location, are available Friday and Saturday nights for up to four people per room. A limited number of rooms are available at the special rate and rates for suites will be higher.

Reservations can be made by calling 1-800/321-2211.

Designed for the individual business and pleasure traveler as well as families, Courtyard By Marriott is Marriott Corp.'s mid-priced hotel chain. It was recently rated the best hotel in the mid-priced segment in a survey by a major trade publication, Business Travel News, for the third consecutive year.

Courtyard was developed based on millions of dollars in consumer research which asked travelers what they wanted and did not want in guest accommodations from room lay-out to decor.

As a result, each hotel offers superior guest accommodations with little ''extras'' not typically found in moderately priced hotels such as free HBO and ESPN, exercise rooms, pools and whirlpools, king-sized beds in most rooms, in-room coffee and more.

SAN DIEGO (JUNE 20) BUSINESS WIRE - CYMER Laser Technologies announced Wednesday that Nikon Corp. and Canon Inc., two of the world's largest wafer stepper manufacturers, have each invested in the San Diego-based laser company.

The extremely unusual investment by two highly competitive Japanese companies in a single U.S. supplier represents a vote of confidence in excimer laser technology developed by CYMER.

This announcement follows the recent establishment of a joint development project between CYMER and GCA/Ultratech, a unit of General Signal, the leading wafer stepper manufacturer in the United States.

Under this program, GCA/Ultratech will guide the integration of CYMER's laser with their excimer-based wafer stepper system.

The company's excimer lasers, which emit intense deep UV light, were developed for use in lithographic equipment, or wafer steppers, machines used by semiconductor manufacturers to project minute circuit patterns onto silicon wafers.

Excimer laser steppers will become the key tool in manufacturing 64 Mb and 256 Mb DRAM memory chips and other advanced semiconductor devices which will fuel the next generation of computers, workstations and high definition televisions.

The investment by Canon and Nikon represents approximately a 5 percent equity position and adds credence to CYMER's assertion that excimer laser-based systems will be the next generation of wafer steppers.

CYMER holds a dominant share of this emerging market, and is a supplier of such lasers to customers including GCA, Nikon and Canon. These systems have been installed in R&D and pilot production facilities in the United States, Japan, Korea and Europe.

Founded in 1986, CYMER Laser Technologies is dedicated to the development, manufacture and support of excimer lasers used in semiconductor manufacturing systems.

CYMER is the leading supplier of excimer lasers to the world's top manufacturers of lithography systems used for semiconductor processing.

Headquartered in San Diego, CYMER has offices in Boston and Tokyo with plans for European expansion next year.

LOS ANGELES (JUNE 20) BUSINESS WIRE - David L. Ferguson has been named a general partner of Chemical Venture Partners and will be responsible for the firm's regional office to be opened in Los Angeles this month, it was announced Wednesday by Jeffrey C. Walker, managing partner of Chemical Venture Partners.

Chemical Venture Partners is a New York-based general partnership with more than $450 million of capital under management and is affiliated with Chemical Banking Corp., the nation's sixth-largest bank-holding company with more than $70 billion in assets.

The firm specializes in management buyouts and recapitalizations as well as growth-equity and venture-capital opportunities. Since its inception in 1984, Chemical Venture Partners has closed more than 50 individual transactions including more than 15 in California.

Prior to joining Chemical Venture Partners in New York in 1989 as vice president, Ferguson was a member of the mergers and acquisitions groups of Bankers Trust New York Corp. and Prudential-Bache Capital Funding.

A certified public accountant, Ferguson earlier was a member of the audit departments of KPMG Peat Marwick and Deloitte & Touche. He currently serves on the advisory board of Wedbush Capital Partners, Los Angeles.

Ferugson holds a bachelors degree from Loyola College in Baltimore and earned his masters in business administration from the Wharton School of the University of Pennsylvania. He and his family are residing in Manhattan Beach.

Chemical Venture Partners regional office is located in Westwood at 10940 Wilshire Blvd.

BURLINGAME, CALIF. (JUNE 20) BUSINESS WIRE - When it comes to big-league endorsements, Easton Sports has some heavy hitters!

Will Clark, one of the heros of last year's National League champion San Francisco Giants and runner-up for the league batting title, has signed on as an Easton baseball spokesperson.

''We're very pleased to have a player of Will Clark's caliber join our team,'' said Doug Kelly, president of Easton Sports. ''Will is a great team leader, he is very popular with fans throughout the country, and, best of all, he knows our products from personal experience.''

Clark literally grew up with an Easton aluminum bat in his hands (as shown in the May 28 issue of Sports Illustrated). It was his bat of choice through Little League, high school and college baseball (at Mississippi State), and when he was one of the stars of the 1984 U.S. Olympic silver medal team.

Today as a Giant, he uses an Easton EXP Series first baseman's mitt and the pro model cabretta leather batting glove.

''I am very familiar with Easton products ... the bats, gloves and Incrediball ... and I know they are manufactured with the highest degree of quality and craftmanship for durability and performance. That's why I'm pleased to endorse Easton products,'' Clark said.

''I owe a lot to Easton. Learning to hit correctly at a young age is very important. The lightweight Easton aluminum bat gave me better control, allowed me to get the bat around faster and to develop a full swing,'' he added.

Clark, who signed a multiyear agreement with Easton Sports, will endorse and promote the company's complete line of baseball bats, fielder's gloves batting gloves, Incrediball and baseball accessories.

DELAVAN, WI (JUNE 20) BUSINESS WIRE - Ajay Sports Inc. (NASDAQ:AJAY) announced Wednesday that it had executed a definitive letter of intent to acquire a majority stock ownership interest in MGS Acquisitions Inc.

MGSA operates through its 100-percent wholly owned subsidiary of MacGregor Sports Inc.

The agreement calls for Ajay to provide a minimum of $1 million as a junior participant in MacGregor's present asset based financing arrangements. These funds are to be secured by all of MacGregor's assets subordinated only to the interests of the present primary lender.

It is anticipated that as a result of this transaction, Ajay will acquire a minimum of 60 percent of the MGSA common stock presently issued and outstanding. This equity ownership will consist of either a new issuance of securities by MGSA or as a result of an exchange offer with the present MGSA shareholders, or a combination of the foregoing. Completion of the transaction is contingent upon the execution of a definitive agreement no later than Aug. 1, 1990.

MGSA, through its 100-percent wholly owned subsidiary, MacGregor Sports Inc., is sole successor to MacGregor Sporting Goods Inc. In August 1989, MGSA acquired substantially all of the assets of MacGregor Sporting Goods Inc., including rights to use the MacGregor trade name and a 25-1/2 percent interest in Riddellink Corp.

Ajay, through its 100-percent wholly owned subsidiary, Ajay Leisure Products Inc., is one of the largest distributors of golf accessories as well as the nation's largest manufacturer of golf bags and hand-pulled golf carts.

PRAGUE, Czechoslovakia (JUNE 20) BUSINESS WIRE - U S WEST and Bell

Atlantic signed a letter of intent Wednesday with the Ministry of Posts and Telecommunications (MPT) of the Czech and Slovak Federated Republic to form a joint venture company to build a public switched packet data network.

It is the second major letter of intent signed by the three parties within a week. On June 15, U S WEST, Bell Atlantic and the MPT agreed to construct a national cellular system and work together to modernize the telecommunications infrastructure in Czechoslovakia.

Construction of the public switched packet data network will offer both dedicated access and dial-up access for the transmission of data information. The network will be consistent with international standards for data transmission. The initial configuration of the network will connect Prague, Bratislava and Brno with future extensions to most cities in the country.

As contemplated by the letter of intent, the joint venture company will be owned 51 percent by the Czech and Slovak MPT and 49 percent by U S WEST and Bell Atlantic.

''We view this agreement, the second signed within a week with the MPT, as an important step in meeting the business communications needs of Czechoslovakia,'' said Edgar L. Brown, president of Bell Atlantic Europe S.A. ''We are pleased to join with U S WEST in introducing high-quality business communications services that will support Czechoslovakia's move to a market-based economy.''

Steven Andrews, president of U S WEST International, said: ''This agreement, along with our plans for a cellular system, will greatly enhance Czechoslovakia's communications capabilities. A modern data network will provide the communications services necessary to help the economy of the Czech and Slovak Federated Republic grow and expand.''

U S WEST Inc. is a US$25 billion diversified company headquartered in Englewood, Colo., a suburb of Denver. Its major subsidiary, U S WEST Communications, serves the communications needs of 10 million customers in 14 states of the western United States.

Besides U S WEST International, which markets the company's services in the international marketplace, U S WEST also owns companies involved worldwide in radio communications, including cellular, paging and Personal Communications Networks; cable television; business telecommunications products and services; data solutions, and financial services.

Bell Atlantic Corp. is the Philadephia-based parent of telephone companies serving more than 17 million customers in the mid-Atlantic region of the United States and companies that provide cellular communications, computer

maintenance, and financial and leasing services in U.S. and international markets. The company had 1989 assets of US$26.2 billion.

With more than 900 employees today living and working in 14 countries outside North America, Bell Atlantic expanded its overseas activities last week with the announcement that it, Ameritech and two New Zealand companies were the winning bidders to purchase New Zealand's state-owned telephone company.

#90171b0194 06/20/1990 ~Business Wire

COLUMBUS (JUNE 20) BUSINESS WIRE - UtiliCorp United (NYSE: UCU) announced Wednesday that second quarter net income and primary earnings per common share are expected to decline, compared to the same period in 1989, while operating revenues are expected to increase.

For the first six months of 1990, net income and revenues are expected to increase over results in the same period of 1989 while earnings per share are expected to be essentially even.

For the second quarter ending June 30, 1990, UtiliCorp projects net income of $4.8 million, compared to $5.5 million in last year's period, and primary earnings per common share of $.12, compared to $.21 in the 1989 quarter. Operating revenues are estimated at $154 million, vs. $134 million in last year's period.

Average common shares outstanding increased from 20.8 million in the 1989 second quarter to 23.4 million this year. The increase is primarily due to a public offering of 2 million new shares in December 1989.

For the six months ending June 30, 1990, UtiliCorp expects net income of $27.8 million, compared to $23.1 million in the prior year's period. Earnings per share are estimated to be $1.03, the same as in the 1989 period.

Operating revenues for the six months are projected at $432 million, vs. $354 million. Six month results include first time contributions from two winter peaking gas utilities, Michigan Gas Utilities acquired in May 1989, and the West Virginia Power Gas Service operation, acquired in January 1990.

Based in Kansas City, UtiliCorp provides gas and electricity to 810,000 customers in eight states and the province of British Columbia. Its divisions are Missouri Public Service, Peoples Natural Gas, Michigan Gas Utilities, West Virginia Power, Northern Minnesota Utilities and Kansas Public Service. West Kootenay Power is a Canadian subsidiary.

TUCSON, AZ (JUNE 20) BUSINESS WIRE - Burr-Brown Corp. (NASDAQ:BBRC)

announced that earnings for the current quarter will not meet analysts' estimates.

At the Cowen and Company Electronic Industry Conference in Boston, James J. Burns, president and chief executive officer, stated: ''Earnings this quarter will be less than either we or our shareholders have expected. However, bookings have improved somewhat since the fourth quarter of last year. Our three month rolling book-to-bill ratio has been running at a healthy 1.13 to 1.14 since the beginning of this year. However, several factors are influencing quarterly performance. First, our bookings during this period include a larger than usual percentage of orders for military product. The shipment schedule for these orders begins late in the year and extends through 1991. Second, the Japanese market is still very slow for us in both industrial and consumer products. In addition, the weak yen has continued to result in lower revenues when translated into U.S. dollars.''

Burns noted, however, that he expects the business to begin improving later this year, with a return to its historical growth rate to be achieved in 1991.

For additional information, please contact Robert E. Switz, vice president chief financial officer and treasurer at 602/746-7366.

MONROVIA, CA (JUNE 20) BUSINESS WIRE - Vision Sciences Inc. (NASDAQ: LENZ) Wednesday announced that it completed a previously announced, $3.4 million loan closing in advance of a proposed debenture financing and rights

offering.

Two funds managed or advised by Alan Patricof Associates Inc. (APA), lent $2 million (of which $1.05 million had previously been advanced) and two funds managed by Matuschka Venture Partners (Matuschka) lent $1.4 million to Vision Sciences.

The loans were evidenced by 12 percent Senior Secured Demand Promissory Notes secured by all of the company's assets and senior to all other debt of the company.

The company intends to offer $3 million of common stock at ten cents per share, to its existing common stockholders and warrantholders, on a pro rata basis, (the "rights offering"), subject to compliance with the Securities and Exchange Commission (SEC) and state requirements and stockholder approval of an increase in the number of authorized shares.

Following stockholder approval, completion of the rights offering and the fulfillment of certain other conditions, APA and Matuschka are expected to purchase $2.4 million of five-year non-interest bearing Senior Secured Convertible Debentures convertible into shares of Series D preferred stock and in turn common stock at a common stock equivalent rate of ten cents per share, in exchange for $2.4 million of their loan.

APA will purchase an additional 10 million shares of common stock, for $1 million already lent to the company. APA and Matuschka will also receive warrants to purchase an aggregate of 8.5 million shares of common stock exercisable at ten cents per share.

Vision Sciences is the leading supplier of office-based lens-casting equipment, the latest technology available in the production of quality, yet inexpensive prescription spectacle lenses.

#90171b0239 06/20/1990 ~Business Wire

OAKLAND, CA (JUNE 20) BUSINESS WIRE - The Clorox Co. (NYSE/PSE:CLX) Wednesday announce that it will purchase American Cyanamid Co.'s household products business for $465 million.

With the purchase, Clorox will acquire prominent national brands including Pine-Sol cleaner, one of the country's strongest consumer franchises and the leader in the $900 million all-purpose cleaner category. The Pine-Sol line also includes Pine-Sol Spray Cleaner and Pine-Sol Spruce Up premoistened household wipes.

Clorox also will acquire the line of Combat brand insecticide products, the number two brand in the $450 million insecticide market.

Clorox's existing household products business includes leading brands such as Formula 409 all-purpose spray cleaner, Liquid-plumr drain opener, Soft Scrub mild abrasive liquid cleanser and Tilex mildew stain remover.

Pine-Sol will be marketed with the company's household cleaning brands and is expected to benefit significantly from cost savings programs in virtually all aspects of its manufacture, distribution and marketing.

A five-year agreement gives Clorox exclusive rights to manufacture, use and market new consumer household insecticide products utilizing insecticide compounds developed or acquired by American Cyanamid.

Combat's major products, ant and roach bait stations, are leaders in this growing segment of insecticide products. They incorporate a proprietary ingredient and offer consumers an alternative to aerosols that is highly effective and is safer, more convenient and environmentally friendlier.

The acquired brands will boost Clorox Company revenues by about $235 million annually.

The acquisition is expected to result in earnings dilution of 30 to 40 cents per share in the first year, 10 cents per share in the second year, and to increase profits thereafter. The acquisition is expected to generate positive cash flow after financing costs in the second year.

A combination of up to $400 million in short-term debt, with the balance of the purchase price in cash, will initially fund the acquisition.

Clorox is a diversified manufacturer and marketer of household grocery products that include 17 brands marketed nationally (including Clorox liquid bleach and Clorox 2 color-safe bleach, Formula 409 all-purpose cleaner, Soft Scrub mild abrasive liquid cleanser, Litter Green and Fresh Step cat litters, the line of Hidden Valley Ranch salad dressings. Kingsford charcoal products and K.C. Masterpiece barbecue sauce).

Clorox products are sold in some 60 other countries.

The company also produces and markets bottled water, primarily under the Deer Park name, in the northeast and in Florida, and produces food products and specialty equipment for the food service industry.

EMERYVILLE, CA (JUNE 20) BUSINESS WIRE - Farallon Computing Inc. Wednesday announced the addition of Ingram Micro D Ltd. in Ontario, Canada to its list of international distributors.

Ingram Micro D Ltd. is the second largest microcomputer distributor in Canada. With more than 4,000 products from over 400 manufacturers and publishers, Ingram Micro D serves 4,500 customers throughout Canada from two distribution centers located in Toronto and Vancouver.

Some of Farallon's larger customers in Canada include the TransCanada Pipeline, Bell Northern Research, British Petroleum, and Faskins, Campbell and Godfrey.

Ingram Micro D Inc. is one of the world's largest distributors of microcomputer products, marketing and distributing more than 6,000 products from over 500 of the world's top hardware manufacturers and software developers. It serves as a wholesale distributor to over 40,000 reseller customers in the United States, Canada and Europe.

Ingram Micro D Inc. operates two international subsidiaries, Ingram Micro D Ltd. of Canada and Ingram Softeurop of Belgium. The company is headquartered in Santa Ana, Calif., and achieved sales in excess of $1 billion in 1989.

Farallon is the world's leading provider of twisted-pair networks, with more than 1 million PhoneNET System nodes installed in Fortune 500 companies, universities and government agencies. The company produces personal communications products and technologies, primarily for use on Macintosh computers.

Farallon has more than 200 employees and has headquarters in Emeryville, with research facilities there and in Lawrence, Kan. Farallon sells products worldwide through retail distribution and makes its technologies available through OEMs and relationships with other major vendors.

Macintosh is a registered trademark of Apple Computer Inc. Ingram Micro D Inc. and Ingram Micro D Ltd. are registered trademarks of Ingram Micro D Inc.

CHICAGO (JUNE 20) BUSINESS WIRE - Information Resources Inc. (NASDAQ:IRIC) announced Wednesday that its chairman, John Malec, sold 155,000 shares of his common stock in the company in open market sales during May and June, 1990.

Malec made these sales in advance of the pending spinoff of the company's VideOcart Inc. subsidiary, and in anticipation that, as its principal shareholder, he will be precluded by the tax laws from making any stock sales during approximately a two year period following the record date for the spinoff.

Malec anticipates making further sales of up to 100,000 additional shares following the release of the company's second quarter earnings report in July. These sales have been necessitated to enable Malec to meet contractual financial obligations he will face during 1991 and 1992.

Chicago-based Information Resources develops and maintains computerized proprietary databases, decision-support software and mathematical models to assist clients, primarily in the consumer packaged goods industry, in testing, monitoring and evaluating their marketing plans for new products, media advertising, pricing and sales promotions.

SEATTLE (JUNE 20) BUSINESS WIRE - Alaska Airlines is offering its frequent fliers mileage bonuses for round trip travel between Seattle or Portland and the three Bay Area cities the airline serves.

Now through Sept. 30, Alaska Mileage Plan members will receive bonuses of triple and quadruple mileage when their flights originate or connect in Seattle or Portland and terminate in San Francisco, Oakland or San Jose. The same applies for those boarding in the Bay Area en route to Seattle or Portland.

In addition, Alaska on July 1 will begin offering Mileage Plan members triple miles for travel between San Francisco and Long Beach. The offer runs through Dec. 31, and will award frequent fliers 1,500 miles each way instead of the normal 500. Alaska offers four non-stop round trip flights daily between San Francisco and Long Beach.

The Seattle/Portland-Bay Area bonus offer requires one round trip between those cities before the traveler qualifies for bonus miles. For each round trip thereafter, bonuses are awarded on top of regularly credited miles at the rate of 2,500 miles for the first post-qualifying round trip flight, 3,000 for the second, 3,500 for the third and 4,000 for each succeeding trip.

Alaska offers 21 round trip flights daily between Seattle and the Bay Area and 11 round trip flights daily between Portland and the Bay Area.

Seattle-based Alaska Airlines serves 36 cities in Alaska, Mexico and five Western states.

LOS ANGELES (JUNE 20) BUSINESS WIRE - Eagle Entertainment Inc. (NASDAQ:EEGL) Wednesday announced that it has extended the expiration date of its common stock purchase warrants until Oct. 5, 1990.

The warrants had been scheduled to expire on July 6, 1990.

Management reported Wednesday that the company has entered into

discussions with principals of several privately owned companies to determine the suitability of acquiring a company in exchange for a substantial equity position in the common stock of Eagle Entertainment to the principals of the company to be acquired.

''We wish to state that the likelihood that we may come to terms with any of the companies with which we are talking,'' said Lawrence M. Vanger, chairman of Eagle Entertainment, ''can not be determined at this stage of our discussions. As the discussions move forward toward a definitve agreement or the signing of a letter of intent,'' he pointed out, ''we will release further information on a timely basis.''

Eagle Entertainment, through its wholly owned subsidiary, Performance Guarantees Inc., writes completion bonds for film producers who must post such bonds to ensure completion of their films on schedule and within a prescribed budget.

BURBANK, CALIF (JUNE 20) BUSINESS WIRE - dick clark productions inc. (NASDAQ/NMS:DCPI) and the Pyramid Operating Authority in Memphis, Tenn., Wednesday jointly announced that a Hall of Fame honoring the American Music Awards will be built atop the Great American Pyramid now under construction in Memphis.

dick clark productions has licensed the Pyramid Operating Authority the right to use the American Music Awards trademark for the Hall of Fame in return for a royalty on ticket admissions. The company also received the rights to produce entertainment specials emanating from the Great American Pyramid.

Construction costs of the American Music Awards Hall of Fame will be borne by the Pyramid Operating Authority.

The American Music Awards Hall of Fame will showcase memorabilia commemorating the history of American music. It will also spotlight the winners of the annual American Music Awards, which has been produced by dick clark productions for 17 consecutive years.

That show is consistently the No. 1 rated music awards program and is rated second only to the Academy Awards in all categories of awards programming.

When it opens in late summer of 1991, the Pyramid will be one of the country's largest sports and entertainment complexes. A 32-story stainless steel structure set on the banks of the Mississippi, the Pyramid is adjacent to the New Music Festival Theme Park on Mud Island.

In addition to the American Music Awards Hall of Fame, the Pyramid will be home to a 20,000-seat all-purpose arena, the Memphis Music Experience, the Egyptian Experience (an attraction recreating the magic and mystery of Ancient Egypt), and the College Football Hall of Fame.

dick clark productions, with headquarters in Burbank, is a major developer of television programming, including specials, series and movies for television. Recently the company began developing new ventures which capitalize on the trademarks and other assets it owns.

WOODLAND HILLS, CA (JUNE 20) BUSINESS WIRE - The board of directors of E.N. Phillips Co. (NASDAQ:ENPQ), parent of TESTING 1.2.3., which operates permanent health-screening centers in major regional shopping malls in

conjunction with local hospitals, has voted to reduce the exercise prices of the company's outstanding warrants.

The new warrant exercise schedule is as follows: each 100 of its Class A Warrants at $1.25; each 100 of its Class B Warrants at $1.75; and each 100 of its Class C Warrants at $2.50. The expiration date of all the Class A and Class B Warrants is Dec. 31, 1990, of Class C Warrants, April 6, 1991.

In making the announcement, Douglas J. Phillips, president of E.N. Phillips Co., comments, ''This action is intended to enhance the company's capitalization in order to complete the remaining five mall site openings scheduled for fiscal 1990 and expand beyond the projected schedule for fiscal 1991.

''The success of our four operating sites has prompted exceptional demand for securing additional sites for local hospitals in addition to what we already have coming on-line.''

TESTING 1.2.3. has signed nine leases in California malls and completed the associated contracts with nine sponsoring local hospitals. Four of the TESTING 1.2.3. centers have opened with the remaining five scheduled for opening in July, August and September 1990.

PACIFICA, CA (JUNE 20) BUSINESS WIRE - Progressive Ventures Inc. Wednesday announced that it has entered into a merger agreement with Schield Management Co. (NASDAQ:SMCC) of Lakewood, Colo.

The merger transaction will be a tax-free exchange of shares with Schield as the surviving company and Progressive as a wholly owned subsidiary. It is anticipated that the transaction will close on or before Sept. 30. The merger agreement is subject to the occurrence of certain conditions, including an approval by Progressive's shareholders.

Schield Management Co. has provided investment management services since 1972 and has over $200 million in assets under management. They are one of the larger providers of market timing services in the country. The Schield Portfolio Series (SPS), formed in 1985, consists of five mutual funds.

Progressive Ventures is a diversified financial services company involved in developing mutual funds and providing bridge and equity funding for

emerging companies, with special emphasis in the environmental sector.

Marshall Schield will maintain his position as president of Schield Management Co. Glenn Cutler, president of Progressive, will assume the posts of chief operating officer and senior executive vice president at Schield Management Co., and he will remain as president of Progressive Ventures.

In commenting, Schield stated, ''Two key events led to this merger. The first was the joint effort to create the Progressive Environmental Fund which has been a major success. This fund was recently ranked number one of all specialty mutual funds by Lipper Analytical Services.

Progressive Ventures trades in the over-the-counter ''pink sheets'' listings.

LINCOLN, NE (JUNE 20) BUSINESS WIRE - Terrano Corp. (NASDAQ:TRNO) Wednesday announced that its IBM AS/400 version of the ILS-5 laboratory information system is in live operation at its first AS/400 platform client site, Memorial Hospital of Dodge County in Fremont, Neb.

''This is an important milestone for Terrano Corp.,'' said James A.

Terrano, president and chief executive officer.

''We expect the AS/400 based ILS-5 system to become a major contributor to revenues over the next 2-to-3 years possibly equaling our Prime 50-Series based ILS-5 revenues,'' he added.

The company also reported that it has filed a shelf registration under Form S-3 with the Securities and Exchange Commission registering 1,026,000 shares of its common stock, 800,000 shares of which are held by existing shareholders and 226,000 shares of which are underlying outstanding warrants. The registration was effective June 4, 1990.

The company additionally reported that its $500,000 bank credit line at Firstier Bank of Lincoln has been renewed until May 31, 1991.

Also the company reported that it was notified that Okabena Partnership V-6, a Minnesota General Partnership located in Minneapolis, acquired 300,000 shares, or 6.5 percent of the company's outstanding common stock on June 5, 1990.

Terrano Corp. develops and markets integrated turn-key computer systems for radiology departments and clinical laboratories.

The company is best known for the ILS-5 clinical laboratory system which is a comprehensive information management system for both hospital and private laboratories.

Terrano Corp. products are based on the IBM AS/400 and Prime Computer Inc. 50-Series family of computer systems.

COLUMBUS, OH (JUNE 20) BUSINESS WIRE - Goal Systems International Inc. Wednesday announced the results of its first annual meeting of shareholders as a public company, held yesterday.

With more than 200 investors and guests in attendance, shareholders reelected the eight management candidates for the board of directors.

Reelected were: James A. Rutherford, chairman of the board of Goal Systems; David C. Wetmore, Goal president and chief executive officer; Thomas J. Kelley, until recently vice president, finance, treasurer and secretary of Goal Systems; Edwin C. Cohen, president, General Atlantic Service Corp.; Brian J. Conway, partner, TA Associates; Bernard M.

Goldsmith III, chairman, The Updata Group Inc.; David C. Hodgson, vice president, General Atlantic Partners; and James L. Mann, chairman, SunGard Data Systems Inc.

Citing the company's 14-year track record of revenue growth at or above 30 percent, Chairman James A. Rutherford acknowledged that the company has come ''a long way'' since its founding in the mid-1970s.

''Having been with the company since its earliest days, I am very gratified that today 3,100 shareholders have confidence enough to invest in Goal Systems,'' Rutherford said.

In discussing the year, President and CEO David C. Wetmore called fiscal 1990 (ended Jan. 31, 1990) the most signficant in the company's history.

''During this year we held our initial public offering of stock, we expanded signficantly in terms of number of employees, new offices and distribution agreements, and we made or initiated five strategic acquisitions,'' Wetmore said. ''Our fundamental principles remain unchanged while our product line and resources have grown signficantly.''

Goal Systems (NASDAQ:GOAL) designs, develops and markets software grouped into two product lines. The Data Center Management Division consists of a broad range of systems software products for IBM and compatible mainframe computers which allow users to manage, automate, monitor and analyze the use, cost and performance of their data processing resources. The Information Technology Division offers performance support products including computer-based training and computer-based reference software and associated courseware and professional services. Revenue for the fiscal year ended Jan. 31, 1990 was $86.6 million.

KENILWORTH, NJ (JUNE 20) BUSINESS WIRE - Harmonia Bancorp (NASDAQ:HBCI) Wednesday announced that it has adopted a stock repurchase program for up to 237,500 shares, or 5 percent, of its outstanding common stock.

The repurchases will be made from time to time in open market or privately negotiated transactions, based on then current market prices. Harmonia Bancorp currently has 4,750,000 shares of common stock outstanding.

Walter D. Tombs, chairman of the board and chief executive officer, stated ''The decision to authorize a buyback program reflects our board of directors' confidence in the company. Also, repurchases have the

effect of increasing the earnings per share and book value applicable to the remaining shares outstanding.''

Harmonia Bancorp Inc. is the holding company for Harmonia Savings Bank, a $699 million asset institution whose deposits are insured by the FDIC Bank Insurance Fund.

The bank operates 20 offices in five central New Jersey counties. Organized in 1851, Harmonia provides traditional savings bank products and services, complemented by multi-family residential loans and home equity lending.

SALT LAKE CITY (JUNE 20) BUSINESS WIRE - Citing strong demand for its products, EFI Electronics Corp. (NASDAQ:EFIC) Wednesday announced record revenues for the fiscal year ended March 30, 1990.

This marks the eighth consecutive year of record revenues for the company.

Net income for the year reached $908,429, or 28 cents per share, on revenues of $9.7 million compared to net income of $1,452,148, or 44 cents per share, on revenues of $9.3 million a year ago.

As of March 30, 1990, the balance sheet reflected over $1 million in cash and no long-term debt. Also, the company's current ratio was 6.1:1. Total liabilities to total assets was less than 15 percent. Return on year-end equity was 21 percent.

''While sales were up for the year, we invested significantly in automation equipment and research and development,'' said Scott Nelson, president of EFI. ''In addition, we have increased our marketing and sales staff to enhance our sales in emerging new markets and to improve the performance of our existing distribution channels. We are confident these commitments will enhance the long-term growth of the company.''

Nelson continued, ''We are pleased with the company's performance in fiscal 1990 following extraordinary revenue levels reported last year. Our strategy is sound and we are very optimistic about the future. With our progress this past year in manufacturing automation, renewed focus on specific markets and greater emphasis on new product development for those markets, we are poised for future growth. Our strong financial position and established presence in the marketplace will enable us to capitalize on new market opportunities.''

To demonstrate management's confidence in the company's future, last week EFI announced the repurchase of 19.6 percent of its common stock from Hospital Corporation of America for $1.7 million and its negotiations with a management group to purchase the majority of these shares.

Founded in 1979, EFI Electronics Corp. is a leading manufacturer of power surge and transient suppression equipment in North America. The company's products are designed to protect computers, telecommunications, and microprocessor-based medical and industrial equipment in a wide range of applications.

#90171b0681 06/20/1990 ~Business Wire
BOULDER, CO (JUNE 20) BUSINESS WIRE - EXABYTE Corp. (NASDAQ:EXBT) and its wholly owned Japanese subsidiary, Nihon EXABYTE Corp., Wednesday announced the execution of an agreement with Sony Corp. for the supply by Sony of 8mm mechanical tape decks through March 1993.

This newly announced agreement replaces and expands the existing supply agreement, due to expire in May 1991, between EXABYTE and Sony's U.S. affiliate. The 8mm decks included in this new supply agreement are the mechanical components of the EXB-8200, EXABYTE's current 8mm cartridge tape subsystem offering, and the EXB-8500, the announced high-performance 5-gigabyte-capacity tape subsystem.

Juan A. Rodriguez, EXABYTE chairman of the board said, ''This agreement reflects the continued strengthening of our relationship and marks one of many joint steps by Sony and EXABYTE in broadening the application of the 8mm helical scan technology to data storage.''

Commenting on the announcement, Frank LaHue, EXABYTE senior vice president of operations stated, ''Sony Corporation's supply of high quality 8mm tape transport units has been a key strategic factor for us in developing and maintaining our lead in the high-capacity tape backup market. This extended supply agreement with Sony is an important step in the continued success of our current EXB-8200 program and the successful introduction of the EXB-8500 product.''

EXABYTE Corp. designs, manufactures and markets high-capacity 8mm cartridge tape subsystems that address the rapidly growing market for cost-effective data storage solutions. More than 100,000 EXABYTE products have been shipped worldwide to OEMs, value-added resellers, system integrators and distributors.

LAGUNA HILLS, CA (JUNE 20) BUSINESS WIRE - Newport Pharmaceuticals International Inc. (NASDAQ:NWPH), amid further volume and price increases in its stock, announced Wednesday that new data from the long term follow-up of its previously announced Scandinavian clinical trial on Isoprinosine was presented by the investigators on Tuesday at an official satellite meeting of the International AIDS Conference in San Francisco.

The results of the Scandinavian trial were previously announced by the company in January 1989. The new follow-up data appears to indicate that the positive results of the initial double blind phase of the Scandinavian clinical trial were sustained for up to one year.

The original double-blind phase of the Scandinavian clinical trial was conducted during 1987 and 1988 on 866 patients. Patients in the original phase were given placebo or Isoprinosine, 3 grams daily, for six months. Of the 19 persons who progressed to AIDS, 89 percent (17 patients) were on placebo while 11 percent (two patients) were on Isoprinosine. As a result of that data, the company believes Isoprinosine to be effective treatment in delaying progression to AIDS.

At the conclusion of the original double-blind phase of the trial, patients who had not developed AIDS were given the opportunity to continue taking Isoprinosine for another six months. As reported by the investigators yesterday, of the 37 patients who progressed to AIDS by the end of the additional six month period, 73 percent (27 patients) were in the original placebo group while 27 percent (10 patients) were on Isoprinosine.

Commenting on these results, J. Roberts Fosberg, president and chief executive officer of Newport Pharmaceuticals stated, ''These positive results need to be confirmed through additional clinical trials on Isoprinosine. We are hopeful that the new data will help us in gaining the endorsement of the AIDS research community as well as the funding necessary for additional U.S. clinical studies.''

The company also offered a correction to yesterday's (June 19) Dow Jones Wire story on the company by noting that the company's announcements concerning Isoprinosine on Monday and Tuesday, June 18 and June 19, were made in response to the dramatic price and volume activity of the company's stock on Friday, June 15, and Monday, June 18.

Newport Pharmaceuticals International Inc. is a diversified health care company headquartered in Laguna Hills. Isoprinosine, an immunomodulator, is licensed worldwide but is not approved by the Food and Drug Administration for marketing in the United States.

NEW YORK (JUNE 20) BUSINESS WIRE - National Patent Development Corp. (NPD-ASE/PSE) announced Wednesday that it had commenced an Exchange Offer for any and all of its seven percent Dual Currency Convertible Bonds due March 18, 1996.

National Patent will exchange (a) common stock, par value 1 cent per share of national patent with a market value of $1,800 and (b) warrants to purchase 300 shares of the common stock, par value 1 cent per share of Interferon Sciences Inc. (NASDAQ:IFSC), the company's 82 percent controlled subsidiary, exercisable until August 16, 1992, for each $3,000 in principal amount of the bonds validly tendered. As of March 31, 1990, there were $10,851,000 of the bonds outstanding.

The purpose of the offer is to reduce National Patent's long-term indebtedness, reduce its interest expense and to provide National Patent with additional financial flexibility in its operations.

If 100 percent of the bonds are exchanged, National Patent will realize an extraordinary gain of approximately $1,850,000 and reduce its long-term debt by $10,851,000.

The company has agreed to reduce the debt owed to it by Interferon Sciences Inc. (''ISI''), which at March 31, 1990 was $8,986,000, by an amount equal to $240 for every $3,000 in principal amount of the bonds validly tendered. As a result of the offer, ISI will increase its book value and reduce its interest expense.

ISI is a biotechnology company focusing on the development and manufacture of interferon-based products for the treatment of viral diseases, cancer and immune system deficiencies.

In October 1989, ISI received approval from the Food and Drug Administration to market Alferon N Injection, ISI's first pharmaceutical product, for the intralesional treatment of refractory or recurring genital warts in patients 18 years or older. ISI, along with its marketing partner, The Purdue Frederick Co., plans to commence sales of the Alferon N Injection on a regional basis in the near future.

ISI, utilizing low doses of an oral formulation of the same active ingredient which is contained in its Alferon N Injection, is presently conducting a controlled clinical study on patients suffering from AIDS related complex (ARC) at a major medical center located in the United States.

The offer will expire at 5 p.m., New York City time, on Friday, August 10, 1990.

VANCOUVER, B.C. (JUNE 20) BUSINESS WIRE - Quartz Mountain Gold Corp. (TSE:QZM; NASDAQ:QZMGF) announces that activities on the Quartz Mountain property in Oregon during the first quarter focused on permitting and metallurgical test work.

Permitting requirements will be determined by the state of Oregon in conjunction with the Bly District Forest Service, and this work is ongoing.

The feasibility development schedule continues to be revised, pending preliminary analyses of alternative sulphide treatment processes. Various processes under assessment include pressure oxidation, bacterial oxidation and the Arseno process.

Due to perceived environmental restrictions in the state of Oregon, innovative tailings handling techniques are an integral part of the processes under study. The assessment of the oxide resource is complete and will likely be presented in conjunction with the sulphide program as a total project feasibility.

An initial feasibility report is anticipated later this summer, but is subject to revision as development progresses.

The drilling program for this season has started and will include both RVC and core drilling.

The company is pleased to announce that it has identified and agreed in principle to acquire two exploration stage properties in Idaho. The properties are associated with the Trans Challis megashear northeast of the recently discovered, three million ounce FMC/Meridian Beartrack gold deposit.

We believe this area holds enormous potential for the discovery of additional multi-million ounce deposits. Quartz Mountain plans to mount a major exploration program this field season.

Pursuant to a joint venture agreement in principle, SOQUEM will soon commence work on Quartz Mountain's Bignell claim block (540 claims) near Chibougamau P.Q. Initial exploration work will focus on the LAC EVA massive sulfide discovery made by Quartz Mountain late in the 1989 field season. Several promising gold vein targets will also be investigated.

KINGSTON, NY (JUNE 20) BUSINESS WIRE - Leading energy project developer Besicorp Group Inc. ("BESI"), in a joint venture with Kamine Development Corp. ("Kamine"), a New Jersey based firm, announced Wednesday the approval by the State of New York Public Service Commission ("PSC") of a 25-year power purchase contract for the sale of 79 megawatts of electricity to Niagara Mohawk Power Corp.

The Beaver Falls project is a 79 megawatt natural gas-fired cogeneration facility which will be constructed at the Specialty Paperboard Co. site located at Beaver Falls, N.Y. The facility will provide steam to Specialty's paper mill with electricity being sold to Niagara Mohawk. The planned on-line date for the project is the end of 1993.

Projected revenues net of expenses to Besicorp will average appoximately $9 million per year for the term of the contract. A project of this size can provide power for over 40,000 households.

According to Besicorp president and CEO, Michael F. Zinn, "This approval represents another milestone in our strategy to position Besicorp as a developer and owner of independent power production projects in New York State. The PSC approval brings the total number of megawatts under contract with Niagara Mohawk to 320 with over 110 under contract with other upstate New York utilities."

Besicorp and Kamine have jointly completed financings for 135 megawatts of gas-fired cogeneration plants which are in operation or under construction

and have several hundred megawatts of additional projects under development.

#90171b0698 06/20/1990 ~Business Wire

DALLAS (JUNE 20) BUSINESS WIRE - Oryx Energy Co. (NYSE:ORX) has announced two new Austin Chalk discovery wells that tested at a combined daily rate of more than 1,800 barrels of oil (BOPD) and one million cubic feet of gas (MMcf/D) and extended the company's proven acreage base in the Pearsall Field to the west.

The C. Jasik No. 1, located in Dimmit County about 2-1/2 miles north of Big Wells, tested 1,084 BOPD and 643 Mcf/D through a 34/64-inch choke at a flowing tubing pressure of 340 pounds per square inch (psi) from pay zones between 6,152 and 10,021 feet measured depth.

The well as a horizontal diplacement of 3,822 feet and reached a total measured depth of 10,021 feet. The latest discovery extends the potential for Austin Chalk production to the western edge of Oryx Energy's acreage in the Big Wells area.

The Jasik No. 1 lies 2-1/2 miles southwest of the Heitz No. 1, Oryx Energy's most prolific horizontal well with a cumulative production of 275,000 barrels since its discovery last fall.

The second discovery, D. Cross et.al. No. 1, flowed 728 BOPD and 359 Mcf/D on a 24-hour production test through a 28/64-inch choke at a flowing tubing pressure of 220 psi from pay zones between 7,092 and 9,463 feet measured depth. This well has a horizontal displacement of 2,713 feet and reached a total measured depth of 9,463 feet. The Cross No. 1 is located in LaSalle County, 12 miles southwest of Dilley.

The company began acquiring acreage in the Pearsall Field in the late 1980s. The company now has a 100-percent interest in approximately 180,000 acres, plus an option on an additional 58,000 net acres through a recent joint venture. Cumulative production from all Oryx Energy's horizontal wells in the Austin Chalk exceeds two million barrels.

By the end of 1990, the company plans to have drilled 85 horizontal wells, about 60 developmental and some 25 exploratory.

Dallas-based Oryx Energy Co. is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy

conducts its domestic operations through Sun Energy Partners L.P. (NYSE:SLP), of which it is the managing general partner and 98-percent owner.

ARNHEM, THE NETHERLANDS (JUNE 20) BUSINESS WIRE - Akzo, the Dutch-based global chemical company, Wednesday announced that its 50/50 joint venture Akzo & Pacific Oleochemicals will invest MYR 40 million (NLG 30 million) in a new oleochemical plant in Johor, Malaysia.

Akzo & Pacific Olechemicals is a joint venture between Akzo and Lam Soon Malaysia/Johor State Economic Development Corp.

Construction of the new plant, at the present manufacturing site, will start in the third quarter of 1990 with anticipated completion by mid 1992.

The operations will employ approximately 80 people.

The plant, based on Lurgi technology, will process palm kernel and palm oil into distilled and fractionated acids, and refined glycerine. A substantial part of the output will be captively used by the parent companies and exported to Europe, Japan and the United States.

Fatty acids and glycerine are used in soaps, paints, cosmetics, detergents and as a chemical intermediates.

Akzo is a diversified chemical company based in Arnhem. Its 1989 sales exceeded $9 billion. In the U.S. and Canada it employs more than 10,500 people at 161 locations. Its ADRs (American Depositary Receipts) are traded on NASDAQ.

#90171b0709 06/20/1990 ~Business Wire
WASHINGTON (JUNE 20) BUSINESS WIRE - MCI Communications Corp., in an industry first, Wednesday unveiled a long distance service aimed specifically at an $18 billion business market.

The new package, MCI Vision, is designed to provide small and mid-size businesses with features and capabilities that have traditionally been available only to the largest national firms. It offers customers a menu of long distance features that can be tailored to their business, new billing and management aids and broad volume discounts based on combined long distance usage for all of a company's calling -- all at prices based upon a flat per-minute rate, regardless of the distance or volume of calls.

The new service is targeted to customers spending between $500 and $50,000 monthly on long distance services.

MCI Vision is structured to meet the needs of the majority of mid-size businesses with one or more locations. Unlike services now available to this market, MCI Vision permits customers to use the technology of MCI's network to centralize and control company-wide long distance usage by individual, department or location, and by the origin or destination of the call.

To simplify telecommunications cost-accounting and analysis, customers

receive a single, comprehensive invoice and reporting package. The report package details long distance calls and charges for outbound and credit card calls, for domestic and international calls, and for all of a company's locations in an easy to read format. Calls can easily be identified by codes assigned to specific employees, departments or calling cards.

The company said customers can sign up for MCI Vision now, with service beginning in mid-July.

To launch MCI Vision, the company also announced an advertising campaign that will include network television and print advertising in major markets.

Headquartered in Washington D.C., MCI is the world's second largest long distance provider. The company offers a full range of domestic and international voice, data, telex and electronic messaging services to business, residential and government customers. MCI's long distance services enable customers to call throughout the United States and dial direct to more than 170 foreign countries.

#90171b0715 06/20/1990 ~Business Wire
SHANNON, IRELAND (JUNE 20) BUSINESS WIRE - GPA Group plc announced Wednesday that it had signed a contract for the first-ever operating lease of new passenger jet aircraft to a Chinese airline.

The contract -- for 10 new Boeing B737 aircraft on 10-year leases -- is with the Guangzhou Region of CAAC, the Civil Aviation Administration of China. Five of the aircraft will be -300 series and five -500 series.

As part of the the agreement, valued at approximately US$450 million, GPA will purchase 10 Boeing B737-200 aircraft from CAAC. These aircraft (manufactured between 1983 and 1985) will be leased to airlines in China or other countries.

The city of Guangzhou (formerly Canton) is situated north of Hong Kong in the Guangdong province which includes three special economic zones which comprise the center of many of China's leading industrial and financial activities.

GPA will deliver the aircraft between December 1990 and December 1991. They will enter service in the colors of ''China Southern,'' the name for the new airline which will replace the Guangzhou CAAC Regional

Administration from September 1990.

James King, chief executive of GPA Leasing, the GPA Group division responsible for the contract, said that he estimated that China had a requirement for a further 400 commercial aircraft over the next 15 years.

''The Chinese move to the operating lease makes this an important new market for GPA,'' he said, ''and we are proud to have pioneered it. We look forward to extending our business there.''

GPA has over 253 aircraft on lease to 73 airlines in 42 countries and has more than 700 modern jet and turboprop aircraft on order for the 1990s. The company recently announced a 59 percent rise in after-tax profits to $242 million for the year to March 31. Fully diluted earnings per share increased by 49 percent to $42.

#90171b0729 06/20/1990 ~Business Wire

MANHASSET, NY (JUNE 20) BUSINESS WIRE - Martinair Holland has added yet another successful chapter to its history of profitable operations, reporting financial results for 1989 that equal, and in some cases, surpass, the record-setting figures it achieved in 1988.

The Dutch airline ended the 1989 fiscal year with net profits on normal operations of $20 million, a slight increase over the 1988 figure. Gross revenues rose by 14 percent, increasing from $309 million in 1988 to $352 million in 1989.

The carrier reported 1,299,000 passenger boardings in 1989 and carried 601.4 million ton/kilometers of freight for a total transportation production of 1,134 billion ton/kilometers, an overall increase of 5 percent.

Fifty-five percent of the carrier's total transportation revenues were derived from passenger income in 1989. Despite a softening in the overall Dutch ''Inclusive Tour'' market, Martinair still manage to capture more than one-third of this important division of the leisure travel sector. Moreover, the airline's 1989 passenger revenues were further bolstered by the success of its year-round service to warm weather destinations popular with Europeans such as Puerto Plata in the Dominican Republic, as well as Tampa and Miami.

Thanks largely to an increased load factor and its competitive rates, Martinair's cargo operation again performed well in 1989, contributing 30 percent of total revenues. The airline maintained its historically strong volume of freight transportation to Middle Eastern destinations. It also enjoyed unusually brisk business to the Far East and Australia as consignments scheduled for destinations in these areas increased significantly.

Among Martinair's special cargo assignments in 1989 were two full charters of Beaujolais Primeur to Japan; shipments of opera decor from Houston to Cairo; four shipments of race horses from England to Australia; and the transportation of relief goods and peace troops. Sea-Air cargo originating in the Far East continued to rely on Martinair's weekly cargo flight from Seattle. Martinair's Miami flights were the conduit for vegetables and flowers originating in Latin America.

Headquartered in the Netherlands, Martinair Holland operates passenger and freight service to Amsterdam Schiphol Airport from 12 North American gateways: Baltimore/Washington, Detroit, Los Angeles, Miami, Minneapolis,

Newark, N.J., New York, San Francisco, Seattle, Tampa, Fla., Toronto and Puerto Plata in the Dominican Republic.

Its toll-free passenger reservation number is 800-FON-HOLLAND. The cargo department may be reached at 800-FON-FREIGHT.

DEERFIELD BEACH, FL (JUNE 20) BUSINESS WIRE - June 20, 1990, CheckRobot Inc. (NASDAQ:CKRB) Wednesday announced that Safeway Stores Inc. has ordered ACM automated checkout systems to be installed in three Safeway supermarkets in the company's eastern division.

The first installation will begin in July 1990. Headquartered in Oakland, Calif., Safeway is one of the largest retailers in the United States with over 1,100 stores natiowide.

As designed by CheckRobot, the systems will allow for customer-controlled, automated checkout in approximately one-third of the store's checkout lanes, allowing customers to choose traditional cashier-operated lanes as an alternative.

Separately, the company announced that it has sold the initial phase of its proposed $8 million private placement of Convertible Preferred Stock, raising $500,000 (less commissions and selling expenses) from local and other U.S. investors. The company anticipates additional closings over the next few months as the main portion of the offering is effected by Dyment Miller Long Associates Inc., a Montreal-based investment banker.

CheckRobot Inc. develops and markets ACM automated checkout machines. The systems are designed to improve customer service and profitability for the supermarket industry. Using enhanced laser bar-code scanners and a proprietary merchandise security system, the ACM allows shoppers to scan and check out merchandise quickly before paying centrally located cashiers.

#90171b0734 06/20/1990 ~Business Wire

LITTLETON, MA (JUNE 20) BUSINESS WIRE - Alliant Computer Systems Corp. (NASDAQ:ALNT) Wednesday announced Silvar-Lisco has ported its design verification software, SL-Verify, to run on Alliant's new RISC-based FX/2800 family of parallel supercomputers.

As part of a joint marketing and development agreement, Alliant and Silvar-Lisco have optimized SL-Verify to run concurrently on the FX/2800's parallel architecture. In a recent benchmark, an entire 1.25 micron VLSI chip -- of over 1.3 million polygons with 12 masklayers and 54 design rules -- was verified in less than 39 minutes.

Silvar-Lisco is the latest in a growing number of software vendors porting applications to the PAX (Parallel Architecture eXtended) software standard developed jointly by Alliant and Intel Corp. PAX software can run unaltered on any PAX-compliant i860 RISC processor-based system, from desktop workstations to parallel supercomputers such as the FX/2800. The announcement also reinforces Silvar-Lisco's commitment to provide software on multiple computer platforms.

''Design rule checking is inherently a parallel application,'' said John Claiborne, vice president of marketing at Silvar-Lisco. ''In addition to parallel processing, the FX/2800's flexible architecture allows design rule and electrical rule checking or pattern generation to run on the same database concurrently. This performance and capability on an affordable suppercomputer is a giant step forward in high productivity, something our customers need to meet aggressive fabrication schedules.''

SL-Verify, formerly called DVP, is a design verification and mask generation package for developing integrated circuits (ICs). It provides a complete suite of tools to catch fatal errors in IC designs before costly fabrication processes begin.

The SL-Verify tool suite includes DRC, a design rule checker that provides edge-based rules and algorithms; EVS, an electrical verification system that ensures the chip layout is free of electrical connectivity related errors; MDP, a mask data preparation system; and YIELD, software that allows product engineers to analyze and predict the manufacturing yield of a given design.

Each SL-Verify tool package will run concurrently on the FX/2800 to check an entire VLSI design.

''Integrated circuits are currently in a high-speed evolutionary stage as manufacturers continue to embed more transistors on a chip,'' said Ron Gruner, Alliant president. ''As ICs continue to increase in complexity, IC vendors are finding their desktop workstations and midrange computers lack the necessary power to design very large scale integrations. Supercomputers with parallel processing and visualization capabilities are

affordable and essential computer solutions for practical business applications.''

Silvar-Lisco is a leading supplier of advanced CAE (Computer-Aided Engineering) and CAD (Computer-Aided Design) software products for the design of ASIC and full-custom integrated circuits. The company's products are marketed both domestically and internationally to IC producers and large electronic systems manufacturers. The company's common stock is traded in the over-the-counter market under the symbol SVRL.

Alliant Computer Systems Corp. manufactures standards-based parallel supercomputers with visualization tools that enable scientists and engineers to quickly interpret and solve complex problems.

CHICAGO (JUNE 20) BUSINESS WIRE - Thomas E. Meade has been named president and chief operating officer of Kemper Securities Group (KSG), announced James R. Boris, chairman, president and chief executive officer of Kemper Securities Group Holdings, Inc. (KSGH).

In his new position, Meade will continue to report to Boris and will oversee the activities of the Kemper Securities Group regional brokerage firms: Bateman Eichler, Hill Richards, Incorporated, based in Los Angeles; Blunt Ellis & Loewi Incorporated, based in Milwaukee; Boettcher & Company, Inc., headquartered in Denver; Lovett Underwood Neuhaus & Webb, Inc., headquartered in Houston; and Prescott, Ball & Turben, Inc., based in Cleveland.

According to Boris, Meade will continue as chairman and chief executive officer of Boettcher & Company, a post he was named to in April of 1988. He will continue to be based in Denver.

In making the announcement, Boris also said that Lawrence G. Kirshbaum, chairman and chief executive officer of Prescott, Ball & Turben, Inc., will take on the additional responsibility of chairman of the Capital Commitment Committee directing capital allocation and risk management

activities for the KSG. Kirshbaum has also been appointed to the KSGH Executive Committee.

In addition to Kirshbaum, Boris also announced the other members of the KSGH Executive Committee: James R. Boris, chairman, president and chief executive officer of KSGH; Stanley R. Fallis, executive vice president and chief financial officer of KSGH; James P. Fitzgerald, president of Kemper Capital Markets; Frank V. Geremia, chairman of Kemper Clearing Corp.; Thomas E. Meade, president and chief operating officer of KSG; and Frederic L. Saalwachter, executive vice president, Investment Banking Division of KSG.

Prior to joining Boettcher in 1988, Meade was with A.G. Edwards & Sons, Inc., where he was a member of the Executive Committee and served on the Board of Directors. He was with A.G. Edwards from 1972-1988. Throughout his career he has been an investment broker, branch manager and regional manager.

KSGH is one of three operating units of Kemper Financial Companies, Inc., which is a holding company for the financial services units of the Kemper Corporation. The other two units of KFC are Kemper Financial Services, Inc., a major investment management and financial products company, and Kemper Investors Life Insurance Company (KILICO).

WESTBOROUGH, MA (JUNE 20) BUSINESS WIRE - New England Electric System (NEES) Wednesday reported earnings for the first five months of 1990 of $.87 per average share.

This compares to $.91 earned in the corresponding period last year on fewer average shares. NEES earnings for the five months ended May 31, 1990 were decreased by approximately $.11 per share, due to a new seasonal rate design, which was implemented by its wholesale electric utility subsidiary in 1989. This seasonal rate design involves higher rates during peak months and lower rates during off-peak months. It was designed not to have a significant impact on earnings over a full year.

Earnings for the 12 month period ended May 31, 1990 of $2.31 compare to earnings of $2.04 per average share for the corresponding period ended May 31, 1989.

New England Electric Systems

MONTGOMERY, AL (JUNE 20) BUSINESS WIRE - The Enstar Group Inc. (OTC NASDAQ Symbol:ENST) (''Enstar'') and American Savings & Loan Association of Florida (''American Savings'') announced Wednesday that the payable date for the dividend of one-half of the common stock of American Savings will be July 2.

Enstar shareholders will receive one-half share of American Savings for each whole share of Enstar. The ex-dividend date for Enstar stock will be July 3. American Savings will begin trading on NASDAQ on July 3, under the symbol ''ASLA''.

Enstar announced in March that a dividend of one-half of the common stock of American Savings had been placed in a trust for the benefit of Enstar shareholders of record on March 6. The common stock of Enstar has been trading with the dividend attached since the distribution to the trust. The first day the stock will trade without the dividend attached is July 3.

Enstar Chief Executive Officer, Richard J. Grassgreen, stated, ''With the intent to distribute the shares of American Savings from the trust, we are presently withdrawing our intent to sell all of our shares of American Savings.

''Since our February dividend declaration, the Resolution Trust Corp. (''RTC'') has announced its intent to sell major branch networks in Florida, including Centrust (a major competitor with 71 branches) and other branch networks in the American Savings market area.

''Due to the extensive amount of institutions presently for sale in the market area, shareholder value would not be maximized with a sale at this time.''

#90171b0794 06/20/1990 ~Business Wire

VANCOUVER, B.C. (JUNE 20) BUSINESS WIRE - Levtech Medical Technologies Ltd. (VSE Symbol:LMT) Wednesday announced results for the first quarter ended March 31.

For the three months ended March 31, revenues were $7,006,601 and the company sustained a loss of $414,517, or 1 cent per share on a fully diluted basis. (All dollar figures herein are stated in Canadian currency.) Levtech noted that there are no comparable figures for the prior first quarter.

Commenting on the latest first quarter results, Harold Fischman, president of Levtech Medical Technologies, stated, ''As we have previously reported, in October 1989 we completed the acquisition of two major Italian medical technologies companies. The loss we are reporting for the first quarter ended March 31 came after direct acquisition related costs of some $1.4 million were absorbed by the two Italian companies. These costs reflect the acquisition tax structure which was designed to minimize tax liabilities and maximize available disposable cash flow.

''We believe it is also noteworthy that revenues for both acquired companies, Poli-Mak S.p.A. and Ciampolini Strumenti Scientifici S.r.L., are seasonally lower in the first quarter of the year. Further, the first quarter has historically been the worst quarter of the year for both companies, while the fourth quarter is the strongest.

''During the first quarter of 1990, we bagan implementing our merger plan for Poli-Mak and Ciampolini and its subsidiary, Labnova. This plan entails a complete reorganization of sales, operations and administrative structure. We anticipate savings of some $2 million as a result of the merger and expect this savings benefit to be reflected in results as early as the third quarter. We are confident that sales will recuperate during the third and fourth quarters.

''It is also significant that Ciampolini has concluded an agreement in principle to acquire a company in the field of electrophoresis and reagents. The acquisition would be highly complementary to Labnova, our reagent manufacturer, and is expected to make a positive contribution to our overall operations,'' Fischman concluded.

NEWARK, NJ (JUNE 20) BUSINESS WIRE - In response to a growing abuse of operator services, New Jersey Bell has filed a plan Wednesday, June 20, with the state Board of Public Utilities (BPU) that would permit the company to charge a customer who requests that the operator interrupt another conversation.

New Jersey Bell filed the plan because it now handles nearly 12 million interrupt requests a year. Most of these requests are not true emergencies but teenagers seeking to talk to other teens.

If approved, the plan calls for customers to pay $2 when the customer asks the operator to interrupt the busy line.

There will be no charge to interrupt calls made to or by public service agencies such as police, fire and ambulance. In addition, customers will not be charged if an operator determines that the line is out of order or if the phone is off the hook without conversation.

''New Jersey Bell operators always cooperate when customers seek emergency assistance,'' said Fred D'Alessio, assistant vice president-regulatory matters. ''Our operators have reported, however, that the vast majority of 'emergency' requests come from teenagers who are requesting breakthroughs merely to talk to other teens . In other words, these are not true emergency situations.''

In many cases, the teenager who is interrupted refuses to give up the line.

Last year New Jersey Bell handled almost 12 million emergency interrupts a year, D'Alessio said, and the number is increasing at an alarming rate -- nearly 12 percent annually.

''We expect this fee to curb abuse of the service while allowing us to continue to provide it to customers who need it,'' he said. ''We believe that the customers who request such a service should pay for it.''

Under the plan, customers who are certified for assistance under two federal programs -- LinkUp America and Lifeline (when it becomes available in New Jersey) -- will not incur charges when they use the interrupt service.

''Clearly, there are times when customers have a legitimate need to interrupt a call in progress,'' D'Alessio said. ''Our operators must be available to handle different types of calls, including true emergencies. We want to ensure that people are able to reach an operator when they need one.''

New Jersey Bell plans to notify customers of the new charges through bill inserts and when requests for interrupts are made. The company is the only one of seven Bell Atlantic local telephone companies that currently does not charge for this service.

HOUSTON (JUNE 20) BUSINESS WIRE - Buttes Gas & Oil Co. Wednesday reported a loss of $380,000, or 1 cent per share, for the first quarter of 1990 compared to a loss of $191,000, or 0 cents per share, in the first quarter of 1989.

Revenues in the 1990 quarter were $3,144,000 compared with revenues of $2,917,000 in last year's first quarter. A primary reason for the smaller net loss in the 1989 quarter was that interest expense in the 1989 quarter was $189,000 lower than in the 1990 quarter, as the company's plan of reorganization was implemented midway through the 1989 quarter.

MILWAUKEE (JUNE 20) BUSINESS WIRE - Fiserv Inc. (FISV), a leading computer services company providing data processing and information management systems to financial institutions worldwide, has acquired the GTE EFT Services Money Network and its automatic teller machine (ATM) network processing business.

GTE EFT Services is located in Long Beach, Calif.

Operating through its data center in Fresno, Fiserv will provide processing of all ATM and related services for all GTE client financial institutions on the Money Network system, a total of 17 financial institutions and two ATM gateway clients.

Fiserv provides a Shared ATM Network with gateway links to all the major switches, and currently handles in excess of 6 million ATM transactions per month, while directly driving more than 850 ATMs nationwide. The Fresno Center currently drives 370 ATMs for 15 financial institutions in California, Nevada and Hawaii. In addition to providing ATM terminal driving and gateway services, Fiserv also provides point-of-sale and card management products.

Recently, Fiserv and First Interstate Bancorp announced an agreement with Sun State Bank of Las Vegas to expand First Interstate's ATM centers in Nevada. A new First Interstate CASH CENTER was unveiled at Caesar's Palace Hotel-Casino where, for the first time, bank cardholders can access both the CIRRUS and PLUS automated teller networks as well as a number of other networks from a single location. All processing for transactions from this location is handled through the Fiserv data processing center in Fresno.

In the past six years Fiserv, a Milwaukee-based company, has grown into a national network of specialized information management centers and subsidiary companies. The company's Data Centers process over 19.5 million customer accounts for more than 840 client financial institutions.

In 1989, the company's annual revenues were over $164 million, an increase of 31 percent over the prior year's record. A publicly-held company, Fiserv stock is traded in the NASDAQ over-the-counter market system under the symbol FISV.

#90171b0874 06/20/1990 ~Business Wire

NEW YORK (JUNE 20) BUSINESS WIRE - Banc One Corp. announced Wednesday its offering of ten million shares of common stock at a price to the public of $29.00 per share.

The offering was structured as a dual syndicate with 7.5 million shares offered in the United States and 2.5 million shares offered concurrently outside the United States.

In addition, Banc One Corp. has granted options to the U.S. underwriters and international managers to purchase up to an additional 1,125,000 and 375,000 shares, respectively, solely to cover over-allotments.

Goldman, Sachs & Co. was the lead underwriter of the U.S. offering with Montgomery Securities and Dean Witter Reynolds Inc. as co-lead underwriters. Credit Suisse First Boston Ltd. lead managed the international offering with Goldman Sachs International Ltd. as co-lead manager.

Proceeds to Banc One Corp. from the offering will be used for the reduction of short-term debt.

Banc One Corp. operates 51 banking organizations in Ohio, Indiana, Wisconsin, Michigan and Kentucky. Banc One Corp. also owns an equity interest in Banc One, Texas, NA, one of the largest depositary institutions in Texas.

Banc One Corp. reported assets of $27.2 billion and common equity of $2.3 billion at Mar. 31, 1990.

A copy of the prospectus relating to the offering may be obtained from William C. Leiter, controller, Banc One Corp., 100 East Broad St., Columbus, Ohio, 43271, 614/248-5905.

STAMFORD, CT (JUNE 20) COMTEX - The Mid-Atlantic Coca Cola Bottling Co. Inc., a Baltimore-based unit of Coca Cola Enterprises Inc., was found guilty of 11 counts of conspiracy, bribery and the payment to a former civilian U.S. Navy procurement officer of illegal gratuities.

As a result, the parent may be suspended from selling to government agencies for a while.

The conviction came after a June 5 jury trial in a federal court in Norfolk, Va.; sentencing, which could result in a fine of up to $1 million is scheduled for Aug. 3, according to a filing with the Securities and Exchange Commission.

The charges relate to Mid-Atlantic's sales to the Navy Operations Base in Norfolk in 1984 and 1985.

The activities occurred before the acquisition of Mid-Atlantic by Coca Cola Enterprises, which may appeal the conviction.

A former Mid-Atlantic officer pled guilty to two counts of illegal gratuities prior to the trial. The same employee was tried on charges of conspiracy and acquitted.

#90171c0055 06/20/1990 ~Comtex
By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JUNE 20) COMTEX - The House panel overseeing securities issues completed mark up today on two bills which provide the Securities and Exchange Commission added enforcement powers in the areas of penny stock abuse and other securities frauds.

The House subcommittee on telecommunications and finance unanimously agreed on voice vote to insert substitute amendments in the Penny Stock Reform Act and Securities Law Enforcement Remedies Act, respectively. The bills now move to the Energy and Commerce Committee.

Penny stocks are low priced securities which trade in the over-the-counter market but are not listed on NASDAQ. They trade primarily in the pink sheets, published once a day by the National Quotation Bureau and containing thousands of thinly traded stocks.

The original version of the penny stock bill mandated that all penny stocks trade through an automated quotation system and banned blank check offerings, in which the issuer discloses no specific business purpose or identifies an intent to engage in unspecified mergers or acquisitions.

This was opposed by the National Association of Securities Dealers, the agency responsibile for regulating the over-the-counter stock market. The NASD charged an automated system needed time to evolve and outlawing blank check offerings would penalize legitimate issuers.

The revised legislation urges the SEC to facilitate at the earliest possible time the development of the NASD's OTC Bulletin Board into a fully implemented automation quotation system for all penny stocks and requires the SEC to adopt rules to address the problem of fraud associated with blank checks, rather than banning them.

"The bill has been substantially modified and we won't oppose it," said Frank Formica, an NASD vice president. "We still feel the legislation is not necessary. Complaints on penny stock fraud have been going down and our view is the problem is becoming manageable."

The penny stock bill would also expand the SEC's authority to expel crooked promoters and consultants from the securities business and increase disclosure to penny stock customers.

"We support the concept of full disclosure but some aspects are not really practical at the time of transaction," said Formica, in reference to a provision in which broker-dealers must impart information on the liquidity of penny stocks in the market.

The SEC will receive most of the enforcement remedies it is seeking in the revised Securities Law Enforcement Remedies Act. The bill, as amended, authorizes the SEC to issue both permanent and temporary cease and desist orders which give the agency power to halt illegal conduct without going to court, and allows the SEC to order the disgorgement of illegal profits.

The legislation also enables the SEC to impose monetary penalties against violators of federal securities laws and authorizes the agency to seek through the federal courts to bar or suspend a securities law violator from serving as an officer or director of a public company.

The SEC currently has the authority to impose fines or other civil penalties only for insider trading cases. The SEC had also also sought access to grand jury information to assist it in enforcing securities laws but neither the original bill nor amended version contains such a provision.

STAMFORD, CT (JUNE 21) COMTEX - Fort Washington, Pa.-based Greenwich Pharmaceuticals Inc. has signed a license agreement with Kissei Pharmaceutical Co. Ltd. of Japan to license Greenwich's amiprilose HCI arthritis drug in the Far East.

The June 1 agreement grants Kissei exclusive rights to develop and commercialize amiprilose HCI in Japan and Southeast Asia, excluding the People's Republic of China, according to a Securities and Exchange Commission filing.

Amiprilose HCI is an oral treatment for rheumatoid arthritis and a topical treatment for psoriasis.

Greenwich has granted Syntex Corp. of Palo Alto, Calif., the co-exclusive right, along with itself, to manufacture and sell the drug in the United

States.

Greenwich has also granted Syntex the exclusive marketing rights to amiprilose HCI in Canada, Mexico, the Bahamas, Australia, New Zealand and Brazil.

In exchange for the license rights granted to Kissei, Greenwich will receive royalty payments on all sales of amiprilose HCI and a technology transfer fee of $6 million.

In addition, Kissei provided Greenwich with a $3 million working capital infusion as part of a private placement.

The funds will be used to design, synthesize and develop new carbohydrate compounds.

This 8-k Filing was submitted to the Securities and Exchange Commission on JUNE 20, 1990

#90171d0000 06/20/1990 ~French/German News Agency
TOKYO (JUNE 20) - Japan's coal output is expected to drop 1.2 million tons in fiscal 1990 to 8.4 million tons, short of estimated demand of 10.91 million tons for the year, the Ministry of International Trade and Industry (MITI) said Wednesday.

The MITI's Coal Mining Council said the 1.2 million tonne drop for fiscal 1990, which ends in March, followed the closure of two major mines on Hokkaido last year.

The gap between the production target and projected supply will be filled by existing stockpiles and other sources, according to MITI officials.

The council sets the nation's production target annually based on the coal mining industry rationalization law, which is designed to streamline the industry.

As a result of the council's recommendation, at least 150 coal miners are expected to lose their jobs this year. At the end of 1989, there were 8,625 coal miners nationwide, according to the officials.

Frankfurt, June 20 dpa - West German production of cars and vans reached 2.07 million in the first five months of 1990, up five per cent on the same period last year, the industry reported Wednesday.

The Automobile Industry Association (Vda) said exports amounted to 1.2 million cars, up six per cent on the first five months of 1989.

The Vda said lightweight lorry output reached 71,100 in the first five months of 1990, up 13 per cent, of which 43,100 were exported, a ten per cent increase.

Output of lorries over six tons increased one per cent to 62,300 through May, while exports of these vehicles fell five per cent to 34,100, the Vda said.

JERUSALEM (JUNE 20) - About 1.7 million Palestinians in the Israeli-occupied territories Wednesday went on strike to commemorate the massacre of seven Arabs by an Israeli ex-soldier a month ago.

Public life came to a halt and almost all shops were closed in the West Bank and Gaza Strip, while black flags were hoisted on rooftops. No incidents were reported.

Ami Popper, 21, shot dead seven Palestinians from the Gaza Strip in Rishon Le Zion near Tel Aviv on May 20. They were on their way to work in Israel. Subsequent day-long clashes in the territories left 17 Palestinians dead and more than 800 wounded.

An Israeli court ruled Monday that Popper was mentally fit to stand trial murder charges. The ex-soldier had said he fired the deadly shots because his girlfriend had left him.

#90171d1130 06/20/1990 ~French/German News Agency

MADRID (JUNE 20) - French insurance group UAP and Spain's second largest private bank, Banco Central, signed a cooperation agreement here

Wednesday for a three-year trial period.

Under the accord, UAP is to take a 25 percent stake in Banco Central insurance subsidiary Vasco Navarro, while Banco Central will take an equivalent stake in UAP's Spanish subsidiary, UAP-Iberica, the bank said.

These stakeholdings will be temporary during the trial period.

French construction group Bouygues, in which UAP holds a 10 percent stake, is the single largest shareholder in Banco Central, with 4.5 percent.

Banco Central president Alfonso Escamez, who signed the deal here with UAP counterpart Jean Peyrelevade, said he hoped that Mr. Peyrelevade would become a member of the bank's board "at the first possible opportunity."

MONROVIA (JUNE 20) - Air Guinea has agreed to fly mail in and out of Liberia via Conakry, after three weeks of severe disruption, Liberian Postal Affairs Minister Morris Dukuly announced Wednesday.

Air Guinea has been serving the capital's small James Spriggs airport since eight other African and European airlines suspended all flights to Liberia's only international airport, Robertsfield, under threat of rebel attack.

Officials said Mr. Dukuly signed the mail agreement Tuesday with Aboukaka Bah, manager of Air Guinea, which has been evacuating U.S., Guinean, Lebanese, Indian and some Liberian nationals from Monrovia.

Rebels of the National Patriotic Front (NPLF) led by former civil servant Charles Taylor have threatened to attack Robertsfield, 35 miles (55 kilometres) east of here, as part of a bid to unseat President Samuel Doe launched in December.

Observers Wednesday said the new arrangement will bring some relief to many people who have not received any mail for three weeks.

#90171d1490 06/20/1990 ~French/German News Agency

MONROVIA (JUNE 20) - Seven key ministers and a dozen top officials of embattled Liberian President Samuel Doe's government have abandoned their posts as rebels press their drive for the capital, reliable sources said here Wednesday.

The sources, who asked not to be identitifed, said Foreign Minister Rudolph Johnson, presently in the United States, has resigned and is seeking employment with a U.N. agency in New York.

They said he left his letter of resignation on his desk and left, while Finance Minister Emmanuel Shaw resigned last week while on an official trip in the United States.

Informed sources quoted family members as saying Mr. Shaw resigned because of "family pressure," without giving details.

Other cabinet members who have reportedly refused to return home from abroad are the ministers of health and social welfare Martha Sendolo-Belleh, planning and economic affairs Elijah Taylor (no relation to rebel leader Charles Taylor), public works Yudu Gray, internal affairs Ansumana Kromah, and agriculture Scott Gblorquo Toweh.

Last month Mrs. Sendolo-Belleh was given permission to attend a World Health Organization (WHO) meeting in Geneva, while Mr. Taylor represented Mr. Doe at the Economic Community of West African States (ECOWAS) meeting in Banjul at the same time.

For his part, Mr. Kromah delivered a special message from Mr. Doe to Guinean leader Lansana Conte, but has since refused to return home.

He is reportedly seeking refuge in Sierra Leone along with Mr. Doe's press secretary Patrick Kugmeh and Nimba County legislator, David Zankpa.

#90171d1570 06/20/1990 ~French/German News Agency

JOHANNESBURG (JUNE 20) - Top South African black union leaders Wednesday ended a 24-hour sit-in at Department of Manpower offices here held in protest at a minister's refusal to enshrine a union and employer agreement in law.

Jay Naidoo, general secretary of the million-strong, mainly black Congress of South African Trade Unions (COSATU), his counterpart in the largest single union, Cyril Ramaphosa of the National Union of Mineworkers, and 25 other leaders of COSATU-affiliated unions walked out at lunchtime.

COSATU spokesman Neil Coleman said that although the leaders had been given no guarantees Mr. Naidoo had briefed President Frederik De Klerk on the phone late Tuesday for 20 minutes.

Mr. Coleman said: "We suspect that he isn't fully aware or hasn't been properly briefed on the seriousness of the situation."

COSATU has asked Manpower Minister Eli Louw to table before parliament an agreement it signed with its smaller rival the National Council of Trade Unions (NACTU) and the employers' South African Consultative Council on

Labour Affairs (SACCOLA) on May 7.

The accord recommends changes to parliamentary amendments introduced last year to the 1956 Labour Relations Act (LRA), which COSATU says restrict the right to strike and enable companies to sue unions for litigation damages.

Mr. Coleman alleged that Mr. Louw had agreed on May 18 to put the agreement to parliament, but later reneged.

Leading employers including the state electricity company Eskom, chemicals giant SASOL, Goldfields of South Africa, and two universities have objected to the May 7 agreement, according to a report by the advisory National Manpower Commission (NMC).

#90171d1580 06/20/1990 ~French/German News Agency

BERLIN (JUNE 20) - East Germany's Ministry of State Security (Mfs) was informed of and permitted the preparation in East Berlin of Arab terrorist bomb attacks in West Berlin, including the "La Belle" discotheque attack which sparked the U.S. retaliatory bombing of Libya, the West German daily Die Welt has learned.

In its Thursday edition, the newspaper said a former top-ranking Mfs officer had briefed Bonn intelligence officials on what East Germany knew about three West Berlin attacks.

They included the bombing of the French cultural institute ''Maison de France'' in August 1983 which killed one person and wounded 24, the attack on the German-Arab Society in March 1986, and the bomb blast at the ''La Belle'' a month later which killed two and wounded 204.

The former Mfs officer confirmed what Washington at the time alleged about the discotheque attack, that Libya was behind it, Die Welt reported. Former President Ronald Reagan ordered the bombing of Libya in retaliation for the attack on the discotheque, in which off-duty U.S. military personnel were the presumed target.

Die Welt said that the Mfs knew of the arrival of Libyan agents preparing the ''La Belle'' attack.

The Mfs had its ''internal sources'' at the Libyan ''People's Bureau'' in East Berlin, and was also listening in on radio messages between the bureau and Tripoli and so had exact information about the Libyan involvement in the discotheque attack, Die Welt reported.

HAVANA (JUNE 20) - President Fidel Castro met Wednesday with former Nicaraguan president Daniel Ortega to discuss future Cuban-Nicaraguan relations, the official daily Granma said.

Mr. Ortega, who now heads the opposition Sandinista National Liberation Front (FSLN), talked with Mr. Castro about bilateral issues and the future of Cuban cooperation with Managua along lines to be "determined by the Nicaraguan Government" of President Violeta Chamorro, the newspaper added.

Mrs. Chamorro defeated Mr. Ortega and the FSLN in general elections last February, ending the Sandinistas' 10-year rule.

Mr. Ortega will travel on from Cuba to Mexico, where will receive Friday the Benito Juarez award issued by human rights groups and several pro-Sandinista organizations.

TEHERAN (JUNE 20) - Iranian Revolutionary Guards killed 18 people and captured 10 others in a military operation against "anti-revolutionaries" in Iranian Kurdistan, the official IRNA news agency reported Wednesday.

Morteza Qorbani, a commander of the military unit, told IRNA that "a large amount of arms, explosives and documents belonging to anti-revolutionaries" was seized during the three-day operation in the Javanroud area last week.

Mr. Qorbani said the Revolutionary Guards, helped by local inhabitants, had thwarted an attempt to block the road between Paveh and Bakhtaran near the Iraqi border and to attack the towns of Marivan and Javanroud.

"Plans are already underway to weed out anti-revolutionary groups from the region," he added.

IRNA said one of those captured admitted being "armed and despatched to the Islamic republic by Iraq-based anti-Islamic revolution groups," while another confessed that their aimed to attack military and economic centres in Iran.

Earlier Wednesday, the Baghdad-based Democratic Party of Iranian Kurdistan said Kurdish separatists had killed 40 Iranian soldiers and captured eight during raids over the past few days in northwestern Iran.

It said the offensive in the Saqqez and Oshnoviyeh regions, north of the Javanroud area, was designed to "keep up pressure on troops of the Iranian regime in Kurdistan" at a time when the weather favours such operations.

NAIROBI (JUNE 20) - Two former Kenyan cabinet ministers who have come under fire from the government over their calls for a multi-party democracy said they were briefly detained by police here Wednesday.

Kenneth Matiba and Charles Rubia, who gave a news conference after the release, said their lives were threatened.

They said they were in their lawyer's office when six plain clothes policemen burst in and said they were both under arrest for holding an illegal meeting.

They have been denied permission to hold public meetings, but said they were alone with their lawyer Paul Muite when they were hauled out of his office into the street. The police later released them after failing to produce an arrest warrant.

The two men were discussing a request by the authorities for Mr. Rubia to hand in his passport "for scrutiny". Mr. Matiba, a former transport minister, said his passport had been confiscated months ago.

Mr. Rubia, a former housing minister, said the incident, which came a week after gunmen broke into Mr. Matiba's house in what he suspected was a politically-motivated attack and seriously injured his wife, was "harassment of the worst kind I've ever seen, even during the colonial days".

"My life is not safe," Mr. Matiba said, adding that he and Mr. Rubia were being followed constantly and were under "hostile surveillance".

Pressure is mounting here for the restoration of multi-party democracy, but the government seems determined to stifle public debate on political pluralism.

President Daniel arap Moi, who last weekend called for an end to public discussion about abolishing the one-party state, branded Mr. Matiba and Mr. Rubia "traitors" after they called last month for constitutional change to restore multi-party politics. Both have been detained several times.

Mr. Rubia said Mr. Moi's refusal to let them hold public meetings was "unconstitutional" as Kenya's constitution guaranteed freedom of association and freedom of expression.

MOSCOW (JUNE 20) - Russian Communists Wednesday voted to recreate their Communist Party, 65 years after it was absorbed by the Soviet Communist Party under Stalin.

The party will be called the Communist Party of the Soviet Socialist Federation of Russia.

Delegates to a party congress meeting here since Tuesday adopted the decision by 2,507 votes. Fifty delegates voted against and six abstained.

Russia, the largest Soviet republic, had until Wednesday been the only one not to have its own republican party.

#90171d1840 06/20/1990 ~French/German News Agency

NEW YORK (JUNE 20) - The Woolworth retail chain, which already has a major stake in West Germany, is planning to return to East Germany and possibly other East European nations, the company's chairman said in an interview published Wednesday.

The chain already has 286 stores in West Germany, but has been absent from East Germany since before World War II.

Woolworth chairman Harold Sells told The Wall Street Journal: "We think we'll have a couple of (stores in East Germany) open before the end of this year. This will give us a good test of the market and enable us to move rapidly in 1991."

He speculated that a further eight to 10 stores could be opened there next year.

While seeing opportunities in Czechoslovakia and Hungary, Mr. Sells said expansion there was unlikely for at least a year.

Woolworth's West German business accounted last year for revenues of 1.13 billion dollars, or nearly 13 percent of its worldwide revenues.

#90171d1850 06/20/1990 ~French/German News Agency

PARIS (JUNE 20) - French judges are to strike Thursday over poor funding in the legal service and fury at an amnesty for political fraud.

Magistrates are forbidden from any action which would interfere with the administration of justice. So 6,000 of them will instead be suspending all court hearings and other legal business, except remand or imprisonment cases, to attend general meetings and marches.

Judges from the top to the bottom of the hierarchy say they feel "humiliated" by their professional standing which they claim is "the most backward in Europe".

Their unions are calling for the government to increase the legal service budget from 1.36 percent of public spending to 2.5 percent from 1991.

Justice Minister Pierre Arpaillange has said that the statute would be changed.

Meanwhile President Francois Mitterand told the daily Le Monde Tuesday that the discontent was "certainly" due in part to an amnesty for politicians suspected of fraud in party finances, which was passed by parliament in January. Judges called the amnesty a "whitewash".

#90171d2030 06/20/1990 ~French/German News Agency

TAIPEI (JUNE 20) - Chinese dissident Hou Dejian stole into Taiwan Wednesday and gave himself up to the Taipei District Court for illegal entry, a detention house official said.

The official said the Taiwan-born singer-composer was taken by court officials to the Tucheng detention center in suburban Taipei on Wednesday afternoon.

However, China Television Company (CTV) reported late Wednesday that Mr. Hou was at his family home in Taiwan and the official confirmed that Mr. Hou was no longer at the detention center.

Mr. Hou, 33, turned himself in to Taipei District Court prosecutor Tsai Mao-sung after being smuggled into Taiwan in a fishing boat.

In a telephone interview with CTV, Mr. Hou said: "All I can say is that I have to leave the mainland."

He told CTV that he left China in a fishing boat on Monday and arrived in Taiwan at noon Wednesday.

He gave no further details.

The rock singer defected to China in 1983, leaving behind his wife and child.

Earlier Wednesday in Beijing, Chinese dissident Gao Xin re-emerged from three weeks in police custody.

Mr. Gao, 34, Mr. Hou and economist Zhou Duo were spirited away by police May 31, hours before they were to defy authorities with a press conference to demand the release of political detainees, one year after the Tiananmen square crackdown.

Mr. Zhou, 43, was released Sunday. Neither he nor Mr. Gao, a university lecturer, was charged.

Mr. Hou, the most outspoken of the trio, had been missing and unaccounted for.

Mr. Zhou, interviewed Wednesday in Mr. Hou's home, was asked about the pop singer's whereabouts.

"I haven't seen Hou and I don't know the whole thing," Mr. Gao said.

"I must take into account first that I should not bring trouble to my friends," he said.

#90171d2110 06/20/1990 ~French/German News Agency

JOHANNESBURG (JUNE 20) - The powerful National Union of Mineworkers (NUM) Wednesday called on the government to appoint a commission of inquiry into what it claims is economic mismanagement of the country's gold mines.

The union blamed the crisis in the industry -- where more than 10,000 workers face retrenchment -- on mismanagement and "a serious lack of social responsibility towards miners".

"The mine bosses over the years have failed to make contingency plans for the possibility of mass retrenchments arising from possible closures of exhausted mines or even decline of ores," a statement said.

The NUM accused the Chamber of Mines, representing the main mining houses, of stifling mining-related industrial growth by imposing an "extractive economy".

"The result of this is a lack of industries processing raw materials which would have provided thousands of jobs," it said.

In a detailed analysis of the crisis the union said the profit margin on gold was at its lowest point since 1956.

It said the major challenges ahead were inflation, falling ore grades, a complex tax system, the lack of investment funds and the need to develop new technology for ultra-deep mining.

The union accused the six mining houses, Anglo American, Gold Fields, Genmin, Rand Mines, Anglovaal and JCI, of being concerned only for their own profitability and growth.

With the gold price hovering around a disastrous 348 dollars an ounce, the world's largest gold mine, Freegold in Orange Free State, warned this week that nearly 8,000 jobs stand to be lost.

Anglovaal and Gengold had earlier announced the loss of 1,100 jobs following the slide in the gold price.

Twenty of the 33 South African gold mines in the Chamber of Mines are at risk with the gold price at its current level, the Chamber warned this week.

MONROVIA (JUNE 20) - Rebels fighting to unseat President Samuel have captured Cestos City in Liberia's Rivercess County some 200 kilometers (120 miles) east of here, travellers fleeing the fighting said here Wednesday.

Some 5,000 people live in Cestos City, which lies about 80 kilometers (50 miles) east of Buchanan, the headquarters of the rebel National Patriotic Front (NPFL) First Battalion in rebel-held Grand Bassa County.

The witnesses said the rebels executed five persons after taking Cestos City, but did not say when the town was attacked.

They said the NPFL force commander in Rivercess was living in the residence of Rivercess County Superintendent Morris Kaba, who is now in Monrovia.

It was the first report of fighting near the Atlantic coast east of Buchanan.

Travellers said the rebel forces were also occupying the compounds of the Open Bible Standard Mission and the Liberia Inland Mission, two of three missionary groups operating in Rivercess county.

Deputy Information Minister Moses Washington told Agence France-Presse he had received unconfirmed reports of killings in Rivercess against members of Mr. Doe's Krahn tribe, Mandingos, a group of Muslim traders accused of supporting the government and persons holding membership cards of the ruling National Democratic Party of Liberia (NDPL).

On reports that rebels cut communication links between Rivercess and Monrovia, Mr. Washington said lines had not been working since Monday, but suggested that the problem could be technical.

#90171d2240 06/20/1990 ~French/German News Agency
BRUSSELS (JUNE 20) - The representatives of the European Economic Community (EEC) and the European Free Trade Association (EFTA) began negotiations on Wednesday top set up a joint European economic area, according to sources at the European Commission.

The goal of the project is to extend by 1993 the free circulation of goods, services, capital and persons which will be in effect in the EEC to the countries of the EFTA, according to the mandate for negotiation adopted Monday in Luxembourg by the EEC.

During the first day of negotiations, which did not see any serious disagreements, the EFTA countries (Austria, Finland, Iceland, Norway, Sweden and Switzerland) reiterated the list of exemptions from EEC regulations from which they hope to benefit in the framework of a joint economic area.

According to the terms of the EEC mandate for negotiation, which was presented to EFTA representatives on Wednesday, the EEC accepts in principle the idea of such exemptions, but stipulates that they should be "transitory" and "kept to a strict minimum."

#90171d2340 06/20/1990 ~French/German News Agency
PARAMARIBO (JUNE 20) - Army troops recaptured the mining town of Moengo, a rebel stronghold since September, after fleeing guerrillas blew up an important mining concern, the official Surinamese News Agency (SNA) reported Wednesday.

Fighting late Tuesday between government and rebel troops was described as heavy, with several soldiers and civilians wounded, military sources said here.

The army advance came after rebel leader Ronny Brunswijck, who was arrested Monday in neighboring French Guiana, announced he was turning over his command to his number two man, whose nom de guerre is Commander Castro.

Army troops overran the town of 7,000 inhabitants moments after rebels of the Jungle Commando set off charges at the SURALCO mining company bringing down the entire installation.

SURALCO, owned by the U.S. aluminium giant ALCOA, is Suriname's main extractor of bauxite, leading natural resource of this former Dutch colony.

A spokesman for army chief Desi Bouterse said Wednesday that soldiers were ready to "sweep the area surrounding Moengo to eliminate remaining rebel positions and deactivate any mines they may have left."

Prior to Tuesday's attack, rebel spokesman had warned they would destroy Moengo if forced to abandon the city.

Witnesses quoted by radio stations here said they saw a large number of ambulances moving about Moengo and on the main roadway leading to Paramaribo, 100 kilometers (65 miles) to the west.

Other witnesses said hundreds of soldiers were ferried along the Maroni river, which separates Suriname from French Guiana, to Albina, a town close to Moengo where fighting had also been reported on Tuesday.

Government officials have denied ordering the assault on Moengo and the De Ware Tijd newspaper said President Ramsewak Shankar had met late Tuesday with Col. Bouterse -- the country's former military ruler -- to discuss the army's decision to attack.

Mr. Brunswijck formed the Jungle Command in 1986 in a bid to oust the Bouterse-led military regime.

French officials said Mr. Brunswijck was arrested for carrying a false passport and that they were negotiating with the Netherlands on his case.

Mr. Brunswijck said he wanted to leave for the Netherlands because he was disappointed with the stalled peace talks with Paramaribo. The rebel leader was still under detention Wednesday in French Guiana.

#90171d2400 06/20/1990 ~French/German News Agency

LA BAULE, FRANCE (JUNE 20) - President Francois Mitterrand opened the 16th Franco-African summit on Wednesday proclaiming a grants-only aid policy for least developed countries and urging greater democracy with development.

He offered to cut the interest rate to five percent on repayments of public debt by four intermediate-income West African states, Cameroon, Congo, Gabon and Ivory Coast.

French presidential staff said the latter measures would cut Africa's debt burden to France by 250 million francs (some 45 million dollars) this year.

Mr. Mitterrand told 35 African leaders here in this Atlantic resort that: "One should not see freedom as a hidden enemy. It will be your best friend."

French aid would be linked to "efforts made towards greater freedom", he said but made it clear Paris would not be twisting African arms to change their political systems.

He pledged to push at next month's meeting in Houston, Texas, of the seven leading industrial powers for the French aid policy example to be followed.

He would also urge lengthier repayment periods, new debt relief mechanisms, and a guarantees fund for indebted countries financed by the better-off nations relinquishing some of their rights over debts.

The United Nations lists 42 countries as LDCs, 28 of them in Africa.

France is hosting a conference on them in September.

Mr. Mitterrand said France intended to continue helping Africa "no matter what anyone says". He invited the 22 heads of state and other leaders present to move in the direction of democracy, which was "a universal principle".

Some countries were proceeding by leaps and bounds, others were moving step by step, and it was for Africans to choose their path and the pace, Mr. Mitterrand said.

He added that he fully understood those who said their people were not yet ready, pointing out that it took two centuries in Europe to get rid of "all the isms", such as Nazism, fascism, Stalinism and other dictatorial regimes.

#90171d2480 06/20/1990 ~French/German News Agency

KOCEVSKA REKA, YUGOSLAVIA (JUNE 20) - Deep in the Slovenian forest, a concrete door hidden behind trees is the secret entrance to a vast bunker built to shelter Communist leaders in the event of nuclear attack.

This is one of the command centres built by the late Yugoslav leader Marshall Tito in 1949 shortly after he broke ranks with Soviet leader Josef Stalin and feared a Soviet attack.

Until it was shown to journalists Wednesday by the interior and defence ministers of the new non-communist government in the northwestern republic its existence was known only to a handful of party "nomenklatura" and officials.

Already there are rumours that yet darker secrets lie buried like the hideouts, which are redolent of secret passageways leading from mediaeval

castles.

The families of political prisoners who disappeared in the early 1950s maintain that many anti-Communist prisoners, and real or supposed collaborators of the war-time occupying Nazi forces, died while building the bunker.

The Belgrade daily newspaper Borba quoted Wednesday from a secret report dated 1955 which referred to the use of such prisoners for the construction of the hideout.

A governmental commission headed by Slovenian Prime Minister Lojze Peterle is to look into the background and into other unconfirmed reports that part of the 220 square kilometres (88 square miles) of forbidden forest would have been used for the internment of political prisoners in the event of a crisis.

It is believed that archives of the central committee of the Slovenian Communist Party contain the answers and could throw light on reports that somewhere in the forbidden zone lies a secret aerodrome, and that the area was used as a rest centre and hunting park by privileged party people.

But new Interior Minister Igor Bavcar, who was accompanied by Defence Minister Janez Jansa, said that the archives, which had been held at Kocevska Reka, were removed a few days before the elections which gave Slovenia its first non-communist government since World War II.

The bunker covers an area of 2,400 square metres (about 2,880 square yards), and is situated 60 kilometres (37 miles) south of Ljubljana, the Slovenian capital.

#90171d2510 06/20/1990 ~French/German News Agency

DHAKA (JUNE 20) - About 16,000 doctors across Bangladesh refused to treat patients Wednesday to protest a new health policy that would limit private practice, medical sources said.

Doctors at both government and private hospitals observed a seven-hour stoppage, excepting emergency treatment.

But government statement said that "hospitals and dispensaries in Dhaka and elsewhere in the country functioned as usual" during the day and that patients were treated as normally.

The Bangladesh Medical Association (BMA) complained of unspecified "defamatory statements" against doctors and said the government's proposed health policy was an attempt to tarnish their image.

President Hussain Mohammad Ershad was recently quoted as saying that the country's health system was not up to standard and that private practice by the doctors was one of the major causes.

According to available official statistics there is one doctor for every 6,321 people in Bangladesh, a country of more than 110 million.

#90171d2520 06/20/1990 ~French/German News Agency

EINDHOVEN, NETHERLANDS (JUNE 20) - Dutch electronics giant Philips on Wednesday announced a major restructuring of its computer activities, aimed at pulling the sector out of deficit.

The restructuring of the information systems product division, to be carried out in stages, will cost some 200 jobs this year at the data systems product operation in Apeldoorn in the Netherlands.

It will involve making "strategic choices as far as product scope is concerned," and "drastically reducing costs," Philips said in a statement.

Outgoing group chairman Cor van der Klugt has said the multinational has lost hundreds of millions of guilder in the production and development of computers.

It was announced that Mr. van der Klugt would be retiring early at the end of June after Philips said in May that its operating profit fell 26 percent in the first quarter of this year over the same period last year, to 450 million guilder (225 million dollars) from 611 million.

According to Wednesday's Philips statement, the Apeldoorn-based data systems product group will in future concentrate on producing "standard hardware products and 'open' systems," which are compatible with products of other makers.

Experts have criticised Philips' products in this sector in the past for their lack of compatibility and have said the group was too slow in adapting to new developments, although Philips blamed the poor showing on stagnating computer sales worldwide and price pressures, particularly from Japanese makers.

The restructuring of the Apeldoorn data systems product group would mean the loss of 160 jobs this year, plus a further 50 in linked operations such as after-sales service.

The Philips statement gave no indication of the eventual effect on the Philips Information Systems workforce worldwide, which totals some 15,500

people with subsidiaries in France, Australia, West Germany, Sweden, the United States and Canada.

#90171d2550 06/20/1990 ~French/German News Agency

KHARTOUM (JUNE 20) - The rebel Sudan People's Liberation Army (Spla) said Wednesday that its forces killed 153 government troops in fighting in the Upper Nile province.

The rebel Radio Spla said Spla forces ''crushed'' a Sudanese army joint force from Bentiu and Rub Kona, sent to clear Spla bases around Bentiu.

The government force, composed of two battalions from the 18th brigade, suffered ''very heavy losses in both men and materiel'', with 153 dead and 63 wounded in the fighting, it said.

Spla chairman John Garang sent congratulations to the Spla officers and men for ''this magnificent victory over the enemy forces,'' the radio said without indicating when the battle took place.

On Tuesday, a Sudanese armed forces communique, carried by the Sudan News Agency Suna,said 410 rebels were killed and more than 1,000 injured on Saturday when government forces stormed a rebel camp in the Faryang area, near Rub Kona and Bentiu.

#90171d2580 06/20/1990 ~French/German News Agency

BAGHDAD (JUNE 20) - The PLO leadership under Yasser Arafat on Wednesday prepared to meet in the Iraqi capital amid reports that Washington had decided to suspend its dialogue with the organisation, Palestinian sources said.

The sources said the PLO Executive Committee would meet within 24 hours to discuss Arab and international developments, including the situation in the Israeli-occupied territories and the policies of the new Israeli government.

Officials in Washington said President George Bush was to announce later Wednesday that the United States was suspending its 18-month old dialogue with the PLO because of an attempted Palestinian commando raid on Israeli beaches.

Palestinian officials here said they were awaiting the official U.S. announcement -- expected at a press conference to be held by President Bush in Huntsville, Alabama -- before reacting to the move.

Analysts here said the Palestine Liberation Organisation could decide to revise its political strategy following the U.S. decision and Israel's continued refusal to accept talks with a PLO-led Palestinian delegation.

In Tunis, where the PLO has its headquarters, Palestinian sources reacted without surprise to the reports, saying that rumours of a possible break-off by Washington of the dialogue had been rife for the past two days.

The U.S. officials said the decision to break off the dialogue, launched in December 1988, was taken because the PLO refused to clearly denounce the May 30 commando attack on beaches near Tel Aviv, which was foiled by Israeli forces.

The Palestine Liberation Front, a PLO faction headed by Executive Committee member Abu Abbas, claimed responsibility for the attempted sea-borne attack, in which four commandos aboard speedboats were killed and 12 captured.

The PLO leadership has refused U.S. demands that it clearly condemn the attack and discipline Executive Committee member Abu Abbas, preferring to merely reaffirm its condemnation of attacks on civilian targets.

#90171d2760 06/20/1990 ~French/German News Agency

FREETOWN (JUNE 20) - Religious leaders in Sierra Leone have added their support to the growing pressure for authorities to end a four-week teacher strike, state radio reported late Tuesday.

The 18,537 teachers are demanding payment of at at least three months of overdue salaries and allowances.

The radio said religious leaders including representatives of the United Christian Council, Supreme Islamic Council and the Islamic Federation appealed to President Jopseph Momoh at a state house meeting for "the prompt payment of arrears of salary and other allowances to end the present impasse."

"If this is done they would be in turn do everthing possible to get teachers back to the classroom," they said.

The radio did not give General Momoh's reaction, but education ministry officials who were at the meeting said the government was working through the religious leaders to defuse the crisis.

Many of the West African country's schools are owned by the religious groups with subvention from the government.

#90171d2820 06/20/1990 ~French/German News Agency

KUWAIT (JUNE 20) - Kuwaiti Prime Minister and Crown Prince Saad al-Abdallah al-Sabah formed a new 22-member government Wednesday featuring 11 newcomers and a change in the oil portfolio, it was officially announced here.

Rashid Salem al-Oumairy was made oil minister, his first cabinet post, replacing Sheikh Ali al-Khalifa al-Sabah who became finance minister.

The previous 22-man cabinet submitted its resignation June 12, two days after elections to choose 50 members of a new 75-seat national council charged with preparing a return to parliamentary life.

Kuwaiti emir Sheikh Jaber al-Ahmad al-Sabah will name the other 25 members to the council, which is also empowered to discuss government legislation.

Sheikh Jaber dissolved parliament in 1986 after MPs, who often opposed government policies, were accused of abusing democratic practices.

A group of 32 former MPs are demanding a reinstatement of the original parliament and on Monday charged that the national council elections were tainted by fraud and a low turnout.

The crown prince has led five governments since February 1978.

#90171d3070 06/20/1990 ~French/German News Agency

WASHINGTON (JUNE 20) - Seeking international aid to develop newly independent Namibia, President Sam Nujoma Wednesday painted a grim picture of a country and people stripped of resources and kept dependent under 74 years of South African rule.

When Namibia gained independence March 21, Namibians did not inherit ministries because the country had been designated a district, "not even a province," Mr. Nujoma noted.

"We'll have to do everything by ourselves. We will have to start from scratch," said Mr. Nujoma, former leader of the South West Africa People's Organization (SWAPO) that spearheaded the 23-year guerrilla war against South African rule.

Speaking at the Center for Strategic and International Studies on his first visit to the United States since becoming president, Mr. Nujoma outlined daunting problems facing this West African country of 1.3 million people, where most of the 90 percent black population lives in poverty, deprived

of proper housing, education and health care.

He stressed the need for development assistance in four key sectors: agriculture, housing, education and health care.

Tuesday Mr. Nujoma met with President George Bush and later said the U.S. leader had pledged an unspecified amount of U.S. financial aid to the fledgling democracy.

The Namibian leader will attend a United Nations conference in New York of aid-donor nations Thursday and Friday. He is expected to ask donors to agree to finance about 100 development projects in his country.

Mr. Nujoma said the government would move to redistribute the land, of which 85 percent is owned by whites. The minority knew of this plan before the country achieved independence, he added.

#90171d3120 06/20/1990 ~French/German News Agency

WASHINGTON (JUNE 20) - The Supreme Court has upheld a California state court ruling allowing a six-year-old son of Laotian immigrants to undergo corrective surgery for deformities without parental consent.

In a ruling handed down Tuesday but made public Wednesday, Justice Sandra Day O'Connor threw out a request by Ger Xiong of Fresno saying that the court-ordered surgery on his son Kou would violate his religious freedom and rights as a parent.

Kou was born with clubfeet and a dislocated hip.

Mr. Ger and his wife Houa Vue, both immigrants from the Hmong hill tribe of Laos, believe their child's deformities are a divine punishment for faults they or their families committed in the past and fear further punishment if the deformities are corrected.

Physicians told a Fresno County Judge in February that Kou would gradually loose all movement in his legs if his deformities went uncorrected.

The judge authorized the surgery, considering it inadvisable to wait until Kou was old enough to make his own decision, but the ruling was postponed to let Mr. Ger appeal.

HONG KONG (JUNE 21) - An earthquake measuring 5.8 on the open-ended Richter scale was recorded late Wednesday off eastern Indonesia, the Hong

Kong Royal Observatory said.

The epicenter of the "intense" quake at 1523 GMT was in the Molucca Sea about 290 kilometers (180 miles) southeast of Manado, Sulawesi island, the observatory said.

No reports of damage or injuries were immediately available.

TURIN, ITALY (JUNE 20) - Brazil and Scotland fought out a dreary goalless first half in their final World Cup Group C match here on Wednesday night.

With Scotland copying Brazil in fielding a sweeper behind two central defenders by pushing skipper Roy Aitken back, the result was a depressing stalemate containing few notable attacking moves.

Scotland's determination to obtain at least a draw from the game in their bid to follow Brazil into the second round was evident in the first seven minutes when they had two players booked.

Mo Johnston was unlucky to be shown the yellow card for a fourth-minute push on the recalled Ricardo Rocha, but Murdo Macleod deserved his caution for a high tackle on Jorginho.

Both Brazilians continued after treatment and, following a wayward drive from Alemao, Jorginho swung over a dangerous centre which required a headed interception from Stewart McKimmie in front of goal.

The resultant corner from Branco had Jim Leighton backpedalling, but he managed to turn the ball behind for another flagkick which came to nothing.

The Scottish goalkeeper should have been stretched again by Careca in the 24th minute when Dunga's deflected shot landed at his feet, but the prolific striker failed to get any power behind his shot.

Two minutes later Macleod must have wished Branco's fierce free-kick had been as weakly struck. The Scottish midfielder needed lengthy treatment after it had cracked him on the side of the head.

He carried on, but eventually went off still dazed in the 39th minute. Gary Gillespie took over as the sweeper with Aitken returning to midfield.

Brazil -- Taffarel, Jorginho, Gomes, Galvao, Rocha, Branco, Dunga, Alemao, Valdo, Careca, Romario

Scotland -- Leighton, McKimmie, McPherson, McLeish, Malpas, Aitken, McCall,

McStay, MacLeod, Johnston, McCoist

Referee Helmut Khol (Austria)

SAN SALVADOR (JUNE 20) - Salvadoran rebels fired on the home of Labor Minister Mauricio Gonzalez here Wednesday and threw bombs at the military Civil Defense headquarters, but no injuries were reported, the military said.

Leftist rebels from the Farabundo Marti National Liberation Front (FMLN) passed by the labor minister's home, in the western suburb of Maquilishuat, in a taxi and opened fire, the military said in a statement.

Moments later, rebels threw explosives at the Civil Defense headquarters in the southern suburb of Dolores, it said.

The military also reported that three rebels were injured in clashes with soldiers in the last 24 hours in the northern department of Chalatenango.

Rebels also reportedly blew up two electrical towers Wednesday in western El Salvador and four other electrical pylons in the central part of the country, causing widespread power failures.

Peace talks which resumed Tuesday in Mexico City between the rightist government of Alfredo Cristiani and the FMLN appeared not to have deterred clashes between the the military the rebels, observers said.

ATHENS (JUNE 20) - Five South Korean sailors were killed Wednesday in an explosion on board an oil tanker flying the Liberian flag off Ierapetra in the south-east of Crete, the Greek Merchant Marine Ministry reported.

The 100,000-tonne tanker Sea King which belongs to the New York-based Kedma company was empty at the time of the blast some 82 nautical miles south-east of Ierapetra where it was heading, the ministry said.

The explosion ripped through one of the holds in the ship. No details of the circumstances were immediately available.

PRETORIA (JUNE 20) - According South African fugitive Piet "Skiet" Rudolph virtual folk-hero status, rightwingers Wednesday rallied to his support following the announcement of a 50,000 rand (18,700 dollar) reward on his head.

The bounty offer was made Tuesday by Law and Order Minister Adriaan Vlok after Mr. Rudolph publicly threatened a coup in a videotape he sent to the Afrikaans daily Beeld.

Flanked by balaclava-clad guards carrying automatic weapons, Mr. Rudolph in the video urged police and soldiers to help him overthrow the government.

Jaap Marais, leader of the ultra-right Herstigte Nasionale Party, said Wednesday that Mr. Rudolph's threats were evidence of a growing revolt against the government's reform policies.

The HNP had complete understanding of Mr. Rudolph's motives: "He is acting from the knowledge that a war is being waged against the Afrikaner volk," Mr. Marais said.

Leader Robert van Tonder of the Boerestaat Party, of which Mr. Rudolph is a senior member, also supported him, saying it would not help the government to increase the "bribe to catch Piet Skiet."

He said President Frederik de Klerk would be judged by history as the "greatest traitor" for legalising the guerrilla-backed African National Congress and for releasing ANC leader Nelson Mandela from jail in February.

BEIJING (JUNE 20) - Heavy flooding has left an estimated 198 people dead and more than 1,520 injured in the southern Chinese province of Hunan, an official for the province's foreign affairs office said Wednesday.

Describing it as "one of the worst floods in 40 years" in this region, the official said it affected 20 million people, or a third of the province's population.

Damage is estimated at more than one billion yuan (212 million dollars), said the official, who was reached by telephone from Beijing.

More than 2.45 million tonnes of grain were destroyed, while many factories, public buildings and schools were forced to close.

Some 25,000 villages were hit and some that were totally surrounded by water remained cut off Wednesday.

The damage and death toll was still unofficial.

Provincial authorities were called upon to mobilize the population to help in the affected areas.

The province meanwhile set aside 15,000 tonnes of grain and 1.8 million yuans (382,000 dollars) for the affected populations, the People's Daily reported Tuesday.

The provincial insurance body gave 20 million yuan (4.26 million dollars) to businesses to allow them to resume production as fast as possible.

In neighboring Guangdong province, at least 15 people were killed and 19 others seriously wounded Monday when typhoon Nathan struck, the China Daily said.

A three-storey building collapsed like a stack of cards in the coastal community of Shanwai, in the eastern part of the province, killing ten people instantly.

Torrential rains flooded more than 100,000 hectares (247,000 acres) of crops.

A violent storm hit Guangzhou, but there were no reports of injuries or damage.

If the south was suffering from the effects of flooding, the central eastern portion and the north were experiencing a lack of rain and temperatures exceeding 34 degrees celsius (93 fahrenheit).

In Shanghai, municipal trucks sprayed the streets with water and cold drinks were unavailable, the New China News Agency said Wednesday, as residents waited for the rainy season, which usually begins in mid-June.

In Beijing, temperatures have reached 34 degrees celsius (93 fahrenheit) in the past few days and there has been no rain for the past three weeks.

FRANKFURT (JUNE 20) - The West German Bundesbank made repurchase arrangements at rates ranging from 7.80 per cent to 8.05 per cent on Wednesday compared with earlier rates of 7.80 per cent to 8.10 per cent.

The central bank injected 17.9 billion Deutsche marks (10.7 billion dollars) under an arrangement for 28 days and another for 55 days.

This represented a net withdrawal of 2.2 billion marks (1.3 billion dollars) compared with arrangements totalling 20.1 billion marks (12 billion dollars) which fell due on Wednesday. They had been made at rates ranging from 7.80 per cent to 8.10 per cent.

On Tuesday banks had requested a total of 30.6 billion marks for the 28-day arrangement. The bank satisfied requests totalling 10.1 billion marks at rates ranging from 7.80 per cent to 7.95 per cent.

The bank accepted 17 per cent of the offers made at the lowest rate of 7.80 per cent, the bank said.

The banks had sought 14.6 billion marks for the 55-day arrangement, and the central bank accepted to satisfy them to the extent of 7.8 billion marks at rates ranging from 7.85 per cent to 8.05 per cent. The bank satisfied 30 per cent of the requests at the lowest rate of 7.85 per cent.

These arrangements fall due on June 18 regarding the 28-day facility and on August 14 for the 55-day facility.

Last week the bank made available 12 billion marks (7.1 billion dollars) for one month at rates ranging from 7.80 per cent to 8.10 per cent.

#90171d9200 06/20/1990 ~French/German News Agency
TOKYO (JUNE 20) - Justice Minister Shin Hasegawa indicated Wednesday that Japan would stiffen its anti-monopoly law and prosecute violators on criminal charges, officials said.

"I hope violations will be strictly dealt with by the prosecution when reported by the Fair Trade Commission (FTC)," Mr. Hasegawa was quoted as saying at a meeting of prosecutors here.

Experts said they tok the remarks as an indication that criminal charges would be applied to anti-monopoly law violations.

Currently, only recommendations or warnings are given to violators by the FTC, a body promoting fair commercial practices.

Mr. Hasegawa's remarks came amid increasing U.S. pressure on Japan to prevent unfair commercial practices, including the formation of cartels to fix prices, restrict supplies or engage in negotiated bidding.

NARITA, JAPAN (JUNE 20) - A computerized automatic washing machine for jumbo jet planes started operation Wednesday at Narita Airport, east of Tokyo, Japan Airlines Co., Ltd. (JAL) said.

Washing aircraft at Narita has so far been done manually, costing about 500,000 yen (3,247 dollars) and taking about four hours with 20 workers for each jumbo jet.

The new machine, jointly developed by JAL and Kawasaki Heavy Industries Ltd., can do the same job in 90 minutes with only five workers at the reduced cost of 200,000 yen (1,298 dollars).

The mechanism of the new machine, shaped like a large rectangular box, is similar to that of a car washing machine, JAL officials said.

JAL is planning to offer more of the two-billion yen (13 million dollar) machines for sale to other airline companies, they said.

LONDON (JUNE 20) - Svenska Cellulosa, the Swedish paper maker, has made an agreed takeover bid worth over one billion pounds (1.7 billion dollars) for British counterpart Reedpack, a joint statement said here Wednesday.

The offer includes 543.9 million pounds (936 million dollars) in cash for Reedpack's equity value, and an undertaking by Svenska to take on around 470 million pounds (808 million dollars) worth of bank debt.

Reedpack was created by a 609 million pound (1.04 billion dollar) management buyout from a subsidiary of British publisher Reed International two years ago.

The offer, which when bank debt is included represents a multiple of 11.6 times historic earnings, has received acceptances or irrevocable undertakings to accept from 75 per cent of all classes of the company's share capital, except for the 'C' class share held mostly by Reedpack managers.

Most of Reedpack's ordinary shares are held by a small number of

institutional investment organisations.

Svenska Cellulosa is the eighth largest quoted Swedish company in terms of capitalisation, making 2.71 billion krona (447 million dollars) profit after interest in 1989 on a turnover of 24.85 billion krona (4.09 billion dollars).

Its manufacturing businesses include hygiene (Peaudouce disposable baby diapers are among its brand names), packaging and graphic paper.

These are backed up by forestry and timber operations and hydro-electric power production. It has operations in Belgium, Italy and Austria as well as Sweden.

Reedpack is an office supplies, paper and packaging operation. It recently announced pre-tax profits of 35.4 million pounds (61 million dollars) for the year to April 1990 on a turnover of 842 million (1.44 billion dollars).

#90171d9320 06/20/1990 ~French/German News Agency

MANILA (JUNE 20) - The Philippines will implement gradual oil price deregulation next month and bring down tariffs as part of an economic reform package, cabinet members said here Wednesday.

Budget Secretary Guillermo Carague said that from July 1 the government's oil price support fund would cease to function and oil companies would be allowed to make small increases in their retail prices.

This price deregulation would be expanded from January, although the official Energy Regulatory Board (ERB) would monitor oil prices and limit the price increases, Mr. Carague said.

Oil firms would probably be allowed to lift prices by about 1.3-1.5 per cent a month, he said.

To keep oil prices from shooting up drastically, Manila will allocate three billion pesos (130 million dollars) in the 1991 budget to make up for a feared deficit in the oil price support fund, Mr. Carague said.

Oil companies charge that government control of oil prices has caused the support fund to continually fall into deficit and has kept them from expanding their domestic refining capacity.

Meanwhile, other cabinet members said that the government had agreed on bringing down tariffs, simplifying tariff and investment rules and removing tax exemptions and privileges given to large firms.

Press Secretary Tomas Gomez said these reforms would be made as soon as possible although the Trade Department had misgivings about the phase-out of tax exemptions and other investment incentives.

He said the reforms would benefit consumers, encourage small industries and exporters, bring down interest rates, shrink the budget deficit and minimize smuggling.

Finance Secretary Jesus Estanislao said the tax exemptions currently granted resulted in a tax loss of 7.4 billion pesos (320 million dollars) a year.

"We are moving towards a trade and investment regime that will favour the ordinary consumer and away from protecting selective industrialists," he said, although small businesses and export industries would still retain their privileges.

Mr. Estanislao said he wanted the tariff on oil products lowered from 10 per cent to about six per cent.

The oil price deregulation and lowered tariffs are part of a government package to keep the budget deficit from hitting an anticipated 28 billion peso (1.2 billion dollar) total this year.

The secretaries said that the reform measures could be implemented without congressional action but the removal of tax exemptions needed legislation.

A series of increased taxes on liquor and tobacco products was signed into law this week after a year of delays, resistance and alterations by Congress.

Mr. Estanislao admitted that the package may have some "painful" initial costs such as "a brief burst of inflation," which would stay at 13.5 per cent for three to six months. The inflation rate already hit 13 per cent this year.

#90171d9390 06/20/1990 ~French/German News Agency

KUALA LUMPUR (JUNE 20) - The independent Malaysian Institute of Economic Research (MIER) on Wednesday urged the government to review tax incentives it says are no longer necessary to attract investments.

Malaysia's economy has reached a stage at which the net benefits of tax incentives are clearly outweighed by the costs, MIER said a report aimed at helping the Finance Ministry formulate next year's budget.

Investment in Malaysia was booming due to investors' confidence in the

economy and in the medium- and long-term profitability of doing business here, the paper said.

"Malaysia is now an internationally competitive economy. Tax incentives are no longer necessary to attract investment," it said.

MIER said the government should review the incentives system, and aim new incentives at re-investment to reduce repatriation of profits.

The Malaysian economy has grown an average of 7.2 per cent annually in the past three years.

The Malaysian Industrial Development Authority approved foreign and domestic investments totalling 9.1 billion dollars (3.4 billion U.S.) in 1989 and 12.2 billion dollars (4.5 billion U.S.) last year.

MIER has forecast a slower growth rate of 7.8 per cent for this year, compared with 8.5 per cent last year, in anticipation of a global slowdown and a tighter domestic monetary stance to deal with rising inflation.

#90171d9500 06/20/1990 ~French/German News Agency

KUALA LUMPUR (JUNE 20) - Vietnam needs more trade, not aid, to rehabilitate its economy as it attracts the interest of businessmen in non-communist Southeast Asia and Japan, a senior Vietnamese official said here Wednesday.

Vu Khoan, vice-minister for foreign affairs, said Vietnam would not spurn development aid, but felt that trade and joint ventures would make for a more "durable, solid and stable relationship" with non-socialist states seeking to consolidate economic ties with Hanoi.

He said that Italy, Sweden and France were among countries currently providing Vietnam with limited official development assistance, while other Western governments had promised help after the Cambodia conflict is resolved.

Mr. Khoan, here for a four-day security conference organised by the Malaysian Institute for Strategic and International Studies, is to hold talks Thursday with Malaysian officials on bilateral ties and refugees.

Mr. Khoan said that Vietnam's Foriegn Minister Nguyen Co Thach would soon visit Japan at Tokyo's invitation, which could speed the establishment of diplomatic ties and open Vietnam to Japanese investors.

"Many Japanese companies have already come to Vietnam and some have established links with us despite the absence of official ties. I believe

diplomatic relations are coming soon," he said.

Mr. Khoan said that Vietnam had approved 157 projects involving investments of more than a billion U.S. dollars since 1988, when new laws governing foreign investments were announced.

About half the amount will be spent on oil and gas exploration.

He said that Hanoi was giving priority to projects that would increase food production and the manufacture of consumer and export goods in its overall plan to boost private enterprise.

Mr. Khoan said that the new market orientation had cut inflation from 500 per cent to 35 per cent, while the policy of keeping the Vietnamese currency (dong) at a more realistic level had helped boost exports.

He said these developments had drawn investments and boosted trade between Vietnam and its long-time non-communist Southeast Asian rivals, particularly Singapore, Thailand and Malaysia, which opposed Hanoi's 1978 invasion of neighbouring Cambodia.

#90171d9610 06/20/1990 ~French/German News Agency

LONDON (JUNE 20) - British agro-food group Unigate said Wednesday that its taxable profit rose five per cent in the year to March to 105.5 million pounds (175.8 million dollars) from 100.5 million (167.5 million dollars).

The increase came despite the effect on egg and cheese sales of food poisoning scares over salmonella and listeria, and was largely due to lower pension and interest payments and improved income from property.

Operating profit in purely food sectors fell in Britain as the group sold half its dairies and stagnated in the United States.

But despite "generally more difficult economic conditions" earnings per share were up 17 per cent to 31.5 pence from 26.9 and final dividend was set at 9.6 pence, giving a total for the year of 15.3 pence, up from 13.9.

Turnover for the year to April was up four per cent over the previous year's level at 2.4 billion pounds (four billion dollars) against 2.35 billion (3.9 billion dollars).

The current year had got off to a "satisfactory start," the company said.

The results were better than the most optimistic market forecasts and Unigate shares were up three pence at 308 in early trading on the London stock market.

#90171d9680 06/20/1990 ~French/German News Agency
PARIS (JUNE 20) - Europe's leading retailer of computer materials and services, Metrologie International, said Wednesday it had set up a joint venture with U.S. company MicroAge Computer to set up a European retail network.

French company Metrologie will hold a 63 per cent stake in the new company, MicroAge Europe, which will have initial capitalisation of 14 million francs (2.45 million dollars), and MicroAge Computer the remaining 37 per cent. There will also be three subsidiaries for Britain, West Germany and France.

Metrologie will bring to the venture its knowledge of Europe and its ability to manage a European network, while MicroAge, with 700 franchises worldwide, nobably in Japan, will provide international know-how, the two companies said.

MicroAge Europe is aiming for a network of 100 shops with annual turnover of more than 1.5 billion francs (263 million dollars).

Metrologie International is expecting sales of 4.5 billion francs (789 million dollars) this year, a 26 per cent improvement on last year's level and profit of 80 million francs (14 million dollars).

It had sales of 1.02 billion francs in the first quarter of the year, while MicroAge's turnover for the same period was 146.6 million dollars.

#90171d9720 06/20/1990 ~French/German News Agency

ROME (JUNE 20) - Italian hoteliers have described the World Cup as a disaster for business.

Their trade association president Giovanni Colombo said bookings were less than half the figures expected by the organising committee.

"It's catastrophic," Colombo said on Wednesday.

Bari, which has hosted matches involving the Soviet Union and Romania, and Bologna, where the United Arab Emirates and Yugoslavia played their first round matches, were the worst hit.

The ban on alcohol sales, part of the campaign to beat hooliganism, has also hit business.

Colombo did not expect any improvement.

"Tourists don't decide at the last moment to go to something like the World Cup," he said. "They plan their holidays a long time in advance."

#90171d9750 06/20/1990 ~French/German News Agency

BERNE (JUNE 20) - The number of jobless fell slightly by 655 in May from the April level to 15,980, giving an unemployment rate of 0.5 percent, according to official figures released here Wednesday.

The Swiss labour market has been tight for several years and almost a million foreigners work in the country, or equivalent to almost a sixth of the national population of 6.5 million.

A further 200,000 are employed illegally, according to trades unions.

-30- 630

#90171d9810 06/20/1990 ~French/German News Agency

LONDON (JUNE 20) - British M4 bank lending rose 5.8 billion pounds (9.6 billion dollars) in May against an increase of 3.9 billion (6.5 billion dollars) the previous month, the Bank of England said Wednesday.

M4 includes bank and building society loans.

M4 monetary supply was up one per cent in May, after a 0.6 per cent increase in April, the Bank of England said, with the year-on-year increase 17.1 per cent, up from 17.4 per cent in April.

The figures were above market forecasts of a 5.5 billion increase in bank lending and a 0.9 per cent rise in money supply.

The Committee of London and Scottish Bankers meanwhile announced that private sector bank lending rose 750 million pounds (1.25 billion dollars) in May after an increase of 600 million (one billion dollars) in April, with the average increase at 2.3 billion pounds (3.8 billion dollars) over the past six months.

MO money supply, which comprises only coins and banknotes in circulation, was up 0.4 per cent in May, after a 1.7 per cent increase in April.

MO, the sole money supply definition for which the government fixes a target, was up 6.9 per cent on a year on year basis in May, down from 7.3 per cent in April. The government has fixed an MO growth target of between one and five per cent this year.

The Treasury said that the slowdown in the year on year rise in both MO and M4 showed that the government's high interest rate policy was having the desired effect on the British economy.

But the May rise in M4 bank lending seemed disappointing. The rise in bank lending had been held at of 3.9 billion pounds in April after 9.2 billion in March.

#90171h0069 06/20/1990 ~Chinese News Agency

BEIJING (JUNE 20) XINHUA -- CHINA'S MOTORCYCLE INDUSTRY WILL GEAR UP CO-OPERATION WITH ITS FOREIGN COUNTERPARTS, WANG LISAN, A SENIOR OFFICIAL FROM THE CHINA NATIONAL AUTOMOTIVE INDUSTRY CORPORATION (CNAIC) ANNOUNCED HERE TODAY.

HE SAID THAT RECENT YEARS HAVE SEEN A RAPID DEVELOPMENT IN CHINA'S MOTORCYCLE INDUSTRY, WITH THE ANNUAL PRODUCTION CAPACITY REACHING 1.5 MILLION.

THOUGH MUCH IMPROVEMENT HAS BEEN MADE IN THE PROMOTION OF THE FUNCTIONS AND QUALITY OF THE PRODUCTS, HE SAID, CHINA'S MOTORCYCLE INDUSTRY HAS BEEN SLOW IN MANUFACTURING SOME KEY SPARE PARTS.

IN ADDITION, GAPS ARE YET TO BE FILLED IN CHINA'S MOTORCYCLE INDUSTRY SO FAR AS AUTOMATIC TESTING SYSTEMS, COMPUTER AUXILIARY DESIGN, INDUDSTRIAL ROBOTS, AND CONVERTIBLE PRODUCTION LINES ARE CONCERNED. SOME MOTORCYCLE MAKERS ARE IN DIRE NEED OF ADVANCED INTERNATIONAL EQUIPMEMT AND EXPERTISE.

SINCE 1980 SOME 15 MOTORCYCLE MAKERS HAVE INTRODUCED TECHNICAL KNOW-HOW OF 19 TYPES OF MOTORCYCLES AND SOME TESTING EQUIPMENT FROM JAPAN, ITALY, AUSTRIA AND OTHER COUNTRIES.

AT PRESENT, CHINA HAS TWO SINO-FOREIGN JOINT VENTURES IN THE MOTORCYCLE INDUSTRY, HE SAID.

THE SHANGHAI EK CHOR MOTORCYCLE LTD, WHICH PRODUCES 140,000 MOTORCYCLES ANNUALLY WITH EXPERTISE IMPORTED FROM HONDA OF JAPAN AND ENJOYS THE BEST ECONOMIC RESULTS IN THE INDUSTRY, IS A JOINT VENTURE WITH THE CHIA TAI GROUP OF COMPANIES OF THAILAND.

THE OTHER JOINT VENTURE IS THE SINO-AMERICAN FOSTI MOTORCYCLE COMPANY LTD BASED IN FOSHAN, GUANGDONG PROVINCE. WITH AN INVESTMENT OF 25 MILLION U.S. DOLLARS AND EXPERTISE IMPORTED FROM ITALY, THE VENTURE WILL GO INTO OPERATION IN SEPTEMBER. THE DESIGNED ANNUAL PRODUCTION CAPACITY WILL STAND AT 200,000.

WANG SAID CHINA HAS SOME MOTORCYCLE PROJECTS UNDER CONSTRUCTION INCLUDING SOME SINO-FOREIGN JOINT VENTURES. WHEN ALL THESE PROJECTS ARE COMPLETED IN THE NEAR FUTURE CHINA WILL HAVE AN ANNUAL PRODUCTION CAPACITY OF TWO MILLION MACHINES, HE NOTED.

#90171h0105 06/20/1990 ~Chinese News Agency

NEW DELHI (JUNE 20) XINHUA -- THE INDIAN CAPITAL WILL FACE AN ENVIRONMENTAL CATASTROPHE IN 2001 UNLESS THE CENTRAL GOVERNMENT STEMS RAPID OVERPOPULATION, CURBS VEHICULAR TRAFFIC AND CHECKS POLLUTION, ACCORDING TO AN OFFICIAL REPORT PUBLISHED HERE TODAY.

THE REPORT ENTITLED "CONCEPTUAL PLAN FOR DELHI 2001", FORMULATED BY THE DELHI URBAN ART COMMISSION AND NOW UNDER CONSIDERATION OF THE UNION (CENTRAL) GOVERNMENT, HAS URGED THE GOVERNMENT TO FORMULATE A TIME BOUND PROGRAM TO PROVIDE BASIC AMENITIES TO 11.2 MILLION POPULATION WHEN THE CITY ENTERS INTO THE 21ST CENTURY.

"UNLESS WE WAKE UP TO THE SERIOUS DAMAGE OVERPOPULATION AND RAPIDLY INCREASING NUMBER OF VEHICLES ARE DOING TO THE CITY, WE WILL SEE A 21ST CENTURY THAT COULD OFFER UNPRECEDENTED CATASTROPHIC CONSEQUENCES," THE REPORT SAID.

DELHI'S POPULATION HAS GROWN FROM 2.6 MILLION IN 1961 TO WELL OVER 8.5 MILLION IN 1990, OF WHICH, NEARLY 4.5 MILLION ARE LIVING IN SLUMS AND RESETTLEMENT COLONIES.

WHILE THE POPULATION OF DELHI HAS IN THE LAST TWO DECADES INCREASED BY 130 PERCENT, THE NUMBER OF MOTORIZED VEHICLES HAS GROWN UP BY 1,300 PERCENT. THE TOTAL NUMBER OF MOTOR VEHICLES HAS INCREASED TO 1.465 MILLION IN 1989 FROM 389,000 IN 1977.

THE CONCEPTUAL PLAN CALLED FOR IMMEDIATE ACTION FOR AUGMENTATION OF WATER

SUPPLY, SIXFOLD INCREASE IN THE SEWERAGE FACILITIES AND AN APPROPRIATE SYSTEM FOR RECYCLING SOLID WASTE AND ITS EFFICIENT HANDLING BASED ON LATEST TECHNOLOGY.

WATER SUPPLY NEEDS IN THE CAPITAL ARE INCREASING AT AN ANNUAL RATE OF 12 PERCENT. THE AVAILABILITY OF WATER IN DELHI IN 1989 WAS OF THE ORDER OF 400 MILLION GALLONS PER DAY (MGD), AGAINST A DEMAND OF 472 MGD. IT IS EXPECTED THAT THE DEMAND FOR WATER AT THE PRESENT LEVEL IS LIKELY TO BE MORE THAN 1,000 MGD BY 2001.

SIMILARLY, THE POWER NEEDS OF DELHI WHICH WERE 699 MW IN 1982 HAD INCREASED TO 968 MW IN 1987 AND IS LIKELY TO BE OF THE ORDER OF 2,500 MW BY THE TURN OF THE CENTURY.

THE CONCEPTUAL PLAN SUGGESTED THAT DELHI'S POWER REQUIREMENTS INVOLVE A THREEFOLD INCREASE OVER PRESENT CAPACITY.

THE PLAN ALSO DREW ATTENTION TO THE HIGH LEVEL OF POLLUTION IN THE CAPITAL THE FOURTH MOST POLLUTED CITY IN THE WORLD. OVER 900 INDUSTRIAL UNITS HAVE BEEN IDENTIFIED BY THE MUNICIPAL CORPORATION AS BEING POLLUTANT, OBNOXIOUS AND HAZARDOUS.

THE CONCEPTUAL PLAN OFFERED TWO SEPARATE OPTIONS FOR CONSIDERATION OF THE GOVERNMENT, NAMELY, VISUALIZING THE FUTURE GROWTH OF THE CITY ON THE EASTERN BANKS OF THE YAMUNA RIVER AND PROJECTING FUTURE GROWTH BEING LOCATED IN THREE SEPARATE UNITS OF ONE MILLION EACH, IN THE NORTH, IN THE SOUTH AND IN THE TRANS-YAMUNA AREA.

THE PLAN ALSO SUGGESTED THE CREATION OF AN APEX BODY TO PROVIDE EFFECTIVE IMPLEMENTATION OF ITS RECOMMENDATIONS.

WASHINGTON (JUNE 20) XINHUA -- A NEW SPECIES OF LION TAMARIN, A SQUIRREL-SIZED MONKEY WITH A LION-LIKE MANE, HAS BEEN DISCOVERED IN BRAZIL.

ACCORDING TO THE WASHINGTON POST TODAY, THE NEW SPECIES WAS FOUND BY MARIA LUCIA LORINI AND VANESSA GUERRA PERSSON OF THE CAPAO DA IMBUIA NATURAL HISTORY MUSEUM IN THE BRAZILIAN STATE OF PARANA. THEY SAID THE MONKEY, ABOUT THE SIZE OF A BIG SQUIRREL, HAS GOLDEN-COLORED FUR OVER MUCH OF ITS BODY EXCEPT THAT THE TAIL, FOREARMS AND FACE ARE BLACK.

THE DISCOVERY OF A NEW SPECIES, NAMED LEONTOPITHECUS CAISSARA OR THE BLACK-FACED LION TAMARIN, BRINGS TO FOUR THE MEMBERS OF THE LION TAMARIN GENUS. THE WELL-KNOWN MEMBER IS THE GOLDEN LION TAMARIN, WHICH IS BEING BRED IN ZOOS. THE OTHER MONKEYS IN THE GENUS ARE THE GOLDEN-HEADED LION TAMARIN AND THE BLACK LION TAMARIN.

THE BRAZILIAN SCIENTISTS ESTIMATE THAT POPULATION OF THE MONKEYS COULD BE AS FEW AS SEVERAL DOZENS.

#90171h0114 06/20/1990 ~Chinese News Agency

NEW YORK, JUNE 20 (XINHUA) -- THIRTY-FIVE PERCENT OF THE LARGEST 1,500 U.S. COMPANIES ARE PLANNING TO EXPAND IN THE NEWLY OPENED EASTERN EUROPEAN MARKETS NEXT YEAR, ACCORDING TO A NEW STUDY RELEASED BY THE OPINION RESEARCH CORPORATION (ORC) TUESDAY.

THE STUDY SHOWS THAT THE U.S. FIRMS ARE MOSTLY LIKELY TO DO BUSINESS IN EAST GERMANY (48 PERCENT), THE U.S.S.R. (32 PERCENT), POLAND, (31 PERCENT) HUNGARY (27 PERCENT), AND CZECHOSLOVAKIA (26 PERCENT).

"THIS INFORMATION UNDERSCORES THE IMPORTANCE OF EASTERN EUROPE AS A MARKETPLACE. THE ISSUE NOW FACING U.S. COMPANIES IS HOW TO NAVIGATE THESE UNCHARTED WATERS, SAID MICHAEL COOPER, PRESIDENT OF ORC.

IN THE STUDY, ORC INTERVIEWED 500 EXECUTIVES WITH THE 1,500 U.S. FIRMS IN BOTH THE MANUFACTURING AND SERVICE SECTORS.

ALMOST HALF OF U.S. INDUSTRIAL GOODS MANUFACTURERS PLAN DOING BUSINESS IN EASTERN EUROPE DURING THE NEXT 12 MONTHS, WHILE ONE-THIRD OF CONSUMER GOODS MANUFACTURERS SAY THE SAME.

#90171h0116 06/20/1990 ~Chinese News Agency

OTTAWA (JUNE 20) XINHUA -- CANADA HAS FALLEN TO THE FIFTH MOST COMPETITIVE OF 24 DEVELOPED COUNTRIES IN THE WORLD, BECAUSE OF DECLINING INDUSTRIAL EFFICIENCY AND A DISMAL RESEARCH AND DEVELOPMENT EFFORT, A LATEST INTERNATIONAL STUDY SAYS.

THE COUNTRY PLACED FOURTH ON WORLD COMPETITIVENESS SCALE IN 1989. OF THE 24 INDUSTRALIZED COUNTRIES SURVEYED, CANADA RANKED THIRD IN HUMAN RESOURCES FOR THE EDUCATION, AGE DISTRIBUTION, HEALTH AND FLEXIBILITY OF ITS LABOR FORCE, IT RANKED SECOND FOR ITS NATURAL RESOURCE ENDOWMENT, ACCORDING TO THE "1990 WORLD COMPETITIVENESS REPORT" PUBLISHED TODAY BY CANADA'S NATIONAL BUSINESS DAILY, FINANCIAL POST.

BUT IN INDUSTRIAL EFFICIENCY, CANADA'S LOW PRODUCTIVITY GROWTH AND HIGH MANUFACTURING UNIT LABOR COSTS KNOCKED IT DOWN TO 13TH OVERALL. IT WAS ALSO THE WORST OF THE GROUP OF SEVEN LARGE INDUSTRIAL NATIONS. THAT COMPARED TO FOURTH OVERALL PLACING IN 1989 AND THIRD PLACE SPOT IN THE GROUP OF SEVEN LAST YEAR.

CANADA CONTINUED TO DO POORLY IN THE OPENNESS OF ITS ECONOMY TO THE WORLD, OR "INTERNATIONAL ORIENTATION." IT SLIPPED TO 15TH SPOT FROM 14TH LAST YEAR, BECAUSE OF A HIGH CURRENT ACCOUNT DEFICIT, LOW COMPONENT OF MANUFACTURED GOODS IN EXPORTS, DEPENDENCY ON THE U.S. MARKET AND AN UNCOMPETITIVE EXCHANGE-RATE POLICY.

IN ITS EFFORTS TO PREPARE FOR AN INCREASINGLY TECHNOLOGICAL WORLD, OR "FUTURE ORIENTATION," CANNDA FELL TO 16TH OVERALL FROM 15TH LAST YEAR. THAT RESULTED FROM HAVING ONLY THE 17TH HIGHEST RATIO OF RESEARCH AND DEVELOPMENT SPENDING TO GROSS DOMESTIC PRODUCT, 19TH HIGHEST EXPECTED FUTURE SPENDING ON RESEARCH AND DEVELOPMENT, AND BEING 14TH BEST AT LINKING GOVERNMENT AND BUSINESS RESEARCH AND DEVELOPMENT EFFORTS.

THE WORLD COMPETITIVENESS REPORT IS COMPILED REGULARLY BY THE WORLD ECONOMIC FORUM AND INTERNATIONAL INSTITUTE OF MANAGEMENT DEVELOPMENT, BOTH BASED IN SWITZERLAND.

AS THEY DID LAST YEAR, JAPAN, SWITZERLAND AND THE UNITED STATES STILL CAPTURED THE TOP THREE POSITIONS IN THE COMPETITVENESS SCOREBOARD THIS YEAR. BUT CANADA GAVE UP THE FOURTH PLACE TO WEST GERMANY, LAST YEAR'S FIFTH PLACE FINISHER, ACCORDING TO THE REPORT.

#90171h0117 06/20/1990 ~Chinese News Agency

MANILA (JUNE 20) XINHUA -- AN OVERALL BALANCE OF PAYMENTS DEFICIT OF 371 MILLION U.S. DOLLARS WAS REGISTERED IN THE PHILIPPINES IN THE FIRST QUARTER OF 1990, 362 MILLION U.S. DOLLARS HIGHER THAN THE DEFICIT RECORDED IN THE SAME PERIOD LAST YEAR.

A REPORT ON THE ECONOMIC AND FINANCIAL DEVELOPMENTS IN THE FIRST QUARTER OF 1990 SUBMITTED TO PRESIDENT AQUINO TODAY SAID THAT THE CURRENT ACCOUNT DEFICIT ROSE TO 491 MILLION U.S. DOLLARS DURING THE FIRST THREE MONTHS OF 1990 FROM 150 MILLION U.S. DOLLARS DURING THE SAME PERIOD A YEAR AGO DUE TO THE HIGHER MERCHANDISE TRADE GAP AND LOWER NET TRANSFERS.

AGGREGATE EXPORTS, WHICH STOOD AT 1,946 MILLION U.S. DOLLARS, CLIMBED BY 9.4 PERCENT FROM THE LEVEL RECORDED IN THE PREVIOUS YEAR, BUT THIS MARKED A DECELERATION WHEN COMPARED TO THE FIRST QUARTER 1989 GROWTH OF 14.6 PERCENT.

THE MOST NOTABLE INCREASES IN EXPORT SHIPMENTS WERE REALIZED IN GARMENTS AND ELECTRONICS.

MEANWHILE, IMPORTS GREW BY 27.2 PERCENT TO 2,823 MILLION U.S. DOLLARS AS ALL MAJOR COMMODITY GROUPS EXHIBITED UPTRENDS. ALMOST HALF OR 294 MILLION U.S. DOLLARS OF THE GAIN IN IMPORTS WAS ACCOUNTED FOR BY CAPITAL GOODS.

THE NON-MERCHANDISE TRADE ACCOUNT NETTED A SURPLUS OF 250 MILLION U.S. DOLLARS IN THE FIRST QUARTER OF 1990 COMPARED TO ONLY 54 MILLION U.S. DOLLARS A YEAR AGO. THIS DEVELOPED AS RECEIPTS GREW BY 14.6 PERCENT DUE MAINLY TO HIGHER WORKERS' REMITTANCES AS THE NUMBER OF DEPLOYED WORKERS CLIMBED BY 9.4 PERCENT.

THE REPORT SAID THAT NET FOREIGN INVESTMENTS DECLINED BY 12.1 PERCENT TO 102 MILLION U.S. DOLLARS MAINLY ON ACCOUNT OF HIGHER CAPITAL WITHDRAWALS AS INVESTORS WERE STILL REACTING TO THE DEVELOPMENTS THAT TRANSPIRED DURING THE LATTER PART OF 1989, AND LOWER DEBT CONVERSIONS FOLLOWING THE CONTINUED SLOWDOWN IN THE USAGE OF CENTRAL BANK DEBT PAPER UNDER VARIOUS DEBT REDUCTION SCHEMES.

AT END-MARCH 1990, THE REPORT SAID, THE GROSS INTERNATIONAL RESERVES OF THE CENTRAL BANK WERE RECORDED AT 1,751 MILLION U.S. DOLLARS, 573 MILLION U.S. DOLLARS OR 24.7 PERCENT LOWER THAN THE END-1989 LEVEL. THIS CURRENT RESERVE LEVEL WAS EQUIVALENT TO ABOUT 1.4 MONTHS OF IMPORTS OF GOODS AND SERVICES.

THE COUNTRY'S TOTAL FOREIGN EXCHANGE LIABILITIES AT END-MARCH 1990 WERE RECORDED AT 26,340 MILLION U.S. DOLLARS, 1,276 MILLION U.S. DOLLARS OR 4.6 PERCENT LOWER THAN THE END-1989 LEVEL, THE REPORT SAID.

ISLAMABAD (JUNE 20) XINHUA -- THREE PEOPLE WERE KILLED AND FIVE OTHERS INJURED IN A FURNACE EXPLOSION OF A STEEL MELTING FOUNDRY THIS AFTERNOON IN LAHORE, ABOUT 300 KILOMETRES SOUTHEAST OF ISLAMABAD.

THE EXPLOSION OCCURRED WHEN THE WORKERS WERE BUSY MELTING THE STEEL AND SUDDENLY A FURNACE EXPLODED PROBABLY DUE TO LEAKAGE OF GAS, ACCORDING TO A REPORT OF THE ASSOCIATED PRESS OF PAKISTAN (APP) THIS EVENING.

ITS IMPACT WAS SO DEVASTATING THAT THE ROOF OF THE STEEL PLANT WAS BLOWN UP, HITTING PASSERS-BY WITH BRICKS AND OTHER MATERIALS, CAUSING INJURIES TO TWO PERSONS OUTSIDE THE FACTORY, THE REPORT SAID.

THE PEOPLE OF THE AREA FIRST TOOK IT AS A BOMB BLAST AND STARTED RUNNING FOR LIFE.

A HEAVY POLICE CONTINGENT AND THE LOCAL ADMINISTRATION RUSHED TO THE SCENE TO CONTROL THE SITUATION.

THE ADDITIONAL DEPUTY COMMISSIONER IN LAHORE TERMED IT AN ACCIDENTAL OCCURRENCE. HE, HOWEVER, SAID THAT AN INQUIRY WOULD BE CONDUCTED TO LOOK INTO THE INCIDENT.

#90171h0122 06/20/1990 ~Chinese News Agency

ATHENS (JUNE 20) XINHUA -- THE ENVIRONMENT AND PUBLIC WORKS MINISTRY OF GREECE HAS REPORTEDLY DECIDED TO PASS LEGISLATION CALLING FOR STIFF PENALTIES FOR WATER WASTERS.

THE DECISION WAS TAKEN DUE TO INCREASED WATER CONSUMPTION IN THE ATHENS AREA IN RECENT DAYS AND DUE TO DIMINISHING WATER RESERVES.

ACCORDING TO GREEK WATER COMPANY'S DAILY BULLETIN, THE WATER RESERVES FOR THE GREEK CAPITAL OF NEARLY FOUR MILLION INHABITANTS HAVE FALLEN TO DANGEROUSLY LOW LEVELS.

THE BULLETIN SAID APPROXIMATELY 200 MILLION CUBIC METRES OF WATER ARE AVAILABLE IN THE ATHENS AREA, ENOUGH FOR ONLY 139 DAYS, UNTIL NOVEMBER 5, UNLESS HEAVY RAINFALL ALLEVIATES THE SITUATION CAUSED BY A PROLONGED DROUGHT.

BUT WEATHER FORECASTERS BELIEVE THE CHANCES FOR HEAVY RAINFALL ARE SLIM, THE BULLETIN SAID.

IN AN EFFORT TO CONSERVE REMAINING WATER IN THE TWO RESERVOIRS SUPPLYING ATHENS, THE WATER COMPANY HAS PROPOSED JAIL SENTENCES AND STIFF FINES OF UP TO 100,000 DRACHMAS (ABOUT 600 DOLLARS) FOR PERSONS FOUND GUILTY OF WASTING OR STEALING WATER.

THE PROPOSALS WERE MADE DURING A MEETING YESTERDAY CHAIRED BY ENVIRONMENT, TOWN PLANNING AND PUBLIC WORKS MINISTER STEFANOS MANOS.

THE MEASURES INCLUDE 10,000 DRACHMA (ABOUT 60 DOLLARS) FINES FOR USING HOSEPIPES TO WASH CARS ON THE STREET OR THE PAVEMENT OUTSIDE SHOPS AND HOMES.

THREE-MONTH JAIL TERMS AND FINES OF UP TO 100,000 DRACHMAS (ABOUT 600 DOLLARS) WERE ALSO PROPOSED BY THE WATER COMPANY FOR PERSONS STEALING THE INCREASINGLY PRECIOUS COMMODITY FROM RESERVOIRS BY MEANS OF ILLEGAL PIPELINES TO IRRIGATE FARMLAND.

ARMED WATER COMPANY GUARDS RECENTLY BEGAN PATROLLING PIPELINES AND RESERVOIRS.

GREEK GOVERNMENT RECENTLY ANNOUNCED UP TO 300 PERCENT INCREASES IN WATER RATES. THE MEASURE IS ESTIMATED TO RESULT IN A 15-20 PERCENT SAVING IN CONSUMPTION OF WATER.

#90171h0140 06/20/1990 ~Chinese News Agency

LAGOS (JUNE 20) XINHUA -- A FIVE-DAY TRADE EXHIBITION OF NIGERIAN-MADE PRODUCTS WILL BE OPEN IN YAOUNDE, CAPITAL OF CAMEROON, ON FRIDAY, DESPITE THE PRESENT UNEASY RELATIONS BET- WEEN THE TWO NEIGHBOURING COUNTRIES.

ACCORDING TO A LOCAL PRESS REPORT TODAY, PRODUCTS TO BE DISPLAYED AT THE EXHIBITION INCLUDE STEEL, ALUMINIUM PRODUCTS, COSMETICS, LEATHER SHOES, CHEMICALS, AUTOMOBILE SPARE PARTS, ELECTRIC CABLES, PLASTIC PRODUCTS AND ALCOHOLIC SPIRITS.

BILATERAL RELATIONS BETWEEN NIGERIA AND CAMEROON HAVE BEEN DETERIORATING SINCE JUNE, THIS YEAR, WHEN THE NIGERIAN MINISTRY OF EXTERNAL AFFAIRS SUMMONED THE CAMEROONIAN AMBASSADOR TO LAGOS OVER THE MYSTERIOUS DEATH OF A NIGERIAN BUSINESSMAN IN YAOUNDE AND THE ALLEGED MALTREATMENT OF NIGERIANS LIVING IN CAMEROON.

#90171h0147 06/20/1990 ~Chinese News Agency

UNITED NATIONS (JUNE 20) XINHUA - THE WORLD HEALTH ORGANIZATION (WHO) HAS PUT FORTH ITS POLICY AGAINST AIDS FOR THE COMING YEARS.

ACCORDING TO A WHO PRESS RELEASE HERE TODAY, THE MAIN ASPECTS OF THE POLICY INCLUDE STRENGTHENING OF COOPERATION WITH NATIONAL AIDS CONTROL PROGRAMS, ACCELERATION OF RESEARCH ACTIVITIES, AND PREVENTION OF COMPLACENCY AND DENIAL WHICH THREATENS TO UNDERMINE CURRENT ACTIONS AND FUTURE EFFORTS.

ACCORDING TO WHO'S UPDATE STATISTICS, AS OF JUNE 1990, 263,051 CASES OF AIDS HAVE BEEN OFFICIALLY REPORTED TO IT BY 156 COUNTRIES. BECAUSE OF UNDER-RECOGNITION, UNDER-REPORTING AND REPORTING DELAYS, THE WHO ESTIMATED THAT CLOSE TO 700,000 CASES MAY HAVE BEEN OCCURRED AND THAT 500,000 AIDS PATIENTS HAVE DIED.

THE WHO EXPECTED A CUMULATIVE TOTAL OF OVER ONE MILLION CASES OF AIDS WORLDWIDE BY THE EARLY 1990S, AND FIVE TO SIX MILLION CASES BY THE YEAR 2000.

IT ALSO ESTIMATED THAT FROM SIX TO EIGHT MILLION PEOPLE ARE INFECTED WITH THE HUMAN IMMUNIODEFICIENCY VIRUS (HIV), OR ABOUT ONE OF EVERY 400 ADULTS, IN THE WORLD TODAY. OF THESE INFECTED, ABOUT FOUR MILLION ARE MALES AND TWO MILLION FEMALES.

BY THE YEAR 2000, THE WHO SAID, THERE MAY BE A CUMULATIVE TOTAL OF 15 TO 20 MILLION PERSONS INFECTED WITH HIV WORLDWIDE. ABOUT HALF OF THE THOSE INFECTED WILL DEVELOP AIDS WITHIN TEN YEARS OF INFECTION.

THE CURRENT LEVEL OF AIDS VIRUS INFECTION IS MOST ACUTE IN SUB-SAHARA

AFRICA. THE WHO ESTIMATED THAT ONE OUT OF EVERY 50 ADULT MEN AND WOMEN IN THE REGION IS NOW INFECTED.

ASIDE FROM SUB-SAHARA AFRICA, THE PREVALENCE OF HIV INFECTION IS ONE IN 75 MEN AND ONE IN 700 WOMEN IN NORTH AMERICA, ONE IN 125 MEN AND ONE IN 500 WOMEN IN SOUTH AMERICA, AND ONE IN 200 MEN AND ONE IN 50,000 WOMEN IN WESTERN EUROPE.

THE WHO HAS SET UP A GLOBAL AIDS STRATEGY WHICH HAS THREE OBJECTIVES: TO PREVENT HIV INFECTION, TO REDUCE THE PERSONAL AND SOCIAL IMPACT OF HIV INFECTION, AND TO UNIFY NATIONAL AND INTERNATIONAL EFFORTS AGAINST AIDS.

THE GLOBAL ACTIVITIES OF THE WHO TO IMPLEMENT THE STRATEGY INCLUDE ORGANIZING AND CO-SPONSORING TECHNICAL AND SCIENTIFIC MEETINGS AND CONSULTATIONS ON RESEARCH AND POLICY ISSUES.

IN 1990, THESE ACTIVITIES WILL REQUIRE A TOTAL OF 90.7 MILLION U.S. DOLLARS, OF WHICH ABOUT 70 PERCENT WILL BE SPENT TO SUPPORT AIDS PROGRAMS IN COUNTRIES.

#90171k0017 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - JAPAN'S PRODUCTION OF COAL SHOULD DECLINE 1.2 MILLION TONS IN FISCAL 1990 TO 8.4 MILLION TONS, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SAID WEDNESDAY.

THE FALL WILL COME AS A RESULT OF THE CLOSING LAST YEAR OF TWO MAJOR COAL MINES IN HOKKAIDO, THE MINISTRY SAID.

THE MINISTRY'S COAL MINING COUNCIL SETS THE NATION'S PRODUCTION TARGET ANNUALLY BASED ON THE EXTRAORDINARY MEASURES FOR THE COAL MINING INDUSTRY RATIONALIZATION LAW, WHICH IS DESIGNED TO PROMOTE STREAMLINING OF THE COAL

MINING INDUSTRY.

AS A RESULT OF THE COUNCIL'S EFFORTS, AT LEAST 150 COAL MINERS ARE EXPECTED TO LOSE THEIR JOBS THIS YEAR, MITI SAID.

AT THE END OF 1989, THERE WERE 8,625 COAL MINERS NATIONWIDE. THE TOTAL SUPPLY OF COAL IN THE FISCAL 1990, WHICH ENDS IN MARCH, 1991, SHOULD BE 10.91 MILLION TONS TO MEET THE DEMAND FOR COAL AS ESTIMATED BY THE COUNCIL IN APRIL.

THE DIFFERENCE BETWEEN THE PRODUCTION TARGET AND THE PROJECTED SUPPLY WILL BE FILLED BY WITHDRAWAL FROM STOCKPILES AND OTHER SOURCES, MITI SAID.

#90171k0023 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - FOREIGN MINISTER TARO NAKAYAMA SAID WEDNESDAY HE TOLD U.S. SECRETARY OF STATE JAMES BAKER THAT TO PREVENT ISOLATION OF CHINA, JAPAN WILL LIFT ITS BAN ON OFFICIAL LOANS TO THAT COUNTRY IF FAVORABLE TERMS ARE AGREED TO.

NAKAYAMA, WHO MET BAKER IN SAN FRANCISCO LAST FRIDAY, MADE THE REMARKS AT A SESSION OF THE FOREIGN AFFAIRS COMMITTEE OF THE HOUSE OF REPRESENTATIVES.

JAPAN HAS WITHHELD IMPLEMENTATION OF AN 810 BILLION YEN LOAN PACKAGE TO CHINA SINCE THE MILITARY CRACKDOWN ON PRO-DEMOCRACY DEMONSTRATORS IN BEIJING A YEAR AGO.

NAKAYAMA ALSO SAID HE WILL ASK SOVIET FOREIGN MINISTER EDUARD SHEVARDNADZE WHETHER JAPAN MUST NEGOTIATE WITH BOTH THE CENTRAL GOVERNMENT OF THE SOVIET UNION AND THE RUSSIAN FEDERATION GOVERNMENT CONCERNING A TERRITORIAL DISPUTE OVER ISLANDS OFF HOKKAIDO FOLLOWING A DECLARATION OF SOVEREIGNTY BY THE FEDERATION. SHEVARDNADZE IS TO VISIT JAPAN THIS

SEPTEMBER.

THE RUSSIAN REPUBLIC'S LEGISLATURE PASSED A DECLARATION OF SOVEREIGNTY JUNE 12 AND SAID ITS LAWS CARRIES THE HIGHEST AUTHORITY ON THE REPUBLIC'S TERRITORY.

-30- 1256

#90171k0069 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - BUOYED BY THE BRISK SHOWINGS OF THEIR OVERSEAS SUBSIDIARIES, THREE OF THE "BIG FOUR" SECURITIES COMPANIES WEDNESDAY REPORTED RECORD CONSOLIDATED PRETAX PROFITS IN FISCAL 1989 ENDED MARCH 31.

NOMURA SECURITIES CO., THE ONLY EXCEPTION, ALSO POSTED A HEALTHY PROFIT. THE OTHER THREE ARE DAIWA SECURITIES CO., NIKKO SECURITIES CO., AND YAMAICHI SECURITIES CO.

THEIR EUROPEAN SUBSIDIARIES, ESPECIALLY THOSE IN SWITZERLAND AND WEST GERMANY, POSTED THE BEST RESULTS EVER, SUPPORTED BY ACTIVE ISSUANCE BY CORPORATIONS OF CONVERTIBLE BONDS AND BONDS WITH EQUITY-PURCHASE WARRANTS IN THE EUROMARKET, COUPLED WITH ROBUST TRANSACTIONS IN THE WARRANT MARKET.

THE BROKERAGES ALSO DID WELL IN THE UNITED STATES, WHERE THE RECOVERY OF THE STOCK MARKET CONTRIBUTED TO INCREASED COMMISSIONS. ALL OF THE FOUR EXCEPT NIKKO WERE IN THE BLACK THERE.

IN OVERSEAS OPERATIONS ALONE, NOMURA AND DAIWA REGISTERED RECORD PRETAX PROFITS.

RESULTS OF THE FOUR BROKERAGE COMPANIES, WITH FIGURES IN BILLIONS OF YEN, FOLLOWED BY PERCENTAGE CHANGES, COMPARED WITH THE PREVIOUS YEAR:

	CONSOLIDATED PRETAX PROFIT	PRETAX PROFIT BY OVERSEAS SUBSIDIARIES
NOMURA	538.0 (0.1)	65.2 (37.5)
DAIWA	339.1 (0.9)	26.5 (7.2)
NIKKO	274.6 (0.1)	16.5 (-10.4)
YAMAICHI	247.6 (8.3)	13.3 (13.2)

-30- 1545

#90171k0077 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - U.S. SECRETARY OF STATE JAMES BAKER DID NOT REFER TO JAPAN'S PUBLIC WORKS SPENDING RELATIVE TO GROSS NATIONAL PRODUCT WHEN HE MET JAPAN'S FOREIGN MINISTER TARO NAKAYAMA IN SAN FRANCISCO ON JUNE 15, FOREIGN MINISTRY SOURCES SAID WEDNESDAY.

AFTER THE MEETING, SPECULATION SPREAD WITHIN THE GOVERNMENT THAT THE UNITED STATES MIGHT HAVE DROPPED ITS DEMAND THAT JAPAN GIVE DETAILS OF ITS PUBLIC WORKS BUDGET AS A PERCENTAGE OF GNP IN A FINAL REPORT ON THE JAPAN-U.S. STRUCTURAL IMPEDIMENTS INITIATIVE TRADE TALKS.

THE SOURCES SAID, HOWEVER, BAKER DEMANDED THAT JAPAN STEADILY INCREASE ITS PUBLIC WORKS EXPENDITURES OVER THE NEXT 10 YEARS.

THE SOURCES ALSO SAID THEY WERE SKEPTICAL OF ANY SUGGESTION THAT WASHINGTON HAS ABANDONED ITS INSISTENCE THAT JAPAN DECLARE THE RATIO OF ITS PUBLIC WORKS SPENDING TO ITS GNP.

-30- 1030

#90171k0081 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SHOULD ALLOW BANK-AFFILIATED CREDIT CARD FIRMS TO PROVIDE REVOLVING CREDIT, A MITI REPORT SAID WEDNESDAY.

THE REPORT, PREPARED BY MITI'S CREDIT SALES COUNCIL, URGED THE GOVERNMENT TO SCRAP WITHIN TWO YEARS THE ADMINISTRATIVE RESTRICTIONS THAT VIRTUALLY PROHIBIT BANK-AFFILATED CARD COMPANIES FROM OFFERING REVOLVING CREDIT.

THE RELAXING OF THE RESTRICTIONS SHOULD BE CARRIED OUT ON CONDITION THAT CARD COMPANIES HAVING NO TIES WITH BANKS GAIN ACCESS TO CASH DISPENSERS AND AUTOMATIC TELLER MACHINES INSTALLED IN BANKS, THE REPORT SAID.

REVOLVING CREDIT IS A LENDING SCHEME IN WHICH THE LENDER AGREES TO MAKE LOANS UP TO A SPECIFIED MAXIMUM FOR A SPECIFIED PERIOD. AS THE BORROWER REPAYS A PORTION OF THE LOAN, AN AMOUNT EQUAL TO THE REPAYMENT CAN BE BORROWED AS OFTEN AS NEEDED UNDER THE TERMS OF THE AGREEMENT.

THIS FORM OF LOAN IS COMMON IN THE U.S. AND EUROPEAN COUNTRIES, MITI OFFICIALS SAID.

BANK-AFFILIATED CARD COMPANIES, HOWEVER, SHOULD NOT YET BE ALLOWED TO OFFER ORDINARY INSTALLMENT LOANS FOR CREDIT PAYMENTS, THE REPORT SAID.

THE REPORT ALSO CALLED FOR PERMITTING CREDIT SUPPLIERS TO ISSUE CORPORATE BONDS AND COMMERCIAL PAPER AS A MEANS OF RAISING FUNDS.

THE RECOMMENDATIONS REPRESENT A GOVERNMENT CONCESSION TO U.S. DEMANDS IN BILATERAL TRADE TALKS CONCERNING STRUCTURAL TRADE BARRIERS.

WASHINGTON HAS BEEN PRESSING TOKYO TO EASE RESTRICTIONS ON REVOLVING LOANS TO STIMULATE CONSUMER SPENDING AND LOWER JAPAN'S HIGH SAVINGS RATE.

THE REPORT CAME FIVE DAYS BEFORE JAPANESE AND U.S. NEGOTIATORS MEET IN

TOKYO TO HAMMER OUT A FINAL REPORT ON THE STRUCTURAL IMPEDIMENTS INITIATIVE TALKS.

CARD TRANSACTIONS SURGED SHARPLY TO 7.82 TRILLION YEN IN 1988 FROM 1.94 TRILLION YEN IN 1978.

INSTALLMENT PAYMENTS ACCOUNTED FOR 1.92 TRILLION YEN OF THE 1988 TOTAL, UP FROM 769.2 BILLION YEN 10 YEARS BEFORE, ACCORDING TO MITI.

TOTAL SALES CREDIT PROVIDED IN 1988 WAS 21.17 TRILLION YEN, A 2.55-FOLD JUMP FROM 8.23 TRILLION YEN IN 1978.

OF THAT TOTAL, INSTALLMENT PAYMENTS ACCOUNTED FOR 10.89 TRILLION YEN, UP FROM 5.1 TRILLION YEN A DECADE BEFORE, ACCORDING TO MITI STATISTICS.

#90171k0085 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - THE EXPORT-IMPORT BANK OF JAPAN SAID WEDNESDAY IT HAS SIGNED AN AGREEMENT IN LONDON TO ISSUE 200 MILLION DOLLARS WORTH OF EUROBONDS.

THE 10-YEAR BOND WILL CARRY A COUPON RATE OF 9.50 PERCENT PER ANNUM. THE PROCEEDS WILL BE USED FOR LENDING IN FOREIGN CURRENCIES, BANK OFFICIALS SAID.

-30- 477

#90171k0086 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - JAPAN'S EXPORTS OF COPIERS TO THE SOVIET UNION AND EAST EUROPEAN COUNTRIES ARE SURGING AMID EASING CURBS ON HIGH-TECHNOLOGY EXPORTS TO THE COMMUNIST BLOC AND GREATER DEMAND STIRRED BY "SPECIAL PROCUREMENTS" DERIVED FROM DEMOCRATIC MOVEMENTS IN EASTERN EUROPE, INDUSTRY SOURCES SAID WEDNESDAY.

DURING THE JANUARY-APRIL PERIOD OF THIS YEAR, JAPANESE EXPORTS OF COPYING MACHINES TO THESE COUNTRIES DOUBLED FROM THE SAME PERIOD A YEAR EARLIER TO TOTAL SOME 690 MILLION YEN, THE SOURCES SAID.

IN THE SAME FOUR MONTHS, SOVIET-BOUND EXPORTS OF THE MACHINES POSTED A FIVE-FOLD INCREASE TO AMOUNT TO 1,065 UNITS, WHILE THOSE DESTINED FOR HUNGARY MORE THAN DOUBLED TO 356 UNITS, ACCORDING TO RECENT CUSTOMS-CLEARANCE DATA RELEASED BY THE FINANCE MINISTRY.

THE SPECTACULAR GROWTH WAS ACHIEVED AT A TIME WHEN JAPAN'S TRADE CONTRACTS WITH THE SOVIET UNION AND EASTERN EUROPE THROUGH THE COUNTRY'S 18 MAJOR TRADING HOUSES SUFFERD A 3.6 PERCENT DECLINE IN VALUE IN THE JANUARY-APRIL PERIOD. THE DECLINE CAME IN THE WAKE OF AN ECONOMIC TURMOIL AND DWINDLING

FOREIGN CURRENCY RESERVES AMID POLITICAL AND ECONOMIC CHANGES IN THESE REFORM-MINDED COUNTRIES.

THE SOURCES PREDICTED THAT THE GROWING NUMBER OF NEWLY PRIVATIZED COMPANIES AND ACCELERATED MOVES TO OPEN INFORMATION IN THE COMMUNIST NATIONS ARE EXPECTED TO FURTHER BOOST DEMAND FOR COPYING MACHINES, CREATING A MARKET WORTH TENS OF BILLIONS OF YEN A YEAR IN THE NEAR FUTURE.

-30- 1630

#90171k0089 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - THE EXPORT-IMPORT BANK OF JAPAN SAID WEDNESDAY THAT IT WILL SEND AN ECONOMIC ADVISER TO LAOS AT THE REQUEST OF THE LAOTIAN GOVERNMENT.

THE ADVISER, WHO IS TO STAY IN LAOS FOR SIX MONTHS FROM JULY, IS BEING SENT TO HELP THE ASIAN COUNTRY IMPLEMENT NEW ECONOMIC POLICIES CENTERING ON THE INTRODUCTION OF MARKET PRINCIPLES AND AN OPEN-DOOR POLICY, BANK OFFICIALS SAID.

SPECIFICALLY, HE WILL OFFER ADVICE ON BORROWINGS FROM INTERNATIONAL INSTITUTIONS AND RECEIVING DIRECT INVESTMENTS FROM FOREIGN COUNTRIES.

THIS IS THE FIRST TIME THE JAPANESE GOVERNMENTAL BANK IS SENDING A STAFF MEMBER TO THE GOVERNMENT OF A DEVELOPING NATION.

THIS IS ALSO THE FIRST TIME LAOS HAS ACCEPTED AN ECONOMIC EXPERT FROM AN ADVANCED INDUSTRIALIZED NATION SINCE THE ESTABLISHMENT OF THE PRESENT REGIME IN 1975.

-30- 996

#90171k0094 06/20/1990 ~Japanese News Agency

TOKYO (JUNE 20) KYODO - REGIONAL FINANCIAL INSTITUTIONS WILL BE GIVEN TWO OPTIONS TO START NEW FINANCIAL SERVICES EITHER BY THEMSELVES OR BY SETTING UP SUBSIDIARIES, A GOVERNMENT ADVISORY PANEL SAID WEDNESDAY.

THE TWO OPTIONS WERE CONTAINED IN AN INTERIM REPORT ON THE NATION'S REGIONAL BANKING BUSINESS AND THE PLANNED FINANCIAL REFORM IN JAPAN. THE REPORT, COMPILED BY A SUBPANEL OF THE FINANCIAL SYSTEM RESEARCH COMMITTEE, AN ADVISORY PANEL TO THE FINANCE MINISTER, WILL BE SUBMITTED TO THE COMMITTEE'S GENERAL ASSEMBLY FOR APPROVAL ON JULY 13.

ACCORDING TO THE REPORT, REGIONAL FINANCIAL INSTITUTIONS, INCLUDING REGIONAL COMMERCIAL BANKS, WILL BE ABLE TO ADVANCE INTO SUCH FIELDS AS THE TRUST ASSET MANAGEMENT BUSINESS AND SECURITIES BUSINESS EITHER THROUGH EXPANSION OF THEIR OWN BUSINESS OR BY SETTING UP SUBSIDIARIES.

THE REPORT SAID IT OFFERED THE OPTIONS BECAUSE REGIONAL FINANCIAL INSTITUTIONS, MOSTLY SMALL IN SIZE, MAY NOT BE ABLE TO SECURE ENOUGH DEMAND TO WARRANT THEIR NEW BUSINESS FIELDS WHEN THEY OPT FOR ESTABLISHING SUBSIDIARIES.

WHEN SUCH INSTITUTIONS DECIDE TO ADD A NEW BUSINESS TO THEIR MAIN LINE OF BUSINESS, THE FINANCE MINISTRY WILL STUDY TO WHAT EXTENT THEIR BUSINESS SHOULD BE EXPANDED, THE REPORT SAID.

THE REPORT ALSO RECOMMENDED REGIONAL FINANCIAL INSTITUTIONS, OFTEN NOT WELL PREPARED FOR NEW BUSINESS, TO MAKE A TIE-UP WITH SPECIALIZED FINANCIAL INSTITUTIONS SUCH AS TRUST BANKS OR ACT AS SALES AGENT OF FINANCIAL PRODUCTS OFFERED BY OTHER FINANCIAL INSTITUTIONS.

FALLS CHURCH, VA (JUNE 20) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The FT 100 has marginal gains, up 13 points. ... Hopes for German reunification have pushed the DAX index up 15 points this morning. economy grew at an annual rate of 10.4% in the quarter that ended in March due in part to a jump in the country's exports. ... RJR NABISCO has started its $5.3 billion refinancing effort that will drastically reshape its balance sheet. The proposal seeks to retire more than $4 billion of its worst performing junk bonds. ... DONALD TRUMP's bankers report no progress in bailout talks. ... WOOLWORTH announces plans to open as many as a dozen stores in East Germany by the end on next year. They would be the first U.S.-owned general merchandise outlets in that country. ... CIRCUS CIRCUS ENTERPRISES INC. opened the world's largest hotel, EXCALIBUR, in Las Vegas

yesterday with medieval fanfare.

WHAT'S AHEAD:

The FEDERAL RESERVE releases the "beige" or "tan" book at noon today. ... Budget negotiations continue today at 10:30. ... The HOUSE ENERGY AND COMMERCE COMMITTEE will meet at 9 a.m. to vote on 1990 Penny Stock Reform Act. ... The HOUSE BANKING SUBCOMMITTEE will vote on an Administration request that the U.S. participate in the EUROPEAN BANK FOR RECONSTRUCTION AND DEVELOPMENT. ... NIKE is considering a 2-for-1 stock split pending shareholder approval. ... MOTOROLA is expected to unveil plans next week for a satellite communications system that may handle cellular phone calls in a few years.

FROM THE BULLS:

"The good news is that there's a lot of cash on the sidelines," says ROBERT RITTER, chief technician for LADENBURG, THALMANN & COMPANY. "The market is consolidating for a move that will take it higher -- to between 3000 and 3100 -- before the summer is over." (NYT, 6/20)

FROM THE BEARS:

"My view is that when the tide goes out, all the boats are likely to go aground," says H. ERICH HEINEMANN, chief economist for LADENBURG, THALMANN & COMPANY. "So lower corporate earnings that I foresee will probably create some problems for the market." He says that money is "very tight" and that housing starts, which are at their lowest level since the last recession eight years ago, show "that the Fed's actions are having an effect on the economy." He warns, "This is a time to be very cautious chasing stocks that have run up a long way." (NYT, 6/20)

STOCK MARKET:

"The [11.38] rise [in the Dow] was merely a reaction to the drop the day before," says PETER ANDERSON, president of IDS ADVISORY GROUP in Minneapolis. "I wouldn't be surprised to see the stock market continue to correct with the Dow going down 2800. We've had a rally of about 9%. So, it would be logical for the market to pull back, because it doesn't go straight up. What we are seeing now is a normal consolidation. It's not something to be feared, but something to be expected." ("Investor's Daily", 6/20)

"Anytime you're near an all-time high in history, there is a chance that they'll blow through that and go to a slightly higher high, maybe even as high as 3000," says MICHAEL JENKINS, editor and publisher of "Stock Cycles Forecast." "But right now, the trend is still down. It cannot be reversed to the upside without at least 3 or 4 trading days of base

building, and we still have another 60 to 80 points potential risk to the downside." (CNBC "Market Wrap-Up", 6/19)

"Today's action is a kind of an indication that there's a very substantial amount of buying power out there," says MONTE GORDON, director of research at DREYFUS CORP. "When the market comes down it will step in, in order to ... bargain hunt. What it adds up to is this market apparently doesn't want to go down yet." He sees the Dow trading in the 2800 to 3000 range. (CNBC "Market Wrap-Up", 6/19)

"The market has always had its own pulse," says MURIEL SIEBERT of MURIEL SIEBERT & CO. "If we can see the interest rates coming down then we can see some gains to be made by stocks." Siebert says she was looking for a correction, but that since it has not come, stocks may continue ahead. But she warns, "No volume today is what bothered me. (FNN "Marketwrap", 6/19)

Concern about falling earnings "just drives people to the stocks where they have a high confidence of near-term earnings performance," according to SMITH BARNEY, HARRIS UPHAM & CO. portfolio strategist A. MARSHALL ACUFF. He says growth stocks "have been the leaders ... and as far as I'm concerned, they'll remain the leaders." (WSJ, 6/20)

"It looks as if, short-term, the market could be vulnerable to a decline," says SMITH BARNEY, HARRIS UPHAM analyst BILL RAFTERY. Monday's "drop was a bit of a blow to take, and the bond market has lost some of its momentum, too." ("USA Today", 6/20)

STOCK TIPS:

"Our pension funds are holding 12% cash," says PETER ANDERSON, president of IDS ADVISORY GROUP. "If the market continues to pull back, we plan to commit those cash reserves." Anderson says IDS holds large positions in BOEING CO., DEERE CO., WAL-MART STORES INC., MOTOROLA INC. and INTEL CORP. He likes the financial sector, especially insurance firms like AMERICAN INTERNATIONAL GROUP INC. and GENERAL RE CORP., and savings and loans like GOLDEN WEST FINANCIAL CORP. and H.F. AHMANSON & CO. ("Investor's Daily", 6/20)

The predicted earnings problems could cause significant problems for OTC stocks where earnings growth is expected, says CLAUDIA MOTT, a small-stock analyst at PRUDENTIAL-BACHE SECURITIES INC. "High growth expectations leave you susceptible to disappointments, especially in an environment where we seem to be getting negative signals," says Mott, who cautions that apparel retailers are likely to be the hardest hit. Among those that are expected to see the greatest earnings rise are DEB SHOPS, PAUL HARRIS STORES and JAY JACOBS. (WSJ, 6/20)

PRUDENTIAL-BACHE SECURITIES INC. recommends CHIQUITA BRANDS INTERNATIONAL INC. [formerly United Brands Inc.] and looks for the company to show a 21% gain in earnings from operations this year. The company's banana and other fruit operations will benefit from increased sales to Eastern Europe. The stock is up 49% this year. Yesterday the stock hit a new high closing at 26 1/4. ("Investor's Daily", 6/20)

BATEMAN EICHLER, HILL RICHARDS INC. recommends ALLERGAN INC., an Irvine, Calif. maker of eye and skin care products. Though earnings have recently been hurt by restructuring costs, the firm's earnings growth is expected to average 20% a year as it introduces products and streamlines operations following last year's spinoff from SMITHKLINE BEECHAM. ("USA Today", 6/20)

FRANK FRANCESE of MACON, NUGENT explains GOODYEAR anticipates a loss with its restructuring plan to compete with MICHELIN and BRIDGESTONE. "You're seeing some major players with capital getting in there and taking away market share and coming out with good products and you need top-notch production facilities to do that." (CNBC "Business View", 6/19)

#90171m0002 06/20/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 20) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The dollar fell again yesterday in a market dominated by technical factors. "A lot of people don't understand why we're down here," says ROBERT RYAN, chief foreign exchange dealer for the BANK OF NEW YORK. "But it's hard to fight a trend." (NYT, 6/20)

"A body at rest tends to stay at rest," says RICHARD LEVINE, a foreign-exchange broker with MERRILL LYNCH, explaining the recent sluggish market for the dollar. He says traders are alternately pushing the dollar up and down to determine levels of resistance and support. "Having failed to take out the overhead resistance level, they're now probing to see how far it should go on the down side," says Levine. (WSJ, 6/20)

The dollar's recent weakness may be more a result of other currencies' strength, rather than any problems with the dollar itself, according to LAWRENCE LEUZZI, a managing director at S.G. WARBURG SECURITIES. He points out that growth in Japan's money supply, and first period goods and services output numbers boosted the yen, while an increase in German bond yields has strengthened the mark. (WSJ, 6/20)

Slower money growth is needed to achieve the Fed's primary goal of price

stability, says LEE HOSKINS, president of the FEDERAL RESERVE BANK OF CLEVELAND. "We should bring growth rates over time in M2 to something consistent with price stability." He continues, "It's a very uncertain world. ... There's always that risk" of erring in one direction or the other. "I think the objective of the Federal Reserve ought to be to bring inflation down gradually over time. Then if we do have a slowdown, it will be shallow and not too prolonged." ("Investor's Daily", 6/20)

ROBERT HOWE of ROWE PRICE HEMING INTERNATIONAL explains, "There's a natural demand for dollars that's keeping the yen weak, and that is one reason why the Japanese banks have to keep their interest rates high against West Germany and the United States in order to defend its currency. And the high interest rates are what's keeping the [Japanese] market weak." (CNN "Moneyline", 6/19)

"Somewhere towards the end of the year," the Fed will ease interest rates, believes DREYFUS CORP.'s director of research MONTE GORDON. As the economy recovers, but seems to be sluggish, "pressures will become much more definitive and much more evident," explains Gordon. (CNBC "Market Wrap-Up" 6/19)

MURIEL SIEBERT of MURIEL SIEBERT & CO. says, "We're in a new position that we've never been in before," and believes that this "new position" will prevent the Fed from easing. "We must compete today for foreign money. Until we get the deficit under control, we have to keep interest rates high enough so the foreign money comes in and buys our bonds. (FNN "Marketwrap", 6/19)

"The [bond] market has been indoctrinated to expect numbers on the weak side, and this housing-start figure was well forecast," says RAYMOND STONE a managing director at STONE & McCARTHY RESEARCH ASSOCIATES. "At this point, we need economic news that is even weaker than expected to push the market forward." (NYT, 6/20)

"There is a backdrop ... of a tremendous amount of supply," for the bond market, says SEQUOR GROUP's TIM SCALA. Between Federal debt, municipal debt and RTC debt, Scala says "it would take a lot to push" the market. He says that investors can make money in the bond market, if they invest carefully. (FNN "Marketwrap", 6/19)

"Buyers have put on the brakes," says FIRST CHICAGO CAPITAL MARKETS municipal bond trader JOE PIRARO. "They have not taken the aggressive stance that we saw in prior weeks. They can sense the flow is not like it was." Municipal bonds have been hurt by expectations that the government may attempt to raise as much as $70 billion in the third quarter, possibly with higher yields. (WSJ, 6/20)

THE ECONOMY:

Housing starts fell in May for the fourth consecutive month, dipping to their lowest level since the last recession. RICHARD PEACH, an economist at the MORTGAGE BANKERS ASSOCIATION, says that May was a very wet month over parts of the nation, but he also blamed interest rates and large inventories of new and existing homes for the drop in the housing statistics. "It's not an environment in which builders wanted to go out on a limb and start a whole slew of new units." (NYT, 6/20)

Despite the drop in housing starts, "the demand for housing is there," asserts JOHN TUCCILLO, chief economist with the NATIONAL ASSOCIATION OF REALTORS in Washington. "Housing starts are being held down artificially by regulatory fiat." ("Investor's Daily", 6/20)

NORMAN MAINS of BATEMAN EICHLER feels that the weak housing numbers are but the beginning of a long-term trend. "What you really have happening is that you've got a smaller number of households coming up with the baby boomers now moving into middle age, and this is going to just sort of lower the overall housing starts for the country." (FNN "Marketwrap", 6/19)

Describing the housings starts figures released yesterday, DAVID SEIDERS, chief economist for the NATIONAL ASSOCIATION OF HOME BUILDERS, says, "The inventory situation, which is fairly serious, combined with the weak economic fundamentals ... suggests to builders they ought to hold off on construction in the market." (WSJ, 6/20)

"The [housing} permits certainly would indicate in the next month or two, we're not going to see a sharp rebound," says DARYL DELAND, a senior economist at CAHNERS ECONOMICS. He is quick to point out that there is a remedy, however. "It can bounce back ... very quickly with a decline in interest rates." (CNBC "Market Wrap-Up", 6/19)

The U.S. economy, powered by exports and capital goods, is expected to register real growth of 2.4% this year, according to a CONFERENCE BOARD forecast. But growth is likely to slow to 2.2% in 1991, reflecting a weaker industrial economy. Next year's slowdown is based on widespread weakness projected for much of Europe, outside of Germany, that will curtail the advance of U.S. Exports. ("Investor's Daily", 6/20)

BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC," says that saying there's no credit crunch is like, "if you're in Ethiopia, saying there's no food shortage." The shortage has hit businesses most directly, but "on consumers it is not there yet, except ... in the housing market. It's still fairly easy to get a mortgage," according to Wolman. While regulators tightening of regulations may

be partly responsible, "there's a reason for that," says Wolman. (CNBC "Market Wrap-Up", 6/19)

"Thank goodness for exports," says ALLEN SINAI, chief economist with the BOSTON CO. ECONOMIC ADVISERS. "Without them, the U.S. economy would be dead in the water." He feels that the narrowing trade gap may be the factor which prevents a recession. ("Time", 6/25)

MICHAEL WILNER of HILLTOP TRADING COMPANY says crude prices are slipping as OPEC continues to exceed production quotas in a market already experiencing an oil glut. "We don't listen to OPEC the way we did 5 or 10 years ago. But to be sure, the confidence is not on the side of OPEC. Lower prices are what some people are expecting." (CNN "Moneyline", 6/19)

IN WASHINGTON:

The real nitty-gritty of the budget process may begin today, according to SEN. PETE DOMENICI (R. - New Mex.). "Whether the Administration puts something on the table, or whether some of us do, or whether we take pieces of existing budgets and begin to discuss them, I am sure that we will begin discussing budget proposals [on Wednesday]. (CNBC "World Business", 6/20)

REP. JOHN LaFALCE (D. - N.Y.) disagrees with the Administration's proposal for the S&L bailout. "We shouldn't bond for money that's already been spent. That's fiscally irresponsible and morally reprehensible. We should pay for those problems caused by this generation. We should not have future generations pay for problems caused by this generation." (CNN "Moneyline", 6/19)

The existing federal financial safety net places the onus of preventing bank failures on U.S. taxpayers and may be defeating its purpose, says LEE HOSKINS, president of the FEDERAL RESERVE BANK OF CLEVELAND. "To maintain a safety net as banks engage in a wider range of lines of business is clearly inconsistent with the lessons we are learning from the unraveling thrift industry and more generally with growing concerns about federal guarantee programs. If the bank can't balance it's books at the end of the day it is the Fed left holding the bag." (Reuters, 6/19)

ALAN KEYES, president of CITIZENS AGAINST GOVERNMENT WASTE says that while government waste is already identified by the GENERAL ACCOUNTING OFFICE and by inspector generals' offices in most agencies, but it is not removed because, "no political will exists in Washington, in the Congress, in the Executive branch, to implement these reports." Keyes believes that $305 billion over the next 5 years could be saved, "simply by implementing recommendations that are already on the table." (FNN "Marketwrap", 6/19)

ENGLEWOOD, CO (JUNE 20) PR NEWSWIRE - Marquest Medical Products Inc. (NASDAQ: MMPI) today reported record earnings of $3,004,000 on record revenues of $73,227,000 for the fiscal year that ended March 31, 1990. This compares to net earnings of $2,163,000, on revenues of $62,698,000 for its prior fiscal year. This year's earnings and revenues increased 39 percent and 17 percent respectively, over last year's results. This fiscal year's results represents earnings per share of $.72, including an extraordinary gain of $.06 per share on the repurchase of part of the company's Swiss Bond issue. Last fiscal year's results represented earnings per share of $.55 including an extraordinary gain of $.19 per share.

The fiscal year results include an operating income level of $6,450,000 compared with an operating income level of $3,856,000 for the prior year, an increase of 67 percent. The results also reflect a $403,000 pretax gain made by the company through the repurchase of approximately 12 percent of its Swiss Bond Issue at a discount from PAR.

Marquest Medical Products Inc. is a leading innovator and manufacturer of specialty respiratory and anesthesia disposable products. The company is a technological leader with proprietary healthcare products that are time saving and cost effective. Marquest is also an alternate care provider through its subsidiary, Marquest Health Services Inc., which provides home healthcare services and sells retail pharmaceuticals and sundries to the general public.

#90171p7881 06/20/1990 ~PR Newswire

OYSTER BAY, NY (JUNE 20) PR NEWSWIRE - Acclaim Entertainment Inc. (NASDAQ: AKLM) has entered into an agreement with Nintendo Co. Ltd., whereby Nintendo will become the publisher of two Acclaim Game Boy (tm) titles in Europe. Under the agreement terms, Acclaim's Kwirk (tm) and Wizards & Warriors X: Fortress of Fear (tm) for the Game Boy compact video system will be marketed by Nintendo in Europe under the Nintendo brand name.

"Our Game Boy titles, Kwirk and Wizards & Warriors X: Fortress of Fear, have been received with great enthusiasm here in the United States," says Robert Holmes, president of Acclaim. "Backed by the integrity and powerful distribution inherent in the Nintendo brand name worldwide, we expect this agreement to highly benefit both companies."

A challenging puzzle/maze game, Kwirk -- a "rad tomato" -- goes to the rescue of this "main squeeze" Tammy, who is mysteriously hidden at the end of a series of twisting tunnels and maddening mazes. Along the way, he is joined by his "kwirky" cohorts and together, they selectively rotate turnstiles, fill gaping holes and move blocks that reveal passageways leading to Tammy. Three game play modes and variable skill levels add to the challenge.

In Acclaim's Wizards & Warriors X: Fortress of Fear, the legend of Kuros, the knight warrior who appears in the company's highly successful Wizards & Warriors (tm) and IronSword: Wizards & Warriors II (tm) for the Nintendo Entertainment System (NES) continues. This time Kuros travels to the opposite end of the tangled woods of Zanifer in search of Princess Elaine who has disappeared. Forging through the Fortress of Fear, Kuros leaps through castle ruins and travels on clouds as he nears the ultimate confrontation with the evil wizard, Malkil. Along the way, he collects magic spells and battles scores of evil creatures including jumping fish, giant birds and slithering serpent beasts.

Acclaim Entertainment Inc. is a leading publisher, marketer and distributor of home entertainment product under the Acclaim and LJN labels. These include Nintendo Entertainment System software, Nintendo Game Boy compact video system software, wireless remote controllers and hand-held electronic video games.

NILES, OHIO (JUNE 20) PR NEWSWIRE - Employees at RMI Titanium Co. (NYSE: RTI) played an important part in the successful launch of the new Hubble Space Telescope, the company said today.

The main ring that supports the 8-foot wide, 1,650-pound primary mirror at the rear of the telescope is made of RMI titanium alloy plate. The telescope weighs approximately 24,000 pounds and is about 43 feet long and 14 feet wide. It was built by Excelco Developments of New York under a subcontract from NASA.

L. Frederick Gieg Jr., president and chief executive officer of RMI, explained why titanium was selected. "The main ring is the most highly stressed structure on the telescope. Titanium's unique properties to resist severe launch stresses and the conditions of space made it the material of choice for the support ring on the telescope. All of us here are excited that RMI had the opportunity to participate in this historic event."

RMI Titanium Co. is a leading manufacturer of titanium sponge, mill products and powder, with headquarters and manufacturing facilities in Niles, Ohio. Other production and service facilities are located in Ashtabula, Ohio; Washington, Mo.; Salt Lake City; Hermitage and Sharon, Pa. RMI became a public corporation on April 20, 1990, with common stock trading on the New York Stock Exchange under the symbol "RTI." There are 15,002,400 shares of RMI's common stock outstanding.

#90171p7887 06/20/1990 ~PR Newswire

WHITE HAVEN, PA (JUNE 20) PR NEWSWIRE - Electronics, Missiles & Communications Inc. (EMCEE) (NASDAQ: ECIN) today announced the results of its fiscal year ended March 31, 1990:

Fiscal year ended	March 1990	March 1989
Net sales	$10,108,775	$6,577,191
Net income	374,886(A)	404,000(A)
Earnings per common share:		
Continuing operations	$.08	$.05
Extraordinary item	.01(A)	.05(A)
Net income per common share	.09	.10

(A) During fiscal 1989, extraordinary item amounted to $217,000 as a result of an extinguishment of debt of $176,000 and a tax benefit of $41,000. In fiscal 1990, the extraordinary item was a tax benefit only.

Company management attributes the positive results to an expanded marketing and sales approach with innovative design improvements. EMCEE's international presence continues to strengthen, as is evidenced by the 78 percent increase in export sales from $1.6 million (fiscal 1989) to $2,853,000 (fiscal 1990). The company's backlog remains constant in the $2.5 million range.

Electronics, Missiles & Communications Inc., located in White Haven, is a leading manufacturer of television transmission equipment. Its stock is traded Over-the-Counter on the NASDAQ system; ticker symbol ECIN.

The company's annual report will be available in mid-August. Copies can be obtained by contacting Kay Krull, assistant secretary.

ST. PETERSBURG, FLA. (JUNE 20) PR NEWSWIRE - Home Shopping Network, Inc. (NYSE: HSN), announced today that its wholly owned subsidiary, Precision Software, Inc. ("PSi"), was awarded a major contract to provide MCI Communications Corporation (NASDAQ: MCIC) with computerized voice response equipment and technology. This state-of-the-art product is similar to the voice response units (known to Home Shopping Club Members as "Tootie") that currently answer approximately 50 percent of all calls made to the Home Shopping Club, but will provide MCI with additional advanced audio response capabilities in the network.

The contract will be performed by PSi over the next several years for a total of $15.6 million. The terms and conditions of the contract include MCI's right to purchase additional equipment and technology, as well as a right on the part of MCI to terminate the agreement in its discretion provided PSi is compensated for work already performed.

Roy M. Speer, chairman of Home Shopping Network, commented, "We are delighted with the agreement with MCI which represents the first step in marketing the advanced voice response technology of PSi. PSi's voice response units have contributed to Home Shopping Network's lead in the electronic retailing industry, and now PSi is moving forward to address a larger market. We value our business relationship with MCI, HSN's telecommunications provider, and are pleased that MCI selected PSi. This is a significant expansion in the commercial use of PSi's advanced call processing technology by telephone companies and large corporate users."

#90171p7890 06/20/1990 ~PR Newswire

MILPITAS, CA (JUNE 20) PR NEWSWIRE - Komag Inc. (NASDAQ: KMAG) today announced that the board of directors of Asahi Komag Co. Ltd. (AKCL) approved a change in accounting practice for AKCL's financial statements prepared under U.S. generally accepted accounting principles (GAAP). AKCL Komag's Japanese joint venture, will change to the straight-line method of depreciation from an accelerated method currently in use.

The straight-line method is a practice more commonly followed by U.S. companies in the preparation of financial statements. The effect of this change will be recorded in AKCL's 1990 U.S. GAAP financial statements as a

cumulative effect adjustment.

The joint venture agreement provides that Komag will record in its financial statements (using the equity method of accounting) a 50 percent share of AKCL's net income when AKCL's retained earnings become positive. Prior to the accounting change and as previously announced, Komag did not expect to reflect such income for several years. "Based on a preliminary evaluation of the accounting change and estimates of AKCL's future financial performance, this income recognition will occur earlier than previously announced," said Stephen C. Johnson, president and CEO of Komag Inc. "We have begun a formal evaluation to quantify the effect of this accounting change and plan to complete this evaluation by the end of our September 1990 quarter," he continued. Additionally, under the joint venture's technology licensing agreement, Komag will continue to receive and record royalty income based on a percentage of revenue derived from product produced by AKCL.

Komag Inc. develops, manufactures and markets sputtered thin-film metallic disks for use in high-capacity, high-performance Winchester disk drives. Komag is the largest independent supplier of these disks to independent disk drive manufacturers and computer system manufacturers which build their own disk drives.

AKCL, a Japanese company operated under a joint venture agreement with Asahi Glass Co. Ltd. and Vacuum Metallurgical Co., manufacturers and sells thin-film disks for Winchester disk drives in Japan. AKCL is among the top three media producers in Japan. Komag employs nearly 1,500 people. The company is traded on the NASDAQ over-the-counter market under the symbol KMAG.

#90171p7891 06/20/1990 ~PR Newswire

VAN NUYS, CALIF. (JUNE 20) PR NEWSWIRE - Pinkerton's Inc. (NASDAQ: PKTN) today announced that it has successfully completed the refinancing of all existing senior and subordinated debt on substantially more favorable terms.

Thomas W. Wathen, chairman and president, said: "The completion of the refinancing strengthens our balance sheet and increases our financial and operating flexibility. We will benefit from a more favorable interest rate with a deferral of principal payments for four years."

The company has sold $60 million in senior notes to two major insurance companies. The new senior notes, bearing interest at a fixed rate of

10.35 percent, will not require any principal payment during the first four years subsequent to issuance.

In conjunction with the private placement of the notes, Pinkerton has established a new $50 million line of credit with a consortium of banks led by Citicorp, NA. The line consists of a $40 million letter of credit facility and a $10 million revolving line of credit.

On April 4, 1990, Pinkerton raised $19.3 million in an initial public offering of common stock and used a substantial portion of those proceeds to reduce senior bank debt. The issuance of the new senior notes has enabled the company to eliminate from its balance sheet the remaining $35 million in term debt with an approximate interest rate of 11.5 percent and $20 million of subordinated debt, bearing interest at a rate of 13 percent. The combined weighted average interest rate of the debt being repaid approximated 12.4 percent.

As previously announced, the early payment of senior and subordinated indebtedness will result in an extraordinary "non-cash" charge in the second quarter of 1990 amounting to approximately $2.6 million, net of taxes, to write off deferred financing charges relating to the prepaid indebtedness.

In another development, Pinkerton was successful in having the suit brought against it by Guardsmark Inc. dismissed. Judge Miriam Goldman Cederbaum of the Southern District of New York upheld Pinkerton's position that the company fairly portrayed its screening test as a version of the Minnesota Multiphasic Personality Inventory, a well-known psychological assessment test.

Pinkerton's Inc. is one the largest security and investigative companies in the United States with 208 offices in 40 states and two foreign countries and more than 40,000 employees.

ANAHEIM, CALIF. (JUNE 20) PR NEWSWIRE - Odetics Inc. (AMEX: OA, OB) today reported record fourth quarter sales and earnings. Revenues and sales for the three month period ending March 31, 1990, were $17,070,000 compared to $15,460,000 for the comparable period last year. Fourth quarter earnings increased to $994,000 versus $291,000 last year.

In addition the company's fiscal year revenues of $55,323,000 established a new record, increasing slightly over fiscal year 1989's $54,821,000. The company's net income figure of $1,190,000 reflects a 13 percent increase over last year's $1,055,000. Net income per share for fiscal year 1990 was $0.28, compared to $0.25 for fiscal year 1989.

Fiscal year 1990 also marked the company's 20th consecutive year of profitability.

"In light of contract delays experienced earlier in the year, the fourth quarter and year-end results were most gratifying," said Joel Slutzky, Odetics' chairman of the board and chief executive officer. "We saw strong growth on both the commercial and government sides of our business. Our backlog is at an all-time high, and we are optimistic about prospects for continued growth in our base-product areas, such as recorders, robotics and precision timing."

Odetics, headquartered in Anaheim, is a leading manufacturer of intelligent machines, including information systems for collecting digital and analog data, as well as robotic and artificial intelligence systems.

HOLYOKE, MASS. (JUNE 20) PR NEWSWIRE - Affiliated Banc Corporation (NASDAQ: ABCV) today announced that its wholly owned subsidiary, Vanguard Savings Bank, will charge off real estate loans in the approximate amount of $2,130,000 during the current quarter and increase the allowance for possible loan losses by up to $5,200,000 so that the balance of this account at the end of the second quarter will be approximately $8,650,000.

In announcing this action, Jeffrey A. Lalonde, chairman, president and chief executive officer, said, "While full quarterly financial results are not yet available, it is expected that the corporation will realize a loss in the second quarter of approximately $3,500,000. Based on preliminary results the board of directors has voted to indefinitely suspend the cash dividend to shareholders to preserve capital until earnings return to a consistently profitable level."

Lalonde said, "These actions are management's response to its continuing assessment and review of the weakened Massachusetts real estate market, the composition of the bank's loan portfolio and expected economic conditions."

Lalonde noted that Massachusetts-chartered savings banks, insured by the FDIC, are required to have minimum primary capital equal to 5.5 percent of total assets and total capital, as adjusted, of 6 percent. At June 30, 1990, the corporation will exceed these ratios at approximately 7.6 percent and 8.8 percent, respectively. The book value per share at June 30 will be approximately $11.20 per share, compared with $11.83 per share a year earlier.

It is anticipated that actual financial results for the quarter will be announced during the second week of July.

Affiliated Banc Corporation, with assets of $560,319,000, had stockholders' equity of $45,021,000 at March 31, 1990. Its subsidiary, Vanguard Savings Bank, is a state-chartered savings bank insured by the FDIC. Headquartered in Holyoke, Mass., the bank is a full-service financial institution with eight banking offices.

ATLANTA (JUNE 20) PR NEWSWIRE - Colorocs Corporation (NASDAQ: CLRX) today announced that total proceeds from its recent rights offering were over $8 million with an aggregate oversubscription of approximately 30 percent.

Based on these results, the company expects to issue approximately 1.45 million shares in total, instead of the 1.1 million shares originally anticipated.

Due to the volume of oversubscriptions, Colorocs has amended its rights offering registration statement with the Securities and Exchange Commission to allow the company to issue the higher number of shares. Therefore, all oversubscriptions will be filled.

Colorocs President Charles Muench said, "The oversubscriptions are a sign of shareholder confidence in the company, and I am pleased Colorocs will be able to fill all oversubscription orders.

"Since Sharp expanded its manufacturing capacity in April 1990, Colorocs has been limited in the amount of copiers it could purchase due to lack of capital," Muench said. "Therefore, the proceeds from the rights offering will be used to purchase more color copiers for Savin, HCS Technology, and Colorocs."

Colorocs was formed in 1982 to develop and distribute full color copiers and electronic printers. Shipment of its first product, a full color copier, commenced in June 1989. Through May 31, 1990, Colorocs has shipped over 4,000 units.

CONTACT: Angela Burkardt, 404-840-6500; Alexander Ross, 212-683-4545; or Howard Bronson, 212-867-6160, all for Colorocs.

CAMBRIDGE, MA (JUNE 20) PR NEWSWIRE - Repligen Corporation (NASDAQ: RGEN) announced today the public offering of 2 million shares of common stock at $15.50 per share. Of the total number shares, 775,000 shares are being sold by the company and 1,225,000 shares are being sold by a wholly owned subsidiary of Centocor, Inc. (NASDAQ: CNTO). The company has granted the underwriters an option to purchase up to an additional 300,000 shares to cover over-allotments. The First Boston Corporation, Lehman Brothers and

Hambrecht & Quist Incorporated are the managers of the underwriting syndicate offering the stock.

The net proceeds from the sale of the 775,000 shares offered by Repligen Corporation will be used for research and development efforts, operating losses, working capital requirements, capital expenditures for the enhancement of production facilities and the construction of additional research, development and manufacturing facilities, possible acquisitions and general corporate purposes. The company will not receive any proceeds from the sale of the shares by the selling stockholder.

Repligen Corporation is a biotechnology company engaged in the research and development of biopharmaceutical products for human health care. The company's comprehensive AIDS program currently includes an AIDS vaccine project and an HIV anti-infective project in collaboration with Merck, and an HIV drug discovery project in collaboration with Sandoz. Repligen also has made a major commitment to the development of Endostatin(tm)B, a proprietary product with potential as a cancer therapeutic.

PISCATAWAY, N.J. (JUNE 20) PR NEWSWIRE - Ergamisol(R) (levamisole HCL), an oncology drug with the potential of saving thousands of lives a year, has received FDA approval, Janssen Pharmaceutica announced today.

Developed by Janssen Pharmaceutica, Ergamisol in combination with 5-fluorouracil (5-FU) is the first and only proven effective adjuvant therapy for Dukes' C colon cancer. Recently the National Institutes of Health (NIH) endorsed the combination of Ergamisol and 5-FU as "the standard treatment" for patients who have had surgery for late stage colon cancer.

Clinical trials of over 1,700 patients have shown that combination therapy involving Ergamisol and the commonly used chemotherapeutic agent, 5-FU, following colon cancer surgery, reduced Dukes' C colon cancer deaths by 33 percent. The combination drug regimen also reduced the recurrence of Dukes' C colon cancer in patients by 41 percent in the National Cancer Institute (NCI) sponsored trials. These findings were reported in the New England Journal of Medicine (NEJM) on Feb. 8, 1990.

The authors of the NEJM study concluded that "adjuvant therapy with levamisole (Ergamisol) and fluorouracil should now be standard treatment for Stage C colon carcinoma. Since most patients in the study were treated by community oncologists, this approach should be readily

adaptable to conventional medical practice."

Colorectal cancer is the second-leading cancer killer, following only lung cancer. Of approximately 110,000 people diagnosed annually with colon cancer, about 22,000 will have Dukes' C. These patients usually undergo surgery and additional therapy because the cancer has spread to the lymph nodes. Adjuvant therapy involving Ergamisol and 5-FU has proven to be the first and only effective treatment in improving survival and preventing recurrence of the disease.

"Only about one-third of all Dukes' C patients are receiving the new 5-FU/levamisole as adjuvant treatment," noted Michael Friedman, M.D., chief of the NCI's Cancer Therapy Evaluation Program, when the NEJM published the recent study findings. "We hope that publicizing this new treatment option will prompt the other eligible patients to enter a clinical trial or take advantage of this therapy."

"The approval of Ergamisol for use in combination therapy represents a major advance in the nation's relentless war against cancer," Dr. Gerald Murphy, chief medical officer, American Cancer Society, added recently. "This news is a ray of hope for numerous individuals with colon cancer, who until now found no promise of life from chemotherapy treatments."

Janssen Pharmaceutica is located in Piscataway, N.J., and is a member of the Johnson & Johnson family of companies.

LAS VEGAS, NEV. (JUNE 20) PR NEWSWIRE - ATI Medical Inc. (AMEX: ATI) has significantly expanded the market for its medical equipment rental services with the company's entry into the home health care market. The company announced at its annual business meeting today that a new subsidiary, Americare, has been established to address this specialized market which, according to Paul E. Stevenson, president and chief executive officer, is estimated to be at least 10 times larger than ATI's primary hospital market.

"The portion of the home health care market that ATI will be competing in is approximately $3.0 billion in annual volume, whereas the size of ATI's total market up to now is slightly more than $250 million annually," Stevenson stated.

ATI is currently developing relationships with privately owned home health care dealers in 120 designated cities across the country, who will have

exclusive rights to rent ATI's over $60 million inventory of medical equipment within the home health care market. These sites will augment ATI's 53 nationwide offices, which have previously served only hospital customers.

Stevenson said that ATI presently has agreements in place with home health care dealers in over 40 cities and anticipate an additional 60 cities will be covered by the end of calendar 1990. He said that Americare was expected to contribute significantly to both revenues and earnings for ATI's fiscal year ending July 31, 1991.

"Since we can control our inventory costs based on demand for equipment, our cost of entry is relatively minimal. We do not require additional facilities or any large increase in personnel, so we are expecting Americare to be a very profitable business in the months ahead," Stevenson added.

ATI Medical Inc. rents medical equipment primarily to hospitals as well as the entertainment industry through offices in major cities across the country. ATI also sells medical equipment and certain disposables and markets, through its subsidiary, CAMS Inc., a software system to monitor equipment usage within hospitals.

WINDSOR LOCKS, CT (JUNE 20) PR NEWSWIRE - The Dexter Corporation (NYSE: DEX) announced today an agreement in principal with The Prudential Insurance Company of America for the private placement of $75 million principal amount of 9.72 percent twenty-year senior unsecured notes due 2010. The notes, to be issued at par, will carry a sinking fund beginning in the sixth year designed to retire the issue in equal installments of $5 million per year, giving an average life of thirteen years. The funds would principally be used to repay short term borrowings and a revolving credit.

Completion of the transaction, expected before mid-July, is dependent upon several factors including the execution of a definitive agreement and approval by the Finance Committee of the Prudential's board of directors.

The Dexter Corporation is a Fortune 500 company producing specialty materials. Founded in 1767, Dexter is the oldest company listed on the New York Stock Exchange.

LOUISVILLE, KY. (JUNE 20) PR NEWSWIRE - Net income of Humana Inc. (NYSE: HUM) increased 18 percent in the three months ended May 31, the company's fiscal third quarter, as both hospitals and health plans had strong performances.

Net income increased to $85,276,000 or 84 cents per share from $72,267,000 or 72 cents in the corresponding period a year ago. Revenues for the quarter advanced 19 percent to $1,271,748,000 from $1,065,200,000. Income before income taxes also rose 19 percent to $133,661,000 from $111,964,000.

Humana's hospitals had operating income of $172,339,000 in the quarter, an increase from $158,788,000 a year ago, while their revenues grew to $936,546,000 from $817,076,000. Hospitals that were owned in both years had an increase in admissions of 4.9 percent and patient days remained approximately the same due to a reduction in the average length of stay.

Health plan operating income reached $13,719,000, compared with $2,414,000 a year ago. Health plan revenues increased to $401,011,000 from $290,716,000. Membership in Humana health plans rose to 1,133,200 from 910,200 a year ago. Hospital revenues paid by Humana health plans, eliminated in the consolidated total, rose to $65,809,000 from $42,592,000.

For the nine months ended May 31, net income increased to $224,517,000 or $2.22 per share from $189,257,000 or $1.90 per share a year ago. Revenues grew to $3,571,701,000 from $3,009,202,000.

Humana is an integrated health care company, operating 85 hospitals and offering a variety of health benefit plans for employee groups and Medicare beneficiaries.

ATLANTA (JUNE 20) PR NEWSWIRE - Health Images Inc. (NASDAQ: HIMG) today announced May 1990 consolidated net revenues of $3,671,232, an increase of $1,069,820 or 41.1 percent over May 1989 consolidated net revenues of $2,601,412.

Gross same center revenues (before deduction for contractual adjustments and uncollectible accounts) increased $732,420 or 29.5 percent as compared to the preceding year. Net same center revenues increased by $607,193 or 30.0 percent in May 1990 as compared to the prior year period. Revenues of the Engineering Services Division were $316,601, a decrease of $242,533 or 43.4 percent as compared to the preceding year. The decline in Engineering revenues relative to May 1989 is due to the shipping of a major equipment upgrade package in that month. No such package was shipped in May 1990. Miscellaneous revenues were $74,435, an increase of $56,343 or 295.1 percent as compared to May 1989. Revenue data are summarized in the following table.

Health Images Inc. operates magnetic resonance imaging centers, manufactures magnetic resonance imaging scanners, and provides equipment maintenance services for major medical diagnostic imaging equipment.

LINZ, AUSTRIA (JUNE 20) PR NEWSWIRE - Voest-Alpine Industrieanlagenbau (VAI) and Allegheny Ludlum Corp. (NYSE: ALS) today announced their decision to design, engineer and build a commercial-size prototype thin strip direct casting machine to produce stainless and carbon steel flat products.

"Following an 18-month evaluation period by the joint venture partners, it is apparent that we are closer to commercialization of this process than

our original timetable contemplated," said Horst Wiesinger, executive vice president of VAI. According to Wiesinger, the joint venture partners expected a two-year evaluation period when they signed their joint venture agreement in December 1988.

"We have made rapid progress since joining forces and the results of our joint effort make us very optimistic about the commercial viability of this technology," Wiesinger said.

In commenting on the decision to build the prototype machine in the United States, Robert P. Bozzone, president and chief executive officer of Allegheny Ludlum, said, "With the success we have had during our evaluation period, we believe it is in the best interest of the joint venture to accelerate our 'go' decision and immediately begin the work necessary to install this revolutionary facility." The prototype direct caster will be engineered and installed by Voest-Alpine Industrieanlagenbau and owned and operated by Allegheny Ludlum at a plant location to be announced later. The prototype machine will be designed to produce 25,000-pound coils up to 3 mm (0.12 inches) thick and 1220 mm (48 inches) wide.

Voest-Alpine Industrieanlagenbau Ges.m.b.H., backed by the Voest-Alpine group of companies, with principal offices in Linz, Austria, is a leading supplier of continuous casting machines and other heavy industrial equipment. The firm has more than 30 years' experience in designing, engineering, construction and marketing of steelmaking equipment. Voest Alpine has gained worldwide recognition for the successful development of the BOF process which revolutionized the steel industry in the '60s and '70s.

Allegheny Ludlum Corp., based in Pittsburgh, is a leading producer of a wide range of specialty materials, including stainless steels, electrical steels and high temperature alloys.

BEDFORD HEIGHTS, OH (JUNE 20) PR NEWSWIRE - Riser Foods, Inc. (AMEX: RSR), today announced that Anthony Rego has become Chairman and Chief Executive Officer of Riser Foods, with responsibilities for corporate administration, direction, and planning.

Michael Borstein becomes Vice-Chairman of Riser Foods with full Seaway Foods wholesale operations responsibility. Charles Rini will continue as President and Chief Operating Officer of Riser Foods with total retail operations responsibility.

As part of these changes, Anthony Petrillo has resigned his position as Executive Vice President and becomes consultant to management, in which position he will actively assist in the continued development of Riser Foods.

"The purpose of these structural changes is to improve operating efficiency and to establish a clarified corporate chain of command," said Anthony Rego. "It essentially implements an operating structure we have been using for some time now. Each of our company's divisions is well-positioned to expand on the progress we have made."

In explaining the effects of the organizational restructuring, Rego said, "Michael Borstein will be keying on our aggressive wholesale expansion, as the company penetrates new markets and expands its wholesale service territory.

"Charles Rini will continue building the company's store retail operations and Anthony Petrillo, as consultant to management, will continue to assist in further development of the programs, systems, and policies which have brought us such a long way in a relatively short time."

Riser Foods was formed two years ago from the merger of Rini Supermarkets, Rego Supermarkets, American Seaway Foods, and Fisher Foods. The company operates 50 retail supermarkets under the Stop-n-Shop and Carl's Superstore names, and serves over 300 wholesale customers through its Seaway wholesale division.

READING, PA (JUNE 20) PR NEWSWIRE - Meridian Bancorp Inc. (NASDAQ: MRDN) Vice Chairman Terry L. Troupe today announced that Steven P. Kurtz of Philadelphia has been named chairman, president and chief executive officer of American Title Insurance company, a Meridian subsidiary. Kurtz replaces John W. Tagge, who has resigned for personal reasons but will, during the transition period, remain on a consulting basis.

"In Steve Kurtz, we have a proven performer and a highly motivated executive who will act decisively in the best interest of the title company's future," said Troupe. "Steve knows and understands the accountability that Meridian expects from its management group," Troupe also said.

Kurtz has been employed by Meridian through the former American Bank and

Trust Co. of Pennsylvania, a Meridian predecessor, since 1976. He has held various positions in the bank's loan administration area and throughout the early 1980s was responsible for a significant improvement in Meridian's loan portfolio quality. Since 1988, Kurtz has served as the executive vice president responsible for corporate and commercial lending in Meridian Bank's Delaware Valley Division.

"My top priorities," said Kurtz, "are to instill the Meridian values of expense management, and the sales and service culture throughout American Title to once again make it a strong contributor to Meridian's bottom line."

"We have to become aggressive in our marketing," said Kurtz who said he thinks that title insurance, like banking, is a relationship-oriented business. "The successful companies are the companies that deliver quality service to their customers," he said. Kurtz will relocate to the Miami area where American Title is headquartered.

BENSALEM, PA (JUNE 20) PR NEWSWIRE - Ketema Inc. (AMEX: KTM) reported today that net income in the first quarter of fiscal 1991 totaled $1.35 million or 32 cents per share earned on sales of $50.9 million. This compares with net income of $1.1 million or 24 cents per share earned on sales of $52.3 million in the same quarter of the prior fiscal year.

Robert L. Noland, president of the diversified industrial manufacturer, said, "On a pre-tax basis, income in the first quarter totaled $1.8 million compared to $1.1 million in the prior year, an increase of $.7 million, or 66 percent. Ketema did not have income tax expense in fiscal 1990 due to an operating loss carryforward.

"This year's first quarter results benefited from a strong performance at our Aluminum Extrusion division compared to last year and continued improvement at the Aerospace and Electronics (A&E) division.

"The backlog of unfilled orders at the end of the quarter remained strong with A&E having received significant new orders for components and subassemblies for use in aircraft jet engines and satellite launch systems " concluded Noland.

#90171p7936 06/20/1990 ~PR Newswire

TORONTO (JUNE 20) PR NEWSWIRE - Campeau Corporation today announced its financial results for the 1989 year ended Jan. 31, 1990. To assist investors in gaining a better understanding of the financial performance and position of the corporation and its subsidiaries, the financial statements show both consolidated and Campeau Corporation (parent- company only) results. All figures are stated in U.S. dollars.

On a consolidated basis, Campeau Corporation reported revenues for 1989 amounting to $10.4 billion from department store retailing, supermarkets, and real estate operations, compared with $8.7 billion for the 1988 fiscal year ended Jan. 31, 1989. The majority of this increase is due to the inclusion of a full year's results for Federated Department Stores, Inc. and Ralphs Grocery Company, acquired in May 1988.

The net loss for 1989 was $1.7 billion compared with a net loss in fiscal 1988 of $34 million. The 1989 loss includes non-cash charges of $1.6 billion, including a $958 million charge attributable to the write down of goodwill of Federated Department Stores, Inc. reorganization expenses of $252 million, and other amounts totalling approximately $420 million related to deferred income taxes, depreciation and amortization, minority interest, and provision for reduction in carrying value of discontinued assets.

The 1989 results include a net gain from the sale of assets, including $101 million from the sale of Allied's Ann Taylor division in early 1989 and a net gain of $104 million from the sale of a number of real estate assets. These included an office building in San Francisco and the corporation's 50 percent interest in three office buildings in Vancouver.
